

Table of Contents

Preface, Committee

About the Importance of Simulation Tools in the Learning Process of Metal Forming and Moulding	
S. Plaza, N. Ortega, A. Celaya, J.A. Sánchez, L.N. López de Lacalle and B. Izquierdo	1
An Integrated Methodology for the Teaching of Computer Aided Tools for Automated Machining	
P.J. Núñez López, E. García Plaza, A.R. Martín and A. Egido	8
Development of a Virtual Machine for the Sheet Metal Bending Process Simulation for Educational Purposes	
P. Fernández, B. Alvarez, D. Blanco, E. Cuesta and S. Mateos	16
Experimental Introduction to Forced and Self-Excited Vibrations in Milling Processes and Identification of Stability Lobes Diagrams	
G. Quintana, J. de Ciurana, D. Teixidor and I. Ferrer	24
Free-Software Development in Computer Science Education for Interface Representation in Casting Processes	
J. López	33
‘Glass Machines’: a Dual Approach for the Machine Tool Study	
F.J. Campa, L.N. López de Lacalle and A. Lamikiz	42
Implementation of “Research Works Based Learning” to the Manufacturing with Material Removal’s Teaching Process	
M. Batista, M. Sánchez-Carrilero, J.A. Sánchez, J. Salguero, M. Álvarez, A. Gómez and M. Marcos Bárcena	50
Implementation of Simulation Software for Better Understanding of Manufacturing Processes	
N. Ortega, A. Celaya, S. Plaza, A. Lamikiz, I. Pombo and J.A. Sánchez	58
Integration of Virtual Manufacturing Laboratory of the University of Malaga	
L. Sevilla, M.J. Martín and F. Martín	65
Learning Strategies for Deep-Drawing Processes in the European Higher Education Area Context	
V. Miguel-Eguía, J. Coello, A. Martínez, M.C. Manjabacas and A. Calatayud	74
Machining Apprenticeship Based on Experimental Training Practice	
P.J. Arrazola, A. Villar, R. Fernández and J. Aperribay	83
Numerical Modeling of Post-Processing of Composite Materials	
X. Soldani, C. Santiuste, J.A. Loya and H. Miguélez	93
Strategy Games Applied to the Teaching of Plant Engineering	
J. Salguero, M. Batista, A. Gómez and M. Marcos Bárcena	99
Tools for Teaching-Learning of Manufacturing Engineering Using Content Management Platforms	
S. Martínez-Pellitero, J. Barreiro and A.I. Fernández-Abia	104
Using Virtual Reality in the Teaching of Manufacturing Processes with Material Removal in CNC Machine-Tools	
A. Sanz, I. González, A.J. Castejón and J.L. Casado	112
Virtual Machining Applied to the Teaching of Manufacturing Technology	
E. García Plaza, P.J. Núñez López, A.R. Martín and E. Beamud	120
