

Table of Contents

Compositional Design and Property Adjustment of Multi-Component Oxides for Thermoelectric Applications F.S. Ohuchi, D.A. Kukuruzyak and T. Chiyow	3
Challenges in Joining Advanced Ceramic Materials: Interface Formation of Ceramic/Metal High-Temperature Brazes J.E. Indacochea, A. Polar and S.M. McDeavitt	7
Current Status of Welding Technology & The State Key Lab of Welding in China L. Wu, G.J. Zhang and H.M. Gao	13
Atomistic Computer Modeling of Intermetallic Alloys Y.M. Mishin	21
First-Principles Calculations of Metal/Oxide Interfaces: Effects of Interface Stoichiometry M. Kohyama, S. Tanaka, K. Okazaki, R. Yang and Y. Morikawa	27
Concurrent Coupling of Electronic-Density-Functional, Molecular Dynamics, and Coarse-Grained Particles Schemes for Multiscale Simulation of Nanostructured Materials S. Ogata and T. Igarashi	33
Coarse-Grained Molecular Modeling of Composite Interfaces V.B.C. Tan, M. Deng and T.E. Tay	39
The Void Growth Simulations in the Hyper-Elastic Material with Multiple Seeds T. Tsuji	45
Cluster, Surface and Bulk Properties of ZnCd Binary Alloys: Molecular-Dynamics Simulations S. Erkoç	51
A General Embedded Atom Method and Application to Prediction for Thermodynamic Properties of Fe-Eu System Y.F. Ouyang, X. Zhong and X.M. Tao	57
Molecular Orbital Study on Adsorption Process of Silica Cluster on Polyimide Surface A. Fujinami, S. Ogata, Y. Shibutani and K. Yamamoto	63
Evaluation of Fracture Behavior of Ceramic Composite Joints by Using a New Interface Potential H. Serizawa, C. Lewinsohn, M. Singh and H. Murakawa	69
Interatomic Potentials for Metal/Metal Wetting Systems T. Makino, A. Kubo, H. Iida and S.I. Tanaka	75
Interpretation of Hardness in Pseudobinary Nitrides by Bulk Modulus Estimated from Interatomic Distance Y. Makino	81
Fundamental Analysis of the New Version of the New Proposed Fracture Theory R.A. Elshikhly	87
The Liquidus Surface of the Ternary System Cu-In-Ti A. Berbecaru and J.C. Schuster	95
The Role of Bond Coat in Advanced Thermal Barrier Coating T. Narita, S. Hayashi, F.Q. Lang and K.Z. Thosin	99
Interfacial Structure and Strength of Ceramic/Metal Couples M. Naka and J.C. Schuster	105
Utilization of Generalized Chemical Potential Diagrams for Multi-Component Systems in Understanding Interface Stability H. Yokokawa, K. Yamaji, T. Horita, N. Sakai and M.E. Brito	111
Diffusion Reactivity between Zinc Plate Layer and Nanocrystalline Surface Layer of IF Steel by Near Surface-Severe Plastic Deformation Y. Minamino, N. Tsuji, Y. Koizumi, Y. Nakamizo, M. Sato, T. Shibayanagi and M. Naka	117
Thermodynamic Investigation of Liquid Alloys in Ga-Sb-Bi-Sn System D. Živković, I. Katayama, Ž. Živković and D. Manasijević	123
Activity Measurement of Liquid Sn-Ag-Bi Alloys by Fused Salt EMF Method I. Katayama, T. Tanaka, S. Akai, K. Yamazaki and T. Iida	129
The Precipitate-Nucleation in the Vicinity of Solubility Limit T. Miyazaki, T. Kozakai and C.G. Schoen	139

Deformation Modes and Anomalous Strengthening of Ni₃X -Type Intermetallic Compounds with the Geometrically Close-Packed Structure Y. Umakoshi, K. Hagihara and T. Nakano	145
Characterization of Grain Boundaries in Recrystallized L1₂-Type Intermetallic Alloys Y. Kaneno and T. Takasugi	151
Atomic Mechanisms of Grain Boundary Motion A. Suzuki and Y.M. Mishin	157
Transmission Electron Microscopy Observations on Cu-Ti Alloy Systems R. Nishio, T.J. Konno and S. Semboshi	163
Defect Structures and Room-Temperature Mechanical Properties of C15 Laves Phase in Zr-X-Cr (X:Nb, Ta and Hf) Alloy Systems T. Takasugi	169
Toughness of Welded Low Carbon Steels Containing Nitrogen (A Resolved Problem on Recycled Steels) T. Yamane, K. Hisayuki, Y. Kawazu, Y. Kimura, S. Tsukuda and T. Itatani	175
Application of Dual-Phase and TRIP Steels on the Improvement of Crashworthy Structures N. Peixinho, N. Jones and A. Pinho	181
In Situ TiB Reinforced Titanium Metal Matrix Composites Prepared by Spark Plasma Sintering Y. Zhou, H.B. Feng and D.C. Jia	189
Mechanical Alloying and Spark Plasma Sintering of Ni-Al-Ti-B Powders for Fabricating Nanocrystalline (TiB+TiB₂)/Ni₃(Al, Ti) Composite L. Geng, G.J. Cao and M. Naka	195
Mechanical Properties of Low Young's Modulus Amorphous Carbon Reinforced Aluminum Composites T. Imai, S.L. Dong, I. Shigematsu, N. Saito, K. Suzuki and K. Osamura	201
Recycling Mechanism of Discontinuously Reinforced Al Matrix Composites T.X. Fan, G.J. Yang, J.Q. Chen, D. Zhang, Z. Shi, T. Shibayanagi and M. Naka	205
Mechanical Alloying and Powder Consolidation in SiC and Hydroxyapatite H. Kimura, K. Hanada and K. Ishigane	211
Effect of Superficial Residual Stresses on Abrasive Wear Resistance of Al₂O₃ / Al₂O₃+3Y-TZP Multilayers G. de Portu, L. Miele, D. Prandstraller, G. Palombarini and G. Pezzotti	217
Recent Development of Highly Corrosion Resistant Bulk Glassy Alloys K. Asami, H. Habazaki, A. Inoue and K. Hashimoto	225
Glass Composition for the Thick-Film Resistors J. Setina, V. Akishin and J. Vaivads	231
Amorphous Alumosilicophosphate Coatings for Niobium Alloys G.M. Sedmale and V.P. Kobayakov	237
Improvement of Oxidation Resistance of NbSi₂ by Addition of Boron K. Kurokawa, A. Yamauchi and S. Matsushita	243
Microstructures of Oxidized Primary Carbides on Superalloy Inconel 718 J.K. Hong, N.K. Park, S.J. Kim and C.Y. Kang	249
Atomic Structure of Hydrogen Storage Amorphous Alloys T. Fukunaga, K. Itoh and K. Aoki	257
Nano-Scale Stress Microscopy of Ceramic Materials Using Their Cathodoluminescence Emission G. Pezzotti	263
Nanoscale Dynamics at Reactive Wetting Front on SiC S.I. Tanaka and C. Iwamoto	269
Two Dimensionally Dispersed Fe/FePd Nanocomposite Particles Synthesized by Electron Beam Deposition Y. Hirotsu, K. Sato and J. Kawamura	275
Effect of Additional Elements on the Thermal Stability of the Cu-Zr Glassy Alloys A. Inoue, H. Yoshida, S. Yamaura, H. Kimura and A. Inoue	281
Microstructure and High Temperature Deformation of Grain Refined Al Alloy Foil Fabricated by RF Magnetron Sputtering T. Shibayanagi, D. Watanabe, M. Maeda, Y. Takayama and M. Naka	287

The Role of Energy in Formation of Sputtered Nanocomposite Films J. Musil and J. Šůna	291
Preparation of Super-Hard Nanocomposite Films by ICP Assisted Magnetron Sputtering S. Miyake and Z. Li	297
Material Processing Using Supersonic Reactive Plasma Jets in Thermodynamical and Chemical Nonequilibrium State H. Tahara, K. Fujiuchi and Y. Ando	303
Reflecting Multi-Layer Coatings by RF Sputtering F. Tamai and Y. Kawakami	309
Enhancement of Adhesive Strength of DLC Film by Plasma-Based Ion Implantation M. Kirinuki, A. Tomita, M. Kusuda, Y. Oka, A. Murakami and M. Yatsuzuka	315
Comparison of Different Types of Plasma in Radioactive Surface Decontamination Process M. Suzuki, M. Kadowaki, F.H. Windarto and S. Mori	321
Manipulation Mechanisms for Micro-Assembly Technology K. Takahashi	327
In Situ X-Ray Diffraction Measurement of Electrodeposition Process in Molten Salts A. Kajinami, S. Deki, N. Umesaki, M. Sato and M. Myochin	335
In Situ Neutron Diffraction Analysis of Phase Transformation Kinetics in TRIP Steel J. Zrník, O. Muránsky, P. Lukáš, P. Šittner and Z. Nový	339
Internal Friction Influenced by Hydrogen in Super Duplex Stainless Steels T. Kuroda, K. Nakade and K. Ikeuchi	345
Laser-Assisted CMP for Copper Wafer T. Ha, K. Kimura, T. Miyoshi and Y. Takaya	351
Development of Technology for Reduction Process of Copper Production Ž. Živković, D. Živković, A. Jovanovic and I. Mihajlovic	361
Fabrication of Lotus-Type Porous Metals, Intermetallic Compounds and Semiconductors H. Nakajima	367
Study on Morph-Genetic Materials Derived from Natural Structure D. Zhang, T.X. Fan, B.H. Sun, T.C. Wang, X.Q. Xie and T. Okabe	373
Fabrications and Corrosion Resistance of Iron-Aluminum Alloy/High Carbon Steel Composites Prepared by Clad Rolling N. Masahashi, K. Komatsu, G. Kimura, S. Watanabe and S. Hanada	379
EB Induced Stress Relaxation of Tight Network Structure in Silica and Soda Glasses Y. Nishi, N. Yamaguchi, K. Takahashi, K. Oguri and A. Tonegawa	385
Selection of Proper Fatigue Model for Flip Chip Package Reliability Y.E. Shin, Y.S. Kim, H. Kim, J.M. Kim, K.H. Chang and D.F. Farson	393
Indentation Rate-Dependent Creep Behavior of Sn-Ag-Cu Pb-Free Ball Grid Array (BGA) Solder Joint F.J. Wang, X. Ma and Y. Qian	399
Effect of Grain Size on Reaction between Pb-Free Solder and Plated Iron H. Nishikawa, T. Takemoto, T. Uetani and N. Sekimori	405
Interfacial Reaction between Sn-Ag Based Solders and Au/Ni Alloy Platings K. Uenishi and K.F. Kobayashi	411
The Effects of Thickness and Underlayer on Both Grain Growth and Internal Stresses in Cu Thin Films S. Takayama and M. Oikawa	417
Production of Diamond Tools by Brazing W. Tillmann and A.M. Osmanda	425
Novel Method for Diffusion Bonding Superalloys and Aluminium Alloys (USA Patent 6,669,534 B2, European Patent Pending) A.A. Shirzadi and E.R. Wallach	431
Microstructure and Mechanical Properties of Hyper-Interfacial Bonded Joints of Ultra-Fine Grained High Strength Steels K. Nishimoto, K. Saida and B. Jeong	437
Joining of Tungsten-Copper Using Pulse Electric Current Sintering Method Y. Fukuzawa, S. Nagasawa, M. Watanabe and S. Takaoka	443

Interface Behavior in Liquid Phase Impact Diffusion Welding of Aluminum Matrix Composite J.T. Niu, W. Guo, J.F. Zhai, J. Yu and B.Y. Zhang	449
Estimation of Mechanical Properties of Al/Cu Compound Layer Formed by Impact Welding H. Date, M. Futakawa and M. Naka	455
Microstructure of SiC / TiAl Interface Formed by Solid-State Diffusion Bonding M. Maeda, K. Tenyama, T. Shibayanagi and M. Naka	461
Comparative Study on Microstructure and Strength of TiAl/Steel Joints Brazed with Ag-Cu-Ti and Ag-Cu-Zn Filler Metals H.J. Liu and J. Feng	467
Al₂O₃/Al₂O₃ Joints Brazed with Composite Active Filler Materials Obtained by Mechanical Alloying H.Y. Fang, J.G. Yang and J.F. Hu	473
Laser Weldability of Aluminum Alloy and Steel S. Katayama, S.M. Joo, M. Mizutani and H.S. Bang	481
Laser Beam Welding of Automobile Materials for Lightweight Car Body A. Hirose and K.F. Kobayashi	487
Diode Laser Brazing of Heat-Resistant Alloys Using Tandem Beam K. Saida, W.H. Song, K. Nishimoto and M. Shirai	493
Analysis of Laser Fusion Zone of Lotus-Type Porous Metals by 3-Dimensional FEM T. Tsumura, T. Murakami, S.K. Hyun, H. Nakajima and K. Nakata	499
Improvement of Solution Type Plasma Spraying Process M. Futamata, X. Gai, T. Mizumoto and K. Nakanishi	505
Performance of Thick TiN Composite Coating as High Heat Resistant TBC A. Kobayashi	511
Formation of Grain Structures of Thermal Sprayed Nickel Coatings and the Coating Properties K. Murakami	517
