

Table of Contents

Preface and Committees

Chapter 1: Physical, Chemical and Optical MEMS

History and Recent Progress of MEMS Physical Sensors

H. Muro 1

Continuous Process for Large-Area Flexible MEMS

T. Itoh 9

Novel Plasmonic Bio-Sensing System Based on Two-Dimensional Gold Patch Arrays for Linear and Nonlinear Regimes

M. Grande, M.A. Vincenti, T. Stomeo, G.V. Bianco, D. de Ceglia, G. Morea, R. Marani, V. Marrocco, V. Petruzzelli, M. de Vittorio, G. Bruno, M. Scalora and A. d'Orazio 15

Micromachined Devices for Use in Terahertz Applications

D. Wood, M. Chamberlain, A. Baragwanath, L. Dodd, C. Hill and A.J. Gallant 20

Rectilinear Electrothermal Actuator Using High-Aspect-Ratio Micromachined Composite of SU-8 and Silicon

B. Thubtimthong, G.K. Lau and M. Vadakke Matham 28

Wet-Etching Characteristics of SiCN Films Deposited by HWCVD Method

H. Nakanishi, T. Ogata, Y. Kadotani and A. Izumi 34

Modeling of Piezo-Actuated Stick-Slip Micro-Drives: An Overview

H.X. Nguyen, C. Edeler and S. Fatikow 39

Foreign Bodies – The Creation of Symbiotic Jewellery through the Development and Application of Stimulus-Responsive Smart Materials and Microelectromechanical Systems

K. Vones 49

Chapter 2: Radiofrequency MEMS

Integrated Microsystems

M. Esashi and S. Tanaka 55

RF-MEMS Components and Networks for High-Performance Reconfigurable

Telecommunication and Wireless Systems

J. Iannacci, G. Resta, P. Farinelli and R. Sorrentino 65

Functional RF Devices Powered by MEMS Technologies

K.Y. Hashimoto, H. Hirano, S. Tanaka and M. Esashi 75

Chapter 3: Micro(Nano) Fluidics

Microfluidic Microchemomechanical Systems

M. Allerdissen, R. Greiner and A. Richter 84

Hydrogel-Based Microfluidic Systems

S. Klatt, M. Allerdissen, R. Körbitz, B. Voit, K.F. Arndt and A. Richter 90

Super-Hydrophilic PDMS and PET Surfaces for Microfluidic Devices

R. Bartali, L. Lorenzelli, M. Scarpa, E. Morganti, C. Collini, V. Micheli, G. Gottardi, A. Gambetti, G. Gambetti, G. Coser, R. Pandiyan, I. Luciu and N. Laidani 96

New Viscosity Data for CuO-Water Nanofluid – The Hysteresis Phenomenon Revisited

C.T. Nguyen, N. Galanis, T. Maré and E. Eveillard 101
