Preface

Lamellar Eutectic Growth Patterns.A Survey of Recent Observations in the $\text{CBr}_4\text{-C}_2\text{Cl}_6$ System

G. Faivre, C. Guthmann and J. Mergy 1

Dendritic Melting in a Crystal Volume

A.V. Gorbunov 15

On the Theory of Lamellar Eutectic Growth

B. Caroli, C. Caroli, K. Kassner and C. Misbah 29

Microscopic Simulation of a Wavefront Propagating into an Unstable State:Internal Fluctuation Effects

A. Lemarchand, H. Lemarchand and M. Mareschal 49

Liquid-Vapor Coexistence in Binary Mixtures:Atomistic Simulations and One-Fluid Approximations

E. Salomons and M. Mareschal 65

Morphological Instabilities in Bilayers Incorporating Polycrystalline Silicon

S. Nygren and F.M. d'Heurle 81

Elastically-Induced Precipitate Shape Transitions in Coherent Solids

W.C. Johnson and P.W. Voorhees 87

Phases Equilibrium and Diffusion in Solids with Plate-Like Geometry

F.C. Larché and W.C. Johnson 105

Peculiarities of Intermediate Phase Nucleation in the Process of Chemical Diffusion

A. Gusak and K.P. Gurov 117

Radiation-Induced Amorphization in Intermetallic Compounds

C. Jaouen 123

Microscopic Simulation Approach to Amorphization by Chemical Disorder

C. Massobrio and V. Rosato 147

Latent Track in Magnetic Insulators:Electronic Stopping Power Threshold and Damage Morphology

M. Toulemonde and F. Studer 161

Stability of Driven Compounds:Stochastic and Deterministic Descriptions

P. Bellon, F. Soisson, G. Martin and F. Haider 169

Radiation-Induced Microstructural Pattern Formation

C. Abromeit and H. Trinkaus 181

Self-Organization of Defect Structures under High-Temperature Irradiation-A Theory of Void Lattices

P. Hähner and W. Frank 203

Self-Organization of Defect Structures under Low-Temperature Irradiation-A Theory of Stacking-Fault-Tetrahedron Lattices

M. Zaiser, W. Frank and A. Seeger 221

Some Problems in the Physics of Void Lattices

A.I. Ryazanov 237

Mechanical Attrition of Intermetallic Compounds

H. Bakker, L.M. Di and D.M.R. Lo Cascio 253

Influence of Milling Conditions on the Formation of Metastable Phases: The Crystal to Amorphous Transition

Y. Chen, R. Le Hazif and G. Martin 271

On the Instability of Dislocation Microstructures during Plastic Deformation

A. Luft 285

Mesoscopic Observations Related to Twinning Instabilities in Alpha Cu-Al Crystals

J. Vergnol, F. Tranchant, A. Hampel and H. Neuhäuser 303

The Flow Law of Mild Steel under Monotonic or Complex Strain Path

E.F. Rauch 317

Plastic Instabilities in AlLi Alloys

Y. Bréchet, F. Louchet and P. Gorniero 335

Some Physical Effects at Unstable Localized Shear and Fracture of Amorphous Alloys Ribbons	
V.Z. Bengus	347
On the Gradient Approach to Deformation Patterning and Fracture	
E.C. Aifantis	355
A Model of Formation of Dipolar Dislocation Structures	
J. Kratochvíl and M. Saxlová	369
Coherent Propagative Structures in Plastic Deformation: A Theory of Lüders Bands in Polycrystals	
P. Hähner and L.P. Kubin	385
The Propagation of the Portevin-Le Chatelier Deformation Bands	
V. Jeanclaude, C. Fressengeas and L.P. Kubin	403
Dislocation Dynamics and Chaos	
G. Ananthakrishna	417
Non-Linear Dynamics of Shear Crack Interaction with Dislocations	
N.N. Ghoniem	429
A Simulation of Dislocation Patterning Derived from Cellular Automata	
H.W. Hesselbarth and E. Steck	445
Dislocation Microstructures and Plastic Flow: A 3D Simulation	
L.P. Kubin, G. Canova, M. Condat, B. Devincre, V. Pontikis and Y. Bréchet	455
Numerical Simulations of Shear Bands in Idealized Granular Materials	
J.P. Bardet and J. Proubet	473
Fractal Description of Fractures	
C.W. Lung	483
Flux Pinning in Type II Superconductors Viewed as a Plasticity Problem	
Y. Bréchet, B. Doucot, H. Jensen and A. Brass	493
