

Table of Contents

Peface

Lamellar Eutectic Growth: A Discussion of the Question of Pattern Selection C. Caroli and G. Faivre	1
Monotectic Microstructure in a Zn-0.6at% Bi Alloy at Near Equilibrium and Nonequilibrium Situation B. Majumdar, R. Goswami and K. Chattopadhyay	11
Dynamics of Transverse Fluctuations in Interfaces M. Barma	19
Unusual Patterns in the Growth of Smectic Liquid Crystals R. Pratibha, G. Basappa and N.V. Madhusudana	27
Dynamics and Nonlinear Effects during Deuterium Implantation of Copper K. Krishan and B. Panigrahi	39
Phase Transformations Induced by Ball Milling in some Alloys and in some Oxides G. Le Caër, S. Bégin-Colin, P. Delcroix, L. Lutterotti, B. Malaman, A. Mocellin, D. Osso and O. Tillement	49
Mechanically Induced Atomic Disorder in Ordered Alloys and Phase Transformations Far from Equilibrium H. Bakker, H. Yang and G.F. Zhou	59
Non-Equilibrium Roughening and Mixing in Crystals under Shear P. Bellon and R.S. Averbach	69
Generation of Chaotic Structure by the Repetition of Cold Working K.N. Ishihara, T. Matsumoto, A. Otsuki and P.H. Shingu	77
Phase Transformations Involving Ordering and Phase Separation: A Monte Carlo Study T.C. Munro, F. Haider and G. Martin	87
Modelling Diffusion Controlled Kinetics in Equilibrium and Driven Alloys G. Martin, P. Bellon and F. Soisson	97
Packing of Mutually Interacting Powder Particles under Gravity S.S. Manna and D.V. Khakhar	117
Interfacial Dynamics in Dilute and Random-Exchange Magnets: Computational Approaches to Domain Growth D. Chowdury	125
Emergence of Scale Invariance in Martensite Growth M. Mohan Rao, S. Sengupta and H.K. Sahu	133
Time Series Analysis - A Review M.C. Valsakumar, K.P.N. Murthy and S. Venkadesan	141
Response to Pulsed Disturbances in III-Condensed Systems and Possible Prediction of Catastrophes M. Acharyya and B.K. Chakrabarti	155
Multirange Fractals in Materials C.W. Lung	163
Microscopic Aspects of Plastic Flow Instability G. Saada	173
Short-Range Order, Slip Coarsening and Slip Instabilities in Alloys G. Kostorz	187
Simulating Shear Bands in Granular Solids H.J. Herrmann, A. Polyakov and H.-. Tillemans	195
Computer Simulations on Dislocation Patterning R. Fournet and J.M. Salazar	205
3-D Simulations of Dislocations and Plasticity L.P. Kubin, B. Devincere, G.R. Canova and Y. Bréchet	217
The Brittle-to-Ductile Transition: A Cooperative Dislocation Generation Instability M. Khanta, V. Vitek and D.P. Pope	227
Crack Patterning Simulation J. Lépinoux	237

Patterns in Fracture: Drying Experiments and Thermal Shock Y. Bréchet, D. Bellet and Z. Neda	247
Serrated Plastic Flow Revisited P. Rodriguez and S. Venkadesan	257
Microscopic and Macroscopic Instabilities in Omega Forming Systems S. Banerjee, U. Naik and J.K. Chakravartty	267
Chaos in Jerky Flow: Theory and Experiment G. Ananthakrishna and S.J. Noronha	277
Chaotic Flow in Al-Mg Alloy S. Venkadesan, K.P.N. Murthy and M.C. Valsakumar	287
Dynamical Analysis of the Portevin - Le Châtelier Effect L. Quaouire and C. Fressengeas	293
Adiabatic Elimination and Ginzburg-Landau Form Description for Steps on Creep Curve M. Bekele and G. Ananthakrishna	303
Dynamic Strain Ageing and Stick-Slip Instabilities: A Parallel Approach and Statistical Study M.A. Lebyodkin, Y. Bréchet, Y. Estrin and L.P. Kubin	313
Dynamics of the Burridge-Knopoff Model of Earthquakes H. Ramachandran and G. Ananthakrishna	325
