

# Table of Contents

## Dedication and Preface

<b>1. Introduction</b>	1
<b>2. Point Defects in Non-Stoichiometric Metal Oxides</b>	9
<b>3. Elementary Processes – The Relations between the Standard Gibbs Energies of the Formation of Defects</b>	33
<b>4. The Resultant Standard Gibbs Energy of the Formation of Defects and its Dependence on the Bond Energy (Cohesive Energy) in an Oxide</b>	48
<b>5. Description of the Defect Equilibrium in Non-Stoichiometric Metal Oxides</b>	55
<b>6. Methods for Calculation of the Diagrams of Point Defects in Non-Stoichiometric Oxides</b>	87
<b>7. Methodology of the Studies on the Deviation from the Stoichiometry and Electrical Conductivity – Remarks and Comments</b>	102
<b>8. Point Defects' Concentrations in Doped Oxides</b>	109
<b>9. Nickel Oxide <math>\text{Ni}_{1-\delta}\text{O}</math></b>	134
<b>10. Cobalt Oxide <math>\text{Co}_{1-\delta}\text{O}</math></b>	191
<b>11. Manganese Oxide <math>\text{Mn}_{1-\delta}\text{O}</math></b>	263
<b>12. Iron Oxide <math>\text{Fe}_{1-\delta}\text{O}</math></b>	313
<b>13. Copper (I) Oxide <math>\text{Cu}_{2\pm\delta}\text{O}</math></b>	377
<b>14. Titanium (IV) Oxide <math>\text{TiO}_{2-\delta}</math></b>	437
<b>15. Concentration of Point Defects in Oxides: <math>\text{Ni}_{1-\delta}\text{O}</math>, <math>\text{Co}_{1-\delta}\text{O}</math>, <math>\text{Fe}_{1-\delta}\text{O}</math>, <math>\text{Mn}_{1-\delta}\text{O}</math>, <math>\text{Cu}_{2-\delta}\text{O}</math> and <math>\text{TiO}_{2-\delta}</math> - Short Summary and Discussion</b>	513
