

Table of Contents

Preface, Committee

Chapter 1: Research and Development of Processing Technologies for Metals and Alloys in Engineering Industry

Influence of Cutting Parameters and Tool Geometry on Thrust Force Behavior in Drilling Ti6Al4V	
M. Vrabel', I. Maňková, P. Ižol, M. Franková and M. Paľo	3
Tool Wear and Surface Roughness Evolution in Hole Making Process of Inconel 718	
M. Eckstein, M. Vrabel' and I. Maňková	11
Comparison of Milling Strategies when Machining Freeform Surfaces	
P. Ižol, M. Vrabel' and I. Maňková	18
Surface Roughness and Cutting Force Components Evaluation in Hard Turning by Differently Shaped Cutting Tools	
M. Kritikos Samardziova	26
Resistance of Cladding Layers Made by FCAW Method to Erosive Wear	
J. Viňáš, J. Brezinová and M. Greš	33
Cladding of Wear-Resistant Layers in Metallurgy and Engineering	
J. Viňáš, M. Greš and T. Vaško	41
Influence of Machining and Heat Treatment on Deformations of Thin-Walled Bearings	
D. Stančeková, D. Steklac, J. Petru, T. Zlámál, M. Sadilek, M. Janota and M. Kordik	49
The Influence of the Filler Material on Weld Joints Made of Duplex Stainless Steels	
J. Ertel, J. Bárta, M. Marônek and J. Bílik	59
Resolving Problems of Finding Surface Boundaries during Laser Machining	
V. Pata, L. Sýkorová, M. Kubišová and M. Malachova	66
Evaluation of Electrochemical Properties of Steel Sheets for Automotive Applications	
J. Koncz and J. Brezinová	72
Aspects of Burnishing Rolling Process of the Surface Prepared in Different Previous Treatments	
A. Kułakowska, M. Kulakowski, Ł. Bohdal and R. Patyk	78
Characterization of Porous Coatings Obtained on Materials by Plasma Electrolytic Oxidation	
K. Rokosz, T. Hryniewicz and W. Malorny	86
The Effect of Technological Conditions of Hard Turning on the Formation of White Layer	
Z. Pálmai and J. Kundrák	96
Selective Laser Melting Technology and Manufacturing of Accurate Thin Structures	
M. Ackermann, J. Šafka and L. Voleský	104

Chapter 2: Polymer and Composite Materials and Production Technologies

On Flexural Stiffness of Polymer Sandwich Walls	
O. Šuba, L. Fojtl, O. Šuba Jr., L. Sýkorová, S. Rusnáková and J. Baďurová	115
Influence of Different Coupling Agent Type on Processibility and Applicability of Polymer Composites	
M. Seidl, J. Habr, L. Běhálek, J. Šafka, M. Ackermann and J. Bobek	123
Analysis of Parameters with Influence on Material Shrinkage PLA and PLLA	
M. Kučerová and P. Lenfeld	133
The “Laser Machinability” of Polymeric Materials	
L. Sýkorová, V. Pata, M. Kubišová and M. Malachova	141
Thermal Degradation of the Thermoplastic Elastomers during the Injection Moulding Process	
L. Běhálek, J. Habr, M. Seidl, P. Lenfeld and M. Boruvka	148

Effect of Dielectric Barrier Discharge Plasma Surface Treatment on the Properties of Pineapple Leaf Fiber Reinforced Poly(Lactic Acid) Biocomposites M. Boruvka, C. Ngaowthong, L. Běhálek, J. Habr and P. Lenfeld	156
Dynamic-Mechanical Properties of Polymer Composites with the Short and Long Glass Fibers P. Lenfeld, L. Běhálek, M. Boruvka and J. Prusek	166
Use of Composite Materials for FDM 3D Print Technology J. Šafka, M. Ackermann, J. Bobek, M. Seidl, J. Habr and L. Běhálek	174
Mechanical Benefits of Gas Assisted Injection Moulding Application in Design of Structural Parts M. Košík, J. Bílik and F. Polakovič	182
Optimal Cutting Conditions for Surface Finishing of Parts Made of Photopolymers P. Keller	192
Reduction of Injection Moulded Plastic Part Warpage Using Advanced Gas Assisted Injection Moulding M. Košík, J. Bílik and D.R. Delgado Sobrino	200

Chapter 3: Computational Methods in Materials Science and Production Technology

Metal to Composite Plastic Conversion of Mechanically Loaded Part Using Numerical CAE Analyses M. Košík, J. Bílik and A. Náplava	213
The Numerical Simulation of the Deep Drawing Process and its Verification by the Adaptation of the Laminated Tooling Concept M. Tomáš and J. Hudák	222
Numerical Analysis of Influence of Cutting Edge Radius on the Minimum Thickness of the Machined Layer J. Chodor and P. Kaldunski	230
Numerical Investigations of the Effect of Process Parameters on Residual Stresses, Strains and Quality of Final Product in Blanking Using SPH Method Ł. Bohdal, A. Kułakowska, R. Patyk and M. Kulakowski	238
Analysis of Strain in Cutting Zone with FEM and Stereological Metallographic Evaluation M. Necpal and M. Martinkovič	246
Computer Simulation and Numerical Analysis of the Tailored Blanks Drawing P. Kaldunski and J. Chodor	254
Study the Possibility of Controlling the Magnitude and Distribution of Residual Stress in the Surface Layer of the Product after the Process Double Duplex Burnishing R. Patyk, Ł. Bohdal and A. Kułakowska	262
Experimental and Numerical Investigation of the Influence of Cutting Speed and Feed Rate on Forces in Turning of Steel J. Kundrák, G. Szabó and A.P. Markopoulos	270
Analysis of the States of Deformation and Stress in the Surface Layer of the Product after the Burnishing Cold Rolling Operation L. Kukielka, M. Szczesniak, R. Patyk, A. Kułakowska, K. Kukielka, S. Patyk, K. Gotowala and D. Kozak	278
Finite Element Simulation of Physical Phenomena in Real Conditions of a Single Grain Cutting Process M. Forysiewicz, L. Kukielka and K. Gotowala	288
Determining of Shear Modulus for the Samples Circular and Hollow Circular Cross-Section E. Labašová, R. Duriš and V. Labaš	298

Chapter 4: Technology Management in Engineering Industry

Modeling the Failure Tree Analysis for Safety-Critical Systems in the Production of Hazardous Materials D. Gabriska	307
---	-----

Application of 3D Printing for Specific Tools P. Zelený, T. Váňa and J. Stryal	316
Using Contactless Scanning for Quality Control of Automotive Parts R. Mendřický	324
Laboratory Tasks and Material and Safety Aspects V. Pelantová and L. Kretschmerova	334
