

## Table of Contents

### Preface

## Chapter 1: Research and Development of Metalworking and Welding Technologies in the Engineering Industry

<b>Fractographic Analysis of Castings from Al-Si Alloy Produced by Low-Pressure Casting</b> J. Svobodová, Š. Michna and I. Hren	3
<b>Evaluation of Surface Roughness after Actively Rotary Turning Method</b> R. Joch, J. Pilc, D. Stančeková, I. Miturska and I. Görögová	11
<b>Research on Workability of Tool Cutters Working under Conditions of Shockless Loads and Friction</b> T.N. Ivanova, I. Zajačko, M. Císař and A.I. Korshunov	19
<b>Electron Beam Welding of Aluminium Alloy AW2099</b> J. Urmanský, M. Maronek, J. Bárta, M. Sahul, F. Jurina and M. Pašák	28
<b>Influence of Electron Beam Technological Movements on Aluminium Alloy AW2099 Welded Joints Properties</b> J. Urmanský, M. Maronek, J. Bárta, M. Lopatková and R. Hrušecský	36
<b>The Selection of Materials for the Auto-Body Deformation Zones</b> E. Evin and M. Tomáš	44
<b>Tool for Strengthening of the Component Surface Layers</b> M. Králik, V. Jerz and M. Bachratý	52
<b>Experimental Determination of Mechanical Properties of Waste Steel Sheets</b> V. Čačko, I. Onderová, L. Šooš, P. Varga and A. Smelík	62
<b>Analysis of the Surface Roughness of a Tube Drawn by a Fixed Mandrel</b> A. Görög, I. Görögová and M. Martinkovič	70
<b>The Thermal Effect of Unconventional Cutting Technologies on Steel DIN 1.7102</b> P. Stoklásek, A. Mizera, M. Manas and M. Ovsík	78
<b>Experimental Study of Nickel Electron Beam Welding</b> E. Hodúlová, B. Šimeková, I. Kovaříková and M. Sahul	88
<b>Research of Laser Beam Welding of Inconel Alloy</b> E. Hodúlová, I. Kovaříková, B. Šimeková, J. Bárta, M. Sahul and P. Kovačócy	96
<b>Bainitic Cast Irons with Nanosized Particles</b> J.A. Kaleicheva, V.P. Mishev and Z.K. Karaguiozova	104

## Chapter 2: Polymers and Composites, Properties and Production Technologies

<b>Basalt Reinforced Plastic - Development and Modeling of Part</b> J. Vosáhlo and M. Ryvolová	115
<b>Experimental Examination of Adhesive Bonded Carbon Fibre Tube to Aluminum Alloy AW 7075</b> K. Kutiová, J. Měsíček and D. Krzikalla	125
<b>FEM Simulation of Composite Polyurethane Foam for Car Seat Cushion</b> P. Srb and M. Petruš	133
<b>Polymer Based Injection Mould Cavity Inserts: An Influence on Crystallization and Thermo-Mechanical Properties of Injection Moulded Parts</b> M. Češková and P. Lenfeld	143
<b>Influence of Raw Material Properties on Parameters of Injection Press during the Injection of Composites Based Biomass and Plastic Waste</b> P. Križan, J. Bábics, J. Beniak and M. Matúš	152
<b>Thermal Expansion of Composite System Epoxy Resin/Recycled Carbon Fibers</b> Š. Dvořáčková and D. Kroisová	162

<b>The Technological Properties of Polymer Composites Containing Waste Sheep Wool Filler</b> P. Strážnický, Š. Rusnáková, M. Žaludek, O. Bošák, M. Kubliha and P. Gross	170
<b>Mechanical Properties of Hierarchical Biopolymer Composite with a Modified Surface of Knitting Fabric</b> P. Lenfeld, I. Lenfeldová, L. Běhálek and M. Boruvka	179
<b>Influence of Injection Moulding Process Parameters on High-Density Polyethylene Surface Hardness</b> A. Mizera, T. Fiala, M. Manas, P. Stoklásek and M. Ovsík	189
<b>Biogenic Nanoparticles of Calcium Carbonate - Preparation and Behaviour</b> D. Kroisová and Š. Dvořáčková	197
<b>Analysis of Shape and Dimensional Deformation of the Gear Made by Digital Light Processing (DLP) Additive Technology and Measured by Industrial Tomography</b> D. Michal, R. Hrušecký, A. Görög, J. Milde and Š. Šimon	205
<b>Analysis of Shape and Dimensional Deformation of the Model with a Precision Circular Hole Produced by Digital Light Processing (DLP) Additive Technology</b> D. Michal, R. Hrušecký, P. Košťál and I. Molnár	213

## **Chapter 3: Computational and Numerical Methods in Materials Science and Production Technologies**

<b>Verification of Friction Models Implemented in the Simulation Software</b> E. Evin and M. Tomáš	223
<b>Fluid Property Adjustment of Water-Ethanol Mixture for the Application of Metal Foam Production</b> S. Attia, K. Fraňa, I. Nová and M. Hdaib	232
<b>Combination of an Improved 3D Geometry and Coupled Eulerian-Lagrangian Formulation for Turning Simulation</b> C. Dimopoulos, N.E. Karkalos, J. Kundrák and A.P. Markopoulos	240
<b>Analysis for the Joining of Light Alloys by Numerical Experiment</b> H. Kraváriková	248
<b>Numerical Simulation of Forging Process in Deform 3D</b> Š. Hajdu	256
<b>Hyperelastic Material Characterization: How the Change in Mooney-Rivlin Parameter Values Effect the Model Curve</b> R. Keerthiwansa, J. Javořík, S. Rusnáková, J. Kledrowetz and P. Gross	265
<b>FEM Optimization of a Steel Belt of OTR Tyres</b> J. Kledrowetz, J. Javořík, R. Keerthiwansa, P. Kratochvíl, S. Rusnáková and P. Gross	272
<b>Determination of GD&amp;T Features Varying the Setting Parameters of X-Ray Computed Tomography by Response Surface Method</b> A. Dao and A. Drégelyi-Kiss	280
<b>The Materials and Technologies Used in the Process of Developing a Rotary Module with an Unlimited Degree Rotation</b> L. Hrvniak, M. Šašala, J. Svetlík and T. Stejskal	288
<b>Modification of the Sliding Joint in Equipment Tribotestor M'89</b> J. Oravcová and E. Labašová	296
<b>Material Selection for Prototype Design and Production</b> M. Šašala, L. Hrvniak and J. Svetlík	304
<b>Polymer Based Abdominal Retractor According to Existing Design Parameters</b> B. Hučko, M. Čekan, F. Horvát, M. Bachratý and M. Čambal	312
