

Table of Contents

Preface

Chapter 1: Research and Development of Metalworking and Welding Technologies in the Engineering Industry

Fractographic Analysis of Castings from Al-Si Alloy Produced by Low-Pressure Casting J. Svobodová, Š. Michna and I. Hren	3
Evaluation of Surface Roughness after Actively Rotary Turning Method R. Joch, J. Pilc, D. Stančková, I. Miturska and I. Görögová	11
Research on Workability of Tool Cutters Working under Conditions of Shockless Loads and Friction T.N. Ivanova, I. Zajačko, M. Císar and A.I. Korshunov	19
Electron Beam Welding of Aluminium Alloy AW2099 J. Urminský, M. Marônek, J. Bárta, M. Sahul, F. Jurina and M. Pašák	28
Influence of Electron Beam Technological Movements on Aluminium Alloy AW2099 Welded Joints Properties J. Urminský, M. Marônek, J. Bárta, M. Lopatková and R. Hrušecký	36
The Selection of Materials for the Auto-Body Deformation Zones E. Evin and M. Tomáš	44
Tool for Strengthening of the Component Surface Layers M. Králik, V. Jerz and M. Bachratý	52
Experimental Determination of Mechanical Properties of Waste Steel Sheets V. Čačko, I. Onderová, E. Šooš, P. Varga and A. Smelík	62
Analysis of the Surface Roughness of a Tube Drawn by a Fixed Mandrel A. Görög, I. Görögová and M. Martinkovič	70
The Thermal Effect of Unconventional Cutting Technologies on Steel DIN 1.7102 P. Stoklásek, A. Mizera, M. Manas and M. Ovsik	78
Experimental Study of Nickel Electron Beam Welding E. Hodúlová, B. Šimeková, I. Kovaříková and M. Sahul	88
Research of Laser Beam Welding of Inconel Alloy E. Hodúlová, I. Kovaříková, B. Šimeková, J. Bárta, M. Sahul and P. Kovačócy	96
Bainitic Cast Irons with Nanosized Particles J.A. Kaleicheva, V.P. Mishev and Z.K. Karaguiozova	104

Chapter 2: Polymers and Composites, Properties and Production Technologies

Basalt Reinforced Plastic - Development and Modeling of Part J. Vosáhlo and M. Ryvolová	115
Experimental Examination of Adhesive Bonded Carbon Fibre Tube to Aluminum Alloy AW 7075 K. Kutiová, J. Měsíček and D. Krzikalla	125
FEM Simulation of Composite Polyurethane Foam for Car Seat Cushion P. Srb and M. Petruš	133
Polymer Based Injection Mould Cavity Inserts: An Influence on Crystallization and Thermo-Mechanical Properties of Injection Moulded Parts M. Češková and P. Lenfeld	143
Influence of Raw Material Properties on Parameters of Injection Press during the Injection of Composites Based Biomass and Plastic Waste P. Križan, J. Bábies, J. Beniak and M. Matúš	152
Thermal Expansion of Composite System Epoxy Resin/Recycled Carbon Fibers Š. Dvořáčková and D. Kroisová	162

The Technological Properties of Polymer Composites Containing Waste Sheep Wool Filler P. Strážnický, Š. Rusnáková, M. Žaludek, O. Bošák, M. Kubliha and P. Gross	170
Mechanical Properties of Hierarchical Biopolymer Composite with a Modified Surface of Knitting Fabric P. Lenfeld, I. Lenfeldová, L. Běhálek and M. Boruvka	179
Influence of Injection Moulding Process Parameters on High-Density Polyethylene Surface Hardness A. Mizera, T. Fiala, M. Manas, P. Stoklásek and M. Ovsik	189
Biogenic Nanoparticles of Calcium Carbonate - Preparation and Behaviour D. Kroisová and Š. Dvořáčková	197
Analysis of Shape and Dimensional Deformation of the Gear Made by Digital Light Processing (DLP) Additive Technology and Measured by Industrial Tomography D. Michal, R. Hrušecký, A. Görög, J. Milde and Š. Šimon	205
Analysis of Shape and Dimensional Deformation of the Model with a Precision Circular Hole Produced by Digital Light Processing (DLP) Additive Technology D. Michal, R. Hrušecký, P. Košťál and I. Molnár	213

Chapter 3: Computational and Numerical Methods in Materials Science and Production Technologies

Verification of Friction Models Implemented in the Simulation Software E. Evin and M. Tomáš	223
Fluid Property Adjustment of Water-Ethanol Mixture for the Application of Metal Foam Production S. Attia, K. Fraňa, I. Nová and M. Hdaib	232
Combination of an Improved 3D Geometry and Coupled Eulerian-Lagrangian Formulation for Turning Simulation C. Dimopoulos, N.E. Karkalos, J. Kundrák and A.P. Markopoulos	240
Analysis for the Joining of Light Alloys by Numerical Experiment H. Kraváriková	248
Numerical Simulation of Forging Process in Deform 3D Š. Hajdu	256
Hyperelastic Material Characterization: How the Change in Mooney-Rivlin Parameter Values Effect the Model Curve R. Keerthiwansa, J. Javořík, S. Rusnáková, J. Kledrowetz and P. Gross	265
FEM Optimization of a Steel Belt of OTR Tyres J. Kledrowetz, J. Javořík, R. Keerthiwansa, P. Kratochvíl, S. Rusnáková and P. Gross	272
Determination of GD&T Features Varying the Setting Parameters of X-Ray Computed Tomography by Response Surface Method A. Dao and Á. Drégelyi-Kiss	280
The Materials and Technologies Used in the Process of Developing a Rotary Module with an Unlimited Degree Rotation L. Hrivniak, M. Šašala, J. Svetlík and T. Stejskal	288
Modification of the Sliding Joint in Equipment Tribotestor M`89 J. Oravcová and E. Labašová	296
Material Selection for Prototype Design and Production M. Šašala, L. Hrivniak and J. Svetlík	304
Polymer Based Abdominal Retractor According to Existing Design Parameters B. Hučko, M. Čekan, F. Horvát, M. Bachratý and M. Čambal	312
