Preface

Chapter 1: Composites

Evaluation of ILSS of Seawater-Immersed GFRP Composites by Adopting Taguchi Method P.K. Satapathy, S.N. Pati, U.K. Mohanty, S. Choudhury and S. Beura	3
Characterization of Textile Waste/Glass Fibre Hybrid Composite Material for Industrial Use M.K. Samantaray and D. Mishra	11
Statistical Investigation of Power Consumption in Dry Turning of Stir-Cast Al7075-SiC-Gr Metal Matrix Composites S. Padhan, J.J. Mohapatra, L. Mishra, A.K. Rout and S.R. Das	19
Characterization of Jute and Bamboo Fiber Reinforced Hybrid Composites T. Koche, S.P. Parida, P.C. Jena, R.R. Dash and B.B. Bal	29
Flexural and Vibration Response Analysis of Cenosphere Filled Natural Fiber Hybrid Composites S. Dash, B.K.B. Darshan, P.K. Jena, B.P. Pattanaik, S. Nayak, T.R. Mahapatra and M. Kumari	37

Chapter 2: Innovative Approaches in Alloy Design and Processing

Optimizing Mg-Pd-Ni Ternary Alloys for Hydrogen Storage: A Molecular Dynamics Study of Mechanical Durability M.Y. Han, H.T. Uchida and M.R. Harada	51
Research on Pulsed Current Assisted Differential Temperature Rolling of Ti/Cu with Gradient Heating X.W. Guo, J.Z. Chen, D. Ha, P. Chen and Z.K. Ren	57

Chapter 3: Catalysts for Pollution Removal

Ti Doped Layered Manganese Oxide as an Efficient Catalyst for the Low-Temperature SCR of NO with NH₃ H.W. Zhang, X. Xiao, S. Shu, L.B. Jiang and J.J. Li	69
Enhancing Dye Decolorization: CS/TiO₂-ZrO₂ Nano Hybrid Catalyst for Malachite Green Removal M.A. Mohd Adnan, M.F. Majnis, M.A.A. Taib and N. Muhd Julkapli	85

Chapter 4: Particle System Mechanics

Modeling the Behavior of Spherical Particles Using the Discrete Element Method (DEM) V. Pasternak, A. Ruban, V. Matukhno and T. Oliynyk	93
Using Numerical Methods in Scilab to Simulate Particle Trajectories under the Action of Various Forces (Gravity, Electromagnetism, Friction) V. Pasternak, A. Ruban, V. Andrii and O. Lyamar	105
