

Table of Contents

Preface

CONTENTS

Introduction

K.H.J. Buschow	1
2. Basic Concepts and Models. 2.1. Introduction.	
K.H.J. Buschow	4
2.2. Magnetic Coupling and Anisotropy	8
2.3. Coercivity	18
3. Rare Earth Based Permanent Magnet Materials. 3.1. Nd₂Fe₁₄B Type Magnets	
K.H.J. Buschow	20
3.2. Ternary Carbides with Nd₂Fe₁₄B Structure	32
3.3. SmCo₅ and Sm₂Co₁₇ Type Magnets	33
3.4. Interstitially Modified R₂Fe₁₇ and R₃(Fe,M)₂₉ Compounds	40
3.5. Ternary Iron Rich Compounds of the Type Rfe_{12-x}M_x	45
3.6. Nanocrystalline Rare Earth Based Permanent Magnet Alloys	46
4. 3D-Transition Metal Alloy Magnets. 4.1. Alnico-Type Alloys	
K.H.J. Buschow	49
4.2. Fe-Cr-Co Alloys	53
5. Miscellaneous Magnet Materials. 5.1. Magnets Based on Noble Metal Compounds	
K.H.J. Buschow	55
5.2. Magnets Based on τ-MnAl	59
6. Hard Ferrites	
K.H.J. Buschow	61
7. Application of Permanent Magnets	
K.H.J. Buschow	67

8. REFERENCES
