## Preface, Committees and Sponsors

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Features of Deformation of Partly Crystallization Blooms at their Two-Stage Soft Reduction</b><br>Y. Smirnov and V. Sklyar                                              | 1   |
| <b>Al<sub>2</sub>O<sub>3</sub>-TiC/Fe Functionally Gradient Material Prepared by SHS Casting</b><br>W.H. Zang, C.L. Yuan and Y. Li                                         | 6   |
| <b>Derivation and Application for Calculation of Carbon Content in Austenitizing of Cast Iron</b><br>W.B. Gong, L. Luo, G.D. Chen and G.Y. Xiang                           | 11  |
| <b>Field Synergy Analysis for Inclusion Removal in the Continuous Casting Tundish</b><br>M.J. Zhang, X.L. Lin, H.Z. Gu, H.X. Zhu, C.J. Deng and Z.W. Xin                   | 16  |
| <b>Study on the Microstructures and Wear Resistance of ZG30Cr Steel Surface Layer</b><br>S.L. Wang, A.Q. Wang and J.P. Xie                                                 | 23  |
| <b>Numerical Simulation Analysis on Shrinkage and Porosity of ZL101A Alloy Mechanism Box</b><br>Y.J. Zhou, K.X. Song, Y.M. Zhang and X.H. Guo                              | 28  |
| <b>The St Venant Zone Extent of the Self-Balancing Longitudinal Elastic Stress</b><br>I. Mazur and S.M. Bel'skii                                                           | 33  |
| <b>Casting Process Optimization for Large Bearing Bush of Zinc-Base Alloy</b><br>C.Z. Gao, D.X. Yang, J.P. Xie, A.Q. Wang and W.Y. Wang                                    | 40  |
| <b>Study on Formability of Tailor Welded Blanks Based on Numerical Simulation</b><br>W. Liu, S.S. Xie, J.Q. Li and X. Ding                                                 | 45  |
| <b>Numerical Simulation of Flow Field and Temperature Field on Aluminium Alloy Engine Cylinder in Casting Process</b><br>H. Wu, H.M. Shi, H.F. Liu and Z.J. Xia            | 50  |
| <b>Simulation of the Temperature, Stress, Strain Field in Aluminum Thin-Gauge High-Speed Casting</b><br>X.B. Liu and D.S. Wu                                               | 58  |
| <b>Modelling of Microstructure Evolution during Thermal Processes – A Hybrid Deterministic-Probabilistic Approach</b><br>I. Hadi, M.A. Jabbareh, R. Nikbakht and H. Assadi | 63  |
| <b>Solidification Simulation of Melt-Cast Explosive under Pressurization</b><br>D.L. Wang, Z.Y. Xie, W.X. Sun and Y. Huang                                                 | 71  |
| <b>LY12 Flange Squeeze Casting and the Die Design</b><br>C. Li, J.X. Wang, H.Q. Miao and H.M. Xiong                                                                        | 76  |
| <b>The Defects Analysis and Numerical Simulation of Automobile Brake Hydro Cylinder in Permanent Casting</b><br>L. Rao, L.B. Zhu, X.L. Li and Q.Y. Hu                      | 82  |
| <b>The Computer Solidification Simulation and Process Optimization of Gear Ring</b><br>A.Q. Wang, J.P. Xie, W.Y. Wang and J.W. Li                                          | 88  |
| <b>Research on Preparation of Transparent Hydrophilic Antifogging Acrylate Resin</b><br>Hu Jing, S.L. Wu and B.Y. Lou                                                      | 92  |
| <b>Numerical Simulation and Experiment Research on Thick Plate Multi-Point Forming Process with Elastic Cushion</b><br>L.Y. Wang and L. Li                                 | 102 |
| <b>Simulation of Shape Distortions during Flat Bottom Raising Process with Titanium Alloy Sheet Based on ADINA</b><br>L.Y. Zhang, Z.R. Han and C.B. Zhao                   | 109 |
| <b>A Numerical Simulation of Microstructure Evolution of GH4169 Alloy Blade during Finish Forging</b><br>G.X. Qi, R.B. Mei, F. Wang and L. Bao                             | 113 |
| <b>Research on New Thermal Hole Flanging Process of Connection Tube Forming in Heavy Nuclear Power Thick-Wall Head</b><br>H.P. An and J.S. Liu                             | 119 |
| <b>Study on Thermal Deformation Behavior of Cu-P Weathering Steel</b><br>X. Zhang and Y. Xiong                                                                             | 124 |

|                                                                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on Formability of Micro-Feature in the Coining Process</b><br>W. Zheng, G.C. Wang, T. Wu and L.B. Song                                                                    | 129 |
| <b>High Temperature Deformation Behavior and Microstructure Preparation of Cu-Ni-Si-P Alloy</b><br>Y. Zhang, B.H. Tian and P. Liu                                                  | 135 |
| <b>Study on High Temperature Deformation Characteristics of BTi-62421S</b><br>H.F. Zhang, Z.M. Zhang, X. Zhang, B.C. Li and H.H. Ma                                                | 141 |
| <b>Comparison of Warm Deformation Behavior between Quenched and Annealed ASTM 1045 Steel</b><br>X. Zhao, X.L. Yang and T.F. Jing                                                   | 147 |
| <b>Numerical Simulation of Al Ball Forming Process in Skew Rolling</b><br>X.M. Shi and B.J. Wang                                                                                   | 151 |
| <b>Numerical Simulation of Seamless Tube's Stretch Reducing Process</b><br>J.H. Li and H. Yu                                                                                       | 155 |
| <b>Mathematical and Physical Modeling of Soft Cobbing Process of Hot Rolling Steels</b><br>I. Mazur and T.I. Cherkashina                                                           | 160 |
| <b>A One-Point Quadrature Element Used in Simulation of Cold Ring Rolling Process</b><br>X.B. Zhang, X. Zhao, Y.M. Zhang and Z.G. Li                                               | 165 |
| <b>Research and Analysis of Material Flow Regularity in the Process of Cross Wedge Rolling for Wrought Aluminum Alloy</b><br>P.F. Zhao, C.C. Han, Y.M. Zhang and K.X. Song         | 172 |
| <b>The Numerical Simulation of Conductive Body Forming Process and Mould Design</b><br>J.X. Gao, P.F. Zhao, K.X. Song and Q. Wang                                                  | 177 |
| <b>Application of Optimization Algorithms in Injection Molding Process Parameters Optimization</b><br>Z.H. Hu, W. Wei, J. Liu and K. Liu                                           | 183 |
| <b>Flow Behavior of Ultra-High Strength Boron Steel at Elevated Temperature</b><br>J. Bao, H.S. Liu, Z.W. Xing, B.Y. Song and Y.Y. Yang                                            | 191 |
| <b>Effect of the Die and Tool Structure on Continuous Extrusion Expansion Forming of Copper</b><br>X.B. Yun, X. Chen, Y. Zhao, Z.X. Fan and B.Y. Song                              | 196 |
| <b>Finite Element Simulation of Biting Process of Cold Rolling Strip for 6-High Mill</b><br>X. Ma, J.Y. Ma, Z.L. Feng, H.L. Cui, Y. Yang, Y.T. Li, J. Zhang, Y.H. Ding and J.P. Li | 203 |
| <b>Hot Deformation Behavior and Processing Maps of Cr-Ni-Mn-N Austenitic Stainless Steel</b><br>E. Bao, M.J. Wang, Z.X. Wang and H. He                                             | 210 |
| <b>Application of an Improved Trust-Region Method to Rigid-Plastic Finite Element Analysis in Strip Rolling</b><br>S.N. Song, J.Y. Liu and J. Qian                                 | 216 |
| <b>Flow Stress Behavior of Al-Fe-V-Si Heat-Resistant Aluminum Alloy Prepared by Spray Forming under Hot-Compression Deformation</b><br>R.H. Zhang, Y.A. Zhang and B.H. Zhu         | 223 |
| <b>Research on Quartz Flat Mirror's Thermal Deformation under the Condition of Non Uniform Heating</b><br>S. Dai, S.L. Chang, Y. Lan, J.F. Luo and F. Wang                         | 229 |
| <b>Brass H62 Hot Extrusion of Micro Gear</b><br>X.R. Liu and X.D. Zhou                                                                                                             | 236 |
| <b>Forming Mechanism of Folding Defect within Closed Die Forming Car Steering Knuckle</b><br>D.Y. Zhao, L.D. Zhang and L.N. Sun                                                    | 240 |
| <b>Study on Load Control and Optimization of Rotary Forging Method for Heavy and Thick-Walled Container Head by FEM</b><br>M.H. Wang, D. Xiang and Y.F. Li                         | 245 |
| <b>Experimental Study of Hot Forming Process by Direct Resistance Heating</b><br>Z.X. Men, J. Zhou and Z.M. Xu                                                                     | 252 |
| <b>Research on Boronizing of the Whetstone Forming Die</b><br>J. Chen, S.X. Hao and X. Fan                                                                                         | 261 |
| <b>Simulated Research on Hot Forming Mechanism of Sour Service Drill Pipe Steel</b><br>M.J. Hu, P. Wang, L.H. Han and X.L. Han                                                     | 266 |

|                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Calculation Model of Punch Force during Tube Extrusion</b><br>Z.T. Wang, G.X. Qi, F. Wang and S.H. Zhang                                                                                 | 273 |
| <b>Tribological Characteristics on the Helical Gear in Cold Forging Mold</b><br>W.S. Choi, J.H. Son, I. Lee, E.Y. Jin, J.R. Kwon, Y.M. Lee and N. Umehara                                   | 277 |
| <b>Numerical Simulation on the Casting Process of Gray Iron Brake Pad</b><br>C.Y. Liang, H.P. Li, L.H. Wang, H.S. Wang and X.J. Zhao                                                        | 284 |
| <b>Investigation on Slurry Filling Sequence during Semi-Solid Forming of Complex Aluminum Part</b><br>K.K. Wang, F.Y. Wang and Y.N. Wang                                                    | 290 |
| <b>The Simulated Calculation and Optimizing Experimental Research of the Residual Stress of the Heavy Rail Straightening</b><br>L. Chen, J.G. Wang and G. Li                                | 296 |
| <b>Die Forging Process Simulation of a Connecting Rod</b><br>L. Xu, G.Z. Dai, X.M. Huang, J. Han and J.W. Zhao                                                                              | 302 |
| <b>Agriculture Auto Workpiece Injection Mold Design Based on CAE</b><br>J. Zhou, L.J. Li, Y.L. Yan, Z.W. Wang and D.C. Zhou                                                                 | 308 |
| <b>Analysis on Contact Forms of Interface in Wafer CMP Based on Lubricating Behavior</b><br>S.F. Zhang, J.X. Su, J.X. Du and R.K. Kang                                                      | 313 |
| <b>Analysis of the Surface Residual Stress in Grinding Aermet100</b><br>Y.Q. Xu, T. Zhang and Y.M. Bai                                                                                      | 318 |
| <b>The Effect of Heat Treatment on Mechanical and Corrosion Performances of Zr-Nb Alloy</b><br>X.L. Yang, D.W. Deng, Y. Wang and Y.L. Ge                                                    | 325 |
| <b>TD-GC-MS Analysis on Volatile Organic Compounds of Chinese Fir Biomass in Simulated Hot Drying Environment</b><br>C.P. Xie, K.F. Li, W.X. Peng, Q.M. Liu and D.W. Gao                    | 337 |
| <b>Experimental Analysis of Seed Effect on the Directional Solidification of Sn-Pb Alloy</b><br>L.S. Chao, Y.R. Chen and F.C. Wang                                                          | 343 |
| <b>The New Technology of Softening Control for Copper Weld Joint Using Pretension Method</b><br>G.T. Zhou, W.D. Hou, Z. Wang and Z.M. Xue                                                   | 348 |
| <b>Application of Digital Simulation Software ANSYS in Rolling Concrete Dams Construction Technology</b><br>G.X. Zeng                                                                       | 352 |
| <b>Rigid Plastic FEM Model of Fast Solution to Strip Rolling</b><br>R.B. Mei, C.S. Li, X. Liu and L. Bao                                                                                    | 358 |
| <b>Effect of <math>\alpha_k</math> on Aluminium Trihydroxide Crystallization from Sodium Aluminate Soluntion under Ultrasound</b><br>Y.S. Wu, Y.P. Qu, L.N. Zhang and M. Liu                | 364 |
| <b>Numerical Calculations on the Grating-Assisted Phase Matching Condition of High Harmonic Generation in Photonic Crystal Fiber</b><br>H.Z. Ren, M. Zhang, P. Guo and L.F. Yang            | 370 |
| <b>Study on Temperature Change Rule of Sprayed Composite Powders in Flight</b><br>H.W. Liu, J.J. Wang, X.F. Sun and J. Qiu                                                                  | 375 |
| <b>High Concentration of Viscous Material Pipeline Characteristics of the Discussion</b><br>Z.F. Yu, X.L. Tian and Y. Pan                                                                   | 382 |
| <b>Valence Electron Theoretical Analysis of Mechanical Properties in Low-Alloy Steel</b><br>C. Sun, Y.K. Li and L. Jiang                                                                    | 389 |
| <b>A Study on Magnetic Separation Washability Mathematical Model of Pulverized Coal</b><br>H.G. Jiao, S. Li and L.Y. Pan                                                                    | 395 |
| <b>Molecular-Dynamics Studies of the Diffusion of H<sub>2</sub> in All-Silica ZSM-5</b><br>X.M. Du, Y. Huang and E.D. Wu                                                                    | 401 |
| <b>Detonating Gas Simulation Experiment System Based on the Dynamic ESD Model on Human Body</b><br>X.J. Dong, X. Chen, J.C. Zhang and L. Zhang                                              | 407 |
| <b>Numerical Simulation and Experiment Research on Temperature Field of Steel Slab in Walking Beam Furnace</b><br>C. Chen, C.J. Ding, D.G. Ouyang, Z.Z. Liu, Z.H. Song, S. Chen and C. Yang | 412 |
| <b>Effect of Red Extractives of Plantation Leaves on Bamboo Biomass Mildewing</b><br>F.J. Wu, W.X. Peng, D.C. Qin and F. Lu                                                                 | 419 |

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Predicted Model of Section Stress Distribution and Bending Strength of Fiberboard Based on Vertical Density Profile</b>       |     |
| Y. Zhang and Z.M. Yu                                                                                                             | 424 |
| <b>Application of CAD/CAM Systems for Computer Simulation of Metal Forming Processes</b>                                         |     |
| K.N. Solomonov                                                                                                                   | 434 |
| <b>Numerical Simulation and PIV Test on Flow-Field Character of Zinc-Silica Composite Electrolyte</b>                            |     |
| Y.Y. Fan, J.X. Xu, Y.H. Jiang and W.Q. Wang                                                                                      | 440 |
