Contents

Forward

Preface

Contributors

CHAPTER 1

1. Introduction	3
2. Ions in Solids	4
3. Fiber Lasers	12
4. Lanthanide Glass Spectroscopy	19
5. Lanthanide Fiber Lasers	27
6. Applications of Fiber Lasers	38
References	44

CHAPTER 2

1. Introduction	49
2. Experiment Procedures	50
4. Results and Discussion	56
5. Conclusions	65
Acknowledgment. References	66

CHAPTER 3

1. Introduction	71
2. Er ³⁺ -Activated Silicate Glasses. 3. Alumina Co-Doping: Local Environment Modification and Spectroscopic Properties Enhancement	74
4. Sensitisation of Erbium Luminescence	83
5. Waveguide Configuration and Circuit Patterning.	91
6. Conclusions	106
Acknowledgments. References	107

CHAPTER 4

1. Introduction	121
2. Material Synthesis	122
3. Spectral Properties of Rare Earth Ions Doped Bismuth Borate Glasses	123
4. Conclusion	143
Acknowledgments. References	144

CHAPTER 5

1. Introduction	151
2. Properties of the Fluoride Glasses	152

3. Rare Earth Ions in Solids	153
4. Spectral Intensities of the Rare Earth Ions in Fluoride Glasses	155
5. Non-Radiative Transitions of Rare Earth Ions in Fluoride Glasses	163
6. Infrared-to-Visible Upconversion in Fluoride Glasses	169
7. Rare Earth Local Structures in Fluoride Glasses	176
8. Conclusions	191
Acknowledgments	192
References	193

CHAPTER 6

1. Introduction	201
2. Experimental Procedures in General	202
3. Emission Properties	203
4. Local Structure Around Rare-Earth Ions	212
5. SUMMARY. ACKNOWLEDGMENT. REFERENCES	221

CHAPTER 7

1. Introduction	227
2. Experimental Studies	231
3. Luminescence Properties of ZBS Glasses Doped with	236
4. Luminescence Properties of LBG Glasses Doped with	245
5. Conclusions	255
Acknowledgment. References	256

CHAPTER 8

1. Introduction	263
2. Materials and Methods	264
3. Theoretical Background	267
4. Results and Discussion	268
5. Conclusion. Acknowledgment. References	286
