Preface, Committees, Sponsors

Chapter 1: Atomic Control Surfaces, Semiconductor Nanostructures and their Application

The Causes of Formation of the Triple Junctions of Grain Boundaries Containing Excess Free Volume in fcc Metals at Crystallization G.M. Poletaev, D.V. Novoselova and V.M. Kaygorodova	3
Mg₂Si under Pressure: DFT Evolutionary Search Results Y.V. Luniakov	9
Nanographite Films: Structure and Properties Y.M. Nikolenko and A.M. Ziatdinov	17
Experimental Study and Simulation of the Structure-Phase Transitions in Deposited Ge Layers during Pulsed Laser Annealing H.A. Novikov, R.M. Bayazitov, R.M. Batalov, I.A. Faizrahmanov, G.D. Ivlev and S.L. Prokop'ev	24
Influence of Ti Doping on the Properties of Ge-Sb-Te Thin Films for Phase Change Memory A. Sherchenkov, S. Kozyukhin, P. Lazarenko, A. Babich, S. Timoshenkov, D. Gromov, A. Yakubov and D. Terekhov	30
Localized Plasmon Resonances in Gold and Silver Microcones Fabricated Using Single-Pulse Femtosecond Nanoprocessing A.A. Kuchmizhak, O.B. Vitrik and Y.N. Kulchin	39
The Features of the Current-Voltage Characteristics of Field Emission Metal Cathode Covered by a Nanometer Oxide Layer V.A. Bepalov, N.A. Djuzhev, M.A. Makhaboroda and G.D. Demin	47
Nanostructured Metal Substrates Fabrication for Surface Enhanced Fluorescence Using the Nanosecond Speckle-Modulated Laser Pulses S.O. Gurbatov, A.A. Kuchmizhak, Y.N. Kulchin and O.B. Vitrik	54
Extended near-IR Spectral Sensitivity and Electroluminescence Properties of Silicon Diode Structure with GaSb/Si Composite Layer D.L. Goroshko, A.V. Shevlyagin, E.A. Chusovitin, K.N. Galkin, I.M. Chernev and N.G. Galkin	61
Formation and Optical Properties of Thin Mg₂Ge Films on Si(001) Substrate D.L. Goroshko, E.A. Chusovitin, K.N. Galkin, I.M. Chernev and N.G. Galkin	66
Characterization of In/Si(111) System by Optical Second-Harmonic Generation K.V. Ignatovich, A.V. Zotov and A.A. Saranin	73
Multilayer Graphene Nanoclusters: Structure, Electronic and Magnetic Properties N.S. Saenko and A.M. Ziatdinov	76

Chapter 2: Magnetic Nanostructures and Functional Hybrid Materials

Dielectric Studies of Ammonium Hydrogen Sulphate (NH₄HSO₄), Embedded into Molecular Sieves SBA-15 A. Milinskiy, A.A. Antonov and S.V. Baryshnikov	85
Treatment and Optical Analysis of Domestic and Industrial Wastewater V.T. Shamirzaev, B.D. Zhukov, V.A. Gaisler and T.S. Shamirzaev	91
The Features of Standing Spin Wave's Spectra in Granulated and Gradient Co-Based Multilayer Films L.A. Chekanova, I.G. Vazhenina, E.A. Denisova and R.S. Iskhakov	96
Kinetics of the Fractal Mesodefect Structure of Melt-Spun Fe₇₀Cr₁₅B₁₅(Sn) Alloys during Annealing T.A. Pisarenko, G.S. Kraynova and A.M. Frolov	101
Characteristic Modification of Catalysts by Use of a Chloride Source X. Meng, H. Suzuki, K. Sasaki and H. Tatsuoka	106

The Effect of Adsorbed Molecules on Electronic Structure and Magnetic Properties of Nanographites	111
A.M. Ziatdinov, V.V. Kainara and N.S. Saenko	
RHEED Study of the Texture in Polycrystalline Films of Magnetite Grown on Oxidized Silicon Surface	118
V.V. Balashev, V.A. Vikulov, T.A. Pisarenko and V.V. Korobtsov	
Technological Features Influence on Magnetic Sensitivity of Ferromagnetic Structures	124
V.A. Bepalov, N.A. Djuzhev, A. Iurov, N. Mazurkin, M. Chinenkov and R. Preobrazhensky	
Polarization Switching Response and Domain Structure Dynamics Induced in Ferroelectrics by Incident Electron Beams	131
A. Maslovskaya, T. Barabash and E. Veselova	
The Investigation of Superparamagnetic Colloidal Particles $\text{Fe}_m\text{O}_n\text{-SiO}_2$	138
P.V. Kharitonskii, K.G. Gareev, A.M. Frolov, S.V. Lebedev and P.V. Velikorussov	
Partition Function and Density of States in Models of a Finite Number of Ising Spins with Direct Exchange between the Minimum and Maximum Number of Nearest Neighbors	142
P.D. Andriushchenko and K.V. Nefedev	
Magnetic States and Frustrations of Square Spin Ice in 2D XY Point Dipoles Model	148
Y.A. Shevchenko and K.V. Nefedev	
Order Parameter in Short-Range and Long-Range Ising Finite Ferromagnetic Models	153
P.D. Andriushchenko and K.V. Nefedev	
The Structure and Magnetic Properties of Bronze, Stainless steel and Alloy Layers Formed by Direct Laser Welding on Nonmagnetic Substrates	158
N.G. Galkin, Y.N. Kulchin, E.P. Subbotin, D.S. Yatsko, K.N. Galkin, I.M. Chernev and E.A. Chusovitin
