Preface, Committees and Sponsors

Positrons and Free Volume Related Issues in Polymeric Systems: A Sketch of Günter Dlubek's Contributions

M.A. Alam 1

Chapter 1: Fundamental Aspects

Beyond the Point Ps Approximation

S.Ů. Stepanov, D.S. Zvezhinskiy and V.M. Byakov 7

Effects of Local Heating and Premelting in the Terminal Part of the e^+ Track

D. Zvezhinskiy, S.V. Stepanov, V. Byakov and B. Zgardzińska 15

Towards the Positronium and Radiolytic Hydrogen Formation Mechanisms in Liquid Hydrocarbons

V. Byakov and S.V. Stepanov 19

Testing of the Extended Tao-Eldrup Model on Porous VP-DVB Copolymers

M. Gorgol, M. Maciejewska, B. Jasińska and R. Zaleski 24

Ps Bubble in Liquids

B. Zgardzińska 29

The Free Volume Dynamics

D. Račko and J. Krištiak 33

Study of Unbound HePs Using Exact Diagonalization Technique

A. Zubiaga, F. Tuomisto and M. Puska 38

Chapter 2: Membranes

Layer Structures of Composite Membranes for Water Filtration Elucidated by Variable-Energy Positron Annihilation

Z. Chen, K. Ito, H. Yanagishita, N. Oshima, R. Suzuki and Y. Kobayashi 45

Effect of Water on the Size Distribution of Free-Volume Holes in Nafion Membrane

J. Čížek, Z. Barnovská, M. Šourek and I. Procházka 49

Annihilation Process of Positron in Degraded Nafion®-117

Y. Honda, Y. Aoyagi, S. Tojo, Y. Akiyama and S. Nishijima 53

Study of Thin Nafion® Films for Fuel Cells Using Energy Variable Slow Positron Annihilation Spectroscopy

H.F.M. Mohamed, S. Kuroda, Y. Kobayashi, B. Tavernier, R. Suzuki and A. Ohira 57

Positronium Lifetimes and Gas Permeation in Aquivion® for Fuel Cells

H.F.M. Mohamed, Y. Kobayashi, S. Kuroda and A. Ohira 61

Chapter 3: Molecular Systems

Positronium in Normal Alkanes

T. Goworek, B. Zgardzińska, M. Pietrow and J. Wawryszczuk 67

The Influence of Admixtures in n-Alkanes on Electron Traps

M. Pietrow and J. Wawryszczuk 75

Motion of Molecules at Plateau Region: Case of Propylene Glycol

V. Majerník, J. Krištiak, O. Šauša and M. Iskrová-Miklošovičová 80

"In Situ" Observation of Crystallization in Propylene Carbonate, Salol and M-Toluidine

V. Majerník, J. Krištiak, O. Šauša and M. Iskrová-Miklošovičová 84

Encapsulation of Natural Flavors in Cyclodextrins: Free Volume Studies by PALS

M.F. Ferreira Marques, P.M. Gordo, S.D. Santos, R.F. Marques, A.M. da Silva and Z. Kajcsos 88

Modification of the Crystallographic Structure of Olanzapine during Solvation by PALS and X-Ray Diffraction Methods	
M. Tydda, B. Jasińska, A.E. Koziol and I. Wawrzycka-Gorczyca	92
Molecular Packing of Carbohydrate Oligomer Encapsulants - A Free Volume Perspective	
M. Roussenova, S. Townrow, M. Murith, J. Ubbink and M.A. Alam	96

Chapter 4: Confined Systems

Annihilation Characteristics of Confined 2D Positronium	
J. Dryzek and S. Lewicka	103
Hexadecane in SiO₂ Aerogels	
B. Sláviková, M. Miklošovičová, E. Illeková, V. Majerník, O. Šauša, J. Krištiak and K. Jesenák	107
Phase Transition of Water Confined in Saponites Using Positron Annihilation Spectroscopy	
P. Maheshwari, S.K. Sharma, D. Dutta, K. Sudarshan and P.K. Pujari	111
Topological Quasi-Positroniums in Graphite-Alkali Metal Intercalation Compounds	
M. Saito, K. Yamada and I. Kanazawa	115

Chapter 5: Liquids

Positron Annihilation Parameters in Connection to Surface Phenomenon of Liquids	
B.N. Ganguly	121
Location of Phase Boundaries of Lyotropic Liquid Crystal Employing Positron Lifetime Spectroscopy and Electrical Conductivity Measurement	
R. Yadav, K.C. Singh, S.R. Choudhary and P.C. Jain	127
Positron and Charged Ion Diffusion and the Effective Interactions in the Liquid Phase	
K. Yamada, M. Saito, H. Suzuki and I. Kanazawa	132

Chapter 6: Polymers

<i>In Situ</i> Positron Lifetime Measurement for the Strained Polyethylene	
M. Fujinami, R. Minei, C.G. Liu and K. Hara	139
Positron Irradiation Effects in HDPE during PAL Measurement at Ambient Temperature	
J. Kansy and M. Ziabka	143
Positron Lifetimes and Mechanical Properties of Gamma-Irradiated Ultra High Molecular Weight Polyethylene	
Y. Kobayashi, M. Yamawaki, T. Oka, S. Saiki, H.F.M. Mohamed, K. Hattori and Y. Watanabe	147
Positron Annihilation Lifetime of Irradiated Polyimide	
T. Hirade, T. Oka, N. Morishita, A. Idesaki and A. Shimada	151
Effect of Crosslinkers on the Microstructure and Swelling Properties of the N-Isopropyl Acrylamide Gels: A Positron Annihilation Study	
P.N. Patil, K. Sudarshan, P.K. Pujari and D. Dutta	155
Effect of Hydrophilicity of the Sidechains on the Amorphous Structure of Polypropylene Derivatives Studied by Positronium Lifetime Measurements	
K. Ito, H. Hagihara and Y. Kobayashi	159
Positron Lifetimes and Crystallinity of γ-Irradiated Polypropylenes	
Z. Chen, W. Huang, P.F. Fang, W. Yu and S.J. Wang	163
Positronium Lifetime Study on Subnanoscopic Structure of Polyrotaxane	
K. Ito, C.M. Zhao, K. Ito and Y. Kobayashi	167
New Organic-Inorganic Hybrid Ureasil-Based Polymer Materials Studied by PALS and SEM Techniques	
T. Kavetsky, O. Šauša, J. Krištiak, T. Petkova, P. Petkov, V. Boev, N. Lyadov and A.L. Stepanov	171
Depth Profile of Chemical Composition and Free Volume of Polyurethane-Urea/Clay Nanocomposite	
S.K. Rath, M. Patri, P. Maheshwari, K. Sudarshan, P.K. Pujari and D.V. Khakhar	175
Relationships between Positron Lifetime and Dynamics of Polymers	
Y. Yu, G. Dlubek, J. Bartoš, H. Švajdlenková and R. Krause-Rehberg	179

On the Relationship of the Relative Intensity I_3 and a Cavity Number as Obtained from Computer Simulations	
D. Račko	183

Chapter 7: Porous Systems

Argon Plasma Decomposition of Porogen in Mesoporous Silica Films Studied by Positron Annihilation	
C.Q. He, K. Ito, T. Oka, Y. Kobayashi, T. Ohdaira and R. Suzuki	193
<i>o</i>-Ps Lifetimes in Iron Containing Micro- and Mesoporous Media	
T.Q. Dung, K. Lázár, K. Havancsák and Z. Kajcsos	197
Study of the Behavior of Positronium Annihilation in Porous Silicon	
B.Y. Wang, R.S. Yu, X.Z. Cao, Z.X. Li, P. Zhang, X.B. Qin, L. Wei and T. Kurihara	203
<i>In Situ</i> Monitoring of Adsorption and Desorption of <i>n</i>-Heptane on Porous Silica by Positron Annihilation Lifetime Spectroscopy	
R. Zaleski, W. Dolecki and J. Goworek	207

Chapter 8: Non-Metallic Materials

Positron and Positronium Annihilation as Probes to Identify Cation Substitution Effects in $\text{CoCr}_x\text{Fe}_{2-x}\text{O}_4$	
P.M.G. Nambissan, V.K. Lakhani and K.B. Modi	215
Ni-Substitution Induced Inversion in ZnFe_2O_4 Seen by Positron Annihilation	
P.M.G. Nambissan, O. MONDAL, C. Chakrabarty and M. Pal	219
Positron Lifetime at Deep Donors of Radiation Origin in Proton - Irradiated FZ-Silicon Single Crystals	
N.Y. Arutynov, M. Elsayed, R. Krause-Rehberg, V.V. Emtsev, G.A. Oganessian and V.V. Kozlovski	224
Hydrogen Interaction with Defects in ZnO	
F. Lukáč, J. Čížek, M. Vlček, I. Procházka, M. Vlach, W. Anwand, G. Brauer, F. Traeger, D. Rogalla, H.W. Becker, S. Wagner, H. Uchida and C. Bähz	228
Hydrogen-Induced Defects of Subsurface Layer in ZnO Single Crystal Probed by a Slow Positron Beam	
X.D. Xue, T. Wang, J. Jiang, P.H. Li, Y.F. Liu and Y.C. Wu	232
Effect of Sintering on Defects in Yttria Stabilised Zirconia	
I. Procházka, J. Čížek, O. Melikhova, W. Anwand, G. Brauer, T.E. Konstantinova and I.A. Danilenko	236
Positron Annihilation at Planar Defects in Oxides	
J. Kuriplach, O. Melikhova, J. Čížek, I. Procházka, G. Brauer and W. Anwand	240
$1-x\text{Eu}_x(\text{dpm})_3$ Solid Solutions Studied by Optical and Positron Annihilation Spectroscopies	
W.F. Magalhães, F. Fulgêncio, F.C. de Oliveira, D. Windmüller, J.C. Machado, H.F. Brito, O.L. Malta and G.F. de Sá	245
Inhibition of Positronium Formation in Yttria Stabilized Zirconia Nanopowders Modified by Addition of Chromia	
Ö. Melikhova, J. Čížek, I. Procházka, T.E. Konstantinova and I.A. Yashchishyn	249

Chapter 9: Nuclear Materials

Positron Annihilation Study of Neutron-Irradiated Nuclear Reactor Pressure Vessel Steels and their Model Alloy: Effect of Purity on the Post-Irradiation Annealing Behavior	
A. Kuramoto, Y. Nagai, T. Toyama, T. Takeuchi and M. Hasegawa	257
Vacancy Type Defects in Oxide Dispersion Strengthened Steels	
V. Slugeň, J. Veterníková, J. Degmová, S. Kilpeläinen, F. Tuomisto and V. Kršjak	264
Defect Detection in Fe-Cr Alloys with Positron Annihilation Doppler Broadening Spectroscopy	
V. Sabelová, M. Petriska, J. Veterníková, V. Slugeň, J. Degmová and S. Kilpeläinen	270

Thermal Annealing Influence on Ions Implanted Fe-Cr Model Alloys S. Sojak, V. Slugeň, V. Kršjak, W. Egger, L. Ravelli, M. Petriska, S. Stanček, M. Skarba, P. Priputen, K. Vitázek, M. Stacho, J. Veterníková and V. Sabelová	274
Positron Annihilation Measurements Performed on Oxide-Dispersion Strengthened Steels J. Veterníková, S. Kilpeläinen, M. Skarba, F. Tuomisto, V. Slugeň, J. Degmová, V. Sabelová and S. Sojak	278

Chapter 10: Experimental Techniques

Recent Developments and Future Plans for the Accelerator Based Slow Positron Facilities at AIST B.E. O'Rourke, N. Oshima, A. Kinomura, T. Ohdaira and R. Suzuki	285
The LEPTA Facility for Fundamental Studies of Positronium Physics and Positron Spectroscopy A.A. Sidorin, I. Meshkov, E. Ahmanova, M. Eseev, A. Kobets, V. Lokhmatov, V. Pavlov, A. Rudakov and S. Yakovenko	291
Scoring Analysis of Design, Verification and Optimization of High Intensity Positron Source (HIPOS) A. Zeman, K. Tuček, G. Daquino, L. Debarberis and A. Hogenbirk	297
Positronium Formation and Decay in Organic Scintillators for Neutrino Detection G. Consolati, D. Franco and D. Trezzi	306
Sealed ^{22}Na Sources for Positron Annihilation Lifetime Spectroscopy M. Yamawaki, Y. Kobayashi, K. Ito, M. Matsumoto, H. Ishizu, A. Umino, K. Hattori and Y. Watanabe	310
Design and Simulation of a Trap-Based Pulsed Slow Positron Beam C.Q. He, J.C. Wang, J. Zhu and S.J. Wang	314
Software for Digital Coincidence Doppler Broadening Setup M. Petriska, V. Sabelová, V. Slugeň, S. Sojak, M. Stacho and J. Veterníková	318
Positron Annihilation Spectroscopy at LEPTA Facility A.A. Sidorin, I. Meshkov, E. Ahmanova, M. Eseev, A. Kobets, V. Lokhmatov, V. Pavlov, A. Rudakov and S. Yakovenko	322
An AMOC System with Two Detectors Z.X. Li, R.S. Yu, X.Z. Cao, P. Zhang, X.B. Qin and B.Y. Wang	326
A New Scintillator Geometry for Positronium Time of Flight Measurement X.P. Jiang, X.Z. Cao, R.S. Yu, Z.X. Li, P. Zhang, X.B. Qin and B.Y. Wang	330
