

# Table of Contents

## Preface, Committees, Sponsors

## Chapter 1: Microstructure and Properties

<b>Powder Metallurgy Ti-6Al-4V Alloy with Wrought-Like Microstructure and Mechanical Properties by Hydrogen Sintering</b>	
M. Dunstan, Z.Z. Fang, M. Koopman and J. Paramore	3
<b>Increase of Fatigue Life of Titanium VT1-0 after Electron Beam Treatment</b>	
S.V. Konovalov, I. Panchenko, D. Kosinov, Y.F. Ivanov, V. Gromov and O. Semina	15
<b>Metal Injection Moulding of Ti-6Al-4V with Yttrium Addition</b>	
W. Limberg and T. Ebel	20
<b>Corrosion and Tribocorrosion Behavior of Ti-Alumina Composites</b>	
E. Gordo Odérez, R.G. das Neves, B. Ferrari, A. Jiménez-Morales, A. Lima, A.C. Alves, A.M.P. Pinto and F. Toptan	28
<b>Titanium Matrix Composites with High Specific Stiffness</b>	
E. Neubauer, L. Vály, M. Kitzmantel, D. Grech, A.R. Ortega, I. Montealegre-Meléndez and C. Arévalo	38
<b>Influence of Oxygen on the Fatigue Behaviour of Ti-6Al-7Nb Alloy</b>	
A.A. Hidalgo, T. Ebel, W. Limberg and F. Pyczak	44

## Chapter 2: Thermomechanical Processing

<b>Fabrication of <i>In Situ</i> TiC Reinforced Ti Matrix Composites by Thermomechanical Consolidation of TiH<sub>2</sub>/CNTs Powder Mixtures</b>	
Y.F. Zheng, X. Yao, Y.J. Su and D.L. Zhang	55
<b>Powder Consolidation of Titanium and Titanium Alloys by a Powder Compact Forging Process</b>	
M.T. Jia and B. Gabbitas	68
<b>Preparation of Titanium Alloy Parts by Powder Compact Extrusion of a Powder Mixture and Scaled up Manufacture</b>	
F. Yang, B. Gabbitas, A.P. Singh, S. Raynova, H.Y. Lu and B. Robinson	75
<b>Study of Titanium Metal Matrix Composites Reinforced by Boron Carbides and Amorphous Boron Particles Produced via Direct Hot Pressing</b>	
I. Montealegre-Meléndez, E. Neubauer, C. Arévalo, A. Rovira and M. Kitzmantel	85
<b>Evaluation of Press-and-Sinter Processing Parameters in Titanium Hydride Powder Metallurgy</b>	
S.L.G. Petroni, E.T. Galvani, C.A.A. Cairo, C.C. Girotto and V.A.R. Henriques	94

## Chapter 3: Metal Injection Moulding

<b>Titanium Metal Injection Molding - A Commercial Overview</b>	
M. Scharvogel	107
<b>Sintering Powder Metal Injection Molded (MIM) Titanium Alloys: In Vacuum or Argon?</b>	
S. Banerjee and C.J. Joens	113
<b>New Titanium Alloy Feedstock for High Performance Metal Injection Molding Parts</b>	
T. Tingskog, F. Larouche and L.P. Lefebvre	118
<b>Titanium Metal Injection Molding, a Qualified Manufacturing Process</b>	
J. Piemme and J.A. Grohowski	122
<b>Development of PEG/PMMA Based Binders for Ti-Metal Injection Moulding</b>	
M.D. Hayat and P. Cao	130
<b>A MIM Route for Producing Ti6Al4V-TiC Composites</b>	
R. Pelletier, L.P. Lefebvre and E. Baril	139

<b>Two-Component Metal Injection Moulding of Ti-6Al-4V and Stainless Steel Bi-Material Parts</b>	148
M. Mulser and F. Petzoldt	
<b>Metal Injection Moulding of Titanium Medical Components</b>	155
V. Friederici and T. Hartwig	
<b>Identification of Contamination Levels and the Microstructure of Metal Injection Moulded Titanium</b>	161
P. Ewart, H. Jull, R. Künnemeyer and P.N. Schaare	

## Chapter 4: PM Ti Alloys Including TiAl

<b>Metal Injection Moulding of Superelastic TiNi Parts</b>	
J.E. Bidaux, A.A. Hidalgo, H. Girard, M. Rodriguez-Arbaizar, L. Reynard, J. Chevallier, F. Aeby, J.C. Giachetto and E. Carreño-Morelli	173
<b>Microstructures and Mechanical Properties of Ti-43Al-5V-4Nb-Y Alloy Consolidated by Spark Plasma Sintering</b>	
Y.J. Su, Y.F. Zheng, D.L. Zhang and F.T. Kong	183
<b>Creep Properties of Ti-48Al-2Cr-2Nb Produced by Selective Electron Beam Melting</b>	
V. Juechter and C. Körner	190
<b>Processing and Characterization of Porous Ti<sub>2</sub>AlC Using Space Holder Technique</b>	
J. Gonzalez-Julian and M. Bram	197
<b>Microstructural Investigation of Routes for Gamma Titanium Aluminides Production by Powder Metallurgy</b>	
V.A.R. Henriques, E.T. Galvani, C.A.A. Cairo, M.L.A. Graça and A.C.S.M. Dutra	204
<b>Microstructure of Ti-45Al-5Nb and Ti-45Al-10Nb Powders</b>	
D. Laipple, A. Stark, F.P. Schimansky, B. Schwebke, F. Pyczak and A. Schreyer	214

## Chapter 5: Additive Manufacturing

<b>Mechanical Behaviour of Gas Nitrided Ti6Al4V Bars Produced by Selective Laser Melting</b>	
P. Franz, A. Mukhtar, W. Downing, G. Smith and B. Jackson	225
<b>Mechanical Properties of Ti-6Al-4V Fabricated by Electron Beam Melting</b>	
A. Kirchner, B. Klöden, T. Weißgärber, B. Kieback, A. Schoberth, D. Greitemeier and S. Bagehorn	235
<b>A Phase Field Approach for Modeling Melting and Re-Solidification of Ti-6Al-4V during Selective Laser Melting</b>	
P. Holfelder, J.M. Lu, C. Krempaszky and E.A. Werner	241
<b>Thermohydrogen Processing of 3D Screen Printed Titanium Parts</b>	
M. Jurisch, T. Studnitzky, O. Andersen and B. Kieback	251
<b>Processing and Characterization of Ti-6Al-4V Samples Manufactured by Selective Laser Melting</b>	
P. Sarria, Y. Torres, F.J. Gotor, E. Gutiérrez, M. Rodríguez, R. González, L. Hernández, E. Peón, H. Guerra and J.E. González	260

## Chapter 6: Powder Production

<b>Novel and Emerging Routes for Titanium Powder Production - An Overview</b>	
I. Mellor and G. Doughty	271
<b>Induction Plasma Technology Applied to Powder Manufacturing: Example of Titanium-Based Materials</b>	
R. Vert, R. Pontone, R. Dolbec, L. Dionne and M.I. Boulos	282
<b>Spherical Ti-6Al-4V Powders Produced by Gas Atomization</b>	
G. Chen, P. Tan, S.Y. Zhao, W.W. He and H. Tang	287
<b>Processing TiRO™ Powder for Strip Production and other Powder Consolidation Applications</b>	
C. Doblin, G.M.D. Cantin and S. Gulizia	293

**Characterization of Simultaneously Gas Atomized Ti/TiC Composite Powders**  
T.Y. Yeh and K.Y. Peng

302

## Chapter 7: PM Biomaterials

<b>Review of the Powder Metallurgical Production of Net-Shaped Titanium Implants</b> A. Laptev, A.P. Cysne Barbosa, N. Daudt and M. Bram	311
<b>Engineering Properties of Cellular Ti-6Al-4V Structures Fabricated by Electron Beam Melting</b> G. Smith, I. Brown, A. Kirchner, M. Ryan, P. McGavin and M. Sharp	318
<b>Design, Processing and Characterization of Materials with Controlled Radial Porosity for Biomedical and Nuclear Applications</b> P. Trueba, E. Chicardi, J.A. Rodríguez-Ortiz, J.J. Pavón, J. Cobos and Y. Torres	325
<b>Development of Ti-22Nb-xZr Using Metal Injection Moulding for Biomedical Applications</b> A.B. Nagaram and T. Ebel	334
<b>Electrophoretic Deposition of PEEK/45S5 Bioactive Glass Coating on Porous Titanium Substrate: Influence of Processing Conditions and Porosity Parameters</b> Y. Torres, C. Romero, Q. Chen, G. Pérez, J.A. Rodríguez-Ortiz, J.J. Pavón, L. Álvarez, C. Arévalo and A.R. Boccaccini	343
<b>CP Ti Fabricated by Low Temperature Extrusion of HDH Powder: Application in Dentistry</b> M. Balog, J. Viskic, P. Krizik, Z. Schauperl, M. Snajdar, Z. Stanec and A. Catic	351
<b>Spark Plasma Sintering of Titanium Alloys for Biomedical Applications</b> A. Molinari, M. Zadra, N. Vicente Jr., L. Facchini and F. Bucciotti	360

## Chapter 8: Cost Efficient and Specific Techniques

<b>Press and Sintering of Titanium</b> R. Frykholm and B. Brash	369
<b>Development of Low Cost PM Ti Alloys by Thermomechanical Processing of Powder Blends</b> S. Raynova, B. Gabbitas, L. Bolzoni and F. Yang	378
<b>A Detailed Experimental Assessment of Microwave Heating of Titanium Hydride Powder</b> Y.Y. Sun, S.D. Luo, Y.F. Yang, J.F. Sun and M. Qian	388
<b>Development of Ti-MMCs by the Use of Different Reinforcements via Conventional Hot-Pressing</b> C. Arévalo, M. Kitzmantel, E. Neubauer and I. Montealegre-Meléndez	400
<b>Shaping Strategies for Porous Ti Fabrication throughout Colloidal Chemistry</b> E. Molero, A.J. Sanchez-Herencia, R.G. das Neves, E. Gordo Odériz and B. Ferrari	406
<b>Processing, Microstructure and High Strain Rate Behaviour of Ti-6Al-4V Alloy Produced from a Blended Mixture Using Powder Compact Extrusion</b> A.P. Singh, B. Gabbitas, F. Yang and R. Torrens	413
