Preface, Acknowledgements, Sponsors and Committees

Chapter 1: PM Titanium Alloy Design and Processing Developments

Current Status of Ti PM: Progress, Opportunities and Challenges

W.H. Peter, W. Chen, Y. Yamamoto, R.R. Dehoff, T. Muth, S.D. Nunn, J.O. Kiggans, M.B. Clark, A.S. Sabau, S. Gorti, C.A. Blue and J.C. Williams

1

Application Status and Market Analysis of Non-Aero Titanium in China

L. Zhang, X.D. Wang and X.H. Qu

8

Pathways to Optimize Performance/Cost Ratio of Powder Metallurgy Titanium – A Perspective

Z.Z. Fang and P. Sun

15

Design of Low Cost High Performance Powder Metallurgy Titanium Alloys: Some Basic Considerations

M. Qian, Y.F. Yang, M. Yan and S.D. Luo

24

High Performance Titanium Alloy Compacts by Advanced Powder Processing Techniques

H. Miura, H.G. Kang and Y. Itoh

30

Rare Earth Element: Is it a Necessity for PM Ti Alloys?

Y. Liu, Y.B. Liu, B. Wang and H. Tang

41

Microstructure Development and Alloying Elements Diffusion during Sintering of Near- β Titanium Alloys

E.V. Pereloma, D.G. Savvakin, A. Carman, A. Gazder and O.M. Ivasishin

49

Scandium (Sc) Behavior in High Temperature Ti Alloys

D.H. Ping, S.Q. Wu and Y. Yamabe-Mitarai

57

Modification of Sintered Titanium Alloys by Hot Isostatic Pressing

L. Bolzoni, E.M. Ruiz-Navas, D.L. Zhang and E. Gordo

63

Preparation, Microstructure and Properties of Ti-6Al-4V Rods by Powder Compact Extrusion of Powder Mixture

F. Yang, D.L. Zhang, H.Y. Lu and B. Gabbitas

70

Porous Ti-6Al-4V Alloy Prepared by a Press-and-Sinter Process

H.L. Bi, C.Z. Yu, P. Cao and Y.H. He

76

Comparison of Blended Elemental (BE) and Mechanical Alloyed (MA) Powder Compact Forging into Ti-6Al-4V Rocker Arms

M.T. Jia, D.L. Zhang and B. Gabbitas

82

Enhanced Sintering of Pre-Alloyed Binary TiAl Powder by a Small Addition of Iron

Y. Xia, G.B. Schaffer and M. Qian

89

Chapter 2: Powder Production

Titanium Powder from the TiRO™ Process

C. Doblin, A. Chryss and A. Monch

95

Fundamental Reactor Design Considerations for Reducing $TiCl_4$ Metallothermically to Produce Ti Powder

D.S. van Vuuren

101

A Novel Process for Making Spherical Powders of High Nb Containing TiAl Alloys

X. Lu, L.P. Zhu and X.H. Qu

111

Chapter 3: Effect of Impurities

Role of Surface Contamination in Titanium PM

O.M. Ivasishin, D.G. Savvakin, M.M. Gumennyak and O.B. Bondarchuk

121

Effects of Lubrication on the Powder Metallurgy Processing of Titanium

J. Lou, B. Gabbitas and D.L. Zhang

133

Effect of Contaminants on Sintering of Ti and Ti-6Al-4V Alloy Powders in an Argon-Back-Filled Graphite Furnace

C.Z. Yu, P. Cao and M.I. Jones

139

Chapter 4: Metal Injection Moulding of Titanium

Metal Injection Moulding of Low Interstitial Titanium	
A.T. Sidambe, F. Derguti and I. Todd	145
Metal Injection Moulding of Titanium and Titanium-Aluminides	
T. Ebel, O. Milagres Ferri, W. Limberg, M. Oehring, F. Pyczak and F.P. Schimansky	153
Design Strategy of Binder Systems for Ti Injection Moulding	
G. Wen and P. Cao	161
A Study of Polyvinyl Butyryl Based Binder System in Titanium Based Metal Injection Moulding	
G. Thavanayagam, D.L. Zhang, K.L. Pickering and S. Raynova	167
Debinding Kinetics of a Water Soluble Binder System for Titanium Alloys Metal Injection Moulding	
G. Chen, G. Wen, N. Edmonds, P. Cao and Y.M. Li	174
Removal of the Water Soluble Binder Components from Titanium and Titanium Alloy Powder Compacts Produced by MIM	
P. Ewart, D.L. Zhang and S. Ahn	181
Evaluation and Analysis of Distortion of Complex Shaped Ti-6Al-4V Compacts by Metal Injection Molding Process	
S. Virdhian, T. Osada, H.G. Kang, F. Tsumori and H. Miura	187

Chapter 5: Biomedical Titanium Alloys

A Brief Review of Biomedical Shape Memory Alloys by Powder Metallurgy	
A. Biesiekierski, J. Wang and C. Wen	195
A Newly Developed Biocompatible Titanium Alloy and its Scaffolding by Powder Metallurgy	
C. Wen and Y.C. Li	201
Biomedical Ti-24Nb-4Zr-7.9Sn Alloy Fabricated by Conventional Powder Metallurgy and Spark Plasma Sintering	
S.B. Guo, C.B. Cai, Y.Q. Zhang, Y. Xiao and X.H. Qu	208
Fabrication of Ti14Nb4Sn Alloys for Bone Tissue Engineering Applications	
K. Mediaswanti, V.K. Truong, J. Hasan, Y.C. Li, C. Wen, E.P. Ivanova, C.C. Berndt, F. Malherbe and J. Wang	214
Direct Metal Laser Sintering of a Ti6Al4V Mandible Implant	
I.A. Aziz, B. Gabbitas and M. Stanford	220
Selective Laser Melting of Low-Modulus Biomedical Ti-24Nb-4Zr-8Sn Alloy: Effect of Laser Point Distance	
L.C. Zhang and T. Sercombe	226
Structural Characteristics and Mechanical Properties of Biomedical Porous Ti-10Mo Alloy Fabricated by Selective Laser Sintering	
F.X. Xie, X. Lu, X.B. He and X.H. Qu	234
Nanoscale SiO₂/ZrO₂ Particulate-Reinforced Titanium Composites for Bone Implant Materials	
Y.C. Li, C. Han, X.K. Zhu, C. Wen and P. Hodgson	242
Preparation of Titanium/Strontia Composite by Powder Metallurgy for Biomedical Application	
Y. Wang, C. Wen, P. Hodgson and Y.C. Li	248
Mechanical Property and Microstructure of Ti-Ta-Ag Alloy for Biomedical Applications	
M. Wen, C.E. Wen, P. Hodgson and Y.C. Li	254

Chapter 6: Titanium Composites

Multi-Walled Carbon Nanotubes Reinforced Titanium Composites via Powder Metallurgy Process	
K. Kondoh, T. Threrujirapapong, S. Bin, H. Imai, S.F. Li, J. Umeda and B. Fugetsu	261
Microstructure and Mechanical Properties of Ti-ZrO₂ Composites Fabricated by Spark Plasma Sintering	
H. Tsukamoto, T. Kunimine, M. Yamada, H. Sato and Y. Watanabe	269

Effects of Raw Powder Morphology and Size on Tensile Properties of SPS-Consolidated TiB/Ti Composites
A. Ota, M. Yamazaki and H. Izui

276

Chapter 7: Forging and Equal-Channel Angular Pressing of Titanium

Characteristics of Powder-Rolled and Sintered Sheets Made from HDH Ti Powders

N.K. Park, C.H. Lee, J.H. Kim and J.K. Hong

281

Tensile Properties of Ti-6Al-4V Discs Produced by Open Die Powder Compact Forging of Pre-Alloyed HDH Powders

S. Raynova, D.L. Zhang and B. Gabbitas

289

Ti-6Al-4V Recycled from Machining Chips by Equal Channel Angular Pressing

D.T. McDonald, P. Luo, S. Palanisamy, M.S. Dargusch and K. Xia

295

Ti-6Al-4V Billet Produced by Compaction of BE Powders Using Equal-Channel Angular Pressing

C. Haase, H.P. Ng, R. Lapovok and Y. Estrin

301

Chapter 8: Laser Cladding, Welding, Slip Casting, and other Processing Developments

The Effect of Laser Cladding Deposition Rate on Residual Stress Formation in Ti-6Al-4V Clad Layers

R. Cottam, K. Thorogood, Q. Lui, Y.C. Wong and M. Brandt

309

Weldability of Ti-6Al-4V Alloys Formed via Various Powder Consolidation Techniques

N. Hoye, H.J. Li, J. Norrish, R.J. Dippenaar and A. Dehghan-Manshadi

314

Characterization and Mechanism of α_2 -Ti₃Al and γ -TiAl Precipitation in Ti-6Al-4V Alloy Following Tungsten Arc Welding

L.M. Wang, H.C. Lin and C.J. Tsai

320

Optimisation of Performance of Dispersants in Aqueous Titanium Slips

Q. Xu, B. Gabbitas, S. Matthews and D.L. Zhang

330

Improvement of Ti Processing through Colloidal Techniques

R.G. Neves, J.A. Escribano, B. Ferrari, E. Gordo and A.J. Sanchez-Herencia

335

Resistance Heated Pressing (RHP): A Novel Technique for Fabrication of Titanium Alloys

A. Dehghan-Manshadi, N. Hoye, B.d. Jong and R.J. Dippenaar

341

Self-Propagating Synthesis of Ti-Al-C Powder Mixtures

M. Balog, R. Florek, M. Nosko and F. Šimančík

347
