Dedicated to My Friend

The Editor

Preface

Table of Contents

Powder Metallurgy Technology : An Introductory Overview

G.S. Upadhyaya 1

Advanced Screening to Produce High Performance Powder Metals

G. Riter 31

Pneumatic Transport of Bulk Powder: Design and Equipment

S. Manna, S.K. Satpati and S.B. Roy 43

Powder Metallurgy Compaction Press Selection: Risks and Opportunities

A. Grandi 65

Capabilities of Conventional and Advanced Powder Compacting Presses

G. Hinzmann 75

New Press Type EP with Electrical Servo Drive System

V.L. Lackner 83

Industrial Furnaces in Powder Metallurgy and their Process Technological Background

I. Cremer 91

Powder Injection Moulding: Process and Equipment

H. Walcher and M. Maetzig 111

Debinding Equipment for Powder Metal Injection Molded (MIM) Parts

S. Banerjee 135

Sintering Equipment for Powder Metal Injection Molded (MIM) Parts

S. Banerjee 145

**High Temperature Mechanical Properties Measurements of Sintered Products by Impulse
Excitation Technique**

J. Bracke 157

**An Integrated Approach to optimize the Interaction of Powder Concepts, Tooling and
Compaction Aspects in PM Component Manufacturing**

U. Engström, N. Solimanjad, K. Backer, R. Menzel and P. Rauch 165

Organisations of the Contributors
