

Table of Contents

Preface, Committees and Reviewers

Chapter 1: Progressive Technologies in Production of Powdered and Particulate Materials

Influence of Opoka Additive on Composite Cement Hydration I. Barauskas, R. Kaminskas, A. Stanaitis and I. Vilkaite	3
The Influence of Temperature and Nature of CaO Component on the Formation of α-C₂SH R. Gendvilas and R. Siauciunas	12
Hiding Power of Aluminum Metal Pigments Development in the Ball Mill Grinding Process T. Svěrák, P. Bulejko, K. Sikorova, P. Kejik, O. Kristof and M. Raudenský	19
The Synthesis of α-C₂S Hydrate Substituted with Al³⁺ Ions in Mixture with CaO/SiO₂ = 1.75 K. Baltakys, T. Dambrauskas and A. Eisinas	26
General Comment on Particle Size Analysis K. Jesenák, M. Kadlečíková and J. Breza	34
Analysis of Mixing of Particulate Material by a Single Blade P. Peciar, M. Peciar and R. Fekete	40
Research of Relations between Thermodynamic Quantities of Building Materials in Connection with Heat Dissipation M. Kušnerová, J. Valíček, V. Václavík, M. Harničárová and L. Gola	48

Chapter 2: Recycling of Powdered and Solid Wastes

Bio-Corrosion Resistance of Concretes Containing Antimicrobial Ground Granulated Blastfurnace Slag BIOLANOVA and Novel Hybrid H-CEMENT J. Strigáč, P. Martauz, A. Eštoková, N. Številová and A. Luptáková	57
Surface Analysis of Plastic Materials PET by XPS Method M. Kanuchova, Ľ. Kozáková and I. Brezani	65
Influence of High Dosage of Specific C&DW Micro-Fillers on the Fluidity of Concrete A. Sicakova, K. Urban and M. Draganovska	71
Steel Slag as a Substitute for Natural Aggregate in the Production of Concrete V. Václavík, T. Dvorský, V. Šimíček, M. Ondová, J. Valíček, M. Kušnerová and L. Gola	77
The Ability of Slag-Portland Cement Composites to Withstand Aggressive Environment M. Kovalcikova, A. Eštoková, A. Luptáková and J. Strigac	88
Alkali Activation of Blast Furnace Slag by Various Types of Activators P. Mec, J. Boháčová, J. Koňářík and P. Závorský	94
Utilization of Crushed Glass Waste in Concrete Samples Prepared with Coal Fly Ash J. Junak	102
Fly Ash Incorporation into the Concrete Composites in Order to Improve their Environmental Performance V. Ondrejka Harbulakova, A. Eštoková, A. Luptáková and P. Purcz	108
Studies on Concrete Incorporating Copper Slag as a Fine Aggregate E. Terpakova	114
Agglomeration Technologies of Processing Powder Wastes M. Peciar, R. Fekete and P. Peciar	121
Development of Fly-Ash Based Hydraulic Backfilling Technology for the Final Closure of Underground Mines J. Fajtli, J. Böhm, G. Mucsi, I. Gombkötő and R. Weisz	130
Mechanical Properties of Mortars Prepared by Alkali Activated Fly Ash Coming from Different Production Batches M. Špak and P. Raschman	140
Characterization of Cellulosic Fibres Properties for their Using in Composites V. Hospodarova, E. Singovszka and N. Številová	146

Role of Key Factors of Particulate Components in Biocomposites N. Številová, J. Cigasova and I. Schwarzova	153
The Change of Swelling of Pulp Fibres under Recycling A. Geffert, J. Geffertova, N. Številová and B. Seman	161

Chapter 3: Atmospheric and Indoor Particulate Matter

Chemical Composition of PM₁₀, PM_{2.5}, PM₁ and Influence of Meteorological Conditions on them in Zilina Self-Governing Region, Slovakia D. Ďurčanská and D. Jandačka	171
Measuring of Outdoor and Indoor Particulate Matter Concentrations in Village of Jasov S. Vilčeková, J. Kubinova and E. Kridlova Burdova	182
Atmospheric Deposition of Solid Particles in the Area of Kosice J. Hančulák, T. Kurbel, E. Fedorová, J. Briančin, O. Šestinová, L. Findoráková and T. Špaldon	188
Particulate Matters Propagation by the Surface Winning K. Lukáčová, M. Badida, M. Moravec and P. Liptai	197

Chapter 4: Environmental Aspects of Processing and Using of Raw and Bulk Materials

Removal of Cu(II) Ions from Aqueous Solutions by Adsorption onto Natural Bentonites Z. Melichová and M. Handzušová	205
Environmental Assessment of the Concrete Based on Blast Furnace Slag M. Ondová and V. Vaclavik	213
Activated Zeolite and Magnesite as Potential Reactive Materials for Passive Acidic Groundwater Treatment Technology A. Fedoročková, G. Sučík and P. Raschman	221
Elimination of Heavy Metals from the Material of Sludge Bed Slovinky Ľ. Kozáková, M. Zelenák, T. Bakalár and F. Zelenák	228
Study of Precipitates from Mine Water after Defrosting and Oxidation M. Balintova, Š. Demcak, M. Holub and M. Hurakova	234
The Effect of Sediment Grain Size on Heavy Metal Content in Different Depth in Water Reservoir Ruzin, Slovakia E. Singovszka, N. Junakova and M. Balintova	240
Determination the Availability of Chromium from Powdered Cement Composites Containing Blast Furnace Slag J. Oravec and A. Eštoková	246
Hybrid Sorption and Microfiltration Characteristics of Zeolite Š. Sabo, T. Bakalár, M. Búgel and H. Pavolová	252
