

Table of Contents

Preface

Notation

Table of Contents

1. Introduction

1.1 Precision Dies. 1.2 The Die Expansion Method.	1
1.3 Scope of Method	3

2. Die Container Design for Monoplex Dies

2.1 The Die Container	5
2.2 Die Expansion	6
2.3 Design Criteria. 2.4 Monoplex Design	9

3. Multiplex Die Containers

3.1. Introduction	29
3.2 Duplex Die Containers	30
3.3 Triplex Die Containers	39
3.4 Quadruplex Die Containers	45
3.5 <i>N-Plex</i> Die Containers	51
3.6 Radial Interferences and Diameters of Cylinders in Multiplex Dies	58
3.7 Force-Fit Loads in Cylinder Assembly	64
3.8 Effects of Die Container Parameters	65
3.9 Die Geometric Constants for Higher Order <i>n-plex</i> Dies	72
3.10 Total Elimination of Die Expansion	75

4. Application to Processes

4.1 Introduction. 4.2 Die Geometric Constant as a Function of Die Diameter Ratio	83
4.3 Maximum and Allowable Die Stresses. 4.4 Design Procedure for Completely Closed Cavity Dies	89
4.5 Impact Extrusion Dies	98
4.6 Conical Converging Dies	108
4.7 Direct Extrusion Dies	111
4.8 Indirect Extrusion Dies	119
4.9 Wire/Rod Drawing Dies	123
4.10 Tube Drawing	126

5. Tube Drawing

5.1 Introduction. 5.2 Theoretical Analysis	135
5.3 Effects of Die Parameters	142
5.4 Design Procedure	145
5.5 Application to a Typical Design Problem	146

6. Die Production Cost

6.1 Introduction. 6.2 Assumptions	153
6.3 Die Production Cost Function	154

6.4 Cost of Press-Fitting of Cylinders	169
6.5 Cost of Die Material. 6.6 Die Selection Criteria	170
6.7 Procedure for Selection of Die Container	171
6.8 Case Study	173

Exercises
