Preface, Committees and Sponsors

Chapter 1: Cutting Tools

Detail Study and Analysis of Durability for Selected Cutting Materials According to Taylor's Theory J. Duplák, M. Čuma and M. Kormoš	3
Improvement of Working Capacity of Carbide Tools for Machining Rail Wheel Pairs A.S. Vereschaka, M.Y. Kulikov, A.A. Vereschaka, A.V. Florov, A.Y. Popov and S. Maung	9
Tool Life and Wear Mechanism of Coated Si₃N₄ Ceramic Tools in Turning Grey Cast Iron V.V. Kuzin and S.N. Grigoriev	14
Finishing Methods of Tools Functional Surfaces I. Lukovics and J. Čop	18
Shape Investigation of Worn Cutting Inserts with Utilization of Active Triangulation L. Morovič, J. Vagovský and I. Buranský	22
Comparison of Round Insert's Lifetime when Milling Inconel 718 I. Mrkvica and M. Janoš	26
Experimental Research of Cutting Performance and Quality Abilities of Modern Drilling Tools B. Palásti-Kovács, S. Sipos and I. Szalóki	32
Cutting Tool Life in Machining at Various Speeds Z. Pálmay	38
Influence of the Lead Angle from the Vertical Axis Milling on Effective Radius of the Cutter J. Peterka and P. Pokorný	44
Wear Rate of CBN Cutting Tool in Hard Turning of 100Cr6 Bearing Steel L. Ráczkövi	50
Development of Technological Means for Formation of Multilayer Composite Coatings, Providing Increased Resistance of Carbide Tools, for Different Machining Conditions V.P. Tabakov and A.S. Vereschaka	55
Development of Assisted Filtered Cathodic Vacuum Arc Deposition of Nano-Dispersed Multi-Layered Composite Coatings on Cutting Tools A.A. Vereschaka	62
Improving the Efficiency of the Cutting Tool Made of Ceramic when Machining Hardened Steel by Applying Nano-Dispersed Multi-Layered Coatings A.S. Vereschaka, S.N. Grigoriev, V.P. Tabakov, E.S. Sotova, A.A. Vereschaka and M.Y. Kulikov	68

Chapter 2: Machining Processes

Applying Projective Geometry in Design of Worm Manufacturing Z. Balajti and J. Ábel	77
The Role of Polymer Binder in Ceramic Injection Moulding D. Bleyan and B. Hausnerová	82
Environmentally Conscious Manufacturing: The Effect of Metalworking Fluid in High Speed Machining J. Hricova	89
Machining of Non-Homogeneous Composite Material with Natural Fibers Reinforcement and HDPE Matrix Z. Hutyrová, J. Zajac and V. Fečová	95
Precision Machining and Optimisation of Cutting Conditions J. Madl	100
Precision Assembly Process with Augmented Reality Technology Support J. Novak-Marcincin, J. Barna and J. Torok	106

Health Effects from Occupational Exposure to Metalworking Fluid Mist P. Semanová and M. Kučera	112
Experimental Investigation of Tool Breakage in Micro Drilling of EN AW-5083 Aluminium T. Szalay, K. Patra and B.Z. Farkas	119
Static-Stiffness Analysis of a Roll-Bending Machine of High-Power A. Szilágyi, G. Takács and B. Barna	125
Determination of the Chip Width and the Undeformed Chip Thickness in Rotational Turning I. Sztankovics and J. Kundrák	131
Advanced Materials in Sheet Metal Forming M. Tisza	137
Preliminary Study of Ozone Utilization in Elimination of Bacterial Contamination in Metalworking Fluids K. Gerulova, E. Buranská, O. Tatarka and Z. Szabova	143
Cutting Data Influence on Cutting Forces and Surface Finish during Sintered Carbide Turning W. Zębala and R. Kowalczyk	148

Chapter 3: Hard Machining

Study of the Effect of the Cutting Force Decomposition on Machined Surface when Hard Turning J. Beňo and I. Maňková	157
Finite Element Analysis of Orthogonal Hard Turning with Different Tool Geometries B.Z. Farkas	163
Hard Cutting and Diamond Burnishing of 100Cr6 Steel Bearings J. Liska, K. Liska and J. Kodácsy	169
Effect of Workpiece Hardness on Surface Microgeometry when Hard Turning with Ceramic Inserts I. Maňková, J. Beňo and M. Vrabel'	176
Precision Milling of Hardened Steel with CBN Tools A. Matras, W. Zębala and R. Kowalczyk	182
Hardened Steel Turning by Means of Modern CBN Cutting Tools Ł. Ślusarczyk and G. Struzikiewicz	188
Study of Elastic Deformations in Hard Turning A. Mičietová, M. Neslušan and I. Mrkvica	194

Chapter 4: Abrasive Machining

Detection of Surface Damage after Grinding of Large Case-Hardened Bearing Rings M. Čilliková, M. Neslušan, K. Kolařík and M. Mičúch	205
Research of Grinding Material Tools by Modern Grinding Wheels J. Čop and I. Lukovics	211
Simulation of Grinding Process of Polycrystalline Superhard Materials A.I. Grabchenko, V.A. Fedorovich, I. Pyzhov, V. Fadeev, E. Babenko and V. Klimenko	217
Technological Method for the Finishing Process of Fusible Alloy M.U. Kulikov, V.E. Inozemtcev and M.N. Oo	224
Norton Vitrium³ – Revolutionary Grain Adhesion S. Kiss	229
Burr Formation in Metal Cutting Operations and some Deburring Methods J. Kodácsy and A. Szabó	235
Application of Superfinishing to Curved Surfaces K. Miura, T. Yamada, M. Takahashi and H.S. Lee	241
The Influence of Cutting Conditions on Surface Roughness during Steel X38CrMoV5 Grinding M. Novák and N. Naprstkova	247

New Ways at the Fine Grinding M. Novák	255
Goodness Indicator and Technological Optimization of Honing O. Szabó	261
High Accuracy Honing of Polygon Surfaces of Bores O. Szabó	266
Development of Cutting Technology in Strong Alkaline Water I. Tanabe, Y.H. Soe, T. Iyama and M. Shibuyta	272

Chapter 5: Non-Conventional Machining

Integral Characteristics of Triangulation 3D Models of Products A.I. Grabchenko, V.L. Dobroskok, Y.N. Garashchenko and L.N. Abdurajimov	281
Influence of Welding Parameters to Quality of Welds from Structural Steel M. Hatala, I. Orlovský and S. Radchenko	287
Precision Manufacturing Process of Parts Realized by FDM Rapid Prototyping L. Novakova-Marcincinova, J. Novak-Marcincin and M. Janak	292
Molecular Dynamics Modelling of Nanometric Cutting A.P. Markopoulos and K.A.L. Kalteremidou	298
Effect of Load Energy on the Form of the Gap at Waterjet Cutting Z. Maros	304
Generation of Microelectrodes for Micro EDM K. Miura, S.I. Kohmo, T. Yamada and H.S. Lee	310
Is there a Limit to Nanoscale Mechanical Machining? A.O. Oluwajobi and X. Chen	316
Laser Micro-Machining and Temperature Field Simulation L. Sýkorová, O. Šuba and J. Knedlova	322

Chapter 6: Analysis of Surfaces

Influence of Tool Path Orientation on the Surface Roughness when End Ball Milling Rounded Surfaces J. Beňo, B. Mikó, I. Maňková and M. Vrabel'	329
Investigation of Surface Roughness while Ball Milling Process O. Bílek, D. Sámek and O. Šuba	335
Surface Roughness after Machining and Influence of Feed Rate on Process R. Čep, A. Janásek, J. Petru, M. Sadilek, P. Mohyla, J. Valíček, M. Harničárová and A. Czán	341
Coherencies of Temperature and Surface Roughness by Milling Procedure V. Fečová, P. Michalík, J. Zajac, E. Hanisko and J. Zajac	348
Machining and its Influence to Surface Quality of Machine Parts F. Holesovsky, M. Novák, M. Lattner and T. Vyslouzil	354
Comparison of Theoretical and Real Surface Roughness in Face Milling with Octagonal and Circular Inserts C. Felhő and J. Kunderák	360
Surface Roughness Modeling and Prediction by ANN when Drilling Udimet 720 M. Vrabel', I. Maňková and J. Beňo	366
Effect of the Working Diameter to the Surface Quality in Free-Form Surface Milling B. Mikó and J. Beňo	372
Comparison of Roughness and Profile between ELID and Ground Surfaces M. Novák, H. Kasuga and H. Ohmori	378
Improving the HSC Linear Motor Milling Machine Contouring Accuracy Z. Pandilov and V. Dukovski	384
Surface Integrity of Metal Spun Parts P. Šugár, J. Šugárová and J. Petrovič	391
PMMA Surface Structure within CO₂ Laser Micro-Machining L. Sýkorová, O. Šuba and I. Lukovics	397

Effects of Technological Parameters on the Surface Texture of Burnished Surfaces G. Varga	403
Research of Surface Finish during Titanium Alloy Turning W. Zębala, J. Gawlik, A. Matras, G. Struzikiewicz and Ł. Ślusarczyk	409

Chapter 7: Machining Accuracy

Trends in Precision Manufacturing Based on Intelligent Design and Advanced Metrology M.N. Durakbasa, G. Bas, J.M. Bauer and G. Poszvek	417
Verification of Manufacturing Accuracy of Mathematically Defined Shaped Surfaces on 3D CNC Milling Machine J. Král' and J. Král'	423
Finite Element Investigation of Acetabular Cups Used During Revisionist Surgery R. Monostori	431
Contact Measurement of Flatness of Parts with Low Rigidity M. Kritikos Samardziova, M. Kováč and M. Necpal	437
Dependence of Shape Deviations and Surface Roughness in the Hardened Steel Turning G. Struzikiewicz and T. Otko	443

Chapter 8: Process Modelling and Simulation

Up to Date Mathematical Model for Analysing of Cylindrical Worm Power with Bevel-Gear Z. Balajti and M.N. Toth	451
Mathematical Simulation of Kinematics of Vibrating Boiling Granular Medium at Treatment in the Oscillating Reservoir V.A. Fedorovich and A.V. Mitsyk	456
Tool Profile Generation by Boolean Operations on Ball Nuts G. Hegedűs and G. Takács	462
ANFIS Building Methodology for the Task of Cutting Tool Condition Diagnosis Using Matlab Software V.O. Zaloha, R.M. Zinchenko and A.V. Honshchuk	466
Determination of the Mechanical Properties of Thermally Treated Recycled Glass Based on Nano-Indentation Measurement and FEM Supported Simulation M. Jamal and M. Morgan	472
Advanced CNC Programming Methods for Multi-Axis Precision Machining S.N. Grigoriev, A.A. Kutin and M. Turkin	478
Micropositioning System with Flexure Hinges for Microfactories D. Lates, S. Noveanu and V.I. Csibi	485
Achievement of Precision Accuracy of Openings in Gas Turbine Engines Details M.Y. Kulikov, R.E. Rygin and D.A. Nechaev	491
Stress Modelling in Curved Parts of Short Fibres Reinforced Plastic Products O. Šuba, L. Sýkorová and O. Bilek	497
Investigation of Residual Stresses in Case of Hard Turning of Case Hardened 16MnCr5 Steel G. Szabó and J. Kundrák	501
Validation of 3D Finite Element Simulation of Chip Removal Process Performed by Unique Insert Geometry M. Takács	505
Neural Network Assisted Particle Swarm Optimization of Machining Process U. Zuperl and F. Cus	511

Chapter 9: Production Processes

On the Multi-Level Unit Load Formation Model B. Illés and G. Bognár	519
---	-----

Flexible Manufacturing System for Drawingless Manufacturing P. Košťál and D.R.D. Sobrino	527
On the Development of Machine Controller Systems with Enhanced Facility for Process Monitoring Integration M. Morgan, J.J. Moruzzi, D.R. Allanson and X. Chen	533
Sensitivity Analysis of Road Transport by Sensibility of Production-Function B. Illés and J. Németh	539
Introducing a Risk-Management Concept for Holonic Manufacturing Supply Chains R. Skapinyecz and B. Illés	547
Verification of Process Fluids in Mass Production J. Zajac, D. Mital and P. Michalik	554
