

Table of Contents

Preface, Committees

Assessment of Tool Life and Wear Intensity of CBN Tools in Hard Cutting J. Kundrák, A.P. Markopoulos and T. Makkai	1
Molecular Dynamics Study of Abrasive Grain Morphology and Orientation in Nanometric Grinding A.P. Markopoulos, N.E. Karkalos and D.E. Manolakos	7
Cutting Force during Grinding Determined by Regression Analysis and Genetic Algorithms P. Kovač, V. Pucovsky, M. Gostimirović, B. Savković, L. Šooš and D. Ješić	13
Modelling and Analysis of Relationship between Cutting Parameters Surface Roughness and Cutting Forces Using Response Surface Methodology when Hard Turning with Coated Ceramic Inserts I. Maňková, M. Vrabel, J. Beňo and M. Franková	19
Using Advanced CAM System in Modern Machining D. Djurica, M. Sekulić, D. Kramar, P. Kovač and M. Gostimirović	27
Identification and Analysis of Residual Stresses in the Axisymmetric Workpiece Existing before and after Machining T. Otko and W. Zebala	33
Identification of the Minimal Thickness of Cutting Layer Based on the Acoustic Emission Signal J. Gawlik, J. Krajewska-Śpiewak and W. Zebala	39
Morphology of the Chip Formation at Orthogonal High Speed Milling of AISI H13 J. Rehoř, J. Fulemová, K. Monkova and P. Monka	45
Sampling Based Assessment of the Free-Form Milling Strategies J. Beňo, I. Maňková, D. Draganovská and P. Ižol	51
Analysis of Micro-Milling of Hardened Tool Steel B. Sredanovic, G. Globocki Lakic, D. Kramar and J. Kopac	57
The Formation and Behaviour of Residual Stresses with Finished Surfaces F. Holešovsky, R. Lattner, M. Novák and M. Dian	63
Numerical Investigation of the Influence of Tool Rake Angle on Residual Stresses in Precision Hard Turning J. Kundrák, G. Szabó and A.P. Markopoulos	68
Influence of Cutting Fluid Conditions and Cutting Parameters on the Chip Form in Turning of Titanium and Steel Alloys B. Słodki, G. Struzikiewicz and Ł. Ślusarczyk	74
An Analytical Study of Energy Partition in Grinding M. Gostimirović, V. Pucovsky, P. Kovač, M. Sekulić and B. Savković	80
Influence of Cutting Data on the Thin Wall Deformation in Milling of Difficult to Cut Materials Ł. Ślusarczyk and A. Matras	86
Characterization and Utilization of the Intelligent Decision Making Methodology to Improve Quality and Precision in the Machining Process G. Bas, N.M. Durakbasa, J. Bauer and G. Poszvek	92
Possibility to Increase the Life Time of Surfaces on Parts by the Use of Diamond Burnishing Process G. Varga	100
The Influence of Tool Stiffness on the Dimensional Accuracy in Titanium Alloy Milling W. Zebala	108
Application of Taguchi Method to Optimization of Cutting Force and Temperature during Turning of Difficult to Cut Materials G. Struzikiewicz, W. Zebala and K. Rumian	114
Surface Quality Prediction in Case of Steep Free Form Surface Milling B. Mikó	119
Performance of Norton Quantum Grinding Wheels M. Neslušan, J. Baďurová, A. Mičietová and M. Čilíková	125

Influence of Technological Parameters on Surface Quality of Injection-Molded Parts J. Čop, V. Pata and O. Bilek	131
A Study on the Grindability of Engineering Plastics and Metals O. Bilek, J. Baďurová and J. Čop	137
Dynamic Programming Approach in the Optimization of Tool Life in Turning Process of Duplex Stainless Steel DSS A. Metelski, S. Krile, W.R. Maruda, S. Legutko and G. Królczyk	143
Aluminum-Based MMC Machining with Carbide Cutting Tool I. Szalóki, S. Sipos and Z.J. Viharos	149
Influence of Machining Parameters on Machine Tool Loads at Rotary Ultrasonic Machining of Cubic Boron Nitride M. Kuruc, J. Vagovský and J. Peterka	155
Surface Roughness Prediction in Face Milling by Special Tools C. Felhő and J. Kundrák	161
Application of Value Stream Mapping at Flexible Manufacturing Systems P. Tamás	168
Stiffness of Technological System and Final Accuracy of Turned and Milled Parts Z. Murčíková and K. Vasilko	174
Influence of Machining Parameters on Surface Topography of Cubic Boron Nitride at Rotary Ultrasonic Machining M. Kuruc, M. Kusý, V. Šimna and J. Peterka	180
The Grinding Fluid Influences on Surface Roughness Using Acoustic Emission H. Liu, L. Zhao, O. Bafakeeh and I.D. Marinescu	186
Choosing Appropriate Interatomic Potentials for Nanometric Molecular Dynamics (MD) Simulations A.O. Oluwajobi and X. Chen	194
On Atomic Surface Roughness Evaluation A.O. Oluwajobi and X. Chen	200
ELID Fine Grinding of SiC Bearing Rollers L. Zhao, O. Bafakeeh, H. Liu and I.D. Marinescu	204
Grinding of the Alloy INCONEL 718 and Final Roughness of the Surface M. Novák, N. Naprstkova and H. Ohmori	212
Influence of Grinding Wheel Dressing on the Roughness of Final Surface and Cutting Force during GGG60 Grinding M. Novák, N. Naprstkova and H. Kasuga	218
Precision Sculptured Surface CNC Machining Using Cutter Location Data N.A. Fountas, N.M. Vaxevanidis, C.I. Stergiou and R. Benhadj-Djilali	224
Comparison of Sintered Carbide Shafts Turning with PCD and CBN Tools A. Matras and R. Kowalczyk	234
The Influence of Copy Strategy on the Tool Life of Ball End Mills and Achieved Surface Roughness T. Vopát, J. Peterka, V. Šimna and I. Buranský	240
Simulation of the Transient Temperature Field when Laser Machining Polymeric Materials V. Pata, L. Sýkorová, O. Šuba and M. Kubišová	246
Influence of Various Cutting Fluids on Energy Consumption during Turning M. Bachratý, M. Tolnay, P. Kovač and V. Pucovsky	252
