

# Table of Contents

## Preface

### Production and Characterization of Silicon Nitride Powders

G. Schwier, G. Nietfeld and G. Franz 1

### The Crystal Chemistry of Nitrogen Ceramics

D.P. Thompson 21

### Calculated Phase Equilibria in Silicon Nitride Systems

J. Weiss and H.L. Lukas 43

### Compounds and Solid Solutions Occurring in Nitride-Oxide Systems

D.S. Yan, T.S. Yen and W.Y. Sun 58

### Reaction Bonded Silicon Nitride

F.L. Riley 70

### Microstructural Development in Silicon Nitride Ceramics

C.J. Hwang and T.Y. Tien 84

### A Large Scale Processing Inhomogeneity in Silicon Nitride Ceramics and Its Effect on Oxidation

D.R. Clarke 110

### Microstructure Development during Controlled Crystallization of M-Si-O-N Glass-Ceramics

T.R. Dinger 119

### Structure of Grain Boundary Phases in Silicon Nitride

D.A. Bonnell 132

### Atomic Structure of Interfaces in Silicon Nitride

J.Y. Laval and A. Thorel 143

### Thermo-Mechanical Properties of Silicon Nitride and Their Dependence on Microstructure

G. Ziegler 162

### Microstructural Effect on Creep of Silicon Nitride Ceramics

C.F. Chen and T.Y. Tien 204

### Electrical Properties of Silicon Nitride

H. Ohno and Y. Katano 215

### Silicon Nitride in Semiconductor Device Technology

M. Arienzo and W.A. Orr-Arienzo 228

### Silicon Nitride-Based Composites

S.T. Buljan and J.G. Baldoni 249

### Silicon Nitride Whisker Synthesis by Carbothermal Reduction of Silica

M.J. Wang and H. Wada 267

### Evolution of Applications of $\text{Si}_3\text{N}_4$ -Based Materials

D.W. Richerson and P.M. Stephan 282
