

Table of Contents

Preface, Conference Organization and Scientific Board

Chapter 1: Invited Lecture

Laser Centre ELI, Dolní Brezany

J. Koukal, L. Kostkova, M. Mazurova and J.L. Vitek

3

Construction of the First Footbridge Made of UHPC in the Czech Republic

P. Koukolík, J.L. Vitek, R. Brož, R. Coufal, M. Kalný, J. Komanec and V. Kvasnička

8

Chapter 2: Properties and Production Technologies of Concretes

Study of Properties of Concrete for Water-Tight Tunnel Lining

A. Hubáček, T. Jarolím and P. Macháňová

17

Diffusion of Chloride Ions in Ultra High Performance Concrete

D. Dobiáš and R. Pernicová

21

The Influence of Age and Temperature on the Bond Behaviour between Prestressing Strands and UHPC

D. Čítek, T. Mandlík, J. Kolísko, J.L. Vitek and S. Řeháček

25

Possible Synergism of High Temperature Fly Ash and Fluidized Bed Combustion Fly Ash in Cement Composites

D. Orsakova, R. Hela, P. Novosad and J. Valek

29

Effect of Lightweight Concrete Density on Bond Strength

J. Kadlec, I. Terzijski, F. Girgle and L. Zvolánek

33

Mechanical Properties of Cement Composites with Alternative Binders

K. Šeps and I. Broukalová

37

Measurement of Set Fibre-Concrete Homogeneity in Finished Steel Fibre-Concrete Structure of Segmental Tunnel Lining

L. Hobst, J. Vodička, P. Bílek and J. Vala

41

Influence of Recycled Aggregate Quality on Recycled Concrete

M. Šefflová and T. Pavlů

45

Testing of Concrete and Fibre Reinforced Concrete in Uniaxial Tension

M. Tipka and J. Vašková

49

Options for Improving the Workability of High Performance Concrete

M. Ženíšek, T. Vlach and L. Laiblová

53

Influence of Ground Clay Brick on the Properties of Fresh and Hardened Self Compacting Lightweight Concrete (SCLC)

S. Juradin and K. Grbeša

57

Environmental Assessment of Recycled Aggregate

T. Pavlů, V. Kočí and M. Šefflová

61

Influence of the Amount of Dispersed Suspension of Carbon Nano-Tubes on Physico-Mechanical Properties of Cement Mortar

T. Jarolím, R. Hela and M. Labaj

65

Numerical Simulation of Cohesion Influence of Textile Reinforcement on Bending Performance of Plates Prepared from High Performance Concrete (HPC)

T. Vlach, A. Chira, L. Laiblová, C. Fiala, M. Novotná and P. Hájek

69

Edit the Properties of the Fresh Concrete Admixing Additives and Steel Fibres

V. Suchánek and M. Slováček

73

Experimental Analysis of the Proposed High-Strength Concrete

V. Suchánek and M. Radouš

77

Possibilities of Nanoparticle Application in Concrete Technology

R. Hela and M. Labaj

81

Chapter 3: Research and Designing of Structural Elements from Concrete

Measuring the Deflection of Reinforced Concrete Slab B. Páleník, A. Stará, R. Kratochvíl and M. Zich	87
Application of Probabilistic Methods for the Assessment of Structural Load Bearing Capacity J. Doležel, M. Šomodíková, D. Lehký and D. Novák	90
Optimization of Pretensioned Steel Fiber Reinforced Concrete Beam J. Novák and A. Kohoutková	94
Design and Evaluation of the Method of Parameterization of the Force-Deflection Diagram of FRC M. Kovar and M. Foglar	98
Experimental Verification of Precast Dapped-End Beams M. Hasa and M. Zich	102
Fracture-Mechanical Parameters for Modeling of Quasi-Brittle Materials and Structures R. Pukl, T. Sajdlová, D. Novák and D. Lehký	106
Structural Design and Experimental Verification of Precast Columns from High Performance Concrete C. Fiala, J. Hejl, V. Tomalova, V. Bílek, T. Pavlu, T. Vlach, M. Volf, M. Novotna and P. Hájek	110
Concrete Precast Panel for Noise Barrier of New Generation V. Vacek, J. Kolísko, J. Tichý and R. Cvancigerová	114
Analytical and Statistical Evaluation of FRC Bending Tests Layouts A. Podstawka, M. Kovar, M. Foglar and V. Kristek	118
Experimental Research of Shrinkage in Thick Concrete Elements J.L. Vítek, D. Čítek and P. Tej	122
Analytical Description of Punching-Shear Resistance of Concrete Specimens Subjected to close Blast J. Stohr and M. Foglar	128
Theoretical and Experimental Research of a Frame Structure with Articulated Joints J. Witzany, D. Makovička, R. Zigler, T. Čejka, S. Urushadze and A. Polák	132
Testing the Long-Term Flexural Behaviour of FRC with Synthetic Fibres J. Fládr and I. Broukalová	136
Experimental Analysis of Reinforcement Corrosion on Bond Behaviour J. Bilčík and I. Holly	140
Fibre-Concrete Tubes in Pure Shear Mode L. Kadlec, V. Ráček, V. Kříštek and J.L. Vítek	144
Monitoring the Degradation of UHPC Boards with Textiles Armatures M. Kostelecká	148
Precast Floor Plates from Lightweight Concrete M. Hubertová and P. Hladík	152
Production and Properties of Functionally Graded UHPFRC Beams M. Rydval, P. Huňka and J. Kolísko	156
High-Performance Concrete for Thin-Walled Members P. Bíly, J. Fládr, A. Kohoutková, I. Broukalová and V. Brejcha	160
Field Testing of Concrete Members Subjected to Contact and Adjacent Blast R. Hajek, M. Kovar, M. Foglar, J. Pachman and J. Štoller	164
The Effective Cross-Section Thickness and its Effect on Shrinkage R. Hofírek and M. Zich	168
Developing Fire Resistant Construction for Tunnel Construction Using Lightweight Aggregate Concrete V. Junek, J. Kolísko, M. Kroc and I. Bradáčová	172
Analysis of Secondary Effects and Bond Behavior due Prestressing J. Laco, P. Pažma and J. Halvoník	177

Chapter 4: Technologies of Bridge Engineering

Bridge over Canal Laranjeiras, Laguna, Brazil R. Novák, J. Stráský, P. Kocourek and L. Šopík	183
Cable Stayed Bridge Avenida Prudente de Morais, Natal, Brazil R. Novak and P. Kocourek	187
Reconstruction of the Reinforced-Concrete Railway Bridge in km 3,668 – Argentinská of the Track Bubeneč – Holesovice in Prague J. Sýkora, M. Hacaperka, J. Lukeš and S. Rosenthal	191
Concrete Pavements on Bridges B. Slansky and J. Šrůtka	195
Effects of Creep and Shrinkage on an Integrated Arch Structure B. Slansky, R. Nečas and J. Stráským	199
Experimental Verification of Plan Curved Arch Structures D. Hochman, J. Trenz, R. Nečas and J. Stráským	203
Plate-Element Numerical Model of a Bridge across the Hostovsky Creek B. Slansky and M. Zich	207

Chapter 5: Codes, Standards, Certifications

Punching Resistance of Flat Slabs without Shear Reinforcement J. Hanzel, L. Majtánová and J. Halvoník	213
Calculation of the Minimum Reinforcement for Limitation of Crack Width According to Change of National Annex for ČSN EN 1992-1-1 J. Šmejkal and J. Procházka	217
Design of Flat Slabs Height L. Fillo, J. Labudková and J. Hanzel	221
Impact Testing of Concrete Using a Drop-Weight Impact Machine S. Rehacek, P. Hunka, D. Čítek, J. Kolisko and I. Simunek	225
Overall Reliability of the Concrete Columns in Case of Stability Loss V. Benko, P. Kendrický, M. Krizma, M. Kišac and I. Beleš	229
Punching Analysis of a Flat Slab with a Change in Elevation J. Nováček and M. Zich	233
