

Table of Contents

Preface, Committees

Chapter 1: Properties, Protection and Remediation of Wood Materials and Structures

Bonded Joints in Water-Repellent Timber Structures J. Daňková, T. Majstříková and P. Mec	3
Discoloration of Historic Wood after the Application of Nanotextiles M. Šmidtová and K. Kroftová	10
Unsuitable Mounting of Wooden Cladding to the Base Structure and its Consequences V. Kuplík, P. Hejtmánek and H. Najmanová	15
Coefficients of Transverse Contraction of the Wood Cell Constituents and their Effect on the Cell Behavior V. Hlavata, P. Kuklík and M. Hataj	20
Modulus Mapping and its Use to Determine the Effect Process of Drying on the Cells of Spruce Z. Prošek, J. Topič, P. Tesárek, V. Nežerka and V. Králík	25
Comparison of Modulus of Elasticity of Glued Laminated Timber P. Klapálek, Z. Prošek and V. Králík	29

Chapter 2: Materials and Technologies for Surface Treatment and for Surface Finish

Modification of Silica Gel by Nanosilica A. Peterová and P. Kotlík	35
Properties of the Superabsorbent Polymer in Cement Paste T. Otcovská, P. Bittnar and P. Padevčt	40
The Occurrence of Mold in Construction Materials before Inbuilt into New Building and Protection against this Type of Biodegradation P. Ryparová and Z. Ráková	44
Composition and Microstructure of Plasters in Convent of the Želiv Monastery (Czech Republic) P. Rezek, P. Martinec, J. Ščučka and T. Majstříková	51
Microscopy Measurement of Open Porosity as a Function of Hydrophobic Impregnation R. Pernicová	59
Water Vapour Resistance Factors of Three Wall Surface Finishing Š. Nenadálava, L. Balík, M. Rydval and T. Bittner	64
Development of Lightweight, Remediation Plasters and Study of their Moisture Behavior J. Hroudová, J. Zach, M. Sedlmajer and A. Korjenic	72
Volume Stability of Polymer-Silicate Based Materials Exposed to High Temperatures T. Melichar, J. Bydžovský and Á. Dufka	78
A Study of Crushed Glass as a Replacement for Cement in Cement Pastes J. Zahálková and P. Rovnaníková	86
Influence of Different Nanoparticles in Stone Silicon-Based Consolidant A. Peterová, S.G. Mayo, J. Polonský, V. Knotek and P. Kotlík	90
Impact of Relative Humidity on Modified Alkoxysilane Gels B. Benetková, A. Peterová, M. Slavikova and P. Kotlík	95

Chapter 3: Properties and Production Technologies of Concretes and Building Composites

The Behavior of Fly Ash in Concrete Mixture O. Zobal, P. Padevět, Z. Bittnar, L. Kopecký and V. Šmilauer	103
Influence of Carbon Nanotubes on Mechanical Properties of High Performance Concrete (HPC) T. Vlach, L. Laiblová, A. Kumar and A. Chira	107
Influence of Finely Ground Recycled Concrete on Microstructure of Cement-Based Composite Material J. Topič, Z. Prošek, J. Fládr, J. Trejbal, P. Tesárek and G. Karra'a	111
Influence of Gypsum Additive on the Formation of Tobermorite in Autoclaved Aerated Concrete E. Helanová, R. Drochytka and V. Černý	116
Sulfate Attack on Different Types of Concrete in Media Simulating Sewer System M. Vyšvařil, M. Rovnaníková and P. Bayer	122
Using Waste PUR Granules as an Alternative to Integrated Thermal Insulation in Ceramic Blocks V. Novák, J. Zach and M. Reif	128

Chapter 4: Reinforcing Components from Fibers and Textiles

Structural Studies of Nanofiber Membranes M. Havrlík and I. Klicmanová	137
Quasicontinuum Simulation of Nanotextile Based on the Microplane Model K. Mikeš and M. Jirásek	143
Influence of the Oxygen Plasma Treatments on Surface Wettability of Glass Micro Fibers Used as Reinforcement in any Mortars J. Trejbal, L. Kopecký, P. Tesárek and Z. Prošek	148
The Influence of Technology on the Quality Nanotextile I. Klicmanová and M. Havrlík	152

Chapter 5: Methods of Measurements, Experimental Determination and Testing

Experimental Determination of Concrete Resistance of Various Composition to Water and De-Icing Chemicals D. Kocáb, T. Komárková, M. Králíková, P. Misák and B. Moravcová	159
Experimental Determination of the Influence of an Air Entraining Additive on the Resistance of Concrete to Chemical Defrosting Agents D. Kocáb, P. Misák, M. Králíková and T. Komárková	165
Evaluation of Permeability Tests of Surface Layer of Concrete of Various Composition P. Misák, P. Pössl, D. Kocáb, I. Rozsypalová and T. Stavař	171
Design of Methodology for Non-Destructive Testing of Steel-Reinforced-Fiber-Concrete T. Komárková	179
Diagnosis of Myslinka Stone Railway Bridge T. Bittner, M. Hrabánek, Š. Nenadálova and J. Kolísko	186
Measuring of Equivalent Air Layer Thickness of Nanofibre Textiles M. Černohorský, P. Semerák and P. Tichá	192
Characterisation of Micoorganism from Individual Layers of the Building Envelope (ETICS) and Methods of their Sampling P. Ryparová and Z. Rácová	196
Long Term Measuring of Expansions and Contractions of Pre-Stressed Concrete Bridge Structure M. Vokáč, T. Bittner, P. Bouška, P. Klimeš and R. Šafář	201
The Properties of Historical Wrought Iron Tie Rods M. Králíková, P. Cikrle, P. Daněk, I. Bilíková and P. Misák	207
Repairs of Steel Structures after Long-Term Use in Aggressive Environment Š. Gramblička and T. Živner	213
