

# Table of Contents

## Technical Focus, Committees, Sponsors and Supporter

### I: Plenary and Keyword Lectures

<b>Dynamic Material Characterization Using Digital Image Correlation</b>	3
A. Gilat and J.D. Seidl	
<b>Present Status and Future Problems on the Impact Resistance Performance Design of Civil Engineering Protective Structures</b>	10
Y. Sonoda	
<b>Proton Bombardment in Mercury Target for Neutron Production - Impact Dynamics on Interface between Liquid and Solid Metals</b>	26
M. Futakawa	
<b>Thermal Processing History and Resulting Impact Response of a Hot-Formed Component with Tailored Properties – Numerical Study</b>	34
M.J. Worswick, R. George, A. Bardelcik, L. Ten Kortenaar and D. Detwiler	

### II: Dynamic Deformation and Constitutive Relations

<b>Dynamic Deformation Behaviors of High Performance Steels</b>	43
H.S. Shin, B.J. Tuazon, K.O. Bae, S.H. Lee, H.C. Yim, K. Choi and J.W. Lee	
<b>Filtering Effects of Periodic Structure in Water Hammer</b>	50
M. Nagai, K. Inaba, K. Takahashi and K. Kishimoto	
<b>Dynamic Tensile Response of Magnesium Nanocomposites</b>	56
Y. Chen, V.P.W. Shim and M. Gupta	
<b>Dynamic Tensile Characteristics of Nuclear-Grade Graphite IG-11</b>	61
T. Yokoyama and K. Nakai	
<b>Effect of High Loading Rate on SCC Behaviour of SUS304 Austenitic Stainless Steel</b>	67
A. Kumegai, Y. Tanabe and H. Suzawa	
<b>Strengthening of FCC Metals at High Strain Rates</b>	73
H. Couque	
<b>High Strain-Rate Compressive Behavior and Constitutive Modeling of Selected Polymers Using Modified Ramberg-Osgood Equation</b>	80
K. Nakai and T. Yokoyama	
<b>Quasi-Static and Dynamic Compressive Properties of AZ31 Magnesium Alloy Processed by Equal Channel Angular Pressing</b>	86
X. Yu, T. Suo, F. Zhao and Y.L. Li	
<b>Modelling of Formation of Adiabatic Shear Bands</b>	92
N. Bassim and J. Delorme	
<b>Identification Methods of Parameters for Johnson-Cook Constitutive Equation – Comparison</b>	97
M. Grzka, J. Janiszewski, L. Kruszka, E. Cadoni, D. Forni and G. Riganti	
<b>Dynamic Deformation Behavior of ECAPed AZ31 Magnesium Alloy</b>	104
H.T. Hu, F. Zhao, Y.G. Miao, T. Suo, Q. Deng and Y.L. Li	
<b>Experimental Analysis of Visco-Plastic Properties of the Aluminium and Tungsten Alloys by Means of Hopkinson Bars Technique</b>	110
L. Kruszka, M. Magier and M. Zielenkiewicz	
<b>Effect of Deflection Rate on Bending Deformation Behavior of Fe-Based Shape Memory Alloy</b>	116
K. Nishikori and T. Iwamoto	
<b>Dynamic Compression Test of CFRP Laminates Using SHPB Technique</b>	122
T. Kusaka, T. Kono, Y. Nomura and H. Wakabayashi	

<b>Effect of Pre-Fatigue Deformation under Humid Environment on Impact Tensile Properties in 7075 Aluminum Alloys</b>	128
M. Tsurudome, H. Yamada, N. Ogasawara and K. Horikawa	
<b>Impact Compressive Properties of Foamed Film with Closed Cell</b>	134
H. Yamada, R. Okui, N. Ogasawara, H. Kobayashi and K. Ogawa	
<b>A Study on Rate Sensitivity of Impedance in TRIP Steel during Deformation at Various Strain Rate under Two Kinds of Deformation Mode</b>	140
D. Inoshita and T. Iwamoto	
<b>Evaluation of Dynamic Deformation Properties of Metallic Materials with Different Crystal Structures Using Taylor Impact Test</b>	146
K.O. Bae, H.S. Shin, H. Huh, L.J. Park and H.W. Kim	
<b>Strain Rate Effects on Strain-Induced Martensitic Transformation and Electrical Resistivity of Deforming Stainless Steel</b>	152
H. Date	
<b>Dynamic and Quasi-Static Compressive Deformation Behaviour of Polyimide Foam at Various Elevated Temperature</b>	158
A. Yosimoto, H. Kobayashi, K. Horikawa, K. Watanabe and K. Ogawa	

### III. Numerical Simulations in Civil Engineering

<b>Mechanical Behavior of Polycrystalline Aluminum under Penetration with Extremely Large Loading Rates via Molecular Dynamics Simulation</b>	167
C.Y. Wu and Y.C. Wang	
<b>Concrete Material Models in LS-DYNA for Impact Analysis of Reinforced Concrete Structures</b>	173
M.A.K.M. Madurapperuma and K. Niwa	
<b>An Analytical Study on Dynamic Strength Evaluation of Perfobond Strip Shear Connectors</b>	179
S. Munemoto and Y. Sonoda	
<b>Improving Rebound Models in 3D Rockfall Simulation Codes Used for the Design of Protection Embankments</b>	185
D. Toe, S. Lambert, F. Bourrier and F. Berger	

### IV. Dynamic Behavior of Structures in Civil Engineering

<b>Behaviour and Design of Steel Columns Subjected to Vehicle Impact</b>	193
H.A.B. Al-Thairy and Y. Wang	
<b>Batter Pile Behavior Modeling Using Finite Difference Analysis</b>	199
C.Y. Chen and C.X. Tsai	
<b>Failure Behavior and Numerical Simulation of the Local Damage of Ultra High Strength Fiber Reinforced Concrete Subjected to High Velocity Impact</b>	205
S.B. Cheon, M. Beppu, Y. Sonoda and M. Itoh	
<b>Study on Dynamic Shear Resistance of RC Beams</b>	211
A. Somraj, K. Fujikake and B. Li	

### V. Dynamic Failure and Fracture

<b>Energy Absorption Property of CFRP under Impact Loadings</b>	219
D.D. Chen, R. Matsumoto, K. Arakawa and S. Yoon	
<b>Micro-Tomography to Characterize Size Distribution of Fragments Created by Laser Shock-Induced Micro-Spallation of Metallic Sample</b>	225
D. Loison, T. de Resseguer and A. Dragon	
<b>Impact Fracture of Jointed Steel Plates of Bolted Joint of Cars</b>	232
H. Ambarita, M. Daimaruya and H. Fujiki	
<b>High-Velocity Impact between Vehicles and Soft Bodies</b>	238
S. Yoshie, M. Sakai, T. Murakami and K. Fujimoto	
<b>Mechanisms of Energy Absorption during High Rate Loading of Cellular Lattice Structures</b>	244
M. Cotton, R. Winter and E. Harris	

<b>Experimental and Numerical Analysis of Repeated Impacts between Two Spheres</b>	250
H. Minamoto, R. Seifried, P. Eberhard and S. Kawamura	
<b>Modeling of Low Energy, Low Velocity Impact Failure of a Honeycomb Sandwich Material</b>	256
M.C. Miron, Z. Major and T. Adachi	
<b>Energy and Momentum Transfer to a Clamped Elastic Plate in an Air-Blast</b>	262
Y. Yuan and P.J. Tan	
<b>Partial Destruction of Reinforced Concrete Wall by Small Blasting</b>	268
K. Nishino, S. Kubota, Y. Wada, Y. Ogata, N. Ito, M. Nagano, S. Nakamura, T. Taguchi and A. Fukuda	
<b>Experimental and Numerical Study on the Dynamic Fracture Characteristics of Gray Cast Iron FC200</b>	274
K. Cho, C. Simozono, T. Fujimoto and T. Nishioka	
<b>Dynamic Fragmentation Tests of LY12 Aluminum Alloy Using a SHPB Based Expanding Ring Technique</b>	281
Y.X. Zheng, F.H. Zhou and S.S. Hu	
<b>Characterization of the Loading Rate Dependent Fracture Behavior over a Wide Loading Rate Range Using Charpy Specimens</b>	286
Z. Major and M. Reiter	
<b>Impact Deformation and Dislocation Substructure of Ti-6Al-7Nb Biomedical Alloy</b>	292
W.S. Lee and C.W. Chen	
<b>Velocity-Toughening and Crack Speed Oscillations in the Dynamic Fracture of PMMA Plates</b>	298
Z.Y. Zhang, Z. Duan and F.H. Zhou	
<b>Dynamic Axial Crushing of Empty and Foam-Filled Conical Aluminium Tubes: Experimental and Numerical Analysis</b>	305
F. Mat, K.A. Ismail, M. Ahmad, Y. Sazali and I. Othman	
<b>Numerical Analysis of the Brittle-Ductile Transition in the Failure-Mode in Polymeric Materials</b>	310
J. Aranda-Ruiz and J.A. Loya	
<b>Evaluation of Impact Fracture Toughness of AZ31 Magnesium Alloy</b>	316
T. Kawa, M. Nagao and T. Mukai	

## VI. Ballistic Response

<b>Effect of Pre-Tension on Ballistic Resistance of Woven Fabric</b>	325
V.P.W. Shim, Y.B. Guo and X.Y. Tan	
<b>Experimental and Numerical Study of a Combined Blast and Ballistic Protection</b>	332
L. Gilson, J. Gallant and L. Rabet	
<b>Ejecta Size Distribution Resulting from Hypervelocity Impacts between Aluminum Alloys</b>	338
K. Nozaki, M. Nishida, K. Hayashi and S. Hasegawa	
<b>Microstructural Evolution from Shaped Charge through Steel Plates</b>	344
M.N. Bassim, S. Boakye-Yiadom and M. Bolduc	

## VII. Penetration

<b>An Examination of DOP Test of Ceramic Tile Subjected to Long Rod Penetration</b>	353
J.M. Yuan and G.E.B. Tan	
<b>An Investigation on the Grooved-Tapered Projectile Penetrating into the Concrete Targets</b>	359
X.X. Zhang, H.J. Wu, F.L. Huang, A.G. Pi and X.F. Ma	
<b>Projectile Mass Loss Model Using the Coefficient of Friction for High-Speed Penetration into Concrete</b>	365
F. Qian, H.J. Wu, F.L. Huang, A.G. Pi and X.F. Ma	
<b>Penetration Velocity Measurement in Sands Using Magnet-Coil Gages</b>	371
K. Watanabe, S. Fukuma, T. Yoshisaka and H. Kobayashi	

## VIII. Dynamic Behavior and Application

<b>Joining Experiment of Aluminum Sheets Using High-Speed Shearing</b>	379
M. Yamashita, T. Tezuka and T. Hattori	
<b>Pressure Measurement of Non-Ideal Detonation in Ammonium Nitrate Based High Energetic Material</b>	385
Y. Yamamoto, S. Kubota, T. Saburi, Y. Wada and A. Miyake	
<b>Dynamic Behavior of Liquid Mercury Droplets Colliding with a Solid Surface</b>	391
T. Naoe and M. Futakawa	
<b>Rubber Ball Impacts on Composite Plates Investigation by 3D Correlation</b>	397
P. Guégan, R. Othman, F. Pasco, N. Swiergiel, P. Thévenet and J.M. Guimard	
<b>Propagation of Underwater Shock Wave and Gas Bubble Behavior Induced by Electrical Discharge in Water</b>	403
H. Hamashima, S. Iwasa, H. Maehara, S. Itoh and K. Hokamoto	
<b>Effect of Impact Compression on Age Hardening Behavior of Aluminum Alloys</b>	409
Y. Kitani, K. Horikawa, H. Kobayashi, K. Tanigaki, T. Ogura and A. Hirose	
<b>Blast Resistant Design of an Embassy Building</b>	415
A. Malhotra, D. Carson and T. Stevens	
<b>A Study on the Evaluation of Intelligent Headlamp Interworking with Camera and Navigation</b>	420
W.G. Shin, D.H. Seo, D.H. Kim and D.G. Han	
<b>Dynamic Impact Behavior of Ti-Ni Shape Memory Alloys in Two Different Compositions</b>	426
S.Y. Young, D.H. Jin and D.T. Chung	

## IX. Elastic/Plastic Wave Propagation

<b>Transient Phenomena in Wave Propagation around a Large Suspended Particle in a Water-Filled Tube</b>	431
T. Hori, K. Inaba, K. Takahashi and K. Kishimoto	
<b>Measurements of Combined Pressure-Shear Waves by the Oblique-Parallel Impact Experiment</b>	437
K. Ogata, X. Liu and T. Mashimo	

## X. Dynamic Biomechanics and Sports Dynamics

<b>Oblique Impact Analysis of a Golf Ball</b>	443
K. Arakawa	
<b>Felled Trees as a Rockfall Protection System, Experimental Study for Numerical Models Calibration</b>	449
I. Olmedo, F. Bourrier, D. Bertrand, F. Berger and A. Limam	

## XI. Numerical Simulations

<b>Finite-Element Modelling of the Impact Behaviour of Aluminium Nacre-Like Composite</b>	457
E.A. Flores-Johnson, L.M. Shen, I. Guiamatsia and G.D. Nguyen	
<b>Analysis on Low Velocity Impact Damage and Compressive Residual Strength of Composite Laminates</b>	463
P. Xue, H.H. Chen and W. Guo	
<b>Finite Element Simulation of Brittle Fracture of Bulletproof Glass System</b>	468
Y.K. An, B.Y. Joo, D.T. Chung and H. Kang	
<b>Study of Material Modeling of Polymers for Impact Analysis</b>	474
K. Takekoshi and K. Niwa	
<b>Numerical Analysis of Vehicle Occupant Responses during Rear Impact Using a Human Body Model</b>	480
J.A. Pramudita, S. Kikuchi and Y. Tanabe	
<b>Design Methods for Window Stopper Component Strength Cushions Operating under Wind Gusts</b>	486
G. Nishie and T. Mori	

<b>Thermo-Elastic-Plastic Constitutive Model for Numerical Analysis of Metallic Structures under Local Impulsive Loadings</b>	493
M. Chernobryvko, L. Kruszka and Y. Vorobiev	
<b>FEM Analysis of Cylindrical Structural Elements under Local Shock Loading</b>	499
L. Kruszka, Y.S. Vorobiov and N.Y. Ovcharova	
<b>Simulations of High Velocity Impacts of Ice on Carbon/Epoxy Composite Laminates</b>	505
J. Pernas-Sánchez, J.A. Artero-Guerrero, D. Varas and J. López-Puente	
<b>Numerical Study of the Effects of Metallic Plates in the Attenuation of the HRAM Phenomenon</b>	511
D. Varas, J. López-Puente and R. Zaera	
<b>A FEM Study on Adiabatic Shear Band Formation in Tube Compression Driven by Electro-Magnetic Loading</b>	517
X.L. Dong, L.Z. Li, Y.Q. Fu and F.H. Zhou	

## **XII. New Experimental Techniques**

<b>Hugoniot-Measurement Experiments of the Heated Samples</b>	525
K. Oka, K. Ogata and T. Mashimo	
<b>Development of an Output-Bar Supporting Stand to Suppress Transverse Vibration in Dynamic Tensile Test of Sheet Steel</b>	530
M. Itabashi	
<b>The Development of Micro Ball Supersonic Impact Test System</b>	536
D.T. Chung, J.Y. Lee, T.Y. Kim, D.H. Jin and H. Kang	
<b>Investigation of High-Speed Loading Effects on the Properties of Ferromagnetic Alloys Processed in an External Magnetic Field</b>	542
Y.V. Sudenkov, S. Atroshenko, I. Smirnov, N. Naumova and X.Y. Sun	
<b>A Study on Reduction of Friction in Impact Compressive Test Based on the Split Hopkinson Pressure Bar Method by Using a Hollow Specimen</b>	548
N. Kii, T. Iwamoto, A. Rusinek and T. Jankowiak	
<b>Construction of Data Acquisition/Processing System for Precise Measurement in Split Hopkinson Pressure Bar Test</b>	554
S.H. Lee, B.J. Tuazon and H.S. Shin	

## **XIII. Structural Crashworthiness**

<b>Dynamic Crushing of Voronoi Honeycombs: Local Stress-Strain States</b>	563
J.L. Yu, S.F. Liao, Z.J. Zheng and C.F. Wang	
<b>Energy Absorption of Thin-Walled Beams with a Pre-Folded Origami Pattern</b>	569
J.Y. Ma and Z. You	
<b>Improvement of Energy Absorption of Circular Tubes Subjected to High Velocity Impact</b>	575
M. Higuchi, S. Suzuki, T. Adachi and H. Tachiya	
<b>Response of Sandwich Panels with Tubular Cores to Blast Load</b>	581
S.C.K. Yuen, G. Nurick and M.C. du Plessis	
<b>Response of Filled Thin-Walled Square Tubes to Axial Impact Load</b>	586
S.C.K. Yuen, G. Nurick, S. Piu and G. Ebrahim	
<b>Experimental Evaluation of Dynamic Buckling Load of GFRP Rod for Gas Circuit Breaker</b>	593
H. Hashimoto, H. Yaka, I. Riku, T. Umeda and K. Mimura	
<b>Mass Impact of Density-Graded Cellular Metals in a Temperature Field</b>	599
Z.J. Zheng, X.K. Wang and J.L. Yu	
<b>Numerical Evaluation of Dynamic Behavior of Axial Crushing Honeycomb Based on Adhesively-Bonded Model</b>	605
T. Umeda, K. Mimura and T. Kamigawa	
<b>Evaluation of Sliding Behavior of Simple Structures for Oblique Collision</b>	611
T. Watanabe, N. Nishimura, H. Watanabe, S. Nakadate and K. Murase	
<b>Characteristic Evaluation of the Enforcement Device for the Car</b>	617
S. Nakadate, N. Nishimura, T. Watanabe, H. Watanabe and K. Murase	

<b>Study on Impact Collapse Characteristics of CFRP Double-Hat Members According to Stacking Angle</b>	
J.H. Choi, W.C. Hwang, Y.J. Yang, C.S. Cha and I.Y. Yang	623
<b>Damage Evaluation by Impulsive Response in Structure Filled with Liquid</b>	
T. Wan, T. Naoe, T. Wakui, M. Futakawa and K. Maekawa	629
<b>A Fundamental Study on the Shock Cushioning Characteristics of a Novel pin-Fixed Aseismatic Connector for Bridges</b>	
Y. Yuki, H. Tamai, N. Wada, Y. Sonoda and T. Kasugai	637
