

Table of Contents

Technical Focus, Committees, Sponsors and Supporter

I: Plenary and Keyword Lectures

Dynamic Material Characterization Using Digital Image Correlation A. Gilat and J.D. Seidt	3
Present Status and Future Problems on the Impact Resistance Performance Design of Civil Engineering Protective Structures Y. Sonoda	10
Proton Bombardment in Mercury Target for Neutron Production - Impact Dynamics on Interface between Liquid and Solid Metals M. Futakawa	26
Thermal Processing History and Resulting Impact Response of a Hot-Formed Component with Tailored Properties – Numerical Study M.J. Worswick, R. George, A. Bardelcik, L. Ten Kortenaar and D. Detwiler	34

II: Dynamic Deformation and Constitutive Relations

Dynamic Deformation Behaviors of High Performance Steels H.S. Shin, B.J. Tuazon, K.O. Bae, S.H. Lee, H.C. Yim, K. Choi and J.W. Lee	43
Filtering Effects of Periodic Structure in Water Hammer M. Nagai, K. Inaba, K. Takahashi and K. Kishimoto	50
Dynamic Tensile Response of Magnesium Nanocomposites Y. Chen, V.P.W. Shim and M. Gupta	56
Dynamic Tensile Characteristics of Nuclear-Grade Graphite IG-11 T. Yokoyama and K. Nakai	61
Effect of High Loading Rate on SCC Behaviour of SUS304 Austenitic Stainless Steel A. Kumagai, Y. Tanabe and H. Suzawa	67
Strengthening of FCC Metals at High Strain Rates H. Couque	73
High Strain-Rate Compressive Behavior and Constitutive Modeling of Selected Polymers Using Modified Ramberg-Osgood Equation K. Nakai and T. Yokoyama	80
Quasi-Static and Dynamic Compressive Properties of AZ31 Magnesium Alloy Processed by Equal Channel Angular Pressing X. Yu, T. Suo, F. Zhao and Y.L. Li	86
Modelling of Formation of Adiabatic Shear Bands N. Bassim and J. Delorme	92
Identification Methods of Parameters for Johnson-Cook Constitutive Equation – Comparison M. Grązka, J. Janiszewski, L. Kruszka, E. Cadoni, D. Forni and G. Riganti	97
Dynamic Deformation Behavior of ECAPed AZ31 Magnesium Alloy H.T. Hu, F. Zhao, Y.G. Miao, T. Suo, Q. Deng and Y.L. Li	104
Experimental Analysis of Visco-Plastic Properties of the Aluminium and Tungsten Alloys by Means of Hopkinson Bars Technique L. Kruszka, M. Magier and M. Zielenkiewicz	110
Effect of Deflection Rate on Bending Deformation Behavior of Fe-Based Shape Memory Alloy K. Nishikori and T. Iwamoto	116
Dynamic Compression Test of CFRP Laminates Using SHPB Technique T. Kusaka, T. Kono, Y. Nomura and H. Wakabayashi	122

Effect of Pre-Fatigue Deformation under Humid Environment on Impact Tensile Properties in 7075 Aluminum Alloys	
M. Tsurudome, H. Yamada, N. Ogasawara and K. Horikawa	128
Impact Compressive Properties of Foamed Film with Closed Cell	
H. Yamada, R. Okui, N. Ogasawara, H. Kobayashi and K. Ogawa	134
A Study on Rate Sensitivity of Impedance in TRIP Steel during Deformation at Various Strain Rate under Two Kinds of Deformation Mode	
D. Inoshita and T. Iwamoto	140
Evaluation of Dynamic Deformation Properties of Metallic Materials with Different Crystal Structures Using Taylor Impact Test	
K.O. Bae, H.S. Shin, H. Huh, L.J. Park and H.W. Kim	146
Strain Rate Effects on Strain-Induced Martensitic Transformation and Electrical Resistivity of Deforming Stainless Steel	
H. Date	152
Dynamic and Quasi-Static Compressive Deformation Behaviour of Polyimide Foam at Various Elevated Temperature	
A. Yosimoto, H. Kobayashi, K. Horikawa, K. Watanabe and K. Ogawa	158

III. Numerical Simulations in Civil Engineering

Mechanical Behavior of Polycrystalline Aluminum under Penetration with Extremely Large Loading Rates via Molecular Dynamics Simulation	
C.Y. Wu and Y.C. Wang	167
Concrete Material Models in LS-DYNA for Impact Analysis of Reinforced Concrete Structures	
M.A.K.M. Madurapperuma and K. Niwa	173
An Analytical Study on Dynamic Strength Evaluation of Perfobond Strip Shear Connectors	
S. Munemoto and Y. Sonoda	179
Improving Rebound Models in 3D Rockfall Simulation Codes Used for the Design of Protection Embankments	
D. Toe, S. Lambert, F. Bourrier and F. Berger	185

IV. Dynamic Behavior of Structures in Civil Engineering

Behaviour and Design of Steel Columns Subjected to Vehicle Impact	
H.A.B. Al-Thairy and Y. Wang	193
Batter Pile Behavior Modeling Using Finite Difference Analysis	
C.Y. Chen and C.X. Tsai	199
Failure Behavior and Numerical Simulation of the Local Damage of Ultra High Strength Fiber Reinforced Concrete Subjected to High Velocity Impact	
S.B. Cheon, M. Beppu, Y. Sonoda and M. Itoh	205
Study on Dynamic Shear Resistance of RC Beams	
A. Somraj, K. Fujikake and B. Li	211

V. Dynamic Failure and Fracture

Energy Absorption Property of CFRP under Impact Loadings	
D.D. Chen, R. Matsumoto, K. Arakawa and S. Yoon	219
Micro-Tomography to Characterize Size Distribution of Fragments Created by Laser Shock-Induced Micro-Spallation of Metallic Sample	
D. Loison, T. de Resseguier and A. Dragon	225
Impact Fracture of Jointed Steel Plates of Bolted Joint of Cars	
H. Ambarita, M. Daimaruya and H. Fujiki	232
High-Velocity Impact between Vehicles and Soft Bodies	
S. Yoshie, M. Sakai, T. Murakami and K. Fujimoto	238
Mechanisms of Energy Absorption during High Rate Loading of Cellular Lattice Structures	
M. Cotton, R. Winter and E. Harris	244

Experimental and Numerical Analysis of Repeated Impacts between Two Spheres H. Minamoto, R. Seifried, P. Eberhard and S. Kawamura	250
Modeling of Low Energy, Low Velocity Impact Failure of a Honeycomb Sandwich Material M.C. Miron, Z. Major and T. Adachi	256
Energy and Momentum Transfer to a Clamped Elastic Plate in an Air-Blast Y. Yuan and P.J. Tan	262
Partial Destruction of Reinforced Concrete Wall by Small Blasting K. Nishino, S. Kubota, Y. Wada, Y. Ogata, N. Ito, M. Nagano, S. Nakamura, T. Taguchi and A. Fukuda	268
Experimental and Numerical Study on the Dynamic Fracture Characteristics of Gray Cast Iron FC200 K. Cho, C. Simozono, T. Fujimoto and T. Nishioka	274
Dynamic Fragmentation Tests of LY12 Aluminum Alloy Using a SHPB Based Expanding Ring Technique Y.X. Zheng, F.H. Zhou and S.S. Hu	281
Characterization of the Loading Rate Dependent Fracture Behavior over a Wide Loading Rate Range Using Charpy Specimens Z. Major and M. Reiter	286
Impact Deformation and Dislocation Substructure of Ti-6Al-7Nb Biomedical Alloy W.S. Lee and C.W. Chen	292
Velocity-Toughening and Crack Speed Oscillations in the Dynamic Fracture of PMMA Plates Z.Y. Zhang, Z. Duan and F.H. Zhou	298
Dynamic Axial Crushing of Empty and Foam-Filled Conical Aluminium Tubes: Experimental and Numerical Analysis F. Mat, K.A. Ismail, M. Ahmad, Y. Sazali and I. Othman	305
Numerical Analysis of the Brittle-Ductile Transition in the Failure-Mode in Polymeric Materials J. Aranda-Ruiz and J.A. Loya	310
Evaluation of Impact Fracture Toughness of AZ31 Magnesium Alloy T. Kawa, M. Nagao and T. Mukai	316

VI. Ballistic Response

Effect of Pre-Tension on Ballistic Resistance of Woven Fabric V.P.W. Shim, Y.B. Guo and X.Y. Tan	325
Experimental and Numerical Study of a Combined Blast and Ballistic Protection L. Gilson, J. Gallant and L. Rabet	332
Ejecta Size Distribution Resulting from Hypervelocity Impacts between Aluminum Alloys K. Nozaki, M. Nishida, K. Hayashi and S. Hasegawa	338
Microstructural Evolution from Shaped Charge through Steel Plates M.N. Bassim, S. Boakye-Yiadom and M. Bolduc	344

VII. Penetration

An Examination of DOP Test of Ceramic Tile Subjected to Long Rod Penetration J.M. Yuan and G.E.B. Tan	353
An Investigation on the Grooved-Tapered Projectile Penetrating into the Concrete Targets X.X. Zhang, H.J. Wu, F.L. Huang, A.G. Pi and X.F. Ma	359
Projectile Mass Loss Model Using the Coefficient of Friction for High-Speed Penetration into Concrete F. Qian, H.J. Wu, F.L. Huang, A.G. Pi and X.F. Ma	365
Penetration Velocity Measurement in Sands Using Magnet-Coil Gages K. Watanabe, S. Fukuma, T. Yoshisaka and H. Kobayashi	371

VIII. Dynamic Behavior and Application

Joining Experiment of Aluminum Sheets Using High-Speed Shearing M. Yamashita, T. Tezuka and T. Hattori	379
Pressure Measurement of Non-Ideal Detonation in Ammonium Nitrate Based High Energetic Material Y. Yamamoto, S. Kubota, T. Saburi, Y. Wada and A. Miyake	385
Dynamic Behavior of Liquid Mercury Droplets Colliding with a Solid Surface T. Naoe and M. Futakawa	391
Rubber Ball Impacts on Composite Plates Investigation by 3D Correlation P. Guégan, R. Othman, F. Pasco, N. Swiergiel, P. Thévenet and J.M. Guimard	397
Propagation of Underwater Shock Wave and Gas Bubble Behavior Induced by Electrical Discharge in Water H. Hamashima, S. Iwasa, H. Maehara, S. Itoh and K. Hokamoto	403
Effect of Impact Compression on Age Hardening Behavior of Aluminum Alloys Y. Kitani, K. Horikawa, H. Kobayashi, K. Tanigaki, T. Ogura and A. Hirose	409
Blast Resistant Design of an Embassy Building A. Malhotra, D. Carson and T. Stevens	415
A Study on the Evaluation of Intelligent Headlamp Interworking with Camera and Navigation W.G. Shin, D.H. Seo, D.H. Kim and D.G. Han	420
Dynamic Impact Behavior of Ti-Ni Shape Memory Alloys in Two Different Compositions S.Y. Young, D.H. Jin and D.T. Chung	426

IX. Elastic/Plastic Wave Propagation

Transient Phenomena in Wave Propagation around a Large Suspended Particle in a Water-Filled Tube T. Hori, K. Inaba, K. Takahashi and K. Kishimoto	431
Measurements of Combined Pressure-Shear Waves by the Oblique-Parallel Impact Experiment K. Ogata, X. Liu and T. Mashimo	437

X. Dynamic Biomechanics and Sports Dynamics

Oblique Impact Analysis of a Golf Ball K. Arakawa	443
Felled Trees as a Rockfall Protection System, Experimental Study for Numerical Models Calibration I. Olmedo, F. Bourrier, D. Bertrand, F. Berger and A. Limam	449

XI. Numerical Simulations

Finite-Element Modelling of the Impact Behaviour of Aluminium Nacre-Like Composite E.A. Flores-Johnson, L.M. Shen, I. Guimatsia and G.D. Nguyen	457
Analysis on Low Velocity Impact Damage and Compressive Residual Strength of Composite Laminates P. Xue, H.H. Chen and W. Guo	463
Finite Element Simulation of Brittle Fracture of Bulletproof Glass System Y.K. An, B.Y. Joo, D.T. Chung and H. Kang	468
Study of Material Modeling of Polymers for Impact Analysis K. Takekoshi and K. Niwa	474
Numerical Analysis of Vehicle Occupant Responses during Rear Impact Using a Human Body Model J.A. Pramudita, S. Kikuchi and Y. Tanabe	480
Design Methods for Window Stopper Component Strength Cushions Operating under Wind Gusts G. Nishie and T. Mori	486

Thermo-Elastic-Plastic Constitutive Model for Numerical Analysis of Metallic Structures under Local Impulsive Loadings	
M. Chernobryvko, L. Kruszka and Y. Vorobiev	493
FEM Analysis of Cylindrical Structural Elements under Local Shock Loading	
L. Kruszka, Y.S. Vorobiov and N.Y. Ovcharova	499
Simulations of High Velocity Impacts of Ice on Carbon/Epoxy Composite Laminates	
J. Pernas-Sánchez, J.A. Artero-Guerrero, D. Varas and J. López-Puente	505
Numerical Study of the Effects of Metallic Plates in the Attenuation of the HRAM Phenomenon	
D. Varas, J. López-Puente and R. Zaera	511
A FEM Study on Adiabatic Shear Band Formation in Tube Compression Driven by Electro-Magnetic Loading	
X.L. Dong, L.Z. Li, Y.Q. Fu and F.H. Zhou	517

XII. New Experimental Techniques

Hugoniot-Measurement Experiments of the Heated Samples	
K. Oka, K. Ogata and T. Mashimo	525
Development of an Output-Bar Supporting Stand to Suppress Transverse Vibration in Dynamic Tensile Test of Sheet Steel	
M. Itabashi	530
The Development of Micro Ball Supersonic Impact Test System	
D.T. Chung, J.Y. Lee, T.Y. Kim, D.H. Jin and H. Kang	536
Investigation of High-Speed Loading Effects on the Properties of Ferromagnetic Alloys Processed in an External Magnetic Field	
Y.V. Sudenkov, S. Atroshenko, I. Smirnov, N. Naumova and X.Y. Sun	542
A Study on Reduction of Friction in Impact Compressive Test Based on the Split Hopkinson Pressure Bar Method by Using a Hollow Specimen	
N. Kii, T. Iwamoto, A. Rusinek and T. Jankowiak	548
Construction of Data Acquisition/Processing System for Precise Measurement in Split Hopkinson Pressure Bar Test	
S.H. Lee, B.J. Tuazon and H.S. Shin	554

XIII. Structural Crashworthiness

Dynamic Crushing of Voronoi Honeycombs: Local Stress-Strain States	
J.L. Yu, S.F. Liao, Z.J. Zheng and C.F. Wang	563
Energy Absorption of Thin-Walled Beams with a Pre-Folded Origami Pattern	
J.Y. Ma and Z. You	569
Improvement of Energy Absorption of Circular Tubes Subjected to High Velocity Impact	
M. Higuchi, S. Suzuki, T. Adachi and H. Tachiya	575
Response of Sandwich Panels with Tubular Cores to Blast Load	
S.C.K. Yuen, G. Nurick and M.C. du Plessis	581
Response of Filled Thin-Walled Square Tubes to Axial Impact Load	
S.C.K. Yuen, G. Nurick, S. Piu and G. Ebrahim	586
Experimental Evaluation of Dynamic Buckling Load of GFRP Rod for Gas Circuit Breaker	
H. Hashimoto, H. Yaka, I. Riku, T. Umeda and K. Mimura	593
Mass Impact of Density-Graded Cellular Metals in a Temperature Field	
Z.J. Zheng, X.K. Wang and J.L. Yu	599
Numerical Evaluation of Dynamic Behavior of Axial Crushing Honeycomb Based on Adhesively-Bonded Model	
T. Umeda, K. Mimura and T. Kamigawa	605
Evaluation of Sliding Behavior of Simple Structures for Oblique Collision	
T. Watanabe, N. Nishimura, H. Watanabe, S. Nakadate and K. Murase	611
Characteristic Evaluation of the Enforcement Device for the Car	
S. Nakadate, N. Nishimura, T. Watanabe, H. Watanabe and K. Murase	617

Study on Impact Collapse Characteristics of CFRP Double-Hat Members According to Stacking Angle	
J.H. Choi, W.C. Hwang, Y.J. Yang, C.S. Cha and I.Y. Yang	623
Damage Evaluation by Impulsive Response in Structure Filled with Liquid	
T. Wan, T. Naoe, T. Wakui, M. Futakawa and K. Maekawa	629
A Fundamental Study on the Shock Cushioning Characteristics of a Novel pin-Fixed Aseismic Connector for Bridges	
Y. Yuki, H. Tamai, N. Wada, Y. Sonoda and T. Kasugai	637
