

Table of Contents

Preface, Committees, Sponsors

Chapter 1: Plenary Lectures

Experimental Techniques and Measurements in Impact Engineering Using Hopkinson Bar Technique

L. Kruszka 3

Impact Compressive Fracture of Synthetic Quartz Accompanied by Electromagnetic Phenomenon

H. Kobayashi, K. Horikawa, K. Tanigaki and K. Ogawa 13

Chapter 2: Dynamic Deformation and Constitutive Relations

Evaluation of Dynamic Properties of Wood-Plastic Composites Using Split Hopkinson Bar Methods

M. Nishida, S. Furuya, H. Ito, R. Makise and M. Okamoto 23

Analysis of Shell Material Influence on Detonation Process in High Explosive Charge

I.A. Balagansky, A. Vinogradov, L. Merzhievsky, A. Matrosov and I. Stadnichenko 27

Assessment of Dynamic Responses of Skin Simulant in a Drop Weight Penetration Test

J.A. Pramudita, M. Kato and Y. Tanabe 33

Effects of Additives on Tensile Properties of Polyhydroxyalkanoate/Polycaprolactone Polymer Blends

M. Nishida, Y. Ito, H. Shinzawa, M. Nishida and Y. Hayakawa 39

Study of Deformation and Failure of Bitumens for Asphalt Mixtures under Dynamic Loads

I.V. Smirnov, Y.V. Petrov, A.Y. Konstantinov, A.M. Bragov and A.K. Lomunov 43

The Prediction of the Depth of Long Rod Penetrating into Semi-Infinite Concrete Targets

J. Wang, H.J. Wu, A.G. Pi, F.L. Huang and Z.W. Liu 48

Chapter 3: Dynamic Failure and Fracture

Ballistic Performance of a Transparent Inter-Layered Specimen by a Long-Rod Impact

J.H. Choi, D.K. Kim and J.T. Kim 57

Effect of Detachment Speed on Adhesion Strength of Gecko Inspired Adhesive Devices

Y. Sekiguchi and C. Sato 63

Finite Element Simulation and Experimental Studies on Projectile Perforation of Circular and Rectangular Plates

K. Yamada, T. Moroe, M. Nishida, K. Mizutani, S. Enomoto, T. Matsuda, K.O. Bae and H.S. Shin 68

The Texture Effect on the Dynamic Fracture Properties of Magnesium Alloy AZ31B

X. Yu, Y.L. Li and T. Li 74

Welding Current Dependence of Dynamic Mechanical Properties for Spot-Welded Electric Arc Furnace Steel Sheet

M. Itabashi 80

Experimental Study of the Effects of Geometry and Strain Rate on Dynamic Behavior of Axial Crushing Honeycomb

T. Umeda, K. Kataoka and K. Mimura 86

Chapter 4: Experimental Techniques and Measurements in Impact Engineering

Analysis of Plasma Created by High-Speed Impact with Triple Probe

K. Umeda, T. Sakai, K. Watanabe, G. Kennedy and N. Thadhani 95

Determination of Fracture Toughness by Single and Double Action Tensile Impact Fracture Tests	101
Z. Major, M. Miron and I. Kallai	
Effect of Acrylic Foam Film on Impact Reduction	107
K. Takeo, T. Nogami, T. Adachi, R. Koretoh and H. Tada	
Effect of Displacement Rate on Sharp Millimeter Indentation	111
H. Yamada, M. Hotta and N. Ogasawara	
Experimental Characterization of Crack Growth Behavior in Adhesive Interface under Impact Loading	116
S. Oshima, H. Ishida, R. Tanegashima, T. Kusaka and T. Takeda	
Measuring Behavior of Impactor Penetrating through Polymer Sheet Based on Electromagnetic Induction	122
T. Adachi, M. Osada and K. Watanabe	
Stationary Wavelet Transform Based on De-Noising of Digital Image Correlation in the Investigation on the Impact Response	128
X. Guo, Y.L. Li, T. Suo, Z.B. Tang and Y.G. Miao	
Velocity Control of Diaphragmless Vertical Gas Gun for Low Pressure Ranges	133
T. Yano, P.A. Gardiner, Y. Egawa and K. Watanabe	
Measurement of High Frequency Viscoelastic Properties of Deformed Rubber	139
T. Shoyama and K. Fujimoto	
Effect of Material Composition on Impact Energy Absorbing Capability of Composite Laminates	147
R. Haruna, T. Kusaka, R. Tanegashima and J. Takahashi	
Validation of the Hardening Behaviors for Metallic Materials at High Strain Rate and Temperature by Using the Taylor Impact Test	153
M.J. Piao, H. Huh, I.J. Lee, H.W. Kim and L.J. Park	
Effect of Foam Structure on Impact Compressive Properties in Foamed Polyethylene Film	159
K. Tateyama, H. Yamada and N. Ogasawara	

Chapter 5: Modeling and Numerical Simulation in Practice of Impact Engineering

DEM/FEM Simulations of Dynamic Response of Projectile Penetrating into Granular Medium	167
S. Takeda, K. Ogawa, K. Tanigaki, K. Horikawa and H. Kobayashi	
Design and Analysis of Automotive Bumper Covers in Transient Loading Conditions	174
C.H. Liu, Y.C. Huang, C.H. Chiu, Y.C. Lai and T.Y. Pai	
Improved Model for Impact of Viscoplastic Bodies	180
M. Ahmad, K.A. Ismail, F. Mat and W.J. Stronge	
Interior Head Impact Analysis of Automotive Instrument Panel for Unrestrained Front Seat Passengers	186
C.H. Liu, Y.C. Lai, C.H. Chiu and M.H. Lin	
Investigations on Dynamic Energy Absorption Behavior of Metal Foam	192
G. Luo and P. Xue	
Numerical Simulation of Behavior of Sand Particles during High-Speed Penetration with Particle Method	198
R. Shimono and K. Watanabe	
Numerical Simulation on Molten Metal Collision Behavior Using SPH Method Combined with Fractal Analysis on Morphology of Stacking Pattern	203
M. Futakawa, K. Tsutsui, H. Kogawa and T. Naoe	
Numerical Study of High Velocity Impact onto MMC/Ceramic Layered Systems	210
S.H. Lee and M. Lee	
The Resistance of Structural Elements to Impact and Shock-Wave Load	216
L. Kruszka, I. Vorobiov and N. Ovcharova	
Theoretical Analysis of Dynamic Spherical Cavity Expansion in Reinforced Concretes	222
S. Zhang, H.J. Wu, Z.J. Tan and F.L. Huang	

Chapter 6: Industrial Applications Related to Impact Engineering

Analysis of the Sliding Contact Behavior of a Centrifugal Clutch C.H. Liu and Y.P. Chiang	231
Dynamics of Thin-Walled Elements of Rocket Engine under Impact Loads M. Chernobryvko, K. Avramov, L. Kruszka and A. Tonkonogenko	237
Experimental Analysis of the Concrete Penetration by Using Warheads from Demobilized Ammunition M. Magier, W. Burian, M. Rotkegel and J. Szymala	243
Synthesis of Hexagonal Diamond under Shock Loading Using Single Stage Powder Gun K. Tanigaki, A. Nakahara, K. Horikawa and H. Kobayashi	249
Experimental Analysis of Elastic-Plastic Free Vibrations of Beam Models Caused by Impact G. Jemielita, Z. Kozyra and L. Kruszka	254
