## Preface and Committees

## Chapter 1: Protection and Remediation of Wood Structures

<b>Application of Colored Impregnating Glazes on Wood and Color Changes due to Artificial Aging</b> S. Slunská	3
<b>Research of Fire-Retardant Properties of Timber Constructions, Protected Geocement-Based Coating, after their Operation</b> A. Kravchenko, S. Guzii, Y. Tsapko and V. Petranek	7
<b>Heat-Reflecting Geocement Based Coatings Containing Perlite for Fire Protection of Timber</b> S. Guzii, A. Kravchenko, P.V. Krivenko, Y. Tsapko and K. Sotiriadis	11
<b>Mineralization Influence on the Strength Parameter of Solid Wood</b> T. Murínová, P. Mec, J. Daňková and P. Rezek	15
<b>Reconstruction of Historical Timber Roofs at Zehusice Castle</b> R. Zidek, A. Utíkal, I. Utíkalová, L. Brdečko and H. Brdečková	19
<b>Wooden Facade with Bonded Joints - Experimental Test</b> B. Nečasová, P. Liška and J. Šlanhof	23

## Chapter 2: Surface Treatment

<b>Determination of Compressive Strength of Cement and Polymer-Modified Cement Pastes with Pozzolans</b> N. Žižková and P. Bayer	31
<b>Development of Thermal Insulation, Capillary Active Plasters Suitable for Historical Buildings</b> J. Hroudová, J. Zach and M. Sedlmajer	35
<b>Formation of Efflorescence on the Surface of Construction Products in the Process of their Operation</b> G. Yakovlev, A. Politaeva, A. Shaybadullina, A. Gordina and A.F. Buryanov	39
<b><i>In Situ</i> Applicability of Selected Nanotextiles on Surfaces of Historic Plasters</b> M. Šmidtová and K. Kroftová	44

## Chapter 3: Restoration of Stone

<b>Remediation of Old Sandstone Structures via Hydroinsulating Injection Gels</b> J. Melichar, R. Drochytka and P. Dohnálek	51
<b>The Effect of the Flood in 2002 on Microflora of the Sandstone Blocks of Charles Bridge in Prague</b> R. Wasserbauer, E. Burgetová and Z. Rácová	55

## Chapter 4: Redevelopment of Masonry

<b>A Survey of Historic Galleries in the Area of the Prague Castle</b> E. Burgetová and K. Michalová	61
<b>Drying Technologies in Masonry Structures</b> M. Novotný, K. Šuhajda, J. Sobotka and Z. Jiroušek	65
<b>Possibilities of Hydrophobization of Masonry Construction for High Risk Flood Areas</b> J. Zach, J. Hroudová, M. Sedlmajer, V. Novák and M. Reif	70
<b>Protecting the Brickworks against Technical Seismicity</b> J. Solář	74

<b>Special Mortars for Repair Masonry: The Problem of the Optimization</b> A. Kharitonov and O. Smirnova	78
<b>The Application of Carbon Composites in the Rehabilitation of Historic Vaults</b> J. Witzany, J. Brozovsky, T. Čejka, K. Kroftová, V. Maršík and R. Zigler	82

## Chapter 5: Redevelopment of Concrete Structures

<b>Determining the Presence of the Corrosion Inhibitors Based on Amines in Hardened Mortars</b> M. Fiedlerová, L. Taranza, R. Drochytka and M. Tupý	93
<b>Development of Repair Mortars Based on Alkali Activated Materials for Application in Chemically Aggressive Surroundings</b> Á. Dufka, J. Brožovský and T. Melichar	98
<b>Fine Grain Portland Cement Concrete with Complex Nanodisperse Admixture for Structure Rehabilitating</b> G.D. Fedorova, G.N. Alexandrov, G.I. Yakovlev, I.S. Polyanskikh and I. Pudov	105
<b>Influence of Temperature on Structure Formation Processes Geocements for Rehabilitation of Concrete</b> V. Kyrychok, R. Drochytka and P.V. Krivenko	111
<b>Reconstruction of the Municipal Bath House</b> R. Čajka and K. Burkovič	115
<b>Shielding Silicate Composition of Increased Durability for Repair and Rehabilitation</b> A. Shaybadullina, A. Politaeva, G. Yakovlev and G.N. Pervushin	121
<b>Special Repair Materials and Influence of Aggressive Environment on their Properties</b> L. Mészárosová, E. Tumova, Á. Dufka and R. Drochytka	127
<b>The Suitability of Sealants for Use with Concrete Structures</b> J. Šlanhof, P. Liška, B. Nečasová and M. Šimáčková	131
<b>Development of Lightweight Repair Materials Applicable to Re-Profiling to the Lightweight Concrete</b> Š. Keprdová, J. Bydžovský and N. Žižková	135

## Chapter 6: Materials Properties and Measurements in Building

<b>Comparison of Standardized Test Methods for Determining the Permeability of the Surface Layer of Concrete</b> T. Komárková, M. Králíková, D. Kocáb, P. Misák and T. Stavař	141
<b>Enhancing the Wood Glue Bond Using Cellulose Modified Epoxy</b> J. Vanerek, R. Drochytka and A. Benešová	145
<b>Experimental Comparison of Air Pore Content of Concrete with Different Dosage of Cement by Microscopic Analysis</b> B. Moravcová, M. Blažek, P. Pössl and P. Misák	149
<b>Experimental Determination of Innovative Plaster Moisture Expansion</b> J. Lukovičová, G. Pavlendová and S. Unčík	153
<b>Influence of Firing Temperature on the Quality of Fly Ash Body</b> V. Černý	157
<b>Investigating Interior Changes in Historical Building by Computational Modeling and Determination Critical Places for Structural Conservation</b> J. Souček and P. Tichá	161
<b>Long-Term Durability of Modified Wood-Polymer Composite to Alternate the Solid Wood External Application</b> A. Benešová and J. Vanerek	165
<b>Microscopic Analysis of Degradation of Polymer Fibers Subjected to Aggressive Environment</b> M. Kostecká, D. Kytýř, V. Koudelková and P. Koudelka	169
<b>Non-Destructive Defectoscopy of Building Structures by Lock-In Thermography</b> Z. Peřina, R. Fabian, M. Wolfová, P. Valíček and V. Panovec	173

<b>Non-Destructive Defectoscopy of Building Structures by Pulsed Thermography</b> Z. Peřina, R. Fabian, M. Wolfová, P. Valíček and V. Panovec	177
<b>Selection of Alternative Additives and their Influence on High-Temperature Resistance of Repair Mortars</b> M. Fiedlerová, T. Melichar, J. Bydžovský and Á. Dufka	181
<b>Single-Sided Nuclear Magnetic Resonance as a Non-Invasive Tool to Evaluate Sprayed Polymer Concrete</b> R. Schulte Holthausen and O. Weichold	185
<b>Storage Properties of Water-Soluble Salts in Bastion Historical Brick</b> R. Pernicová	191
<b>Thermographical Measurement of the Surface Temperature and Emissivity of Glossy Materials Using the Method of Four Points</b> F. Čmiel and J. Solař	195
<b>The Effect of Long Term Storage on Properties and Stability of Dry Mixture</b> E. Tumová, L. Mészárosová and R. Drochytka	201
<b>The Thermographic Measuring of the Surface Temperature of the Peripheral Wall after Removing a Technical Device for Elimination of Reflected Radiation</b> J. Solař and F. Čmiel	205
<b>Thermally-Technical Comparing of Traditional Double Timber Window and Eurowindow</b> L. Balík and L. Kudrnáčová	210
<b>Thermotechnical Calculation of Air Cavities by Rehabilitation of Wet Brickworks</b> J. Solař	214
<b>Use of Glassy Slag from Biomass Combustion in the Building Industry – Coarse Aggregate</b> F. Khestl, V. Šulková and P. Mec	219
<b>Use of Separated Dust from the Formatting and Grinding Cement-Bonded Chipboards to Modify their Composition</b> T. Melichar, D. Konečný, J. Bydžovský and M. Vacula	225
<b>Utilization of Liquefying Additives in Clay Fly Ash Grouting Mixtures</b> E. Helanová, M. Kociánová and R. Drochytka	229
<b>Verification of Applicability of Alternate Sources of Heat for Determination of the Surface Temperature and Emissivity of Glossy Materials</b> F. Čmiel and J. Solař	233
<b>Verification of Applicability of Thermographical Measuring of the Surface Temperature and the Influence of Emissivity of Glossy Materials while Eliminating the Reflected Radiation Using a Metal Shield</b> J. Solař and F. Čmiel	237

## **Chapter 7: Static and Dynamic Analysis of Buildings and Constructions**

<b>Comparison of Two Medieval Trusses from the Viewpoint of Geometric and Static Analysis</b> P. Krušínský, E. Capková and J. Gocál	243
<b>Statistical Simulation of Accidental Loads in the Problems of Constructional Mechanics</b> B. Yermenko, A. Pashko and S. Terenchuk	249
<b>Factors Affecting the Accuracy of Computations of Historic Structures</b> A. Maroušková	253
<b>Flexural Buckling of Columns Strengthened under Load</b> M. Vild and M. Bajer	257
<b>Insufficient Maintenance an Achilles Heel of the Broumov Group of Churches</b> G. Facelli and P. Kuklík	261
<b>Longitudinal Shear Analysis of Composite Slabs with Prepressed Embossments</b> J. Holomek, M. Bajer and M. Vild	265
<b>Numerical Investigation of Reinforcing a Masonry Column with Fiber Reinforced Strain Hardening Cementitious Composite</b> M. Jašek and J. Brozovsky	269
<b>The Corner Radius Influence on the Deformation Behavior of Brick Pillars Strengthened by CFRP Confinement</b> J. Kubat and J. Karas	273
