

# Table of Contents

## Preface, Scientific Committee

## Chapter 1: Technology of Rolling and Thermomechanical Processing

|  |    |
|--|----|
| <b>Effect of Parameters in the Physical Simulated Rough Rolling Stage on Microstructure Evaluation and Tensile Properties of a Bainitic Pipeline Steel</b>       | 3  |
| M. Soliman and H. Palkowski  |    |
| <b>Development of Modern Steels for Strain Based Design Pipe Lines and Simulation Results</b>  | 9  |
| C. Heering, K. Tokmakov and I. Schuster  |    |
| <b>Influence of Hot Rolling Condition on the Final Microstructure of Non-Oriented Electrical Steel Fe-3.2 wt.% Si</b>  | 16 |
| A. Stöcker, A. Franke, H. Hermann and R. Kawalla   |    |
| <b>On the Correlation between Microstructure Homogeneity and Formability in Two Multi Phase Steels Treated with Different Cooling Strategies</b>                 | 22 |
| M. Bechtold, M. Witte and S. Kluge   |    |
| <b>Production of Directly Quenched High-Strength Hot-Rolled Strip Steels - Influence of Rolling and Cooling Conditions on Mechanical Properties and Flatness</b> | 29 |
| J. Schöttler, T. Maiwald and G. Linke  |    |
| <b>Material Aspects of Hot Rolling and Cooling Conditions for Strips from Martensitic Steel</b>  | 35 |
| M. Dziedzic, S. Turczyn and Z. Kuzminski   |    |
| <b>Arvedi ESP Technology - The Hot Rolling of HS and AHS Thin Gauge Steel Strips</b>   | 42 |
| R. Venturini, P.D. Avancini, N. Barbier and A. Rizzi   |    |

## Chapter 2: New Materials, Special Forming Processes and Materials Characterization

|   |     |
|---|-----|
| <b>Substitution of Rare Earths in Magnesium Alloys</b>  | 51  |
| R. Hoppe, G. Kurz and D. Letzig   |     |
| <b>Substitution of Rare Earth Elements in Hot Rolled Magnesium Alloys with Improved Mechanical Properties</b>                     | 57  |
| K. Neh, M. Ullmann and R. Kawalla   |     |
| <b>The Effect of Sheet Thickness, Loading Rate and Punch Diameter on the Deformation Behaviour of AZ31 during 3-Point Bending</b> | 65  |
| F. Berge, H. Winderlich, C. Krötschek, M. Ullmann and R. Kawalla  |     |
| <b>Investigation of Texture Structure and Mechanical Properties Evolution during Hot Deformation of 1565 Aluminum Alloy</b>       | 73  |
| S.V. Rushchits, E.V. Aryshenskii, R. Kawalla and V. Serebryany  |     |
| <b>Development of Rolling Technology for an Iron-Based Shape-Memory-Alloy</b>   | 79  |
| C. Leinenbach, C. Czaderski, J. Michels, M. Graf and R. Kawalla   |     |
| <b>Rolling of Flat Aluminum Strips with Tailored Mechanical Properties</b>  | 87  |
| O. Grydin, S. Bondarenko, M. Stolbchenko and M. Schaper   |     |
| <b>Skin Pass Rolling of High Manganese Steels</b>   | 93  |
| K. Köhler, N. Kwiaton and M. Bretschneider  |     |
| <b>A New Strategy for Manufacturing Tailored Blanks by a Flexible Rolling Process</b>   | 99  |
| P. Hildenbrand, M. Lechner and M. Merklein  |     |
| <b>Corrosion Resistant Plates for Pipes Operated in Sour Environments</b>   | 106 |
| M.Y. Matrosov, O.N. Sychev, A.M. Korchagin and O.P. Talanov   |     |
| <b>Cyclic Tension Test of AZ31 Magnesium Alloy at Elevated Temperature Realized in a Miniaturized Uniaxial Tensile Test Setup</b> | 112 |
| S. Suttner and M. Merklein  |     |
| <b>Punch Stretch Test for TRIP690 and DP780 Steel at Elevated Temperatures</b>  | 118 |
| R. Krupa  |     |

|   |     |
|---|-----|
| <b>Effects of Process Parameter Variation on the Bonding Strength in Clad Steel Strips by Twin-Roll Strip Casting</b> | 124 |
| D. Münster, M. Vidoni and G. Hirt   |     |

## **Chapter 3: Mathematical Modeling and Numerical Investigation in Designing of Technological Processes**

|  |     |
|--|-----|
| <b>Thermo-Kinetic Modelling and Analysis of the Simultaneous Hot Stamping and Quenching of EN AW-6016-T4 Sheet</b>                             | 133 |
| M. Kumar   |     |
| <b>Modelling the Temperature Evolution During Hot Reversing Strip Rolling of Magnesium Alloys</b>  | 140 |
| A. Nam, U. Prüfert, M. Eiermann and R. Kawalla   |     |
| <b>Physical and Numerical Simulation of Cold Rolling and Heating during Continuous Annealing of DP Steel Strips</b>                            | 146 |
| L. Madej, N. Kwiaton, R. Kuziak, M. Sitko and M. Pietrzyk  |     |
| <b>A New FE-Model for the Investigation of Bond Formation and Failure in Roll Bonding Processes</b>  | 152 |
| M. Pietryga, J. Lohmar and G. Hirt   |     |
| <b>Implementation of a Dual Mesh Method for Longitudinal Rolling in QForm V8</b>   | 158 |
| D. Gerasimov, N. Biba, S. Stebunov and M.V. Kadach   |     |
| <b>Hybrid Modeling of Materials Properties for Improved CAE-Simulations</b>  | 163 |
| U. Diekmann, A. Miron and A. Trasca  |     |
| <b>Comparison of Numerical Simulation and Experiment for the Microstructure Development of a Cold-Rolled Multiphase Steel during Annealing</b> | 167 |
| N. Kwiaton, R. Kuziak and M. Pietrzyk  |     |
| <b>Material Models and their Capability for Process and Material Properties Design in Different Forming Processes</b>                          | 174 |
| K. Schacht, U. Prahl and W. Bleck  |     |
| <b>Computer Model STAN 2000 and its Use in Practice of Steels Hot Rolling on Mill 2000 of Severstal</b>  | 183 |
| A.A. Ogoltcov, D. Sokolov, S. Sokolov and A.A. Vasilev   |     |

## **Chapter 4: Systems of Control, Automation and Measurements, Plant Layout for Production and Processing**

|  |     |
|--|-----|
| <b>Further Developments in Strip Thickness Measurement Laser-Based Strip Thickness Measurement</b>   | 193 |
| E. Roller  |     |
| <b>New Opportunities for Process Optimization in the Metal Industry Using Laser Line Sensors for Thickness and Width Gauging</b>                         | 200 |
| A. Sonntag   |     |
| <b>Arvedi ESP for High-Quality Hot-Strip Production at Rizhao Steel</b>  | 207 |
| B. Linzer and A. Jungbauer   |     |
| <b>Digitalization in Hot and Cold Rolling Mills</b>  | 215 |
| J. Ohlert, A. Sprock and P. Sudau  |     |
| <b>Power Cooling</b>   | 225 |
| E. Opitz, A. Seilinger, L. Pichler, O. Silbermann and A. Rimnac  |     |
| <b>The Virtual Rolling Mill – Enhancing Product Development and Commissioning</b>  | 231 |
| M. Klinkov and R. Feist  |     |
| <b>Inline High Speed Laser Cutting of Band Material</b>  | 237 |
| A. Wetzig, J. Hauptmann, P. Herwig, E. Beyer, W. Bundschuh, S. Volk and M. Hemberger   |     |
| <b>Industrialization of New Developments in the Lubrication System of the Coupled Tandem Mill AMEKO at ArcelorMittal Eisenhüttenstadt with Henkel AG</b> | 243 |
| M. Tille, B. Staes, G. Sardo, A. Müller, T. Saffer and F. Fabian   |     |
| <b>Numerical Investigation of a Process Control for the Roller Levelling Process Based on a Force Measurement</b>  | 249 |
| M. Grüber and G. Hirt  |     |

**Continuous Casting and Rolling Technology at MKM Mansfelder Kupfer und Messing  
GmbH – Optimisation of the Surface Quality for Conti-M® Strip**

K.D. Palm, H. Busch and A. Dusdorf
