

Table of Contents

Preface, Scientific Committee

Chapter 1: Technology of Rolling and Thermomechanical Processing

Effect of Parameters in the Physical Simulated Rough Rolling Stage on Microstructure Evaluation and Tensile Properties of a Bainitic Pipeline Steel M. Soliman and H. Palkowski	3
Development of Modern Steels for Strain Based Design Pipe Lines and Simulation Results C. Heering, K. Tokmakov and I. Schuster	9
Influence of Hot Rolling Condition on the Final Microstructure of Non-Oriented Electrical Steel Fe-3.2 wt.% Si A. Stöcker, A. Franke, H. Hermann and R. Kawalla	16
On the Correlation between Microstructure Homogeneity and Formability in Two Multi Phase Steels Treated with Different Cooling Strategies M. Bechtold, M. Witte and S. Kluge	22
Production of Directly Quenched High-Strength Hot-Rolled Strip Steels - Influence of Rolling and Cooling Conditions on Mechanical Properties and Flatness J. Schöttler, T. Maiwald and G. Linke	29
Material Aspects of Hot Rolling and Cooling Conditions for Strips from Martensitic Steel M. Dziedzic, S. Turczyn and Z. Kuzminski	35
Arvedi ESP Technology - The Hot Rolling of HS and AHS Thin Gauge Steel Strips R. Venturini, P.D. Avancini, N. Barbier and A. Rizzi	42

Chapter 2: New Materials, Special Forming Processes and Materials Characterization

Substitution of Rare Earths in Magnesium Alloys R. Hoppe, G. Kurz and D. Letzig	51
Substitution of Rare Earth Elements in Hot Rolled Magnesium Alloys with Improved Mechanical Properties K. Neh, M. Ullmann and R. Kawalla	57
The Effect of Sheet Thickness, Loading Rate and Punch Diameter on the Deformation Behaviour of AZ31 during 3-Point Bending F. Berge, H. Winderlich, C. Kröbetschek, M. Ullmann and R. Kawalla	65
Investigation of Texture Structure and Mechanical Properties Evolution during Hot Deformation of 1565 Aluminum Alloy S.V. Rushchits, E.V. Aryshenskii, R. Kawalla and V. Serebryany	73
Development of Rolling Technology for an Iron-Based Shape-Memory-Alloy C. Leinenbach, C. Czaderski, J. Michels, M. Graf and R. Kawalla	79
Rolling of Flat Aluminum Strips with Tailored Mechanical Properties O. Grydin, S. Bondarenko, M. Stolbchenko and M. Schaper	87
Skin Pass Rolling of High Manganese Steels K. Köhler, N. Kwiaton and M. Bretschneider	93
A New Strategy for Manufacturing Tailored Blanks by a Flexible Rolling Process P. Hildenbrand, M. Lechner and M. Merklein	99
Corrosion Resistant Plates for Pipes Operated in Sour Environments M.Y. Matrosov, O.N. Sychev, A.M. Korchagin and O.P. Talanov	106
Cyclic Tension Test of AZ31 Magnesium Alloy at Elevated Temperature Realized in a Miniaturized Uniaxial Tensile Test Setup S. Suttner and M. Merklein	112
Punch Stretch Test for TRIP690 and DP780 Steel at Elevated Temperatures R. Krupa	118

Effects of Process Parameter Variation on the Bonding Strength in Clad Steel Strips by Twin-Roll Strip Casting D. Münster, M. Vidoni and G. Hirt	124
--	-----

Chapter 3: Mathematical Modeling and Numerical Investigation in Designing of Technological Processes

Thermo-Kinetic Modelling and Analysis of the Simultaneous Hot Stamping and Quenching of EN AW-6016-T4 Sheet M. Kumar	133
Modelling the Temperature Evolution During Hot Reversing Strip Rolling of Magnesium Alloys A. Nam, U. Prüfert, M. Eiermann and R. Kawalla	140
Physical and Numerical Simulation of Cold Rolling and Heating during Continuous Annealing of DP Steel Strips L. Madej, N. Kwiaton, R. Kuziak, M. Sitko and M. Pietrzyk	146
A New FE-Model for the Investigation of Bond Formation and Failure in Roll Bonding Processes M. Pietryga, J. Lohmar and G. Hirt	152
Implementation of a Dual Mesh Method for Longitudinal Rolling in QForm V8 D. Gerasimov, N. Biba, S. Stebunov and M.V. Kadach	158
Hybrid Modeling of Materials Properties for Improved CAE-Simulations U. Diekmann, A. Miron and A. Trasca	163
Comparison of Numerical Simulation and Experiment for the Microstructure Development of a Cold-Rolled Multiphase Steel during Annealing N. Kwiaton, R. Kuziak and M. Pietrzyk	167
Material Models and their Capability for Process and Material Properties Design in Different Forming Processes K. Schacht, U. Prahl and W. Bleck	174
Computer Model STAN 2000 and its Use in Practice of Steels Hot Rolling on Mill 2000 of Severstal A.A. Ogoltcov, D. Sokolov, S. Sokolov and A.A. Vasilyev	183

Chapter 4: Systems of Control, Automation and Measurements, Plant Layout for Production and Processing

Further Developments in Strip Thickness Measurement Laser-Based Strip Thickness Measurement E. Roller	193
New Opportunities for Process Optimization in the Metal Industry Using Laser Line Sensors for Thickness and Width Gauging A. Sonntag	200
Arvedi ESP for High-Quality Hot-Strip Production at Rizhao Steel B. Linzer and A. Jungbauer	207
Digitalization in Hot and Cold Rolling Mills J. Ohlert, A. Sprock and P. Sudau	215
Power Cooling E. Opitz, A. Seilinger, L. Pichler, O. Silbermann and A. Rimnac	225
The Virtual Rolling Mill – Enhancing Product Development and Commissioning M. Klinkov and R. Feist	231
Inline High Speed Laser Cutting of Band Material A. Wetzig, J. Hauptmann, P. Herwig, E. Beyer, W. Bundschuh, S. Volk and M. Hemberger	237
Industrialization of New Developments in the Lubrication System of the Coupled Tandem Mill AMEKO at ArcelorMittal Eisenhüttenstadt with Henkel AG M. Tille, B. Staes, G. Sardo, A. Müller, T. Saffer and F. Fabian	243
Numerical Investigation of a Process Control for the Roller Levelling Process Based on a Force Measurement M. Grüber and G. Hirt	249
