

Table of Contents

Preface and Committees

I. Extrusion Benchmark

Extrusion Benchmark 2011: Evaluation of Different Design Strategies on Process Conditions, Die Deflection and Seam Weld Quality in Hollow Profiles

A. Selvaggio, A. Segatori, A. Güzel, L. Donati, L. Tomesani and A.E. Tekkaya 1

II. Process Optimization

High Strength Aluminium Alloys Extrusions - A Review of the Thermo-Mechanical-Process in High Performance Profile Manufacturing

O. Jensrud 11

Finite Element Modelling of the Charge Welds Evolution in a Porthole Die

B. Reggiani, A. Segatori, L. Donati and L. Tomesani 19

Surface Quality Prediction in Aluminum Extrusion

M. de Rooij, X. Ma, A.J. den Bakker and R.J. Werkhoven 27

Influence of Contact Friction Conditions on Thin Profile Simulation Accuracy in Extrusion

S. Stebunov, N. Biba and A. Lishnij 35

Constitutive Equations for Hot Extrusion of AA6005A, AA6063 and AA7020 Alloys

T. Pinter and M. El Mehtedi 43

III. Innovative Processes

Investigation of Conclad Extrusion and Multi-Billet Extrusion

M. Hoshino 51

Advanced Technologies Used in the Manufacture of Products from Aluminium Alloys Powder in Extrusion Process

B. Plonka and J. Senderski 59

Co-Extrusion of Aluminium-Titanium-Compounds

N. Grittner, B. Striwe, A. von Hehl, D. Bormann, M. Hunkel, H.W. Zoch and F.W. Bach 67

Processing of Wrought Magnesium Alloys to Produce Small Tubes for Biomedical Applications: Investigation about the Extrusion Process by a Laboratory Test Rig

Q. Ge and M. Vedani 75

The Process of Co-Extrusion – An Analysis

K. Kittner and B. Awiszus 81

Factors Influencing Bonding Mechanics in FSW of AA5754

G. Buffa, L. Fratini, F. Micari and G. Previte 89

IV. Material Flow and Friction Evaluation

Experimental and Numerical Analysis of Material Flow in Porthole Die Extrusion

T. Kloppenborg, M. Schwane, N. Ben Khalifa, A.E. Tekkaya and A. Brosius 97

Aluminium Extrusion Weld Formation and Metal Flow Analysis in Hollow Profile Extrusions of Different Section Thickness

Y.A. Khan and H.S. Valberg 105

Experimental and Numerical Analysis of the Friction Condition in the Die Bearing during Aluminum Extrusion

S. Müller, J. Muehlhause, J. Maier and P. Hora 113

Conditions for Sticking Friction between Aluminium Alloy AA6060 and Tool Steel in Hot Forming

F. Widerøe and T. Welo 121

Modeling of Friction Phenomena in Extrusion Processes by Using a New Torsion-Friction Test

P. Hora, M. Gorji and B. Berisha 129

Experimental and Numerical Investigations on Metal Flow during Direct Extrusion of EN AW-6082	
M. Kammler, T. Hadifi, M. Nowak and A. Bouguecha	137
Experimental Analysis of Velocity Fields in Hot Extrusion of Aluminium Alloy 6351	
M. Martins, S.T. Button and J.D. Bressan	145
 V. Seam Welding Phenomena	
3D FEM-NEM Material Joining Simulation in Porthole Die Extrusion	
F. Gagliardi, I. Alfaro, L. Filice and E. Cueto	151
Numerical Modeling of Extrusion Welding in Magnesium Alloys	
Y. Xu and W.Z. Misiolek	159
Optimization of Aluminium Extrusion by Porthole Die Using a down Scaled Equipment	
F. Gagliardi, G. Ambrogio and L. Filice	173
Coupled Simulative-Experimental Procedure for Studying the Solid State Bonding Phenomena	
G. D'Urso, M. Longo, E. Ceretti and C. Giardini	181
Numerical and Experimental Study on Seam Welding Behavior in Extrusion of Micro-Channel Tube	
D. Tang, Q.Q. Zhang, D.Y. Li and Y.H. Peng	189
Analysis of Gas Pocket Formation during Extrusion of Al Hollow Profiles and Establishing an Extrusion Seam Weld Limit Diagram	
Y.A. Khan, S. Torabzadeh Khorasani and H.S. Valberg	197
Numerical Investigations of Welding Conditions during Extrusion of 2024 Alloy through Porthole Dies	
D. Lesniak, A. Rękas, W. Libura and J. Zasadziński	205
 VI. Dies and Tools	
Effect of Liquid Nitrogen Die Cooling on Extrusion Process Conditions	
L. Donati, A. Segatori, B. Reggiani, L. Tomesani and P.A. Bevilacqua Fazzini	215
New Concepts for Cooling of Extrusion Dies Manufactured by Rapid Tooling	
R. Hölker, A. Jäger, N. Ben Khalifa and A.E. Tekkaya	223
Constitutive Laws for the Deformation Estimation of Extrusion Die in the Creep-Fatigue Regime	
B. Reggiani, L. Donati and L. Tomesani	233
Effect of Strain Rate on Metal Flow Pattern in T-Section Extrusion Process	
P. Homayoun and M. Ketabchi	241
Design and Experimental Verification during Extrusion of Square Sections from Round Billets through Curved Dies	
A.K. Rout, K.P. Maity and M.K. Parida	249
 VII. Microstructure Prediction	
Simulation of Hot Extrusion of an Aluminum Alloy with Modeling of Microstructure	
A. Ockewitz, D.Z. Sun, F. Andrieux and S. Müller	257
Simulation of the Grain Structure Evolution of a Mg-Al-Ca-Based Alloy during Hot Extrusion Using the Cellular Automation Method	
L. Li, F. He, X. Liu, Y. Lou, J. Zhou and J. Duczcyk	265
