ISBN(softcover): 978-0-87849-224-4 ISBN(eBook): 978-3-03813-482-4

Table of Contents

Preface

Study on the Grooved Finger and its Application in Micro Gripper
X.H. Zheng, Y.W. Liu, F. Gu, J.K. Kim and D.W. Lee 1

Study on the Semantic Model of Product Form
Z. Gao and X.M. Ji 8

Research on Sound Absorption Properties of Aramid Micro-Perforated Composite Sound Absorbing Material
Y.F. Wen, Y.N. Rui, H.W. Wang and X. Chen 14

Design of Turning Insert with Three-Dimensional Complex Groove Using Cellular Automata
X.M. Feng and G.Y. Tan 23

Simulation on NC Machining for Revolving Body of Stone
Y.H. Liu, D.W. Zuo and D. Zhang 29

A Parametric Curve Interpolation Algorithm for High Speed Machining
Q.J. Liu, J.H. Yue, Y.F. Wang, J.C. Dong and T.Y. Wang 35

Study on the Representation System of Product Design Knowledge
Y.W. Liu 42

A New Approach for Automation of Locating Planning of Workpiece
T.J. Wu, P.H. Lou and Z.G. Man 48

The Confined Chord Error Algorithmfor Machining Complex Parametric Curve
Y.J. Hao, Z.Q. Zhang, T.Y. Wang, Q.J. Liu and Z.F. Qiao 55

Research on Flow Field Simulation and Experiment of Numerical Control Electrochemical Machining
X.Q. Fu, M. Kang and Q.Y. Zheng 63

Process Modeling Methods Based on Global and Associated Design and its Application
Z.F. Liu, H. Liu, J.H. Wang and G.P. An 69

Effect of Temperature on the Impact Performance of Short Fiber Reinforced Composites
F.Y. Wang, G.L. Zhang, J.L. Li, Y.F. Zhang, L. Chen and M. Zhang 75

Studied on the Microfluidic Chip Based on the Kapton by Excimer Laser Ablation
S.J. Sun, J.J. Zhu and W.K.C. Yung 81

Design and Study of the Initial Probe for Multi-Function Fire Helmet
B. Li, B. Li and H.Z. Yang 87

Research on the Process of NC-ECM with Ball-End Cathode Based on FEM
Y. Yang, M. Kang and X.Q. Fu 93

Numerical Simulation of Electrochemical Machining Process and Machined Surface Prediction
F.Y. Wang, J.W. Xu and J.S. Zhao 99

Wear Rule of TiAlN Coated Cutting Tool when Milling Material with High Hardness at High Speed
Y.D. Guo 106

Laser Assisted Turning of Sintered Silicon Nitride
X.F. Wu, H.Z. Zhang and Y. Wang 113

Finite Element Analysis of Thermo-Elastic-Plastic Creep of Super-Heat and High-Pressure Steam Pipe
X.L. Guo, H.M. Lu and W.X. Xu 119

Micro-ECM of Maze Flow Channel on Bipolar Plates of Fuel Cell
Y.L. Chen, H.B. Zhan, S.J. Lee and S.M. Zhu 125

Application of Monto-Carlo Method in HR Investment Risk Evaluation
J.J. Lu and X.X. Ning 131

Vibration Modal Analysis of the Active Magnetic Bearing System
H.Y. Fu, P.F. Liu, Q.C. Zhang and Y.T. Wang 137

Improved Dynamic Process Neural Network and its Application
P.Y. Zhang, G.B. Yu, B. Dai and Y.J. Ao 143

The Simulation of Cutting Force and Temperature Field in Turning of Inconel 718
Z.C. Yang, D.H. Zhang, X.C. Huang, C.F. Yao, Y.S. Liang and Y. Mao 149

Finite Element Analysis of Inductance Sensor Structure in the Measuring System of the Grade of the Iron Concentrate
Z. Zhou, Z.H. Guan, J. Luo, L.J. Wang, Y. Qin and G.F. Sun 155

A System Characteristic Parameters Identification Method by Wavelet Transform Image Ridge
J.H. Yue, J. Zhao, M. Yu, Y.J. Hao and T.Y. Wang 161

A Capillary Model for Gasesas Coolant and Lubricant in Metal Cutting
Y. Zhang, T.L. Sun, Q.D. Li and X.C. Zhang 167

Statistical Inference of LZL-Type Mass Flowmeter Life Distribution Model
Z. Zhou, L.N. Zhang, Y. Qin, D.Z. Ma and B. Niu 173

Prediction Model of Surface Roughness for 2A70 Alloy Based on Orthogonal Test
X.W. Yu and X.H. Ma 179

The Study of Method for Calculating Geometric Average Sound Intensity in Scattering Field
F.L. Luo and G.Y. Li 185

Theoretical Study on Rotating Platform Design for Platform-Based Lifting Fruit-Picking Vehicle in Mountainous Terrain
X.B. Dong and H. Wu 192

Modeling and Simulation of Flexible Band Based on the Muti-Body Dynamics
B.H. Wu, B.J. Pang and Z.Q. Deng 200

Research on the Content of Binder in Pattenless Casting Manufacturing Technique
W.D. Yang and L.B. Liu 206

An Integrated RS and ANN Design Method for Product Agile Customization
C.F. Yuan, W.L. Wang and Y. Chen 212

Moving Character Analysis of a Novel 3-DOF Parallel Mechanism
H.J. San, S.S. Zhong and Z.X. Wang 218

Study on Flow Resistance and Filtration Efficiency of the Carbonized Micron Wood Fiber DPF
Y. Ma, X.R. Guo, C.M. Yang and D.F. Du 224

The Study and Application of Electromagnetic Vibration Shaker Finite Element Model Updating and Validation Technology
X.T. Liu, Z.B. Chen, L.F. Xu and S.Y. Huang 231

Algorithm for Simulator's Road Spectrum Signal
Z.M. Zhao, M.X. Kong, Z.J. Du and L.N. Sun 237

Parameter Optimization of a Five-Axis Tool Grinder Using Grey Relational Analysis
J.Y. Chen and B.Y. Lee 246

Study on Frictional Wear Property of the High Vanadium High Speed Steel
H.M. Chen and L.J. Xu 252

Implementation of Management Model for Manufacturing Information Based to PDM
Y.H. Hu, X.M. Hu, Q.C. Zheng and H.J. Lv 258

Nonlinear Dynamic Characteristics of Semi-Active Suspension System with SMA Spring Based on Hysteretic Nonlinear Theory
Z.W. Zhu, C.W. Sui and J. Xu 265

An Ontology-Based Design Knowledge Model for the Construction Machinery
Z. Gao, X.M. Ji and H. Guo 271

Modeling and Experimental Investigation of Jet Electrolytic Drilling
H. Zhang, J.W. Xu and J.S. Zhao 277

Finite Element Analysis of Machining Thin-Wall Parts
R. Izamshah R.A., J. Mo and S.L. Ding 283

Chatter Detection in High Speed Machining of Titanium Alloys
S.L. Ding, R. Izamshah R.A., J. Mo and Y.W. Zhu 289

Finite Element Analysis of the Influence of Cutting Edge Radius on Mechanical-Thermal Distribution in High-Speed Cutting TiAl6v4
Y.H. Fan, M.L. Zheng, S.C. Yang, W. Zhang and D.Q. Zhang 295

Research and Application of Data Acquisition & Processing of Standard Man-Hour in Discrete Manufacturing Process
M. Lv, Y.X. Liu and Y. Che 301

Experimental Study of Pulsed Electrolyte Jet Machining for Small Hole
Y.Q. Yu, J.S. Zhao, B.H. Li and J.W. Xu 307

Design of Gantry Robot for Dye Dispense and Analysis of Vibration of its Synchronous Belt Driven and Positioning System
Z.H. Zhao, X.M. Jiang and Y.H. Du 313

Simulation Study of the Temperature Field for Squashed Presetting Laser Cladding Based on ANSYS
G. Chen, X.F. Li, D.W. Zuo, H.Y. Wang and Y. Jiang 319

Experimental Investigation on the Process of Jet Electrochemical Machining and Guided Laser Beam Machining
L.X. Yuan, J.W. Xu and J.S. Zhao 325

Research on NC Electrochemical Mechanical Complex Machining Stainless Steel
W.M. Gan, X.L. Xie, B. Xu and W.B. Huang 331

A Method for Designing and Optimizing Force Balanced Constant Spring Hangers with MATLAB Language and Environment
C. Su, Z.R. Zhang and A. Li 337

One Digital Realization Method of Vector Control Project for Permanent Magnet Synchronous Motor
Z.Y. Li and H. Ji 344

System Design and Low-Speed Kinematics Characteristic Analysis of Electrochemical Micro-Machining Equipment
Z.Y. Li, Z.W. Niu and L. Li 349

Online Tool Life Prediction in the Machining of Titanium Alloys
S.L. Ding, R. Izamshah R.A., J. Mo and Q.S. Liu 355

The Development of an Economic Model for the Milling of Titanium Alloys
S.L. Ding, R. Izamshah R.A., J. Mo and Y.W. Zhu 362

Reconstructing of Prototype Surface with Reverse Engineering and Data Process Technology
D.M. Yu, X.J. Li, Y. Xiong, Z.H. Gao and D. Wang 368

The Effect of the Scanning Mode on the Finished Precision for SLA Technology
D.M. Yu, X.J. Li, J. Su, D. Wang, Z.H. Gao and Y. Xiong 374

Exploration of Industrial Ecology Growth Base on Po Yang Lake Ecological Economic Zone
Y.Q. Tang and Z.B. Tang 380

Design of Straw Reuse & Soil Levelling Compound Machine in Paddy Field
X.C. Yang and H.J. Wang 386
