

# Table of Contents

## Preface

## Chapter 1: Heat Transfer and Fluid Mechanics

<b>Effect of the Inclination on Three-Dimensional Incompressible Fluid Flow in a Discretely Heated Cavity</b>	
L. Belarche, B. Abourida, S. Smolen and T. Mediouni	3
<b>Operational Control of Hydraulic Turbines Assisted by Speed Variation</b>	
U. Borchert, J.A. Szymczyk and J. Iwan	9
<b>Free Convection of Water-Al<sub>2</sub>O<sub>3</sub> Nanofluid from Horizontal Porous Coated Tube</b>	
J.T. Cieřliński and K. Krygier	15
<b>Wettability of Horizontal Stainless Steel Tube by Nanofluid Droplets</b>	
J.T. Cieřliński and K. Krygier	21
<b>Development of a Stall Barrier with Internal Flow Channel for Effective, Highly Separated Boundary Layer and Flow Control in the Rotor Blade Root Region</b>	
F. Kortenstedde, B. Stanke, C. Wendler and B. Steckemetz	29
<b>Experimental Investigation of Parameters, Influencing Velocity Fields during Beer Fermentation</b>	
H. Meironke and K. Böttcher	37
<b>Calculation and Optimization of Heat Transfer between the Low Exergy Heat Source and Organic Rankine Cycle Applied to Heat Recovery Systems</b>	
S. Smoleń and H. Boertz	45
<b>Experimental and Numerical Investigation of Thin Liquid Layers at Curved Solid Edges</b>	
O. Sommer, D. Moller and G. Wozniak	51
<b>Effect of Surface Roughness on Thermal-Hydraulic Characteristics of Plate Heat Exchanger</b>	
J. Wajs and D. Mikielwicz	63

## Chapter 2: Power Engineering

<b>Methods of Determination of the Fuel Consumption of the Locomotive Diesel-Electric Propulsion System for Regular Operating Conditions</b>	
P. Kortas	77
<b>Organic Rankine Cycle as Bottoming Cycle to a Combined Brayton and Clausius - Rankine Cycle</b>	
D. Mikielwicz, J. Wajs and E. Źmuda	87
<b>The Analysis of Turbine Propulsion Systems in Nuclear Submarines</b>	
M. Piwowarski	99
<b>Selected Problems of Cogeneration Energy Systems Designing, Fueled with Landfill Biogas</b>	
M. Ziolkowski	107

## Chapter 3: Mechanics and Mechatronics

<b>Modal Parameters Identification with Particle Swarm Optimization</b>	
M.A. Galewski	119
<b>High Speed Milling Vibration Surveillance with Optimal Spindle Speed Based on Optimal Speeds Map</b>	
K.J. Kaliński, M.A. Galewski and M.R. Mazur	125
<b>On Software Unit Testing for Improving Security and Performance of Distributed Applications</b>	
H. Krawczyk, M. Barylski and A. Barylski	131
<b>Frequency Response Spectra Applied to Assess Efficiency of the Training Techniques</b>	
T. Kucharski	137

<b>Numerical Comparison of Damping Amplification Effects Obtained in Neighbourhood of a Mechanism's Singular Position - Viscous and Electromagnetic Cases</b> K. Lipiński	145
--	-----

## **Chapter 4: Technology and Automotive Engineering**

<b>Investigations into Fundamentals and Forming System Design for Micro-Tube Expansion with Pressurized Media</b> G. Anyasodor and C. Hartl	153
<b>Generative Process Planning with Reasoning Based on Geometrical Product Specification</b> M. Deja and M. Siemiatkowski	159
<b>Analysis of Rolling Resistance of Tires with Run Flat Insert</b> J.A. Ejsmont, J. Jackowski, W. Luty, G. Motrycz, P. Stryjek and B. Swieczko-Zurek	165
<b>Diffusible Hydrogen Control in Flux Cored Arc Welding Process</b> D. Fydrych, A. Świerczyńska and J. Tomków	171
<b>The Initial Selection of Parameters for Dynamic Brake for Car Engine Test Dynamometer</b> Z. Kneba and J. Kropiwnicki	179
<b>Carbon Dioxide Potential Reduction Using Start-Stop System in a Car</b> J. Kropiwnicki and Z. Kneba	185
<b>Road Texture Influence on Tire Rolling Resistance</b> S. Taryma, J.A. Ejsmont, G. Ronowski, B. Swieczko-Zurek, P. Mioduszewski, M. Drywa and R. Woźniak	193
<b>Analysis and Comparison of Safety of Children and Adult Passenger in Car Based on Crash Tests Results</b> B. Zdunek, M. Landowski, S. Taryma, R. Woźniak, K. Imielińska and A. Muszyński	199
