

Table of Contents

Preface, Sponsors and Committee

A Concept of Differential-Integral Method Applied in Polymer Processing and Molding W.M. Yang	1
Thermal Conductivity and Mechanical Properties of Natural Rubber Filled with Modified-Graphite L.X. Ma, H.Q. Yan, J.N. Ke and Y. He	10
Finite-Element Comparative Analysis of Two Kinds of Meshing Rotor C.S. Wang, W.S. Lv and H.G. Bian	16
Anti-Icing Nanoparticle/Polymer Composite Coatings X.D. Tang, J. Li, L. Li, H. Chen and X.L. Kong	22
Artificial Neural Networks in Prediction of Mechanical Behavior of High Performance Plastic Composites W. He, G.H. Bao, T.J. Ge, A.S. Luyt and X.G. Jian	27
Effect of Plasticizer and Load on Melt Electrospinning of PLA F.W. Zhao, Y. Liu, Y.M. Ding, H. Yan, P.C. Xie and W.M. Yang	32
Synthesis and Characterization of Epothilone B Molecular Imprinted Polymers G.L. Gong, L. Jia and H. Li	37
Study of Konjac Glucomannan Esterification with Dicarboxylic Anhydride and Effect of Degree of Esterification on Water Absorbency B.C. Han, C. Zhang, X. Yao and X.G. Luo	42
Finite Element Analysis of Flow Field in Nano-Laminated Coextrusion Die T.K. Shan, C.J. Li, W.M. Yang and S.J. Li	47
Research on Crafts of Ni-P-Al₂O₃-SiO₂ Electroless Composite Plating J.Y. Hou	53
Application of SMA on the Alloy of Nylon6/ABS C. Wang, Y.C. Li and Z.X. Yao	57
Thermal Conductivity of Amorphous and Crystalline SiO₂ Nano-Films from Molecular Dynamics Simulations Y. He, Y.Z. Tang, M. Ding and L.X. Ma	64
Numerical Investigation of the Effect of Rotors' Geometric Structure on Mixing Properties of Continuous Mixer Y. An, W.M. Yang and Y.M. Ding	70
Dynamic Simulation of 3D Fluid Field for Four-Wing Synchronous Mixer Rotor and Four-Wing Asynchronous Mixer Rotor C.P. Chen, C.S. Wang and M. Zhang	76
Data Measurement and Analysis Method for YLJ Series Tire Uniformity Testing Machine B.L. Hang, Z.Y. Lu, Z.Y. Duan and F.W. Liu	82
Study on Thermal Conductivity of Filled Silicone Rubber L.X. Ma, J. Xu, Y. He and J.N. Ke	88
Review of Research Progress on Galling in Sheet Metal Forming Y.K. Hou, Y.P. Li, Z.Q. Yu, Y.X. Zhao and S.H. Li	94
The Study on the Preparation and Properties of PPO/PA66 Alloy with a New Type of Compatiblizer B Y.T. Zhang, Y. Li, L. Li and X.W. Qu	99
A New Preparation Method of Barrier Material Based on Micro-Nano Lamination Technology Q. Wang, P.C. Xie, W.M. Yang and Y.M. Ding	104
The Structure Design of a New V-Belt Z.M. Meng, C. Ren and Y.B. Qiao	108
The Influence on the Physical and Mechanical Properties of the Tread by Preheating of Raw Rubber C.S. Wang and F.B. Bai	114
Analysis of Influences of Processing Parameters on Filling Behavior in Microinjection Molding with a Hot Runner Nozzle G. Gou, P.C. Xie, W.M. Yang and Y.M. Ding	117

Non-Plug Solid Conveying Theory and Granule in Feeding Section by Single-Screw Extrusion Molding	
C.H. Liu, D.L. Shi, Y.Y. Wu and J.H. Qin	122
Characterization and Catalytic Activity of Fenton-Like Catalyst: Fe₂O₃/Attapulgite	
S.R. Yu, T. Zhang and H.X. Feng	128
A New Technology for the Synthesis of Rare-Earth Stearate and Several Metal Stearate at the same Time	
T.J. Ge, W. He, Y. Yu and X.F. He	134
Thermal Conductivity and Thermal Mechanism of Octadecane from Molecular Dynamics Simulations	
Q.L. Li, W.J. Zheng, Y. Wang and Y. Zhou	139
Mechanical Behavior of the Rubber Blanket Used for Electrical Machine Hanging	
T.K. Shan	145
Simulation on Effect of Five Kinds of Belt Structures on Tire Performance	
Y. Liu, G. Zhang, H. Yan, Y.M. Ding and W.M. Yang	151
Resin-Based Truss Composite Materials and its Preparation Process	
W.M. Yang, Y. Wang and S.J. Li	156
Design of a Multi Microinjection Molding Module for Thermoplastic Polymer	
P.P. Zhang, J. Wang, P.C. Xie, L.L. Miao and W.M. Yang	162
Filling-to-Packing Switchover Mode Based on Cavity Pressure for Injection Molding	
J. Wang	168
Experimental Studies on Epoxy-Amine System Using Microwave and Conventional Curing Approaches	
T. Sun, X.L. Chang and J.W. Lai	174
Dynamic Modeling and Vibration Analysis of the Drum Washing Machine Based on Four-Terminal Parameter Method	
J.F. Wu, H. Li, X.Z. Yang and X.P. Zhang	179
The Study of Electroless Ni-B Coating on 45 Steel	
J.Z. Guo and Q. Liu	185
Numerical Simulation and Balance Design of Rubber Injection Mold Gating System Based on POLYFLOW	
L.S. Chen, H.M. Zhang and J.T. Niu	190
The Addition of ABS-g-MAH on Properties of Nylon6/ABS Alloy	
Z.J. Quan, G. Chen, Y. Zhang, Y.Z. Zhang, H.B. Zhang, L. Wu, X. He and C. Wang	196
Mesoscale Simulation of Drug Molecules Distribution in the Matrix of Konjac Glucomannan (KGM) at Varying Drug Concentrations	
L. Pang, C. Zhang, D.H. Liu, C.L. Zhong, X.G. Luo and X.Y. Lin	202
Preparation of Soy Protein Isolate Modified by Glutaric Dialdehyde and its Application in Rubber Composite	
Q.H. Fang, D. Zhou, W.C. Han, Y. Gao, N. Wang and F. Yang	208
Research on Moulding Process and Dielectric Property of Polyimide Foam	
K.L. Qi and G.C. Zhang	215
The Modular Design of Cold Feeding Rubber Extruders	
X.Y. Liu, Z.Q. Wang and B.Y. Lv	220
Numerical Simulation of Differential Injection Molding Based on Moldex 3D	
L.L. Miao, P.C. Xie, P.P. Zhang and W.M. Yang	225
Structure and Properties of Cobaltous Chloride/Polyvinyl Alcohol-Glutaraldehyde(CC/PVA-GA) Reversible Thermochromic Microcapsule	
J. Gao, P. Guan, X.L. Hu and M. Cao	231
Key Parameters Influencing Microcellular Polystyrene Cell Morphology Blowing with Supercritical CO₂	
C.Y. Gao, N.Q. Zhou, T.K. Shan and Z.X. Xin	237
Experimental Study of Relations between Synchronous Rotor Speed and Mixing Process	
X.K. Zeng, S. An, D.W. Zhang and D. Wang	243
Effect of Die Structure on Radial Orientation of Short Fiber in Tire Tread and its Performance	
D.W. Zhang, C.S. Wang, G.Y. Lin, S.M. Li and C.P. Chen	247
Vibration Analysis of Tripod of the Twin Tripod Sliding Universal Joint Based on ANSYS	
D.G. Chang, R. Zong and Z.D. Liu	253

Analytical Method of the Rolling Resistance of Radial Tire Base on ANSYS Z.P. Wang, J.N. Ke and L.X. Ma	259
The Binding Performance of Erythromycin Imprinted Polymeric Microspheres P. Guan, X.L. Hu and L. Zhu	263
Simulation of Micro-Gear Manufactured by Differential Injection Molding Based on Moldex 3D P.C. Xie, L.L. Miao, P.P. Zhang and W.M. Yang	269
Effects of Particle Size on the Rubber Mixing Process and Mechanical Properties of Compound G.Y. Lin, B.F. Gao and C.S. Wang	274
Research on Optimization of the Process Parameters of Bio-Packaging Materials by Response Surface Method X.K. Zeng, S. An, C.S. Wang and H.G. Bian	279
Research on Spiral Engagement Cold Feeding Rubber Extruder Y. Liu, X.Y. Liu and B.Y. Lv	283
Mechanical, Morphological and Thermally Behaviors of Natural Rubber/Aluminum Powder Composites H.J. Niu, Z.Y. Zhang, W. Guo, Y. Xue and Z.X. Yao	289
Effect of Processing Conditions on the Shrinkage and Warpage of Glass Fiber Reinforced PP Using Microcellular Injection Molding Z. Bian, P.C. Xie, Y.M. Ding and W.M. Yang	294
Experimental Research and Development on Electrical Screw Tire Vulcanizing Machine Y.J. Fan, Y. Liu and B.Y. Lv	300
Kinematic Simulation of the Tripod Universal Joint with or without Gap D.G. Chang, L. Sun and B. Zuo	306
Research of Low-Temperature Regeneration of Waste EPDM C.S. Wang, Q.G. Xie and H.G. Bian	311
The Study of Electroless Ni-P and Ni-P-PTFE Coating on Steel Tire Mold J.Z. Guo and B. Xu	316
Injection Compression Molding Process and Mould Design of Plastic Optical Lens Q.X. Bu, J.Y. Zhu and Q.Z. Yin	321
Research on Vulcanization Process of Short Fiber-Rubber Composite Material C.S. Wang, D.W. Zhang, L. Guo, X.K. Zeng, X.B. Wang and L. Li	325
Preparation of Porous Polysulfone Membranes Using Ionic Liquids with Different Alkyl Chain as Additives Y.M. Zhao and C.Z. Zheng	330
Finite Element Analysis of Globular Indexing Cam Mechanism Based on ANSYS D.G. Chang, S.M. Li and C.F. An	335
Simulation Analysis of Residual Stress of the Plastic Gear Based on Moldflow M. Li, H.M. Zhang and Y. Nie	339
Research on Rubber One Step Injection Molding Technology and Equipment Y.Z. Pei and B.Y. Lv	344
Study on Curing Process of Resin Nanocomposites C.S. Wang, R.Q. Wang, Y. Wang and Y.X. Fu	349
Corrosion Resistance of TiN Imitation Gold Decoration Coatings on Golden-Pen Components J.Y. Hou and Z.W. Zhou	355
Investigation on Brazing of Carbon Film Deposited Diamond for Cutting Vehicle Tyre B.J. Ma, L.A. Li and Q.X. Yu	360
Research on Structure and Mechanical Properties of Epoxy Resin/Clay Nanocomposites by Shock Wave Method G.Y. Lin, X.C. Mu and D.W. Qu	366
3D Fluid Field FEM Analysis of Meshing Rotors of Mixer H.G. Bian, C.S. Wang and L. Wang	372
Numerical Study on Enhanced Paraffin/Air Heat Transfer with Extended Surface Y. Zhou, W.J. Zheng, X.Y. Fan, J. Chao and Q.L. Li	376

Numerical Simulation of Tire Steady-State Temperature Field Based on ANSYS Workbench	382
J. Li, Z.P. Wang, W.X. Liu and F.H. Zhang	
FEM Comparative Analysis of Synchronous Rotor with Different Helix Angle in the Process of Mixing	388
H.G. Bian, W.S. Lv and C.S. Wang	
Analysis of the Impact of Unloaded Radius of Tire on the Handling and Stability of Automobile on the Basis of ADAMS/CAR	393
Z.P. Wang, W.L. Cui and Z. Yu	
Prediction Method of Main Parameters in Internal Mixer Based on Chaotic Neural Network	398
S.Z. Huang and C.S. Wang	
Study on Conductive Properties of Composites Based on the In-Mold Laminating Technology	402
Y. Zhong, P.C. Xie, W.M. Yang and Y.M. Ding	
Surface Tension Measurement by the Drop Volume Method	407
D.X. Du, D.C. Geng, S.J. Sun and Y.G. Li	
Numerical Simulation and Experimental Verification of Butterfly Porous Fences	413
Z.Y. Duan, Y.Y. Dong, F.L. Zheng and J.M. Zhang	
Finite Element Analysis of Turning Tire Active Mold Segment Using DEFORM-3D	418
X.B. Li and H.M. Hu	
Experimental Study on the Formula of Recycled Rubber Power Modified Asphalt	422
C.S. Wang, Z.Z. Wang and H. Zhang	
The Wear Model Parameters Research of Cone Ring Sliding Plate on Tire Segmented Mould	427
H.M. Hu, X.B. Li and Z.K. Tian	
Study on the Submarine Pipeline with Flexible Spoilers	431
Y. Han	
Energy Saving Study on Carbon Black Pneumatic Conveying	436
D.M. Jiao and Y. Li	
Optimize Mixing Process Parameters of Synchronous Rotor Mixer Based on Orthogonal Method	442
P. Fu, F.B. Bai, C.S. Wang and S.H. Li	
The Cathode Design in Electrolysis Deburring of Gear Face	448
M. Zhang, J.P. Jiao and X.Q. Liu	
Experimental Study on Effects of Filling Factor and Polyester Short Fiber Addition on Mixing of Short Fiber-Rubber Composite Material	453
X.K. Zeng, D.W. Zhang, C.S. Wang and H.G. Bian	
Optimization of Vertical Slab of Screw Tire-Shaping Vulcanizing Machine Based on FEM	457
Z.Q. Wang, Y.J. Fan and B.Y. Lv	
Analysis of Biomass Briquette Machine Ring Mold Length-Diameter Ratio of Finite Element Based on ANSYS	463
B.C. Liu, X.M. Liang and H.Y. Guo	
Heat Transfer and Friction Characteristics Analyses between WPC Materials and Conveyor Plate	467
Y. Tang and W.M. Tu	
Effect of Post-Vulcanization on the Tire Curing Degree	473
Q.L. Li, H.L. Chen, T. Li and D.X. Du	
Mechanical and Thermal Properties of Carbon Black Filled Natural Rubber and Fractal Analysis of Rubber Fracture Surfaces	479
B. Zhang, Y. He and L.X. Ma	
Analysis and Study on the Pulsed Solid-Plug Phase Pneumatic Conveying	484
Z.H. Li, Z.X. Peng and Z. Li	
Thermal Simulation and Experimental Study on Tire Building Machine Hot Knife	489
Y. Tang and L.Q. Meng	
The Finite Element Analysis of Steel Cord in Radial Tire's Belt Ply	495
L. Li and Y. Wang	

The Numerical Simulation for Thermal Deformation in Grinding Hardening Thin Workpiece	
Y. Zhang, P.Q. Ge, L. Zhang and J.L. Jiang	500
A New Method for Recognizing Carton Black in Rubber Image	
X.B. Wang and C.S. Wang	505
The Numerical Simulating Research about the Pulse Cleaning Process of Bag Filter	
Z.H. Li, J.F. Liu, L. Jiao, Z. Li and Z.X. Peng	509
A Review of Studies on the Granular Agglomeration Mechanisms and Anti-Agglomeration Methods	
D.D. Hu, J.B. Zhuang and M.L. Ding	515
The Mathematical Modeling Linear Analysis of Triple Thread Single-Screw Pump	
J.F. Wu and Y. Yu	520
Experimental Study of Vulcanization State on Rubber Mechanical Properties	
T. Li, H.L. Chen, D.X. Du and Q.L. Li	526
Morphological and Flame Retardant Behaviors of Rubber-Modified Asphalt	
J. Borah and C.S. Wang	532
Prediction of Tire Inflated Shape Based on Pressure Function Method	
L. Li and J.Z. Wang	538
Research on the Rheology of Polymer Latex Modified Cement Paste Containing Mineral Admixtures	
F. Xu, M.K. Zhou and J.P. Chen	544
Application of Ointment to Foaming SBR	
T. Zhuang, L.L. Zhou and L. An	549
Finite Element Analysis of PP-3 Meshing Rotor	
C.S. Wang, P.P. Shan and W.W. Liu	555
Application and Research of Acoustic Emission Technology in the Tank Security Detection	
Y.H. Huang, H.L. Chong, M. Hu, X.M. Jia, W.L. Liu and J.X. Ma	561
The Optimization of Weighing and Feeding System for Powder in Mixer Feeding System	
Y. Li, L. Wang and W. Tian	566
Composition Analysis of Spooling Tension about Automatic Winder	
J.Z. Wang and D.G. Chang	572
A Survey of Robot Visual Tracking Algorithm	
Y.H. Huang, M. Hu, H.L. Chong, X.M. Jia, J.X. Ma and W.L. Liu	577
Discussion on N-Lamina Model of Non-Plug Flow Solid Conveying in Feeding Section by Single-Screw Extrusion Molding	
C.H. Liu, D.L. Shi, Y.Y. Wu and J.H. Qin	583
Effect of Preparation Ways on Structure and Properties of Steraric Acid/Na⁺-Montmorillonite Phase-Change Composite Materials	
H.X. Feng, H. Zheng and Y. Wang	589
