Committees

Preface

Keynote Papers

Study on Bioforming Technology of Bionic Micro-Nano Structures

D.Y. Zhang, J. Cai, X.G. Jiang, X. Han and B. Chen

1

The Development Trend of Cutting Tools

D. Murakami

8

I. New Tool Materials and New Abrasive Tools

Bending Fatigue Characteristics of WC- β t-Co Alloys

K. Sakagami, S. Kouno and T. Yamamoto

15

Stress in Diamond Coatings on Cutting Tools Deposited by Hollow Substrate Holder

W.Z. Lu, D.W. Zuo, F. Xu, C. Yang and M. Wang

19

Tool Life Improvement of Coated Carbide Tools Treated by Novel Nitriding Technique

K. Sakai, Y. Suzuki, H. Inoue, K. Utino and Y. Horikoshi

24

A New Method for Profiling Gear Plunge Shaving Cutter on Gear Shaving Machine

T. Yu, S.Y. Wang, X.L. Chen and Y.X. Fan

28

Influence of Tapping Conditions and Tool Geometries on Tool Life in Tapping of Inconel 625®

A. Mizobuchi, M. Masuda and T. Higaino

33

An Experimental Study on Suppression of Chatter Vibration with Different Helix Angles End-Mill

H. Nakagawa, K. Ogawa, S. Demachi and H. Hasegawa

37

Research on Fabricating CVD Diamond Microstructures Using RIE Process

W.C. Chou, C.L. Chao, W.H. Fan and K.J. Ma

41

Study on Micro Drilling — Rotating Bending Fatigue of Micro Carbide Drills

B.X. Ma, M. Nomura, T. Kawashima, T. Shibata, Y. Murakami, M. Masuda and O. Horiuchi

45

Study on Precision Polishing Using Gelatin Stone

S. Sakamoto, U. Hiroshi, Y. Kondo, K. Yamaguchi, H. Katta and H. Ando

49

Machining of Difficult-to-Cut Materials with a Lubricant Coated Tool

M. Isaka, U. Hiroshi, S. Sakamoto and K. Kubota

53

II. New Machine Tools and Tooling Technology

Practical Measurement and Evaluation of Thermal Behavior of NC Lathe and its Application to Turning Process Modification

M. Okabe and M. Sakakibara

59

Analysis on the Instantaneous Stiffness of the 3-RPS Parallel Machine

X.G. Han, X.L. Cui and W.Y. Chen

63

Research on Machining Methods for Non-Circular Isometric Profile

H.Y. Wang, X.F. Yang and P.Q. Guo

68

The Error Analysis on Tooth Profiles with Electroplated CBN Hard Gear-Honing-Tools

M. Lv, M.D. Zhang and C.X. Xiong

73

Experimental Research on Wear Resistance of Deep Cryogenic Treated HSS Twist Drill

H.H. Xu, H.Y. Wang and X.M. Li

77

Novel Positioning Devices for Ultraprecision Machine Tool

H. Mizumoto and M. Yabuya

81

Research on the Method of Improving Accuracy of Parallel Machine Tools

H. Liang, W.Y. Chen and H.F. Li

85

Study on the Accuracy of 3-RPS Parallel Machine Tools	89
J. Xiong, X.G. Han and W.Y. Chen	
A Novel Determination Algorithm of Locating Parameters for Fixture Design	94
G.H. Qin, Z.X. Wu and Y.M. Lu	
The Technical Study on Cylinder Cam Machining	99
G.M. Yuan, L. Liu, H.C. Wang, X.J. Jiao and Z.M. Yin	
Development of Novel XY Micropositioning Stage	103
H.W. Chen, D.H. Jiang and I. Hagiwara	
Optimization of Distribution Model for CNC Lathes Early Failures	107
D.S. Chen and T.S. Lv	
Grey System Theory Modeling for Nonlinear, Dynamic Machine Tool Thermal Error	112
J.Y. Yan and J.G. Yang	
Research on Intelligent Controller for EDM Online Parameters	117
J.M. Chen, Y.H. Liu, R. Shen and S.P. Wu	
Laser-Assisted Truing for Metal-Bonded Diamond Wheel	122
K. Yamada, S. Togo, Y. Tomita, Y. Yamane and K. Sekiya	
Research on Mechanics and Control Methods of a New Loading Structure Based on Stewart Platform	126
Y.S. Sun, R. Fan, W.Y. Chen and X.G. Han	
Principle and Experiment of PRS-XY Hybrid NC Machine Tool	131
Z.G. Niu, Z. Li and Y.J. Deng	
Dynamic Characteristic Analysis and Validation of Spindle Assembly of High Speed Machine Tool	135
Y.M. Zhang, X.L. Lin, C.S. Liu and G.Q. Cai	
Study on Machine Accuracy of the Serial-Parallel Machine Tool Based on the BP Neural Network	140
X.M. Pei, J. Liu and C. Zhang	
Kinematics Simulation of a Tripod Parallel Universal Wrist	146
P. Zou, G.L. Wu and X.L. Yang	
Dimensional Designing Study on a Novel 3-RPS Parallel Machine	150
X.L. Cui, X.G. Han and W.Y. Chen	
Basic Study on the Development of the General Purpose Vertical Milling Machine for Educational Skill Training	155
T. Sawa, M. Okabe, A. Siga, M. Mutoh, T. Kurihara and K. Unno	
Novel Precision PZT-Driven Micropositioning Stage with Large Travel Range	159
H.W. Chen and I. Hagiwara	
The Study of Constant Grinding Removal Rate Model of Turning-Grinding Composite Machine Tool	163
H.J. Wang, Z.Q. Luan and Q.S. Han	

III. Digital Design and Manufacturing

Research on the Integrated Design of Dual Mass Flywheel CAD/CAE/CAM	169
Z.F. Yan and Z.F. Jiang	
Study of Virtual Numerical Control Milling Simulation System	174
X.L. Sui, Z.W. Kong, J.T. Zhang and X.P. Yang	
Construction of Lander Multidisciplinary Optimization Platform	180
A. Li and C.J. Wang	
A Study on a Tool to Support Configuration Design of 5-Axis Machine Tools	185
N. Mishima	
Agile Manufacturing Data Management	189
L.H. Qiao and W. Liu	
Intelligent MES Based on RFID	194
Z.K. Li, M. Li and F.Y. Li	
Toolpath Optimization on Automatic Removal Uncut and Application	198
Z.Y. Zhao, M. Zhang, B. Liu, H.M. Zhou and S.S. Yu	

Flank Milling for Blisk with a Barrel Ball Milling Cutter	202
T. Li, W.Y. Chen, R.F. Xu and D. Wang	
Equipment Integration-Based Workshop e-Manufacturing Execution Mode and Supporting Technologies	207
Q.F. Wang	
E-Enterprise Framework and Operation Mode for Manufacturing Enterprises	211
Q. Lei, Q.F. Wang and Y.C. Song	
Automatic Process Learning to Restore Omitted 2D Drawings	216
M. Tanaka, T. Kaneeda, R. Yokoi and M. Fujiwara	
A Tool-Path Interpolation Algorithm Based on Unfolding-Bending Parametric Curves	220
L.C. Fan, L.N. Sun and Z.J. Du	
A Collaborative Design and Analysis Environment for Flexible Fixture	225
W.F. Chen, J.B. Xue and P.H. Lou	
Collaborative Manufacturing Unit Selection Using a Sorting Adaptive Genetic Algorithm in Networked Environment	230
F.Q. Cheng and F.F. Ye	
Part Recognition Based on Maximum Mutual Information	234
S. Ge and D.G. Huang	
Application of Virtual Manufacturing to Impeller Five-Axis High Speed Machining	239
X.H. Wang, M.J. Feng and S.C. Liu	
Template-Based Process Planning System for Special Bearing	243
S.F. Jiang, C.F. Lu and C.D. Lu	
Development of Advanced NC Geometric Cutting Simulator	248
M. Fujio, S. Kuroyama and S. Shirai	
Development of Novel NC Machining System for Non-Circular Shafts	252
X.G. Wu, D.G. Huang and C. Chen	
Study on Three-Level Matching Model of Product Configuration Oriented to Mass Customization	257
J.H. Ge, Y.L. Xu, Y.T. Huang and G.A. Gao	
Five-Axis Machining Tool Vector Control of Impeller	264
C. Zhao, J.F. Sun and G.B. Bu	
A Petri Net and Genetic Algorithm Based Method for Flexible Manufacturing Cells Modeling and Scheduling	268
L.H. Qiao, Y.X. Zhu, J.J. Yang and Y. Li	
A Strategy of Toolpath Generation for Finish Machining of Mold Cavity Based on Tool-Zmap Model	273
Y.J. Cai, C.Z. Duan and L.J. Sun	
Research on NC Manufacturing Technique of Double Conical Screw	279
K. Wang, X.W. Sun and X. Chen	
Simulation-Based Manufacturing Interoperability Standards and Testing	283
G.D. Shao, S. Leong and C. McLean	
Research about Web Services Based Integration of Manufacturing Process Information	287
D.P. Qiao and J.J. Yang	
Five-Axis Flank Milling of Sculptured Surface with Barrel Cutters	292
D. Wang, W.Y. Chen, T. Li and R.F. Xu	
Integrated Process Planning Based on 3D Product Models	298
L.H. Qiao and J. Zhang	

IV. Cutting/Grinding Fluids

Dynamic Stress and Deformation of Non-Homogeneous Poroelastic Shells of Revolution Saturated in Viscous Fluid	305
T. Gonda, K. Tao, S. Otsuka and M. Yakabe	
Study on Green Design and Biodegradability of B-Containing Water-Based Cutting Fluid	309
C. Wu, X.L. Zhang and X.M. Jia	
Study on Metabolic System for Water-Soluble Coolant — Machining Performance and Long-Term Stability of Recycled Coolant	313
K. Yamaguchi, Y. Kondo, S. Sakamoto and S. Kohira	

Influence of Antirusting Aggent on the Cobalt Leaching of the Cemented Carbide Tool	317
X.M. Jia and F. Wang	
The Assist Effect of Nitrogen Atmosphere on MQL Cutting Performance	321
H. Shizuka, K. Sakai and Y. Suzuki	
Experimental Research on Cutting Heat Dissipation under Various Cooling Conditions	325
Y.M. Quan, H. Xu and Y. Dou	
Importance of MQL Media Composition in Near-Dry Machining of Aluminum	329
T. Wakabayashi, S. Suda and J. Shibata	

V. Precision, Micro and Nano-Machining

A Micromilling Experimental Study on AISI 4340 Steel	335
J.S. Wang, D.J. Zhao and Y.D. Gong	
Surface Modification of Stainless Steel for Surgical Tool by EB-Polishing	339
A. Okada, Y. Uno, H. Watanabe, K. Fujiwara and K. Doi	
High-Efficient Damage-Free Correction of the Thickness Distribution of Quartz Crystal Wafer Using Open-Air Type Plasma CVM	343
K. Yamamura, T. Morikawa and M. Ueda	
Deformation in Mono-Crystalline Silicon Caused by High Speed Single-Point Micro-Cutting	347
A.Q. Biddut, J.W. Yan, L.C. Zhang, T. Ohta, T. Kuriyagawa and B. Shaun	
Study on Cutting of Micro Channel by End Mill with Small Diameter	351
K. Okuda, T. Tsuneyoshi, W. Li and H. Shibahara	
Study on Ultra Precision Polishing of Single Crystal Diamond Substrates under Ultraviolet Irradiation	355
S. Anan, M. Touge, A. Kubota and J. Watanabe	
Ultra-Precision Machining of Dies for Microlens Arrays Using a Diamond Cutting Tool	359
T. Yoshikawa, M. Kyo, Y. Maeda, T. Ohta and M. Taya	
Micro Machining of Three-Dimensional Microstructure with the Tiny-Grinding Wheel Based on the Electro-Magneto-Rheological Effect	363
Y. Liu, Q.S. Yan, J.B. Lu, W.Q. Gao and Y. Yang	
Effect of Potential Function on Molecular Dynamics Simulation of Copper Processing	368
J.C. Wang, J.M. Zhang, N. Li and Y.P. Kou	
Improvement of Thickness Uniformity of Bulk Silicon Wafer by Numerically Controlled Local Wet Etching	372
K. Yamamura, T. Mitani, K. Ueda, M. Nagano and N. Zettsu	
Figuring of Elliptical Neutron Focusing Mirror Using Numerically Controlled Local Wet Etching	376
M. Nagano, H. Takai, K. Yamamura, D. Yamazaki, R. Maruyama and K. Soyama	
Ultra Precision Diamond Shaping of an Elliptical Micro-Lens Array	380
C.L. Chao, C.C. Chen and W.C. Chou	
Mirror Finishing of Austenitic Stainless Steel with a Cermet Insert	384
K. Sekiya, R. Tezuka, Y. Yamane and K. Yamada	
Study on Precision Finishing of PCD by Constant-Pressure Grinding and UV-Polishing	388
M. Touge, T. Nakano, K. Yamaguchi, A. Kubota and J. Watanabe	

VI. Cutting Mechanisms, Analysis and Simulation

The Investigation of Tool Wear in Metal Machining Using Finite Element Method	395
H.Y. Ruan, H. Yan, S.B. Lu, H.X. Liu and X. Wang	
An Analytical Evaluation of Drilling Temperature	400
J. Wu and R.D. Han	
Prediction and Avoidance of Chatter in Milling of Thin-Walled Structure	404
H. Sasahara and Y. Naito	
Off-Line Feedrate Optimization Based on Simulation of Cutting Forces	408
C. Zhang	
Quantitative Study of Shear Localization in Chip Formation while Machining Ti-6Al-4V	412
D. Liu, W.Y. Chen, H.H. Xu, X.K. Luo and H. Liang	

Cutting Mechanism of Sulfrized Free-Machining Steel	416
J. Fujiwara, T. Kawazoe and N. Matsui	
Thermal-Mechanical Effect on Temperature/Stress Distribution when Orthogonal Cutting Bearing Steel	420
H.P. Wang and X.P. Zhang	
In-Process Recognition of Chip Forms Using Dynamic Cutting Force Components in Hard Turning	424
D.H. Wen, Y.H. Wan and X.L. Liu	
Influence of WC and Co in Cutting Cemented Carbides with PCD and CBN Tools	428
T. Miyamoto, J. Fujiwara and K. Wakao	
Dynamic Simulation and Analysis of Centrifugal Barrel Surface Finishing Based on 3D Discrete Element Method	432
C.H. Song and S.C. Yang	
Modelling the Polishing Efficiency of Polycrystalline Diamond Composites by the Dynamic Friction Method	436
Y.Q. Chen, T. Nguyen and L.C. Zhang	
Effect of Cutting Edge Roundness on Work Hardened Surface Layer in Metal Cutting	440
R. Hikiji, E. Kondo and M. Arai	
Study on the Effect of Tool Inclination Angle in Machining Process Based on Three-Dimensional Thermo-Elastic-Plastic Model	444
H.Y. Dong, H. Xue and P.J. Huang	
Cutting Parameters Optimization of Thin-Walled Workpiece Based on Deflection Control	448
W.F. Chen, J.H. Xu, Z.H. Shen and H. Chen	
Development of Multiscale Simulation System for Nano-Processes	452
H.W. Chen, A.K. Tieu and I. Hagiwara	
Study on Machining Error in Ball End Milling of Spherical Surface	456
H. Tanaka, M. Sato, H. Yoshida, S. Ohta and S. Okamura	
Material Removal Model of Sapphire Substrate in Double-Side Lapping Process	460
C.D. Lu, D.M. Qian and S.F. Jiang	
Experimental and Numerical Study of Cutting Forces and Temperature Fields when Dry Turning Aluminum Alloy	465
L. Feng	
The Relationship between Dynamic Components of Cutting Force and Adhesion of Tool-Chip Interface	469
R. Tezuka, K. Sekiya, K. Yamada and Y. Yamane	
Study on the Chip-Breaking Behavior under the Concept of Equivalent Parameters for Complicated Groove Insert in 45 Cutting Steel	473
E.L. Liu, C. Zhang and H.P. Zhang	
MCA Model for Chip Breaking and Curling of Orthogonal Cutting	478
G.Y. Tan, G.J. Liu and G.H. Li	
Simulation and Analysis for Application of Truing Ring in Certain Eccentricity Plane Lapping System	482
Q.F. Deng, J.L. Yuan, D.H. Wen, F. Chen and L. Tao	
A New Approach for Friction Modeling at the Tool-Chip Interface in Orthogonal Cutting	486
J.C. Wang, N. Li, Y.P. Kou and Y.L. Yang	
Calculation of Material Flow in Orthogonal Cutting by Using Streamline Model	490
X.F. Bi, G. List and Y.X. Liu	
Application of a Drill Resistance Technique for Rapid Determining Wood Density	494
H.J. Zhang, Z.R. Guo and J. Su	
Generation of Wear Protective Layer in High Speed Turning of Gray Cast Iron Containing Aluminium and Magnesium	498
S. Furuya, N. Ozoe and Y. Yamane	
Mechanism of Material Softening in Primary Shear Zone during Serrated Chip Formation in High Speed Machining of High Strength Steel	502
C.Z. Duan, M.J. Wang and Y.J. Cai	
A Feedrate Scheduling Strategy Based on a General Force Model	506
Y.J. Cai, C.Z. Duan and L.J. Sun	

Statistical Research on the Effects of Cutting Edge Preparation on Face Milling of Austenitic Stainless Steel Using FEM	516
W.W. Ming and M. Chen	
Determining Modulus of Elasticity of Structural Lumber with Vibration Methods	521
H.J. Zhang, Y.Y. Cui, C.Z. Wang and J. Su	
Research on Warpage Deformation of Machining Cantilever Sheet Part with Combined Saw Milling Tool	528
D.C. Xu, P.F. Feng, D.W. Yu and Z.J. Wu	
Determination of the Flow Stress of Ti6Al4V Based on Cutting Experiment and Optimization	533
Y.F. Yuan, W.Y. Chen and D. Liu	
Cutting Tool Edge Temperature in Finish Hard Turning of Case Hardened Steel	538
R. Tanaka, H. Morishita, Y.C. Lin, A. Hosokawa, T. Ueda and T. Furumoto	

VII. Abrasive Machining

Study on Deep Hole Honing Based on Squeeze Film Technology	545
T.B. Yu, R. Wen, Y.D. Gong and W.S. Wang	
Study on the Abrasive Effecting Factors of the Removal Rate during Dual-Lapping Sapphire Wafer	550
K.H. Zhang, D.H. Wen and J.L. Yuan	
Experimental Investigations into Roughness Finished by Abrasive Jet with Grinding Wheel as Restraint	555
C.H. Li, Y.L. Hou, G.Y. Liu and B.H. Lu	
An Investigation into Integrate the Surface Hardening with the Grinding Precision Finishing	560
Y.L. Hou, C.H. Li and Y.C. Ding	
Study of Magnetic Abrasive Finishing to Thin Sleeve of Al Alloy	565
H.L. Chen, W.H. Li and S.C. Yang	
Research of the Dynamic Abrasive Particles Field	569
S.M. Ji, Y.Q. Shen, L. Zhang, M.S. Jin and Y.D. Zhang	
Mechanical Grinding: An Effective Method to Control the Conductivity of <i>p</i>-Toluene Sulfonic Acid Doped Polypyrrole	573
F.F. Zhou, B.G. Zhai, Z.R. She, Y.M. Huang and C.X. Pan	
Study on Edge Contact Area and Surface Integrity of Workpiece in Point Grinding Process	577
S.C. Xiu, Z.J. Geng and G.Q. Cai	
An Experimental Study on Composites Machining Using Abrasive Water Jet Technology	582
H.T. Cen, L.X. Chi and H. Li	

VIII. High Speed Machining

Dynamic Simulation and Cutting Conditions Optimization of Tee Slot Milling Based on CutPro Software	589
Z.Q. Li	
Predictive Tool Life Model of CBN in Ti6Al4V High Speed Turning and Cutting Parameter Optimization	594
X.Q. Wang, X. Ai, J. Zhao and P.Q. Guo	
Finite Element Analysis on Segmented Chip Formation for High Speed Cutting of Ti6Al4V Alloy	599
X.H. Zhang and H.B. Wu	
Effect of Co Content and WC Grain Size on Wear Resistance of Micro Carbide Endmills in High Speed Milling of Graphite	604
L. Zhou, C.Y. Wang, Y.Z. Li and Z. Qin	
Taguchi Method Based Experiments of Titanium TC11 Flank Milling Parameters	608
C.Y. Liu, C.L. Chu, W.H. Zhou and J.J. Yi	
Application of Minimum Quantity Lubrication when Drilling Nickel-Based Superalloy at High Cutting Speed	612
E.A. Rahim and H. Sasahara	

IX. Unconventional Machining

Design of Angle Adjustable Electrochemical Micro-Machining System S.F. Huang, D. Zhu, Y.B. Zeng, Y. Liu and W. Wang	619
Investigation of Surface Treatment Method by High-Speed Scanning of Single-Mode Fiber Laser with MOPA Y. Okamoto, Y. Uno, T. Mohri and T. Izawa	624
Effect of Ultrasonic Vibration of Tool on Electrical Discharge Machining of Sintered NdFeB Magnet L. Li, Z.W. Niu and G.M. Yuan	628
The Micro-Mechanism of Vibration Cutting Stress Wave and the Analysis of Macro-Processing Effect J. Yao, W. Lu and C.S. Liu	632
Study on Electrical Discharge Machining Characteristics of Electrically Conductive Ceramics H. Wang, A. Okada, T. Uwano, Y. Uno and H. Sameh	636
The “Effective Region” Characteristic of the Tool Life in Vibration Drilling P. Zhang, X.Y. Guo and D.Y. Zhang	640
Effect of Thickening Agent on Water-Based Working Fluid for EDM R.J. Ji, Y.H. Liu, L.L. Yu, J.M. Chen, R. Shen and X.P. Li	644
Experimental Research on Pulse Generator for EDM of Non-Conductive Ceramics H.F. Zhang, Y.H. Liu, J.M. Chen, R. Shen, B.P. Cai and D.W. Wang	649
Study on Cavitation Aided Abrasive Machining on Glass K. Ohashi, S. Tsukamoto and T. Nakajima	654
Simulation Research on the Swirling Airflow Compounded with Magnetic-Field Finishing X.H. Li, S.Q. Yang, S.C. Yang and W.H. Li	658
A Denoise Method of Electrical Discharge Machining Gaps Signal for Non-Conductive Engineering Ceramics Based on Wavelet MMA R. Shen, Y.H. Liu, J.M. Chen, H.F. Zhang and R.J. Ji	662
Effect of Electrode Insulation Thickness on Size Accuracy of Bored Hole in ECD Process W. Wang, D. Zhu, N.S. Qu and S.F. Huang	667
Prevention of Burr Formation in Face Milling of Carbon Steel by Laser Hardening T. Kito, R. Tanaka, A. Hosokawa, T. Ueda and T. Furumoto	672
The Optimization of Processing Parameters and Experimental Investigation on Ni-Based Components Fabricated by Laser Cladding X. Ji, J.Z. Zhou, F. Qiu and S.Q. Jiang	676
Design of a Simultaneous Module Using Burnishing and Electrofinishing on Hole-Wall Surface P.S. Pa	680
The Analysis on the Stability of Diamond Wire Saw Cutting Process for the Silicon L.G. Zhao, D.W. Zuo, Y.L. Sun and M. Wang	684
Influence of On-the-Machine Laser Hardening on Machinability of Carbon Steel in Turning T. Kusano, R. Tanaka, A. Hosokawa, T. Ueda, T. Furumoto and Y.C. Lin	690
Ultrafine-Grained Treatment Process on FGH4096 Alloy Y.Q. Ning, Z.K. Yao, H.Z. Guo, T. Yu and Y.W. Zhang	694
Study on Bio-Limited Forming Technology Based on the Nano-Composite Electroless Coating Z.Y. Lian, B. Chen, J. Cai, W.Q. Zhang, P. Zhang and D.Y. Zhang	698

X. Surface Integrity and Machining Quality

Effect of Surface Topography on Stress Distribution of Vacuum Plate Glass for Different Aluminum Alloy Braced Pillars H. Miao, D.W. Zuo, R.H. Zhang and J.F. Zhang	705
Cutting Characteristics of CFRP Materials with End Milling I. Takashi, M. Hagino, M. Matsui and L.W. Gu	710

Experimental Characteristics of Aluminum Alloys in Dry End Milling	
Y. Mizugaki, K. Takafuji and K. Kikkawa	714
Numerical Analysis of Surface Residual Stress of NC Milling 7075-T7451 Aluminum Alloy	
H.F. Wang, D.W. Zuo, L.T. Wang, H. Miao and H.J. Wang	718
Gloss Evaluation Method for Metal Surface with Hairline Using Patterned Area Illumination	
T. Sugino, Y. Satozono and Y. Yamane	723
Experimental Study on the Cutting Temperature Using Work-Tool Thermocouple while Machining TC4	
B. Zhang, W.Y. Chen and D. Liu	727
Study on the Surface Integrity of Micro-Ultrasonic Machined Glass-Ceramic Material	
W.H. Fan, C.L. Chao, W.C. Chou, T.T. Chen and C.W. Chao	731
