Preface

Keynote Papers

Study on Bioforming Technology of Bionic Micro-Nano Structures D.Y. Zhang, J. Cai, X.G. Jiang, X. Han and B. Chen	1
The Development Trend of Cutting Tools D. Murakami	8

I. New Tool Materials and New Abrasive Tools

Bending Fatigue Characteristics of WC-βt-Co Alloys K. Sakagami, S. Kouno and T. Yamamoto	15
Stress in Diamond Coatings on Cutting Tools Deposited by Hollow Substrate Holder W.Z. Lu, D.W. Zuo, F. Xu, C. Yang and M. Wang	19
Tool Life Improvement of Coated Carbide Tools Treated by Novel Nitriding Technique K. Sakai, Y. Suzuki, H. Inoue, K. Utino and Y. Horikoshi	24
A New Method for Profiling Gear Plunge Shaving Cutter on Gear Shaving Machine T. Yu, S.Y. Wang, X.L. Chen and Y.X. Fan	28
Influence of Tapping Conditions and Tool Geometries on Tool Life in Tapping of Inconel 625[®] A. Mizobuchi, M. Masuda and T. Higaino	33
An Experimental Study on Suppression of Chatter Vibration with Different Helix Angles End-Mill H. Nakagawa, K. Ogawa, S. Demachi and H. Hasegawa	37
Research on Fabricating CVD Diamond Microstructures Using RIE Process W.C. Chou, C.L. Chao, W.H. Fan and K.J. Ma	41
Study on Micro Drilling — Rotating Bending Fatigue of Micro Carbide Drills B.X. Ma, M. Nomura, T. Kawashima, T. Shibata, Y. Murakami, M. Masuda and O. Horiuchi	45
Study on Precision Polishing Using Gelatin Stone S. Sakamoto, U. Hiroshi, Y. Kondo, K. Yamaguchi, H. Katta and H. Ando	49
Machining of Difficult-to-Cut Materials with a Lubricant Coated Tool M. Isaka, U. Hiroshi, S. Sakamoto and K. Kubota	53

II. New Machine Tools and Tooling Technology

Practical Measurement and Evaluation of Thermal Behavior of NC Lathe and its Application to Turning Process Modification M. Okabe and M. Sakakibara	59
Analysis on the Instantaneous Stiffness of the 3-RPS Parallel Machine X.G. Han, X.L. Cui and W.Y. Chen	63
Research on Machining Methods for Non-Circular Isometric Profile H.Y. Wang, X.F. Yang and P.Q. Guo	68
The Error Analysis on Tooth Profiles with Electroplated CBN Hard Gear-Honing-Tools M. Lv, M.D. Zhang and C.X. Xiong	73
Experimental Research on Wear Resistance of Deep Cryogenic Treated HSS Twist Drill H.H. Xu, H.Y. Wang and X.M. Li	77
Novel Positioning Devices for Ultraprecision Machine Tool H. Mizumoto and M. Yabuya	81
Research on the Method of Improving Accuracy of Parallel Machine Tools H. Liang, W.Y. Chen and H.F. Li	85

Study on the Accuracy of 3-RPS Parallel Machine Tools J. Xiong, X.G. Han and W.Y. Chen	89
A Novel Determination Algorithm of Locating Parameters for Fixture Design G.H. Qin, Z.X. Wu and Y.M. Lu	94
The Technical Study on Cylinder Cam Machining G.M. Yuan, L. Liu, H.C. Wang, X.J. Jiao and Z.M. Yin	99
Development of Novel XY Micropositioning Stage H.W. Chen, D.H. Jiang and I. Hagiwara	103
Optimization of Distribution Model for CNC Lathes Early Failures D.S. Chen and T.S. Lv	107
Grey System Theory Modeling for Nonlinear, Dynamic Machine Tool Thermal Error J.Y. Yan and J.G. Yang	112
Research on Intelligent Controller for EDM Online Parameters J.M. Chen, Y.H. Liu, R. Shen and S.P. Wu	117
Laser-Assisted Truing for Metal-Bonded Diamond Wheel K. Yamada, S. Togo, Y. Tomita, Y. Yamane and K. Sekiya	122
Research on Mechanics and Control Methods of a New Loading Structure Based on Stewart Platform Y.S. Sun, R. Fan, W.Y. Chen and X.G. Han	126
Principle and Experiment of PRS-XY Hybrid NC Machine Tool Z.G. Niu, Z. Li and Y.J. Deng	131
Dynamic Characteristic Analysis and Validation of Spindle Assembly of High Speed Machine Tool Y.M. Zhang, X.L. Lin, C.S. Liu and G.Q. Cai	135
Study on Machine Accuracy of the Serial-Parallel Machine Tool Based on the BP Neural Network X.M. Pei, J. Liu and C. Zhang	140
Kinematics Simulation of a Tripod Parallel Universal Wrist P. Zou, G.L. Wu and X.L. Yang	146
Dimensional Designing Study on a Novel 3-RPS Parallel Machine X.L. Cui, X.G. Han and W.Y. Chen	150
Basic Study on the Development of the General Purpose Vertical Milling Machine for Educational Skill Training T. Sawa, M. Okabe, A. Siga, M. Mutoh, T. Kurihara and K. Unno	155
Novel Precision PZT-Driven Micropositioning Stage with Large Travel Range H.W. Chen and I. Hagiwara	159
The Study of Constant Grinding Removal Rate Model of Turning-Grinding Composite Machine Tool H.J. Wang, Z.Q. Luan and Q.S. Han	163

III. Digital Design and Manufacturing

Research on the Integrated Design of Dual Mass Flywheel CAD/CAE/CAM Z.F. Yan and Z.F. Jiang	169
Study of Virtual Numerical Control Milling Simulation System X.L. Sui, Z.W. Kong, J.T. Zhang and X.P. Yang	174
Construction of Lander Multidisciplinary Optimization Platform A. Li and C.J. Wang	180
A Study on a Tool to Support Configuration Design of 5-Axis Machine Tools N. Mishima	185
Agile Manufacturing Data Management L.H. Qiao and W. Liu	189
Intelligent MES Based on RFID Z.K. Li, M. Li and F.Y. Li	194
Toolpath Optimization on Automatic Removal Uncut and Application Z.Y. Zhao, M. Zhang, B. Liu, H.M. Zhou and S.S. Yu	198

Flank Milling for Blisk with a Barrel Ball Milling Cutter T. Li, W.Y. Chen, R.F. Xu and D. Wang	202
Equipment Integration-Based Workshop e-Manufacturing Execution Mode and Supporting Technologies Q.F. Wang	207
E-Enterprise Framework and Operation Mode for Manufacturing Enterprises Q. Lei, Q.F. Wang and Y.C. Song	211
Automatic Process Learning to Restore Omitted 2D Drawings M. Tanaka, T. Kaneeda, R. Yokoi and M. Fujiwara	216
A Tool-Path Interpolation Algorithm Based on Unfolding-Bending Parametric Curves L.C. Fan, L.N. Sun and Z.J. Du	220
A Collaborative Design and Analysis Environment for Flexible Fixture W.F. Chen, J.B. Xue and P.H. Lou	225
Collaborative Manufacturing Unit Selection Using a Sorting Adaptive Genetic Algorithm in Networked Environment F.Q. Cheng and F.F. Ye	230
Part Recognition Based on Maximum Mutual Information S. Ge and D.G. Huang	234
Application of Virtual Manufacturing to Impeller Five-Axis High Speed Machining X.H. Wang, M.J. Feng and S.C. Liu	239
Template-Based Process Planning System for Special Bearing S.F. Jiang, C.F. Lu and C.D. Lu	243
Development of Advanced NC Geometric Cutting Simulator M. Fujio, S. Kuroyama and S. Shirai	248
Development of Novel NC Machining System for Non-Circular Shafts X.G. Wu, D.G. Huang and C. Chen	252
Study on Three-Level Matching Model of Product Configuration Oriented to Mass Customization J.H. Ge, Y.L. Xu, Y.T. Huang and G.A. Gao	257
Five-Axis Machining Tool Vector Control of Impeller C. Zhao, J.F. Sun and G.B. Bu	264
A Petri Net and Genetic Algorithm Based Method for Flexible Manufacturing Cells Modeling and Scheduling L.H. Qiao, Y.X. Zhu, J.J. Yang and Y. Li	268
A Strategy of Toolpath Generation for Finish Machining of Mold Cavity Based on Tool-Zmap Model Y.J. Cai, C.Z. Duan and L.J. Sun	273
Research on NC Manufacturing Technique of Double Conical Screw K. Wang, X.W. Sun and X. Chen	279
Simulation-Based Manufacturing Interoperability Standards and Testing G.D. Shao, S. Leong and C. McLean	283
Research about Web Services Based Integration of Manufacturing Process Information D.P. Qiao and J.J. Yang	287
Five-Axis Flank Milling of Sculptured Surface with Barrel Cutters D. Wang, W.Y. Chen, T. Li and R.F. Xu	292
Integrated Process Planning Based on 3D Product Models L.H. Qiao and J. Zhang	298

IV. Cutting/Grinding Fluids

Dynamic Stress and Deformation of Non-Homogeneous Poroelastic Shells of Revolution Saturated in Viscous Fluid T. Gonda, K. Tao, S. Otsuka and M. Yakabe	305
Study on Green Design and Biodegradability of B-Containing Water-Based Cutting Fluid C. Wu, X.L. Zhang and X.M. Jia	309
Study on Metabolic System for Water-Soluble Coolant — Machining Performance and Long-Term Stability of Recycled Coolant K. Yamaguchi, Y. Kondo, S. Sakamoto and S. Kohira	313

Influence of Antirusting Aggent on the Cobalt Leaching of the Cemented Carbide Tool X.M. Jia and F. Wang	317
The Assist Effect of Nitrogen Atmosphere on MQL Cutting Performance H. Shizuka, K. Sakai and Y. Suzuki	321
Experimental Research on Cutting Heat Dissipation under Various Cooling Conditions Y.M. Quan, H. Xu and Y. Dou	325
Importance of MQL Media Composition in Near-Dry Machining of Aluminum T. Wakabayashi, S. Suda and J. Shibata	329

V. Precision, Micro and Nano-Machining

A Micromilling Experimental Study on AISI 4340 Steel J.S. Wang, D.J. Zhao and Y.D. Gong	335
Surface Modification of Stainless Steel for Surgical Tool by EB-Polishing A. Okada, Y. Uno, H. Watanabe, K. Fujiwara and K. Doi	339
High-Efficient Damage-Free Correction of the Thickness Distribution of Quartz Crystal Wafer Using Open-Air Type Plasma CVM K. Yamamura, T. Morikawa and M. Ueda	343
Deformation in Mono-Crystalline Silicon Caused by High Speed Single-Point Micro-Cutting A.Q. Biddut, J.W. Yan, L.C. Zhang, T. Ohta, T. Kuriyagawa and B. Shaun	347
Study on Cutting of Micro Channel by End Mill with Small Diameter K. Okuda, T. Tsuneyoshi, W. Li and H. Shibahara	351
Study on Ultra Precision Polishing of Single Crystal Diamond Substrates under Ultraviolet Irradiation S. Anan, M. Touge, A. Kubota and J. Watanabe	355
Ultra-Precision Machining of Dies for Microlens Arrays Using a Diamond Cutting Tool T. Yoshikawa, M. Kyoi, Y. Maeda, T. Ohta and M. Taya	359
Micro Machining of Three-Dimensional Microstructure with the Tiny-Grinding Wheel Based on the Electro-Magneto-Rheological Effect Y. Liu, Q.S. Yan, J.B. Lu, W.Q. Gao and Y. Yang	363
Effect of Potential Function on Molecular Dynamics Simulation of Copper Processing J.C. Wang, J.M. Zhang, N. Li and Y.P. Kou	368
Improvement of Thickness Uniformity of Bulk Silicon Wafer by Numerically Controlled Local Wet Etching K. Yamamura, T. Mitani, K. Ueda, M. Nagano and N. Zettsu	372
Figuring of Elliptical Neutron Focusing Mirror Using Numerically Controlled Local Wet Etching M. Nagano, H. Takai, K. Yamamura, D. Yamazaki, R. Maruyama and K. Soyama	376
Ultra Precision Diamond Shaping of an Elliptical Micro-Lens Array C.L. Chao, C.C. Chen and W.C. Chou	380
Mirror Finishing of Austenitic Stainless Steel with a Cermet Insert K. Sekiya, R. Tezuka, Y. Yamane and K. Yamada	384
Study on Precision Finishing of PCD by Constant-Pressure Grinding and UV-Polishing M. Touge, T. Nakano, K. Yamaguchi, A. Kubota and J. Watanabe	388

VI. Cutting Mechanisms, Analysis and Simulation

The Investigation of Tool Wear in Metal Machining Using Finite Element Method H.Y. Ruan, H. Yan, S.B. Lu, H.X. Liu and X. Wang	395
An Analytical Evaluation of Drilling Temperature J. Wu and R.D. Han	400
Prediction and Avoidance of Chatter in Milling of Thin-Walled Structure H. Sasahara and Y. Naito	404
Off-Line Feedrate Optimization Based on Simulation of Cutting Forces C. Zhang	408
Quantitative Study of Shear Localization in Chip Formation while Machining Ti-6Al-4V D. Liu, W.Y. Chen, H.H. Xu, X.K. Luo and H. Liang	412

Cutting Mechanism of Sulfrized Free-Machining Steel J. Fujiwara, T. Kawazoe and N. Matsui	416
Thermal-Mechanical Effect on Temperature/Stress Distribution when Orthogonal Cutting Bearing Steel H.P. Wang and X.P. Zhang	420
In-Process Recognition of Chip Forms Using Dynamic Cutting Force Components in Hard Turning D.H. Wen, Y.H. Wan and X.L. Liu	424
Influence of WC and Co in Cutting Cemented Carbides with PCD and CBN Tools T. Miyamoto, J. Fujiwara and K. Wakao	428
Dynamic Simulation and Analysis of Centrifugal Barrel Surface Finishing Based on 3D Discrete Element Method C.H. Song and S.C. Yang	432
Modelling the Polishing Efficiency of Polycrystalline Diamond Composites by the Dynamic Friction Method Y.Q. Chen, T. Nguyen and L.C. Zhang	436
Effect of Cutting Edge Roundness on Work Hardened Surface Layer in Metal Cutting R. Hikiji, E. Kondo and M. Arai	440
Study on the Effect of Tool Inclination Angle in Machining Process Based on Three-Dimensional Thermo-Elastic-Plastic Model H.Y. Dong, H. Xue and P.J. Huang	444
Cutting Parameters Optimization of Thin-Walled Workpiece Based on Deflection Control W.F. Chen, J.H. Xu, Z.H. Shen and H. Chen	448
Development of Multiscale Simulation System for Nano-Processes H.W. Chen, A.K. Tieu and I. Hagiwara	452
Study on Machining Error in Ball End Milling of Spherical Surface H. Tanaka, M. Sato, H. Yoshida, S. Ohta and S. Okamura	456
Material Removal Model of Sapphire Substrate in Double-Side Lapping Process C.D. Lu, D.M. Qian and S.F. Jiang	460
Experimental and Numerical Study of Cutting Forces and Temperature Fields when Dry Turning Aluminum Alloy L. Feng	465
The Relationship between Dynamic Components of Cutting Force and Adhesion of Tool-Chip Interface R. Tezuka, K. Sekiya, K. Yamada and Y. Yamane	469
Study on the Chip-Breaking Behavior under the Concept of Equivalent Parameters for Complicated Groove Insert in 45 Cutting Steel E.L. Liu, C. Zhang and H.P. Zhang	473
MCA Model for Chip Breaking and Curling of Orthogonal Cutting G.Y. Tan, G.J. Liu and G.H. Li	478
Simulation and Analysis for Application of Truing Ring in Certain Eccentricity Plane Lapping System Q.F. Deng, J.L. Yuan, D.H. Wen, F. Chen and L. Tao	482
A New Approach for Friction Modeling at the Tool-Chip Interface in Orthogonal Cutting J.C. Wang, N. Li, Y.P. Kou and Y.L. Yang	486
Calculation of Material Flow in Orthogonal Cutting by Using Streamline Model X.F. Bi, G. List and Y.X. Liu	490
Application of a Drill Resistance Technique for Rapid Determining Wood Density H.J. Zhang, Z.R. Guo and J. Su	494
Generation of Wear Protective Layer in High Speed Turning of Gray Cast Iron Containing Aluminium and Magnesium S. Furuya, N. Ozoe and Y. Yamane	500
Mechanism of Material Softening in Primary Shear Zone during Serrated Chip Formation in High Speed Machining of High Strength Steel C.Z. Duan, M.J. Wang and Y.J. Cai	504
A Feedrate Scheduling Strategy Based on a General Force Model Y.J. Cai, C.Z. Duan and L.J. Sun	509

Statistical Research on the Effects of Cutting Edge Preparation on Face Milling of Austenitic Stainless Steel Using FEM W.W. Ming and M. Chen	516
Determining Modulus of Elasticity of Structural Lumber with Vibration Methods H.J. Zhang, Y.Y. Cui, C.Z. Wang and J. Su	521
Research on Warpage Deformation of Machining Cantilever Sheet Part with Combined Saw Milling Tool D.C. Xu, P.F. Feng, D.W. Yu and Z.J. Wu	528
Determination of the Flow Stress of Ti6Al4V Based on Cutting Experiment and Optimization Y.F. Yuan, W.Y. Chen and D. Liu	533
Cutting Tool Edge Temperature in Finish Hard Turning of Case Hardened Steel R. Tanaka, H. Morishita, Y.C. Lin, A. Hosokawa, T. Ueda and T. Furumoto	538

VII. Abrasive Machining

Study on Deep Hole Honing Based on Squeeze Film Technology T.B. Yu, R. Wen, Y.D. Gong and W.S. Wang	545
Study on the Abrasive Effecting Factors of the Removal Rate during Dual-Lapping Sapphire Wafer K.H. Zhang, D.H. Wen and J.L. Yuan	550
Experimental Investigations into Roughness Finished by Abrasive Jet with Grinding Wheel as Restraint C.H. Li, Y.L. Hou, G.Y. Liu and B.H. Lu	555
An Investigation into Integrate the Surface Hardening with the Grinding Precision Finishing Y.L. Hou, C.H. Li and Y.C. Ding	560
Study of Magnetic Abrasive Finishing to Thin Sleeve of Al Alloy H.L. Chen, W.H. Li and S.C. Yang	565
Research of the Dynamic Abrasive Particles Field S.M. Ji, Y.Q. Shen, L. Zhang, M.S. Jin and Y.D. Zhang	569
Mechanical Grinding: An Effective Method to Control the Conductivity of <i>p</i>-Toluene Sulfonic Acid Doped Polypyrrole F.F. Zhou, B.G. Zhai, Z.R. She, Y.M. Huang and C.X. Pan	573
Study on Edge Contact Area and Surface Integrity of Workpiece in Point Grinding Process S.C. Xiu, Z.J. Geng and G.Q. Cai	577
An Experimental Study on Composites Machining Using Abrasive Water Jet Technology H.T. Cen, L.X. Chi and H. Li	582

VIII. High Speed Machining

Dynamic Simulation and Cutting Conditions Optimization of Tee Slot Milling Based on CutPro Software Z.Q. Li	589
Predictive Tool Life Model of CBN in Ti6Al4V High Speed Turning and Cutting Parameter Optimization X.Q. Wang, X. Ai, J. Zhao and P.Q. Guo	594
Finite Element Analysis on Segmented Chip Formation for High Speed Cutting of Ti6Al4V Alloy X.H. Zhang and H.B. Wu	599
Effect of Co Content and WC Grain Size on Wear Resistance of Micro Carbide Endmills in High Speed Milling of Graphite L. Zhou, C.Y. Wang, Y.Z. Li and Z. Qin	604
Taguchi Method Based Experiments of Titanium TC11 Flank Milling Parameters C.Y. Liu, C.L. Chu, W.H. Zhou and J.J. Yi	608
Application of Minimum Quantity Lubrication when Drilling Nickel-Based Superalloy at High Cutting Speed E.A. Rahim and H. Sasahara	612

IX. Unconventional Machining

Design of Angle Adjustable Electrochemical Micro-Machining System S.F. Huang, D. Zhu, Y.B. Zeng, Y. Liu and W. Wang	619
Investigation of Surface Treatment Method by High-Speed Scanning of Single-Mode Fiber Laser with MOPA Y. Okamoto, Y. Uno, T. Mohri and T. Izawa	624
Effect of Ultrasonic Vibration of Tool on Electrical Discharge Machining of Sintered NdFeB Magnet L. Li, Z.W. Niu and G.M. Yuan	628
The Micro-Mechanism of Vibration Cutting Stress Wave and the Analysis of Macro-Processing Effect J. Yao, W. Lu and C.S. Liu	632
Study on Electrical Discharge Machining Characteristics of Electrically Conductive Ceramics H. Wang, A. Okada, T. Uwano, Y. Uno and H. Sameh	636
The “Effective Region” Characteristic of the Tool Life in Vibration Drilling P. Zhang, X.Y. Guo and D.Y. Zhang	640
Effect of Thickening Agent on Water-Based Working Fluid for EDM R.J. Ji, Y.H. Liu, L.L. Yu, J.M. Chen, R. Shen and X.P. Li	644
Experimental Research on Pulse Generator for EDM of Non-Conductive Ceramics H.F. Zhang, Y.H. Liu, J.M. Chen, R. Shen, B.P. Cai and D.W. Wang	649
Study on Cavitation Aided Abrasive Machining on Glass K. Ohashi, S. Tsukamoto and T. Nakajima	654
Simulation Research on the Swirling Airflow Compounded with Magnetic-Field Finishing X.H. Li, S.Q. Yang, S.C. Yang and W.H. Li	658
A Denoise Method of Electrical Discharge Machining Gaps Signal for Non-Conductive Engineering Ceramics Based on Wavelet MMA R. Shen, Y.H. Liu, J.M. Chen, H.F. Zhang and R.J. Ji	662
Effect of Electrode Insulation Thickness on Size Accuracy of Bored Hole in ECD Process W. Wang, D. Zhu, N.S. Qu and S.F. Huang	667
Prevention of Burr Formation in Face Milling of Carbon Steel by Laser Hardening T. Kito, R. Tanaka, A. Hosokawa, T. Ueda and T. Furumoto	672
The Optimization of Processing Parameters and Experimental Investigation on Ni-Based Components Fabricated by Laser Cladding X. Ji, J.Z. Zhou, F. Qiu and S.Q. Jiang	676
Design of a Simultaneous Module Using Burnishing and Electrofinishing on Hole-Wall Surface P.S. Pa	680
The Analysis on the Stability of Diamond Wire Saw Cutting Process for the Silicon L.G. Zhao, D.W. Zuo, Y.L. Sun and M. Wang	684
Influence of On-the-Machine Laser Hardening on Machinability of Carbon Steel in Turning T. Kusano, R. Tanaka, A. Hosokawa, T. Ueda, T. Furumoto and Y.C. Lin	690
Ultrafine-Grained Treatment Process on FGH4096 Alloy Y.Q. Ning, Z.K. Yao, H.Z. Guo, T. Yu and Y.W. Zhang	694
Study on Bio-Limited Forming Technology Based on the Nano-Composite Electroless Coating Z.Y. Lian, B. Chen, J. Cai, W.Q. Zhang, P. Zhang and D.Y. Zhang	698

X. Surface Integrity and Machining Quality

Effect of Surface Topography on Stress Distribution of Vacuum Plate Glass for Different Aluminum Alloy Braced Pillars H. Miao, D.W. Zuo, R.H. Zhang and J.F. Zhang	705
Cutting Characteristics of CFRP Materials with End Milling I. Takashi, M. Hagino, M. Matsui and L.W. Gu	710

Experimental Characteristics of Aluminum Alloys in Dry End Milling Y. Mizugaki, K. Takafuji and K. Kikkawa	714
Numerical Analysis of Surface Residual Stress of NC Milling 7075-T7451 Aluminum Alloy H.F. Wang, D.W. Zuo, L.T. Wang, H. Miao and H.J. Wang	718
Gloss Evaluation Method for Metal Surface with Hairline Using Patterned Area Illumination T. Sugino, Y. Satozono and Y. Yamane	723
Experimental Study on the Cutting Temperature Using Work-Tool Thermocouple while Machining TC4 B. Zhang, W.Y. Chen and D. Liu	727
Study on the Surface Integrity of Micro-Ultrasonic Machined Glass-Ceramic Material W.H. Fan, C.L. Chao, W.C. Chou, T.T. Chen and C.W. Chao	731
