

Table of Contents

Preface

Chapter 1: Engines, Propulsion Systems and Fuels

Analysis of Unrepeatability of an SI Engine Based on Measurements of Indicated Pressure P. Kordos and A. Nieoczym	3
Dry Friction Effect on the Work of Viscous Torsion Damper C. Jagielowicz-Ryznar	13
Effect of Fuel Pilot Dose Parameters on Efficiency of Dual-Fuel Compression Ignition Engines Fuelled with Biogas S. Wierzbicki, M. Śmieja and M. Mikulski	19
Fuel System Contamination Affecting Injection Equipment of Diesel Engines A. Bejger and K. Gawdzińska	27
Possibility to Use Cameline (<i>Camelina sativa</i>) as an Alternative Raw Material for Production of Biofuels M. Ambrosewicz-Walacik, M. Tańska, S. Nitkiewicz and M. Walacik	34
Simulation Investigations of Influence of Tooth Depth Coefficient on Dynamic Phenomena in Toothed Gear G. Peruń	41
Verification of a 2-Phase, Zero-Dimensional Model of a Multifuel Compression-Ignition Engine in Single Fuel Operation M. Mikulski, S. Wierzbicki and A. Piętak	47
Diagnostic Model of the Marine Propulsion System M. Kluczyk, A. Grzędziela and T. Batur	57
Numerical Modeling of a Static Cavitation Module T. Vitenko, P. Drożdziel and N. Horodysky	64

Chapter 2: Mechatronics, Robotics and Control

A Concept for Application of a Stereo Vision Method in Control System of an Underwater Vehicle B. Żak and S. Hożyń	73
Advanced Neuro-Fuzzy System in the Task of Position-Force Control of a Manipulator M. Muszyńska and P. Gierlak	81
An Example of a Special Algorithm Application for Control of Aerial Guided Bomb Flight, during Guidance on the Ground Moving Target K. Stefański	93
Architecture of Software for Biomimetic Autonomous Underwater Vehicle T. Praczyk	104
Comparative Analysis of DC Motor Control System W. Mitkowski, M. Zagórska and W. Bauer	111
Concept of Swarm Specialized Distributed Localization System A. Budziński, T. Buratowski and M. Giergiel	122
Determination of Dynamic Parameters for Underwater Robots with Crawler Drives K. Kurec and D. Szybicki	130
Fuzzy Controller for Controlling the Observation and Tracking Head I. Krzysztofik	140
Globalized Dual Heuristic Dynamic Programming in Control of Robotic Manipulator M. Szuster and P. Gierlak	150
Microprocessor System for Measurement of a Thrust Generated by an Underwater Vehicle P. Szymak and S. Bruski	162
Mission Planning Training Simulator of Autonomous Surface Vehicle (ASV) Z. Kitowski	168

Modelling of Underwater Robotic Vehicle Motion with Using of Genetic Algorithms J. Garus, R. Studański and P. Vidan	177
Obstacle Avoidance by Unmanned Underwater Vehicle A. Zak	187
Research on Subsystem of Obstacles Detection Based on Physical Model of Biomimetic Underwater Vehicle P. Szymak, K. Naus and M. Chmielak	197
Robotic Automation of the Turbo-Propeller Engine Blade Grinding Process A. Burghardt, K. Kurc and D. Szybicki	206
Ship Motion Control System for Replenishment Operation W. Gierusz and A. Miller	214
Verification of the Mathematical Model for an Underwater Crawler Robot K. Kurc and D. Szybicki	223
The Manipulator Tool Fault Diagnostics Based on Vibration Analysis in the Frequency Domain P. Gierlak and M. Szuster	234
Analysis of the Feasibility of Usage of Standalone Controllers for Control of Spark-Ignition Engines S. Wierzbicki, W. Kraskowski and B. Kolator	245
Rationalisation of the Operation Process of Power Supply Systems of Highway Telematics A. Rosiński	253
The Ongoing Assessment of the Technical Condition of Avionic Hydraulic Drives on the Basis of Information Received from Means for Unbiased Flight Control of Aircrafts L. Ulanowicz	261
The Use of Hall Effect Sensors in Magnetic Levitation Systems A. Sibilska-Mroziewicz, S. Czubaj, E. Ładyżyńska-Kozdraś and K. Sibilski	271
Optimal Compensator for Anti-Ship Missile with Vectorization of Engine Thrust Ł. Nocoń and Z. Koruba	279
Integration of PEM Fuel Cells and Lithium Ion Secondary Battery into a Single Hybrid Electric Energy Source – Part I: Control System G. Grzeczka, A. Polak and R. Rak	289

Chapter 3: Communication and Navigation Systems

The Reliability and Operation Analysis of the Landing Support System M. Siergiejczyk, K. Krzykowska and A. Rosiński	299
Research and Analysis of Accuracy of Location Estimation in Inertial Navigation System P. Rajchowski, K. Cwalina and J. Sadowski	308
Measurement of Hydroacoustic Channel Impulse Response R. Studański and A. Zak	317
Design of Radio Digital Mobile Communications in Conditions of the Polish Railway M. Siergiejczyk	325
Computing of Poles of Linear Antennas from Noisy Responses M. Walkowiak, A. Witenberg and K. Jagodzińska	334
Analysis of WiFi Communication (Data Interchange) for Mobile Robot in Industrial Environment I. Ostrowski, P. Szulewski and A. Masłowski	342
Wideband Radio Direction Finder Implemented in Software Defined Radio Technology K. Cwalina, P. Rajchowski and J. Sadowski	348
