

Table of Contents

Preface, Conference Organization and Sponsors

Chapter 1: Chemistry and Physics of Materials, Environmental Materials

Analysis of Structural Features of Humic Acids Fractions after Mechanochemical Modification	
M.P. Mirzobekzoda, E.V. Maltseva and N.S. Shekhovtsova	3
Synthesis of Cobalt Nanopowder Using Surfactants of Different Nature	
E. Kolesnikov, V. Levina, A. Godymchuk, D.V. Kuznetsov and N. Polushin	7
Microstructural Changes in Co Films Depending on MOCVD Conditions	
R. Hairullin and S. Dorovskikh	12
Direct Synthesis of Propylene from Ethylene over Palladium Containing Catalysts: Influence of the Support Nature	
L.F. Sayfulina, E.A. Buluchevskiy, A.V. Lavrenov, T.I. Gulyaeva, M.D. Trenikhin, O.V. Protasova, E.Y. Gerasimov, R.V. Gulyaev and V.A. Drozdov	17
Study of Phenol Oxidation Products over Glassy Carbon Electrode in Alkaline Solutions by Photoluminescence Spectroscopy	
K. Alekseenko and V.N. Batalova	23
The Catalysts Synthesis Methanol for Direct Synthesis of Dimethyl Ether from Synthesis Gas	
N. Kosova, O.Y. Vodorezova, I. Kurzina, L.N. Kurina, V.M. Vorobeva, N.V. Shtertser and A.Y. Godymchuk	29
Research of Formation Plasma-Chemical Process Particles of Oxides Metals with Specified Morphology	
E.V. Obkhodskaya, V.I. Sachkov, A.S. Buynovskiy and E.M. Knyazeva	34
Synthesis of Silicon Carbide in Hypervelocity Plasma Jet	
D.S. Nikitin, A.A. Sivkov, A.Y. Pak and I.A. Rakhmatullin	38
Determining the Degree of Nanopowders Hydrophilicity by the Ratio Fractal Dimension to the Specific Surface	
L.S. Vikulina, A.V. Nomoev and A.Y. Godymchuk	44
Properties of Calcium-Phosphate Coatings Formed by Pulsed Laser Deposition	
Y.D. Lenivtseva, I.N. Lapin, E.N. Bolbasov, S.I. Tverdokhlebov and V.A. Svetlichniy	50
Characterization of Electroexplosive Zinc Nanopowders in Aqueous Suspensions	
A. Godymchuk, E. Yunda, D.V. Kuznetsov, A. Gusev and N. Kosova	54
Modification of the Titanium Surface Layer by the Yttrium	
Y.F. Ivanov, N. Popova, M.P. Kalashnikov, V. Gromov, E. Budovskih, A.D. Teresov and E.L. Nikonenko	63
Sorption of Cobalt(II) and Copper(II) Ions by Highly Cross-Linked Carboxyl Cation Exchangers from Natural Waters with High Salt Background	
V.V. Zharkova, L. Bobkova, C.A. Bektimirova and V. Kozik	68
Glyoxylic Acid Separation from Products of Glyoxal Oxidation in the Form of its Calcium Salt	
M.A. Pozdniakov, K.V. Rubtsov, L.A. Rasskazova and A. Filimoshkin	74
Al₂O₃/SiO₂ Materials with Bimodal Pore Size Distribution as Support for Heterogeneous Catalysts	
N. Litvyakova, T. Bugrova and G. Mamontov	79
Morphology and Topology of Coherent Scattering Regions of the Fe-Mn-C Steel Fine Structure	
A.P. Zykova, I. Kurzina, M.Y. Novomejsky and Y.D. Novomejsky	84
Investigation of Surface Phase Layers on GaAs after Selective Chemical Etching	
O.N. Zarubina, G.M. Mokrousov, A.G. Touryanski, I.V. Pirshin and L.V. Maliy	91
Synthesis of TiO₂ and F-Doping TiO₂ Powders via "Reverse" Hydrolysis of Titanium Tetraisopropoxide	
E. Fakhrutdinova, A.V. Shabalina and E. Sudareva	95

Sorption Selectivity of Rare-Earth Elements Ions by KB-2E Macroreticular Carboxylic Cation Exchanger	101
L. Bobkova	
Photodegradation of an Herbicide (2-methyl-4-chlorophenoxyacetic acid) in the Presence of “TiO_2, SnO_2, SnO_2/TiO_2 Nanoparticles – Polypropylene Fibrous Carrier” Systems	107
I.A. Lysak, T.D. Malinovskaya, O.N. Tchaikovskaya, G.V. Lysak and V.R. Artyushin	
Synthesis of the Hydroxyapatite-Silver Nanocomposite	113
A.V. Abakshonok, A.N. Eryomin and V.E. Agabekov	
Acid-Base and Photoinduced Processes on Magnesium-Containing Minerals and their Influence on the Troposphere Cleaning	119
E.B. Daibova, T.S. Minakova, V.S. Zakharenko, N. Kosova, I.A. Kurzina and A.B. Zotova	
Physicochemical and Photosorption Properties of Oxygen-Containing Calcium Compounds – Components of Troposferic Aerosol	124
E.B. Daibova, T.S. Minakova, V.S. Zakharenko, N. Kosova, I.A. Kurzina, M.E. Kirillova and L.Y. Minakova	
Study of Calcium Aluminate Formation	130
L.A. Selyunina and L.N. Mishenina	
Surface Morphology of Titanium Oxide and Oxynitride Coatings Deposited by Reactive Magnetron Sputtering	134
G.V. Arysheva, N.M. Ivanova, A.A. Pustovalova and M.E. Konischev	
Tribological Properties and Microstructure of Gradient Nanocomposite Coatings on the Basis of Ti-Al-Cr-B-N	139
O.V. Sergeev, V. Sergeev, M.V. Fedorischeva and A.V. Voronov	
Experimental Comparison of 2-methylimidazole Nitration by Nitric Acid and Nitrate Salts of Alkali Metals	143
M.V. Lyapunova and V.S. Malkov	
Geochemical Trends of Trace Elements Concentration in Saline Lakes of Central Asia	148
O. Gaskova, M. Kolpakova, V. Isupov, A. Vladimirov, S. Shvartsev and S. Ariunbileg	
Development of a New Technology of Environmental Purification from Naphthalene	154
L.V. Nechaev, O.N. Tchaikovskaya, E.V. Maltseva and N.V. Yudina	
Photosensitized Reactions of Psoralen and Herbicides Revealed by the Pump-Probe Method	161
N. Bryantseva, O.N. Tchaikovskaya, N.B. Sultimova, V.A. Svetlichnyi, I.N. Lapin and V.S. Kraiukhina	
Hydromineral Resources of Saline Lakes of Mongolia and Russian Altai	166
V. Isupov, A. Vladimirov, A. Sodov, M. Kolpakova, S. Shvartsev and N. Volkova	
Synthesis of the Exfoliated Graphite from Graphite Oxide	171
A. Bannov, A. Timofeeva, S. Yusin, K. Dyukova, E.A. Maximovskiy, A. Ukhina and A. Shibaev	
Synthesis and Optical Properties of CdSe and CdSe/ZnS Core/Shell Quantum Dots	176
P. Barik, A.R. Mandal, D.V. Kuznetsov and A.Y. Godymchuk	
Synthesis of CdS Nanoparticles by Laser Ablation of Metallic Cadmium Target in Presence Different Precursors	182
D.A. Goncharova, I.N. Lapin and V.A. Svetlichnyi	
Effect of Microwave-Hydrothermal Synthesis on Tin (II) Oxide Properties	187
A.A. Pichugina and S.A. Kuznetsova	
Ti-Y Surface Alloy Formed by High-Energy Methods	192
N.N. Morozova, K.V. Sosnin, E.A. Petrikova, A.D. Teresov and Y.F. Ivanov	
Structural Analysis of B4C Bimodal Powder Mixture	197
M.S. Petukevich, Y.F. Ivanov, O.L. Khasanov, E.S. Dvilis and A.A. Panina	
Microstructure and Wear Resistance of Surface Layer of Copper Modified by N^+ Ion High Fluencies Implantation	201
V. Sergeev, A.R. Sungatulin, M.P. Kalashnikov, O.V. Sergeev and S.Y. Zharkov	
Bimetallic Supported Pd-Ag Catalysts	205
I.S. Bondarchuk, G.V. Mamontov, F.J. Cadete Santos Aires and I. Kurzina	
Basic Stages of Magnet Production by Fluoride Technology	209
A.S. Bujnovskij, V.L. Sofronov, V. Sachkov and A.V. Anufrieva	
Electromagnetic Characteristics of Composites Based on Multiferroics Powders at Microwave Frequencies	214
Y.V. Zhuravlyova and O. Dotsenko	

Low Sulfur Fuel Distillates Obtaining from Vacuum Gasoil	218
Y.O. Karpov, E.B. Krivtsov and A.K. Golovko	
Development of Stand for Testing Electrochemical Permeation (STEP) of Hydrogen through Metal Foils	224
V.N. Kudiarov, N.S. Pushilina and S.Y. Harchenko	
Advanced of Rare Earth Fluorides Technology	229
T.D. Malinovskaya, R.A. Nefedov, O.B. Sambueva and V. Sachkov	
Investigation of the Phase Composition of Lithium-Titanium Ferrites by Thermo-Magnetometric and X-Ray Analysis	233
A.L. Astafyev, E.N. Lysenko and A.P. Surzhikov	
Impact of Multi-Walled Carbon Nanotubes to Rye Seedlings	237
A.A. Gusev, O.N. Zaytseva, O.A. Selivanova, O.V. Zakharova, A. Godymchuk, D.V. Kuznetsov and A.G. Tkachev	

Chapter 2: Structure Materials, Mechanics and Dynamics of Materials

Cement Foam Concrete with Low Shrinkage	245
A.I. Kudyakov and A.B. Steshenko	
New Technique for Estimation of Fatigue Cracks in Concrete by the Parameters of Electric Response to Pulse Mechanical Excitation	250
D.D. Dann, A.A. Demikhova, G.E. Utsyn and T.V. Fursa	
Kinetic Analysis of Lithium-Zinc Ferrite Synthesis by Thermogravimetric Method	255
E.V. Nikolaev, A.P. Surzhikov and E.N. Lysenko	
Influence of Refractory Metal Oxide Ultrafine Particles on the Structure and Mechanical Properties of High-Manganese Steel	260
A.P. Zykova, I. Kurzina, D.V. Lychagin, A.V. Chumaevsky and M.Y. Novomejsky	
Acrylate Hydrogel Modification Using a Cross-Linking Agent for Increasing Multilayer Glazing Flame Resistance	265
D. Litovchenko, I. Burmistrov, L. Panova, A.Y. Godymchuk and N. Kosova	
Effect of High Intensity Pulsed Ion Beam of Carbon on Subsurface Layers of Zirconia Ceramics	270
A. Surzhikov, I. Vasiliev, S.A. Ghynagazov, T. Frangulyan and A. Chernyavski	
Grain Bending at Deformation of the Steel and Arrangement of Internal Stresses	276
I. Gibert, S. Kiseleva, N.A. Popova, N. Koneva and E. Kozlov	
Pressure and Temperature Effect on Hydrogen Sorption of Carbon Material	280
L.V. Gulidova, N.A. Dubrova and A.M. Lider	
Changing of the Structural-Phase State and Mechanical Properties of VT-23 Titanium Alloy under Surface Treatment by Intense Flux of Copper Ions	284
V. Sergeev, M.P. Kalashnikov and V.V. Neufeld	
Structural Phase State and Mechanical Properties of the Si-Al-N Coatings with Different Concentration Ratio of Al and Si	289
V. Sergeev, M.V. Fedorisheva, M.P. Kalashnikov, I.A. Bozhko, A.V. Voronov, E.V. Ribalko and Y.P. Mironov	
Influence of the Grain Size on the Dispersion Strengthening of VT1-0 Alloy Implanted with Aluminum Ions	294
E.L. Nikonenko, N. Popova, M.P. Kalashnikov, E. Nikonenko and I. Kurzina	
Features of Stress Changes in the Alloy Ti₅₀Ni_{48,7}Mo_{0,3}V₁ under Loading in a Wide Temperature Range	299
V. Gyunter, G. Baigonakova, E. Marchenko and A.A. Klopotov	
Structural Phase State of the Ceramic Layer of ZrO₂	303
O.S. Tolkachev, Y.F. Ivanov, A.A. Klopotov, V. Klopotov and Y.A. Abzaev	
Investigation of the Influence of Ti-Nb Alloy Composition on the Structure of the Ingots Produced by Arc Melting	307
Y.P. Sharkeev, Z.G. Kovalevskaya, Q.F. Zhu, M.A. Khimich and E.A. Parilov	
Influence of Physical Properties of B₄C Powder on the Strength Properties of the Ceramics Manufactured by SPS Sintering	312
O.L. Khasanov, E.S. Dvilis, Z.G. Bikbaeva, V.V. Polisadova, A.O. Khasanov, M.S. Petukevich and T.V. Milovanova	

Control of Defects on the Parameters of the Electromagnetic Response under Pulsed Mechanical Excitation of the Sample	316
P. Khorsov, N. Khorsov and V. Surzhikov	
Recrystallization Features in Olivine from Dunites of the Tarlashkinsk Ultramafic Massif: New Data from the EBSD Analysis of Rock-Forming Grains	319
A.S. Kulkov, A.I. Chernishov, D.V. Lychagin and P.A. Tishin	
Methods for Producing of Cement Mixes Additives Based on Peat	324
N.O. Kopanitsa, Y.S. Sarkisov and A.V. Kasatkina	
Investigation of Defects Accumulation in the Process of Hydrogen Sorption and Desorption	328
A.M. Lider, O.V. Husaeva, Y. Bordulev, R.S. Laptev and V.N. Kudiarov	
Eddy Current Analysis for Nuclear Power Materials	335
V.V. Larionov, A.M. Lider and G.V. Garanin	
Elastoplastic Invariant Relation for Deformation of Alkali-Halide Crystals	340
S.A. Barannikova, M.V. Nadezhkin and L.B. Zuev	
Drying Kinetics of the Selected Grass Fuels under Isothermal Condition	345
A. Filkov, A. Simeoni and Y. Isaev	
Wrinkling and Folding in Copper Single Crystals under Compression and Sliding	351
D. Lychagin, S. Tarasov, A. Chumaevskii and E. Alfedorova	

Chapter 3: Material Science in Biology and Medicine

Comparative Study of the Biological Efficacy of Titanium Dioxide Nano- and Microparticles	357
V. Grigoryeva, O. Zaeva and N. Krivova	
Dispersions of Engineered Nanoparticles in Physiological Liquids	363
A. Godymchuk, E. Yunda, N. Kosova, E. Karepina, D. Kuznetsov, A. Gusev and E. Arzamastseva	
<i>Opisthorchis felineus</i> Infection and Harmful Metals Bio-Concentration: A Pilot Study in Hamster Model	370
S. Lezhava, A.G. Pershina, D. Kokova, E.A. Perina, I.P. Kaminskii, A.E. Sazonov and L.M. Ogorodova	
Study of MWNTS Influence upon Liver Histological and Histochemical Parameters in Laboratory Mice: Preliminary Results	376
I.A. Vasyukova, A.A. Gusev, A.Y. Ubogov and A. Godymchuk	
Effect of Platinum Nanoparticles on Biological Activity of Humus-Accumulated Horizons	384
I.V. Lushchaeva and Y. Morgalev	
Influence of Slaked Lime Addition on Biotechnological Specification of Vermiculture	390
K.A. Petrochenko, A.V. Kurovsky, A.S. Babenko and Y.E. Yakimov	
Bioactivity and Physico-Chemical Properties of Composites on Basis of Hydroxyapatite with Lactic and Glycolic Acids Oligomers	394
L.A. Rasskazova, D. Lytkina, E. Shapovalova, V.V. Botvin, M.A. Pozdnyakov, I. Zhuk, A.G. Filimoshkin, N. Korotchenko and V. Kozik	
Reduction of Locomotor and Brain Activity of Wistar Rats after Serial Administration of Titanium Dioxide	400
M. Khodanovich, A. Zelenskaya, E. Gul, D. Sukhanov and E. Krutenkova	
Circulating Matrix Metalloproteinases, Tissue Inhibitors, Natriuretic Peptides, and Rigidity of the Great Arteries in Patients with HFpEF in 12 Month after Myocardial Infarction	406
V. Ryabov, E. Kravchenko and T. Suslova	
Organ-Preserving Surgery Using Endografts from Superelastic Titanium-Nickelid-Based Alloy for Patients with Laryngeal Cancer	414
E. Choynzonov, M. Mukhamedov, D. Kulbakin, M. Buldakov and V. Gyunter	
Effect of Plasma-Based Chemical Modification on Wettability of Polymer Materials for Cardiovascular Surgery	419
Y. Khodyrevskaya, Y. Kudryavtseva, G. Remnev and S. Tverdokhlebov	
Stability of Disperse Systems during Bioassay of Nanoecotoxicity with Use of Aquatic Organisms	424
S.Y. Morgalev, T.G. Morgaleva, Y. Morgalev and I.A. Gosteva	

Study of Structural Features of Porous TINI-Based Materials Produced by SHS and Sintering	430
S.G. Anikeev, V.N. Khodorenskaya, O.V. Kokorev, T.L. Chekalkin and V.E. Gunter	
Development of a Method for Producing and Purifying N2-Carboxyethyl-2'-Deoxyguanosine for Molecular-Biological Research	436
S. Krivoshchekov, A.O. Bogdanov, L.M. Ogorodova, N.B. Dementeva, I.V. Saltykova, R.D. Marchenko, V.V. Ivanov, O.A. Mayboroda and A.E. Sazonov	
Implementation of Differential Scanning Calorimetry when Studying Polymerization of Compounds Based on Glycolic Acid Ether	441
O. Babkina, E. Vaitulevich, O. Gordeeva, G. Sarycheva, A.L. Nemoykina and K. Alekseenko	
Histopathologic, Immunohistochemical Features and Profile of Viral Antigens in Patients with Myocarditis	447
Y. Rogovskaya, R. Botalov and V. Ryabov	

Chapter 4: Mathematical Methods in Materials Science

Mass Determination Algorithms Using High Energy Digital Radiography	455
S. Osipov, V.A. Klimenov, O.S. Osipov, V.D. Samigullin and A.M. Shtain	
Study of Creep in Face-Centered Cubic Crystals under Constant Load and Constant Stress	460
M. Semenov and S. Kolupaeva	
Designing Fuzzy Systems to Predict Efficiency of the Non-Pharmacological Treatment	465
I. Hodashinsky, A. Anfilofyev, R. Meshcheryakov and I. Gorbunov	
Interconnections between the Polarization Current and the Electromagnetic Signal of Rock Samples under Loading	471
L.V. Yavorovich, A.A. Bespal'ko, P.I. Fedotov and A.I. Popelyaev	
Physicochemical Processes at Plasma Treatment of Quartz-Feldspar Raw Materials	474
O. Volokitin, G.G. Volokitin and V. Shekhovtsov	
Radiation Dose Measurement Technique of the X-Ray Source in the Process of Stabilization	478
I. Miloichikova, S. Stuchebrov, A. Krasnykh and A. Wagner	
Mathematical Models Describing the Absorption Mechanism of Cadmium Ions on the Modified Peat Sorbent	482
L.B. Naumova, N.P. Gorlenko, E.B. Chernov, Y.S. Sarkisov, A.V. Zhuykova and V.P. Dmitrienko	
Numerical Simulation of Impact Loading on Solid Propellant within an Orthotropic Shell	486
P. Radchenko, A. Radchenko and S. Batuev	
Simple Model of Intermetallic Formation in Surface Layer during Ion Implantation	492
K. Asfandyar and A.G. Knyazeva	
Angular Distribution of XPS Peaks by Layers of a Finite Thickness	496
V. Afanas'ev and A. Gryazev	
Influence of Placement Gas Infrared Emitters on the Energy-Effectiveness of their Application	502
V. Maksimov and T. Nagornova	
Using Mathematical Models to Provide Reliability of Transport Facilities	507
S.V. Efimenko, A.V. Sukhorukov and O.V. Konyayeva
