## Preface

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| <b>Rare Earths as Major Components in Oxide Glasses</b><br>J.E. Shelby                                   | 1   |
| <b>Rare Earths as Modifiers in Oxide Glasses</b><br>J.E. Shelby                                          | 43  |
| <b>Structure and Properties of Rare Earth Gallium Sulfide Glasses</b><br>A.G. Clare                      | 81  |
| <b>Magnetic Properties of Glasses Containing Rare Earths</b><br>J.T. Kohli                               | 109 |
| <b>The Faraday Effect in Glasses Containing Rare Earths</b><br>J.T. Kohli                                | 125 |
| <b>Neutron Scattering Studies of Glasses Containing Rare Earths</b><br>A.G. Clare and A.C. Wright        | 141 |
| <b>Rare Earths in Glasses for Laser Applications</b><br>A.G. Clare                                       | 161 |
| <b>Rare Earth Aluminosilicate Glasses for in Vivo Radiation Delivery</b><br>J.E. White and D.E. Day      | 181 |
| <b>Infrared and Raman Spectra of Glasses Containing Rare Earth Ions</b><br>R.A. Condrate, Sr.            | 209 |
| <b>Spectroscopic Studies of Actinides in Glasses</b><br>R.T. Brundage                                    | 233 |
| <b>Gallium Oxide Glasses</b><br>J.C. Lapp and W.H. Dumbaugh                                              | 257 |
| <b>Alkali and Alkaline Earth Galliosilicate Glasses</b><br>J.E. Shelby                                   | 279 |
| <b>Alkaline Earth Gallogermanate Glasses</b><br>J.M. Jewell                                              | 317 |
| <b>Scandium, Yttrium and Indium in Oxide Glasses</b><br>J.E. Shelby                                      | 345 |
| <b>Arsenic and Antimony as Minor Constituents in Oxide Glasses</b><br>J.T. Kohli                         | 363 |
| <b>Alkali Niobium and Tantalum Silicate Glasses and Ferroelectric Glass-Ceramics</b><br>D.E. Vernacotola | 379 |
