

Table of Contents

Preface

Interface Reactions with Formation of a Solid Phase on a Solid Substrate: A Short Overview

F.M. d'Heurle 1

Reactive Interdiffusion

J. Philibert 15

Phase Stability during Growth of Compound Layers

V.I. Dybkov 31

Silicides Thin Films Formed by Metal/Silicon Reaction: Role of Diffusion

P. Gas 39

A Linear Phase Growth with Non-Equilibrium Vacancies

A. Gusak 55

Modellization of the Growth of Three Intermediate Phases

S.-. Zhang and F.M. d'Heurle 59

Spectroscopic Studies of Phase Formation and Diffusion Processes at Interfaces

K.D. Becker 71

Experimental Investigation of Reactive Phase Formation at Interfaces by Ion Beam Techniques

G. Blaise 91

TEM and In Situ HREM for Studying Metal-Semiconductor Interfacial Reactions

R. Sinclair, T.J. Konno and D. Hong Ko 111

Simulations of Growth

P. Stoltze 121

Ordering in Semiconductor Alloys

J.E. Bernard 131

Ab Initio Molecular Dynamics

K. Laasonen 149

Chemical and Topological Structure of Alloy Surfaces: From Equilibrium to Kinetics

B. Legrand, A. Saúl and G. Tréglia 165

Atomic Scale Simulations of Solute-Atom Segregation at Grain Boundaries in Binary FCC Alloys

D. Udder and D.N. Seidman 189

Lattice Kinetic Descriptions for Bulk Reaction-Diffusion Processes: Application to Alloys under Irradiation

P. Bellon and G. Martin 209

Layer by Layer Dissolution of Ag Deposited on Cu(111)

A. Saúl 233

Diffusion in Intermetallic Compounds

H. Bakker 239

Recent Developments in Diffusion in Oxides

A. Atkinson 245

Kinetics of Dissolution of Discontinuous Films into Single Crystal

D.L. Beke, Y.S. Kaganovsky and I. Beszeda 257

The Appearance of Stresses and their Effects in Diffusion-Reaction Processes in Solids

F.C. Larche 267

A Method to Constrain Thermodynamic Mixing Properties and Diffusion Data in Multicomponent Solutions

S. Chakraborty and J. Ganguly 279

Interdiffusion and Unmixing

C.J.A. Monty 285

Numerical Calculation of Kirkendall Deformations and Stress Distributions in Thin-Sheet Diffusion Couples

I.A. Szabó, I. Daruka and D.L. Beke 289

Interpretation of Oxygen Tracer Diffusion Profiles in Growing Polycrystalline Oxide Films	293
Y.M. Mishin and G. Borchardt	
Point Defect Contribution to Self-Diffusion in Amorphous Metallic Alloys	301
J.M. Delaye and Y. Limoge	
Reaction and Diffusion in Multiphase Systems: Phenomenology and Frames	307
F.J.J. van Loo and B. Pieraggi	
Kinetics of Compounds in Thermodynamic Potential Gradients	319
H. Schmalzried	
Diffusion Reactions at Metal/Ceramic and Ceramic/Ceramic Interfaces	331
F. Ernst and M. Rühle	
Metastable Phases and Nuclei: Computer Modeling	345
A.G. Khachaturyan, Y.Z. Wang and H.Y. Wang	
Order and Disorder at Interfaces	367
F. Ducastelle, C. Ricolleau and A. Loiseau	
Electronic Structure of Interfaces in Relation with Adhesion and Magnetism of Transition Metals Bilayers, Sandwiches and Multilayers (Abstract)	387
F. Gautier and D. Stoeffler	
On the Interface Transfer Coefficient in Second Phase Growth Models	389
P. Maugis and G. Martin	
Absolute Atomic Scale Measurements of the Gibbsian Interfacial Excess of Solute at Grain Boundaries in an Iron (Silicon) Alloy	393
B.W. Krakauer and D.N. Seidman	
The Composition and Structure of the Cu/MgO {222} Heterophase Interface on an Atomic Scale	397
H. Jang, D.N. Seidman and K.L. Merkle	
Spatio-Temporal Organization in Reaction-Diffusion Systems	401
D. Walgraef	
Interface Stability during Reactions	429
M. Martin	
Flames and Reaction-Diffusion Waves (Abstract)	445
P. Clavin	
Formation of Metastable Phases by Diffusion Reaction	447
U. Herr, H. Geisler and K. Samwer	
Metastable Phase Formation and Decomposition in Nanomixtures of Immiscible Cu and Fe	463
R. Yavari, O. Drbohlav, A. Hernando, P. Crespo, A. Garcia Escorial, J.M. Barandiarán and I. Orue	
Defect Injection and Diffusion in Semiconductors	475
N. Stolwijk, H. Bracht, H.-. Hettwer, W. Lerch, H. Mehrer, A. Rucki and W. Jäger	
The Interface between Polysilicon and Monocrystalline Silicon: Interface Layer and Electrical Characteristic	493
B. Leroy and T. Vanneste	
Reactive Wetting by Liquid Metals in Materials Science	511
Y. Adda, M.H. Ambroise and F. Barbier	
Diffusive Phase Transformations in Hot Dip Galvanizing	527
M. Guttmann	
Diffusion in the Hf-N System	549
W. Lengauer, D. Rafaja and P. Ettmayer	
Solid State Reactions and Surface Diffusion in SiC-Ta and SiC-Nb Powder Systems	553
P. Mogilevsky and E.Y. Gutmanas	
Phases Formed by Interdiffusion between YBCO and (Bi,Pb) Based Compounds	557
L. Schmirgeld-Mignot, P. Régnier and F. Maurice	
The Growth of Silicides in Ni-Si and Ni-SiC Diffusion Couples	561
J.H. Gülpén, A.A. Kodentsov and F.J.J. van Loo	
Reactive Phase Formation in the Diffusion Zone between Si₃N₄ and Ni-Cr Alloys	565
A.A. Kodentsov, J.K. Kivilahti and F.J.J. van Loo	
ROUND TABLE DISCUSSION	569
A.B. Lidiard	

CONCLUDING REMARKS

G. Martin
