

Table of Contents

Preface

Production of Utilizable Energy from Renewable Resources: Mechanism, Machinery and Effect on Environment N. Mahato, M.O. Ansari and M.H. Cho	1
Renewable Energy for Sustainable Socio-Economic Development in Developing Countries: A Case Study of Sub-Saharan Africa M. Bello	33
Nanocrystalline Materials for Hybrid Photovoltaic Devices T.I.A. Mashreki and M. Afzaal	45
Thin Film Solar Cell: Characteristics and Characterizations M.K. Hossain	51
Hydrogenated Amorphous Silicon-Based Thin Film Solar Cell: Optical, Electrical and Structural Properties M.K. Hossain	59
A Short Review of Parabolic Trough Technology and the Case of Saudi Arabia M.M.A. Khan	65
Water Desalination Using Solar Energy M. Antar	73
Supercritical Carbon Dioxide Brayton Cycles Driven by Solar Thermal Power Tower System M. Atif and F.A. Al-Sulaiman	94
Photocatalytic H₂ Production Using Semiconductor Nanomaterials via Water Splitting – An Overview K. Natarajan, T.S. Natarajan, R.I. Kureshy, H.C. Bajaj, W.K. Jo and R.J. Tayade	130
Hydrogen Storage by Physisorption: An Overview A. Al-Ahmed and M.M.A. Khan	157
Global Status on Fuel Cells and Hydrogen Technology M. Bello	173
A Review of the Importance and Present Status of Micro-Tubular Solid Oxide Fuel Cells M.H. Zahir	190
Use of Organic Polymers for Energy Storage in Electrochemical Capacitors M.F. Ahmer and S. Hameed	202
Electrode Modification for Better Kinetics in all Vanadium Redox Flow Battery (AVRFB): A Short Review A. Al-Ahmed	229
