Preface, Committees, Sponsors

Chapter 1: Research and Design of Materials Machining Technologies

Study on High-Speed Milling of Steam Turbine Blade Materials - Differences in Cutting Characteristics of an Unforged Ingot and a Forged Part of Stainless Steel	
T. Kimura, T. Sawa and T. Kamijo	3
Roller Burnishing Method with Active Rotation Tool - Better Surface Finish than Conventional Roller Burnishing	
M. Okada, Y. Miyagoshi and M. Otsu	9
Relationship between Cutting Heat and Tool Edge Temperature in End Milling of Titanium Alloy	
Y. Araki, R. Tanaka, Y. Kojima, K. Sekiya, K. Yamada and S. Koseki	15
Influence of Micro End Mill Tool Run-Out on Machining Accuracy	
S. Nakai, Y. Maeda, D. Goto, K. Kato, H. Tanaka, T. Yazawa and T. Otsubo	21
Influence of Scratch Marks on Undeformed Chip Thickness in Ultra-Precision Cutting of Al-Mg Alloys	
K. Amaki, Y. Maeda, T. Iida, K. Kato, H. Tanaka, T. Yazawa and T. Otsubo	27
High Aspect Ratio Thin Rib Shape Processing of Carbon Material for Electrical Discharge Machining Molds	
T. Fukao, Y. Masu, T. Yasuki, I. Takashi and H. Masahiro	33
On the Formation Mechanisms of Adhering Layer during Machining Metal Material	
X.Q. Song, Y. Takahashi, W.M. He and T. Ihara	39
Roundness in Drilling of Low-Rigidity Workpiece	
M. Sato, A. Fukuma, K. Yamamoto and T. Matsuno	46
Investigation of Grinding Fluid for Prevention of Chip Adhesion in Miniature Drilling of Glass Plate Using Electroplated Diamond Tool	
K. Honda, A. Mizobuchi and T. Ishida	52
Wet Core Drilling of CFRP with an Electrodeposited Diamond Core Drill - Effects of Cutting Conditions on Chip Evacuation and Core Jamming	
Y. Kojima, R. Tanaka, Y. Yamane, K. Sekiya and K. Yamada	58
Property and Recyclability Change of Corrosion-Inhibition-Improved Amine-Free Water-Soluble Cutting Fluid with Repeated Recycling	
K. Yamaguchi, K. Ogawa, T. Fujita, Y. Kondo, S. Sakamoto and M. Yamaguchi	65
Deposition of a Diamond-Like-Carbon Film by Ion Plating and Investigation on its Adhesiveness	
X. Zhu, K. Kubo, H. Toyota, S. Nomura, Y. Iwamoto and P. Gautama	70
Basic Characteristics of In-Liquid Plasma Jet and Electrode Damage	
X. Zhu, T. Satoh, H. Toyota, S. Nomura, Y. Iwamoto and P. Gautama	76
Micro Milling on Thin Wire	
M. Serizawa and T. Matsumura	81
Influence of Coolant Application Direction on the Cutting Performance of Ceramic Tool in High-Speed Air-Jet-Assisted Machining of Inconel 718	
T. Obikawa and M. Yamaguchi	87
Study on Tool Wear In-Process Estimation for Ball End Mill Using Rotation Control Air Turbine Spindle	
Y. Okamoto, T. Yazawa, T. Kato, K. Nishida, S. Moriyama, Y. Maeda and T. Otsubo	94
Turning of Titanium Alloy Using Near-Dry Methods with MQL, Coolant Mist and Hybrid Mist Supplies	
T. Wakabayashi, K. Yamada, S. Koike and T. Atsuta	101
Deep Hole Machining with a Small Diameter Drill and Ultrasonic Vibration	
Y. Masu, T. Fukao, T. Yasuki, H. Masahiro and I. Takashi	107
Difference of Feed Marks in Cutting Fluids when Turning Stainless Steel	
T. Kitamura, R. Tanaka, Y. Yamane, K. Sekiya and K. Yamada	111

Study on Clarification of Large-Area EB Irradiation Phenomenon by Electron Track Analysis	
Y. Kimura, T. Shinonaga and A. Okada	118
Efficiency Investigation of Removal of Loading Carbon Chips on Wheel Surface Using Dry Ice Blasting	
Y. Ohta, S. Murakawa and K. Ohashi	124
Influence of Nozzle Jet Flushing on Wire Breakage in 1st-Cut Wire EDM from Start Hole	
A. Kawata, A. Okada, Y. Okamoto and H. Kurihara	130
Study on Analysis of Cutting Mechanism of Ball End Mill for Concave and Convex Spherical Surface Using 3D-CAD	
T. Fujita, R. Kuromi, U. Hiroshi and H. Masahiro	136
Effects of Tool-Edge Form during the Drilling of CFRP	
H. Masahiro, I. Takashi, T. Fujita and U. Hiroshi	141
The Investigation of Electrochemical Slurry Jet Micro Machining on the SKD11 Mold Steel	
Z.W. Fan, L.W. Hourng, T.Y. Chen and H.P. Tsui	148
A Research of the Precision of Titanium Sheet Formed by Hot Incremental Sheet Forming Method	
K.D. Le, T.H. Nguyen, N.H. Tran, T.S. Le, H.B. Nguyen and T.N. Nguyen	154
Generation of the Anti-Twist Crowned Helical Gear by Modifying the Gear Rotation Angle in the Hobbing Process	
R.H. Hsu, Y.R. Wu and S.S. Chen	161
The Effect of Heating to the Formability of Titanium Sheet by SPIF Technology	
T.H. Nguyen, K.D. Le, P. Nguyen Ngoc, H.B. Nguyen, T.N. Nguyen and T.Y. Vo	171
Wear Characteristics of Coated Carbide Tools in the Face Milling of Ductile Cast Iron	
I. Martinez, R. Tanaka, Y. Yamane, K. Sekiya, K. Yamada, T. Ishihara and S. Furuya	178
A Standard Procedure for Development Performance Map of CNC Machining Centers by Using Double Ball-Bar	
S. Phankhoksoong, A. Pramuanjaroenkij, T. Ngamvilaikorn and C. Chungchoo	185
A New Procedure for Determining Minimum Sampling Points for Tolerance Evaluation of High Precision Mechanical Parts	
S. Phankhoksoong, A. Pramuanjaroenkij, T. Ngamvilaikorn and C. Chungchoo	191

Chapter 2: Materials Properties, Technologies of Production and Synthesis

Production of Cemented Carbide-Alumina Composite Material by Wet-Shaping Process	
A. Ikuta, H. Kyogoku and H. Suzuki	199
Effects of C and NbC Additions on the Microstructure and Mechanical Properties of Binderless WC Ceramics	
A. Nino, K. Morimura, S. Sugiyama and H. Taimatsu	205
Epitaxial Growth of Diamond by In-Liquid Plasma CVD Method	
P. Gautama, H. Toyota, X. Zhu, Y. Iwamoto, S. Nomura and S. Mukasa	211
Synthesis of Single-Wall Carbon Nanotubes by In-Liquid CVD	
H. Toyota, K. Nagaoka, X. Zhu, Y. Kato, S. Nomura, Y. Iwamoto, H. Yamamoto and Y. Shibano	217
Prediction of Static and Dynamic Mechanical Properties of GFRTP Product through Injection Molding	
K. Furuya, M. Nikawa, N.B. Tuyen, Y. Nakamura, R. Ueno, A. Chiba, K. Sakurai and Y. Matsumura	223
Experimental Analysis on Surface Profile of Sapphire Wafer after Polishing by Chemical Mechanical Polishing	
Z.C. Lin, W.S. Huang and H.Y. Ding	229
Modeling Strength and Stress Diffusion in Hip Prostheses with Nano-Reinforced Composites	
C.Y. Chung	234
Applicability of Interrupted Micro Cutting Process “Tilling” as Surface Texturing	
H. Usami, T. Sato, Y. Kanda and S. Nishio	241

Effects of Machining History on Tribological Properties of Bronze Containing Micro-Sized Sulfide

Y. Hirai, K. Ogawa, T. Sato and H. Usami

246

Gloss Evaluation of Hairline-Finished Metal Surface Using Patterned Area Illumination

Method: Relationship between Gloss Evaluation and Surface Roughness for the Estimation of Surface Roughness

T. Sugino, Y. Tashiro and Y. Yamane

251

Stress Analysis for a Substrate Holder Module and Thin Films Grown in an MOCVD

Reactor

S.W. Guo and C.K. Lin

257
