ISBN(softcover): 978-3-03785-099-2 ISBN(eBook): 978-3-03813-530-2

Table of Contents

Preface, Organizing and Committees

Chapter 1: Material Engineering and Mechanical Engineering

Study on the Swelling and Deswelling of the PH / Thermosensitive Hydrogel
X.F. Zhu, W. Zhou, H.X. Zhang and Y.J. Nie 1

The Corrosion Performance of a Binary Cu-Ni Alloy Used as an Anode for Aluminum Electrolysis
J. Lu and Z. Xia 7

Techno-Economic Analysis of Magnetic Treatment of Cobalt Concentrate
J. Wang and J. Lu 11

Analysis of Basic Oxygen Furnace's Temperature by the Flame's Emission Spectrum
L.F. Xu, W.S. Li, S.X. Xu, J. Li and Y.Q. Wang 16

Plasticity Model of Extruded Peanuts under Mechanical Pressing
X. Zheng, Y.X. Zhang, G.X. Lin and Z.X. Sun 20

Development of Web-Based Partner Alliance Management Platform
Y.M. Wang, F. Han and J.Z. Yu 26

A New Reduced-Reference Image Quality Assessment Method Based on SSIM
L.F. Huang, X.N. Cui, J.A. Lin and Z.Y. Shi 31

Total Object Unified Model Driven Architecture Method for Manufacturing Information Management
S.M. Zhang 37

Numerical Simulation of Welding Residual Stress and its Creep Strain for Cr5Mo Steel Welded Joint
L. Cheng, Z.N. Chen and J. Gao 41

Engineering Graphic Transition in Third-Angle and First-Angle Projection
C.J. Yang 47

Development and Application of Tandem LC-MS Method for the Determination of Paralytic Shellfish Poisoning Toxins for Pollution Monitoring
X.L. Zhang, B. Feng, Y.Q. Cai and H.J. Yu 51

Additives on Hydrogen Donor Catalytic Upgrading for Viscosity Reduction of Heavy Oil under the Conditions of Steam Injection
F.J. Zhao, Y.J. Liu, B. Zhang, S. Ha and S.P. Li 57

Design of Digital Display Control Devise System for Concrete Mixer Truck
Y.L. Chen, Y.Y. Du, Z.H. Jia and W. Zhao 63

Design for Digital Display Device and the Function of Control of Concrete Truck-Mixer Drum
Y.L. Chen, Y.Y. Du, Z.H. Jia and W. Zhao 68

Fuzzy Controller in the Application for Anti-Surge of the Axial-Flow Compressor
W. Zhao, W.J. Huang, Y.L. Chen and J.X. Niu 73

Face Image Segmentation Using Color Information and Saliency Map
H.M. Huang, H.S. Liu and G.P. Liu 77

Fabrication and Oxidation Resistance Property of SiC Coatings on Surface of Graphite by Chemical Liquid Deposition
Y.H. Zhu, H.R. Geng and G.L. Chen 82

A New Architecture for Large Data Warehouse
G. Li, X.S. Qian and C.M. Ye 87

Compressed Iterative Particle Filter for Target Tracking
H.B. Zhu, H. Zhao, D. Liu and C.H. Song 91

An Implementation and Improvement of Fast Two-Dimensional Median Filtering
G.T. Wang, R.H. Wang, F. Wang and W.J. Liu 95

Extension of Von Neumann Model of National Economic System
Y.H. Li and X. Li 101

Testing Methods for Rock-Embedded Foundation Pile in Karst Area
X.G. Zhang, L.Y. Huang, Y. Wang and J.Q. Wang 105

Study on Effect of Vibration Parameters in Filling Process of the Dynamic Injection Molding
X.Y. Wang and X.C. Wang 109

Remote Sensing Image Segmentation Based on Human Visual System Region-Split and Graph Cut
H. Jiang and J. Wen 115

Application Research of Mobile Agent Technology Based on Windows Platform
L. Yang, J. Zhang and H.D. Liao 119

Discrete Element Simulation of Composite Geomaterial Talus Deposit Based on Digital Image Technology
A.Q. Xu, W.Y. Xu, C. Shi and Z.H. Xia 125

A New and High-Accuracy People Counting Algorithm
T. Hu, H.J. Luo, T. Wang and L. Zhu 132

Research on Preparation of High Purity $(C_2F_5COO)_3Nd(phen)$ and the Fluorescence Properties of its Solution in DMSO-d6
Y.Q. Hua, J.P. Zhou, Y.X. Ye and H.F. Sun 138

Study on Bonding Capacity of Modified Glued Structural Lumber for Bridge Deck Based on China Southern Plantation
J.H. Li, X.Y. Zhou, Z.F. Zhang, Z.F. Wang and W.X. Peng 142

Analysis on Health Risk of Volatiles of *Pinus massoniana* Biomass by TD-GC-MS
W.X. Peng, Q. Xue, F.J. Wu, X. Zhang and Z.F. Zhang 147

Study on Heat Release Behavior of Pinus Biomass by TD-GC-MS
Z.F. Zhang, L.S. Wang, Q.Z. Ma and W.X. Peng 152

Analysis on Function Components and Biohealth Function of *Pinus massoniana* Lamb Biomass
Z.F. Zhang, M.L. Zhang, F.J. Wu and W.X. Peng 157

Study on Biomedical Prospects of Extractives of *Pinus massoniana* Lamb
D.Q. Zhang, Q.Z. Ma, Q.M. Liu, W.X. Peng, H.Y. Zhang, K. Peng, Z.J. Gu and M.H. Yang 161

Assessment on Environmental Friendly Characteristics of Pinus Biomass for Building Materials
X. Zhang and R.Q. Zhang 166

Analysis on Biohealth Function of Dried Pinus Biomass by TD-GC-MS
Y. Pang and Z.W. Wang 170

Approximation Theory on the Electromagnetic Fields in Metal Cavity
L.N. Wu, J.F. Xu, L.Z. Jiang and Y. Zhou 175

A Computer Simulation on Human Injury during the Aircrew/Seat Through-the-Canopy-Ejection
Z.Q. Li, X.H. Yao and L.M. Zhao 179

Tensile Behavior and Fractography of Ti-TiAl Multi-Layered Foil Prepared by Electron Beam Physical Vapor Deposition Technology
Z.H. Hu, Y. Li, L. Ma and H.J. Liu 183

The Electrostatic Tangential Resistance of the MEMS Moving Plate Considering the Edge Effects
X.J. Shen, W.J. Qi and X.Y. Chen 188

Numerical Simulation and Experimental Study of Static Driven Short Piles in the Dualistic Structure Stratum
X.G. Zhang, X.G. Kong and Z. Song 193

BP Neural Network Fitting for Spectra of Blast Furnace Raceway
B. Yang, N. Li, L. Lei and X. Wang 197

Finite-Time Chaos Control of the Chaotic Financial System Based on Control Lyapunov Function
Y.L. Wang, J.H. Ma and Y.H. Xu 203

Application of Nonparametric Kernel Density Estimation in Hongkong Stock Market
Y.L. Wang and J. Wang 209

Numerical Investigation on Thermal Environment inside the Passenger Compartment of a Highway Sleeper Coach
X.L. Xie and F.L. Shen 215

Effects of Exterior Window on Temperature Distribution and Thermal Comfort of Commercial Buildings with Radiant Floor Heating System
W. Cai, Z.H. Wu and J.M. Li 219

Transient Responses of Second-Order System
G.F. Guo, S.X. Wu and D. Cao 224

Determination and Distribution of Heavy Metals in the Municipal Waste Incinerator Slags from Guangdong Province
J.Y. Liu, S.Y. Sun, R.X. Zhang and S. Zhong 229

ARM7-Based File System Design
Z.Y. Zhang and J.Y. Li 233

The Distinguishing Method of Internal and External Defects Based on Double Liftoff MFL Signals of Oil Well Pipes
W.J. Ding, Y.H. Kang, Y.H. Sun and J.Z. Li 239

Spectra Modeling of Blast Furnace Raceway by Neural Network
B. Yang, N. Li, X. Wang and L. Lei 245

A Study on Tensile Deformation Features of Ni-Based Super-Alloy Prepared by EB-PVD
L. Ma, T. Zhang, X. Li and Z.H. Hu 251

Tensile Creep Damage and Rupture of Al_2O_3-SiO_2(sf)/AZ91 Composite
J. Tian and S.Y. Zhong 257

Integrating RE/RP for Rapid Product Development Based on Haptic Modeling
S.Y. Cheng, J.H. Liu and X.W. Zhang 262

Effects of Global Climate Change on Water Resources in Rwanda: Lake Kivu Case Study
G. Habiyaremye, J.W. Ge, J.d.l.P. Mupenzi, W.O. Balogun and S.A. Jerop 268

Complex Angle Measuring Method of Passive-Radar-Seeker
C.N. Zhao, C.D. Shi, Y. Zhao and Y. Liu 272

A Measurement of Vehicle Attitude Using Single Tri-Axial Acceleration Transducer Based on ANN
L.M. Wu, L.K. Zhang and Y. Wang 276

The Variation Coefficient Method for Reliability Sensitivity Analysis of Cylindrical Helical Spring
F.C. Liu and L. Geng 285

Use of Municipal Sludge with Soil on Marigold Flower Growth in Pot Experiments: Case Study of Vientiane City, Lao P.D.R
K. Thammathevo, J.G. Bao, J.d.l.P. Mupenzi and B. Singsuaisagna 291

Heterogeneity of Suppliers and Knowledge Transfer in the Supply Chain
Y. Lin and Y. Chen 296

The Effect of Interphase Modulus and Thickness on Stress Transfer of Short-Fiber-Reinforced Composites
B. Zhang and B.Q. Gu 303

Removal of Cu^{2+} in Aqueous Solutions Using Sludge Incineration Slag as an Adsorbent
J.Y. Liu, S.Y. Sun, R.X. Zhang, S. Zhong and M.T. Chen 308

The Synthesis of High Yield Diglycerin Borate
Q. Wang, G. Zheng, J.J. Ai and X.J. Wei 312

Research on the Creation of the Platform Environments for Network Analog Based on FHMIPv6 of NS2
K. Zhang, H.F. Wang, Y.C. Ma and Z. Li 317

Precision Analysis and Discussion on Marker Identification Method
H.W. Wang, H.W. Ji, H. Miao and W.Q. Shao 322

Study on the Cutting Force in Ultrasonic Elliptical Vibration Cutting of Hardened Stainless Steel
C.M. Zhang, C. Li and D.Y. Zhang 327

Aircraft Cable Fault Location Based on Detection Model
X.L. Liu and Z.Q. Li 332

A Methodology of Data Translation for Collaborative Design
J.M. Hou, D.X. Yang and W.S. Wang 337

Effect of Blade Numbers on Pressure Drop of Axial Cyclone Separators by CFD
Y.G. Luan and H.O. Sun 343

Effect of Pressure on Microstructure and Properties of High Silicon Electrical Steel by EB-PVD
X. Li, B.Y. Lou, H.P. Wu, X.D. He and Y. Sun 348

Phase Composition and Magnetic Structure of High Silicon Electrical Steel by EB-PVD
X. Li, B.Y. Lou, X.D. He and L. Ma 352

Assignment Problem Based on Improved Ant Colony Algorithm
Z. Gao and G.J. Zhang 356

Research on Materialized View Selection in the Data Warehouse
L.J. Zhou, H.J. Geng and M.S. Xu 361

Blind Source Separation of Convolutive Mixtures by Using Time-Delayed Statistics and Exact Diagonalization
J. Yang and Z.L. Wang 367

The Dependence of Corrosion Resistance of Ni-Cr-Mo-Cu Alloy to NaOH Solution on 4Cr/ (2Mo+Cu)
L.H. Pan and R.C. Yang 374

Researched on the Corrosion Resistance of Ni-Cr-Mo-Cu Alloy to Aqueous Change with the APF in Regular Way: an Approach of Quantum Electrochemistry
L.H. Pan and R.C. Yang 378

Design of a Dc Motor Soft Start Based on AVR Microcontroller
L.X. Zhang, D.L. Luo, L.J. Su, D. Cao and Z.F. Luo 382

Study on the Modified Effect of Wood Fiber by Silane Coupling Agent
X.G. Li, X. Zheng and Y.Q. Wu 388

Study on Properties of Recycled Fiber from Waste Newspaper / PLA Composites
H. Li, Z. Tong, F. Cheng and X.G. Li 392

Loads Transfer in the Adhesively Bonded Patch
S.C. Her and C.H. Sun 397

Development of Visual Attention Measurement System of Simulated Traffic Environment
R.T. Xia, J. Fan, B.S. Zhan and S. Doi 401

End Effect Processing for Empirical Mode Decomposition Using Fuzzy Inductive Reasoning
Y. Yuan, Z.K. Yang and Q.F. Li 407

The Preparation of $CaMgSi_2O_6$: Eu^{3+},Li^{+} Red Phosphor
R.Q. Wang 413

Research on the Analysis Method of Magnetic Field in the Axial Magnetic Drive Mechanism
S.Q. Mei, Q. Xu, Z.M. Zhang and Q.S. Liu 418

Analysis of Urban Environment: Case Study of the Spatial Integration of Rwandan Cities
J.d.l.P. Mupenzi, J.W. Ge, L.H. Li and G. Habiyaremye 424

Dielectric Tunability in Ferromagnetic-Ferroelectric Composite System
Y. Zhou, Y.X. Ye, L.N. Wu and S.J. Yu 428

Modeling Wood Density of Larch by Near-Infrared Spectrometry and Support Vector Machine
Y.Z. Zhang, Y.X. Li, H.F. Zhang, H.J. Zhang and P. Li 433

Design of a New Vacuum Cleaner
L.Z. Chen and L.S. Gao 439

Mechanical Properties of UP Resin from Soybean Oil
J. Li, Y. Qin and L. Zhao 443

Preparing of SMC Artificial Marble and its Mechanical Properties
J. Li, Z.Q. Huang and Y. Qin 447

Quality Inspection and Analysis of Workpiece Surface in A3 Steel Machining
Q.Y. Zeng, K. Wu, X.F. Zheng and M. Zhu 451

Preparation and Structure of Chitosan Swellable in Alkali Solution by Ultrasonic Treatment
M. Fan, Q.L. Hu and J. Xie 456

Residual Stress Modeling and Simulating for the Panel with Interference-Fit Riveting
D.G. Yang, K.F. Zhang, Y. Li, H. Cheng and B.F. Liu 461

Edge Detection of Inner Crack Defects Based on Improved Sobel Operator and Clustering Algorithm
K.F. Wang 467

DFT-Based on Mahalanobis Distance Discriminant Analysis Method Channel Estimation Algorithm for OFDM Systems
T.L. Fan, M.J. Deng and H.C. Huang 472

Texture Baking Techniques on Construction of Virtual Reality Interactive Scenes
Q.H. He, Y. Zhai and X.W. Li 478

Explore on the Feasibility of RFID Technology in Library
P. Liu 484

Research on Dynamic Wear of Revolution Joint with Clearance for Mechanical System
Z.F. Bai and Y. Zhao 488

Manufacture of Micro Gear Shaft Based on Micro Hobbing Technology
W.T. Shi, Y.D. Liu, Y. Ding and B.A. Han 494

Topology Optimization Design of Implantable Energy Harvesting Device
B. Zheng and L.P. Luo 498

Privacy Protection in Cloud Storage
J.H. Zhang, N. Zhang and C.C. Fu 504

Investigation of Shear and Thermal Characteristics of Polishing Interface in Soft Pad Polishing Process
H.J. Tsai, P.Y. Huang, M.Y. Tsai, H.C. Tsai and C.J. Lin 508

Research of a Novel Bi-Directional Flexible Load for Electric Vehicle Test Bench
J. Liu and L.F. Wang 512

Research of a Full-State Fuel Cell Power Electronic Simulator
J. Liu and L.F. Wang 517

Obstacle Avoidance System Based on Single Rotary Ultrasonic Sensor
G.Z. Cui, W.J. Wei and J.C. Guo 521

Displacement Back Analysis Based on Differential Evolution Algorithm in Metro Station Engineering
A.N. Jiang and J.X. Wang 527

An Electronical Cereals Weight Measure System Using Vibrating Wire Pressure Sensors
Z.H. Yan, Y. Liu, H.Y. Li and Q.S. Li 533

An Road Obstacle Detection Method Based on Monocular Measurement
H.J. Jin, S. Lin and S.G. Luo 539

Vibration of Diatomic System in One-Dimensional Nanomaterials
J. Lu 545

A Study of Three Dimensional Modeling Technology on Food Twin-Screw Extruder
C.F. Zhao, J.J. Lin and L.X. Zhu 550

On the Topology Design of Integrated Wireless Networks
X. Yan and J.G. Du 555

Healthcare Information System and Data Mining
N.W. Kuo 561

Study on Pine Wilt Disease and its Control Situation
H. Li, G.Y. Zhou, J.N. Liu and H.Y. Zhang 567

The Analysis and Comparison of the Technology Performance about Rapid Layered Switching Mobile IPv6 Protocol
K. Zhang, H.F. Wang, Z. Li and Y.C. Ma 573

The Improvement Method Design for β-SiC Recrystallization
B.Q. He, W.T. Chen and Y. Zheng 578

Examine Applicability of the RANS and LES Method on Numerical Simulation of Centrifugal Pump
S.J. Zhang, Y.P. Tong and L. Hu 582

System Modeling and Analysis for Injection Molding Machine Take-Out Manipulator
C.W. Bu 587

A Kind of Load Balance Multicast Routing Algorithm Based on Distributed Computation and Centralized Control
X. Chen, J.Y. Tang and Y. Zhang 591

Fault Diagnosis Research of TWERD Frequency Converter Based on Wavelet Transform
X.S. Wang, H.Q. Zhang and T.M. Zhang 596

Research on Policy-Based Service-Oriented Computing Security
Y.S. Zhang, Q. Luo, X.W. Nie and X.D. Bi 602

Research on the Business Model and Protocol of Offline Digital Coupon Based on RSA Digital Signature
H.Y. Meng and Y.H. Feng 608

Network Communication System Based on AT91SAM92 Hardware Design
D.Y. Luo and Y.M. Zhang 614

A Preliminary Research on Operation Mode of Condensing Heat Recovery Hot Water Supply System for Water-Cooled Chillers
W. Cai, X.M. Du and Z.H. Wu 618

Complex Modifier on Microstructure in Mg_2Si/Al-Si Composite
Z. Liu, X.M. Liu and M. Xie 624

Optimization Design of Electromagnetic Conductance Sensor for the Water Content of Crude Oil inside Pipeline
L. Chang, Q.H. Xu and B.W. Liu 628

Study on Dynamic Balance in Main Driving Mechanism of Cold Rolling Mill Based on the Particle Swarm Optimization Algorithm
W.X. Tang, J.J. Sun and B. Wang 633

Uncertain Newsboy Model
S.B. Ding 639

Research on Automobile Suppliers Evaluation Based on Statistical Analysis
H.T. Su, H.Q. Guo and X.W. Ma 643

Netted Radar System Design with Spread Spectrum Technology
L.Q. Fu, L.S. Yang, T. Wang and Q.L. Zhang 648

Design of Robot Master-Slave Control System Based on LabVIEW
Y.F. Zhang, X. Xiao, J.L. Gong and X.T. Wei 654

Defects Inspection of Steel Ball Based on Optical Fiber Sensing Technique
G.P. Li, Y.K. Zhang, C.S. Ai and Y.Z. Ma 658

Finite Element Analysis of Drum on the New Type Self-Driven Towing Machine for Cable
J.N. Nie, H. Wang and D.F. Xie 664

Modeling Methodology Based on Stacked Neural Networks for Inferential Prediction of Polypropylene Melt Index
L.Y. Xia, H.T. Pan, M.F. Zhou, Y.J. Cai and X.F. Sun 670

Simulation of Temperature Induced Colorimetric Shift of YAG:$Ce_{0.06}$,GD_x Phosphor
T. Ji, X.S. Zhang and Q. Xi 675

Special Scattering Characteristics of Materials Oriented Method of Polarization Analysis
S.X. Xu, L.F. Xu and Y.R. Chen 680

A Landing Gear Drop Dynamic Simulation Based on the LMS. Virtual. Lab
L. Zhang and C.J. Xue 684

Meshed Chaos Mapping-Based Newton Iteration Method of Mechanism Synthesis
X.Y. Che, Q.Y. Liu, Y.X. Luo and B. Zeng 688

CFD Simulation for Displacement Deep-Vee Vessels on Resistance Influence Factor
Y. Xie and X.D. Xia 692

A Method to Determine Unstable Point and its Impact Estimation in Debris-Blocking Dam Monitoringsurvey Network
D.B. Huang, Z.Q. Yang and Z. Shi 698

The Research on Model Updating Technology of Complex Multibody System Virtual Prototyping
B. Han, G. Liu and H.W. Wang 704

Research on Relationship between Industrial Structure and Economic Growth: Evidence from Henan Province in China
S.H. Liu and W.W. Li 709

Chapter 2: Manufacturing and Production Processes

Analysis on Technology Input Structure Based on Grey Theory: Evidence from China
S.H. Liu and W.W. Li 713

Design of Fiber-Optic MEMS Acoustic Sensor System for Gunship Acoustic Detecting
B.L. Jiang, K.T. Yang, J.G. Wang and Y.M. Wu 719

Object Petri Nets Based Monitoring for the Aircraft Assembly System in MES
F. Wu and L. Zhang 723

Product Life Cycle Energy Consumption Analysis Method Considering Remanufacturing
T. Liu, H.H. Huang, Z.F. Liu and G.F. Liu 729

Research on Public Hospital Reform and Medical Staff Incentive Mechanism in China
X.Q. Xie and X.H. Su 737

Joint Network Traffic Forecast with ARIMA Models and Chaotic Models Based on Wavelet Analysis
M.K. Dong, C. Chen, M.H. Huang and Y. Jin 743

Motor Bearing Fault Diagnosis Based on MSICA-LSSVM
Z.H. Li, H.F. Mao, J.G. Cui and Y. Zhang 747

Synthesis and Characterization of Methyl-Orange/Layered Double Hydroxide (LDH) Nanocomposite
J.Q. Liu, X.Q. Fu, J.Y. Song, Y.X. Fu and W.G. Hou 753

Flaw Sizing Detection by Pulse-Echo Ultrasonic Technique
S.C. Her and M.C. Chang 758

Using Artificial Neural Network to Filter Spam for Chinese Mail
S.M. Pi, H.L. Liao, S.H. Liu and D.K. Liu 762

An Analysis of Verb Phase Based on Concept Model for Nature Language Understanding
Y.T. Li, K. Zhao, Z.Z. Yi and P.T. Cheng 767

Evaluation of Physical Property of Plasma-Sprayed Coating Based on Ultrasonic Testing
X.G. Wang and Y.Z. Wang 773

The Research of Steer by Wire System Based on Fuzzy Logic Control
S.F. Geng, Q.F. Peng and L.F. Wang 780

Discussion and Suggestion for the Design of Slope Anchor Bolt
X.G. Kong, X.G. Zhang and Y. Wang 785

Research on Nitrogen Removal Performance of Leachate Treatment of WSIP Reactor
X.J. Duan, Q. He and Y.L. Liu 789

Model and Control of Nitrogen Releasing of Lakes' Sediment
Y.L. Liu and X.J. Duan 796

The Application Research of Amplitude Spectrum in the Coating Layer Thickness Detection
J.T. Zhang and B.B. Peng 802

Modeling the Loading-Rate Dependency of the Hysteretic Dynamics of Magnetorheological Dampers
C. Zhang and L.X. Wang 807

A Control System Based on the Fuzzy Self-Tuning PID Controller for Three-Phase Rectifier
G.G. Zhang and W. Jiang 813

Influence of Ball Milling Parameters on Preparation of $Ti_{50}Cu_{23}Ni_{20}Sn_7$ Amorphous Alloys Powder
G. Wang, Q. Li, Y. Gao, J.N. Gao, Y.Y. Zhu and Z.G. Chao 819

Kinematic Analysis of Power Drive Transmission System of High-Performance Four-Wheel Off-Road Vehicles
A.H. Ren, C.Q. Sun and Y.D. Liu 825

Effects of Al-5Ti-B-2RE on the Microstructures and Mechanical Properties of Al-10Mg Alloy
J.Q. Li, J.L. Chen, X. Li and X.L. Ma 828

Effect of Dressing Load and Speed on Removal Rate in the Chemical Mechanical Polishing Process
M.Y. Tsai, W.K. Chen and H.J. Tsai 832

Measure Method on Reaction Time of Visual Attention Using a New-Style Mechatronic Measurement System
R.T. Xia, J. Fan and B.S. Zhan 838

Web Service Composition Algorithm
Y.J. Song, L. Liu and D. Yang 843

Copula-Based Security Assessment of Power Insulators Influenced by the Storm
Z.K. Wang, J. Yi, M.Y. Lai and B.P. Liu 849

The Optimization Design Study of Selective Laser Sintering Process Parameters on the Pro-Coated Sand Mold
R. Cheng, X.Y. Wu and J.P. Zheng 853

Research on Improved Genetic Algorithm for Heterogeneous Open Vehicle Routing Problem
C.Y. Ren 859

An Improved Fast Algorithm for Solving Toeplitz Systems in Mechanical Control
L.C. Tian and H.K. Li 863

Modeling and Analysis of a Humanoid Robot Active Stereo Vision Platform
Q.J. Du, X.Y. Zhang and X.G. Huang 868

Research on Comprehensive Control of Vibration Isolation System with Flexible Foundation
D.Z. Feng, F. Zhou, Z.M. Zhang and H.G. Liu 872

Motion Control System Design of a Humanoid Robot Based on Stereo Vision
Q.J. Du, C. Sun and X.G. Huang 877

Development of Ceramic Moulds with Zirconia Primary Coat for Investment Casting of Gamma Titanium Aluminide Based Alloys
Y.F. Chen, S.L. Xiao, J. Tian, L.J. Xu and Y.Y. Chen 881

Microstructure and Characteristics of Ti-Nb-Sn-HA Composite Powder Fabricated by Mechanical Alloying
X.P. Wang, S.L. Xiao, Y.Y. Chen, Z.G. Liu and K.D. Woo 886

Numerical Study for Centrifugal Fan Based on Parametric Method
L. Zhang, S.L. Wang, D.F. Wu and Q. Zhang 892

Modeling and Simulation of Enterprise Alliance Running Status Based on System Dynamics
X. Zhang 898

Reform and Innovation of Practice Teaching during Water Pollution Control Engineering Course
J. Lu, Z.J. Zhang, J.F. Pan and Y.F. Ma 904

Probabilistic Analysis of One-Dimensional Consolidation with Monte Carlo Simulations
X.Y. Li and L.Q. Hu 907

Quasicrystal $Al_{63}Cu_{25}Fe_{12}$ Melting Nearby Resistivity and Viscosity Properties Research
H.O. Qin, H.R. Geng and Z.Y. Li 913

Thermal and Structural Analysis of Asphaltine in Heavy Oil before and after the Hydrogen Donor Catalytic Reaction of Upgrading and Viscosity Reduction under the Effect of Auxiliary Agents
F.J. Zhao, Y.J. Liu, X.Y. Qi, H. Wang and J. Zhao 918

Tolerance Sensitivity Robust Design and Evaluation Method
J. Mao and Y.L. Cao 924

Key Technologies and Development of Micro-Nano Positioning Platform with Large Travel
Y.F. Zhang, G.X. Hu, J.L. Gong and X.T. Wei 929

Stability of the Jeffcott Rotor with Local Rubbing
H. Li, X.Z. Chen and B.C. Wen 933

Research about Implementation Strategies in JMI System of Third-Party Logistics Enterprise
Y.Y. Gu and G.X. Wu 937

Vibration Transient Response Using Statistical Energy Analysis
H. Li, Q.F. Liu and B.C. Wen 941

The Improved PSO Arithmetic for Identifying Ground Stress Based on Rock Core Discing Observation
A.N. Jiang, Z.W. Zeng and J.X. Wang 945

Covalent Bond Cluster Effects and Phase Transitions in Superconductor $Mg_{1-x}Al_xB_2$ Compounds
Y. Bao, Y. Zhao and N. Zhu 950

Relational Similarity Measure: An Approach Combining Wikipedia and WordNet
Y.J. Cao, Z. Lu and S.M. Cai 955

Process Optimization for the Side-Plate of the Core Part in Parallel Flow Evaporator
M.J. Liu, Z.Y. Zhao and B. Liu 961

Operating Parameters' Influence on the Specific Volume of Extrusion Puffed Food
C.W. Bu 966

A Method of Audio Digital Watermark Based on Discrete Wavelet Transform and Quantization Index Modulation
P.L. He and T.S. Fan 970

Screening on Three High Efficient Antagonistic Fungi of *Colletotrichum gloeosporioides*
J.N. Liu, J.H. Zhou, L. Yang and G.Y. Zhou 975

Model of DOS near the Top of Valence Band in Strained $Si_{1-x}Ge_x$/(001)Si
J.J. Song, H.S. Shan, H.M. Zhang, H.Y. Hu, G.Y. Wang, J.L. Ma and X.B. Xu 979

Adiabatic Shear Localization in High Speed Cutting of Hardened Steel
C.Z. Duan, W.S. Kong, Z.X. Wang and M.J. Wang 983

Appliance on Evaluation of Type Selection for Agricultural Machinery Based on Grey Relational Analysis Method
Y. Xie and M. Li 988

Simplified Output Feedback Stabilization for Interconnected Systems Based on Dynamic Surface Control
T. Guo 992

Vibration Characteristics Simulation and Experimental Study of Super-Heavy Vibrating Shaker
S. Chen and S. Guo 998

Web Data Extraction with Hierarchical Clustering and Rich Features
Y.Q. Dong, X.J. Zhao and G.J. Zhang 1003

Planar Four-Linkage Guide Mechanism Synthesis Based on Mechanical Chaos System Methods
X.Y. Che, Z.M. He, Y.X. Luo and Q.Y. Liu 1009

Chaos Nested Intervals Method to Solve Nonlinear Equations and Planar Crank-Slide Mechanism Synthesis
X.Y. Che, Z.M. He, Q.Y. Liu and Y.X. Luo 1013

A CRF Based Model for Learning High Level Behaviors of the Elders in Household Environment
X.S. Li and L.F. Kong 1017

Microstructure and Mechanical Properties of Al-7%Si Matrix Composites Reinforced by $Al_{63}Cu_{25}Fe_{12}$ Icosahedral Quasicrystal Particles
Z.Y. Li, H.R. Geng and H.O. Qin 1022

Extraction Feature of Motor Unbalance and Interference of Alternating Current Based on the Wavelet Transform
D.J. Chen, J.W. Fan and F.H. Zhang 1028

The Application of Grillage Method in Analyzing Box Girder Structure
L.Y. Yi 1034

Aeroelasticity Simulation of the Large-Span Basket Handle Tied-Arch Bridge
L.Y. Yi 1040

Kinematics and Dynamics Analysis of an Innervation Seat Based on ADAMS
Y.T. Li, Q.Q. Pan, J. Li and C. Xu 1047

Probabilistic State Estimation Based Scheduling Approach for Cloud Computing
G.D. Zheng and M. Chen 1053

Application of Cluster Algorithm in Clothes Shape Classifying
X.G. Wang, X.Z. Li and Y. Li 1058

Effect of Hydrogen in rf Plasma Nitriding on Al-6wt%Cu Alloy
J. Pongsopa, P. Visuttpitukul and B. Paosawatyanyong 1063

Research on Construction Method and Measure for Informatization Surveying and Mapping Service System
D.B. Huang, Z.Q. Yang and H.R. Li 1067

A Pattern Making System Based on Clothes Databases
X.G. Wang, X.Z. Li and Y. Li 1073

A Novel Modeling Method Based on Telmat Laser Scanning System
X.G. Wang, X.Z. Li and Y. Li 1079

Automated Trust Negotiation for Web Services
X.G. Peng, Y.R. Feng and M. Li 1085

The Garment Fashionable Shape Prognosticating Based on Manufacture Database
X.G. Wang, X.Z. Li and Y. Li 1091

The Integrated Safety Management of the Multi-Exits of the Campus Network
C.B. Yang, P. Lin and L.F. Chen 1097

Finite Element Analysis for the Chassis of Dynamic Compaction Machine
G.M. Si, H. Sun, Q.L. Zhang and L.L. Duan 1101

Dynamic Response of Out-Plane Line Loads by a Shallow-Embedded Circular Lining Structure
M.S. Gao and Z.G. Chen 1107

Analysis on the Application of GPS in Hull Installment and Marine Monitoring
Y.F. Zhu, X.L. Ding, Z.W. Li and S.J. Zhou 1111

A Study of Metameric Blacks for the Representation of Spectral Images
Q. Chen, L.J. Wang and S. Westland 1116

Research of Electric Wheelchair Control System Based on DSP
L.J. Hu, Q.H. Geng, H. Song and G.X. Chen 1122

Design and Realization of Wireless Sensor Network Gateway Based on ARM
H.J. He, Z.Q. Yue and X.J. Wang 1127

Investigation on the Co-Combustion Characteristics of Pulverized Coal and Paper Mill Sludge
N. Zhang, X.N. Ning, J.B. Zhou, P.T. Wei and H.J. Luo 1132

Effect of Combined Shot Peening on Fatigue Limit of TC4 which Have Different Microstructure
A.L. Wen, S.W. Wang, R.M. Ren and X.X. Yan 1138

Study on Surface Heat Transfer Coefficient of Mixture of Nitrogen-Spray Water Eject Quenching under Normal Pressure and High Velocity
B.D. Shao, H.M. Cheng, J.Y. Li, Z.L. Li, L.J. Hou, J. Hou, L.F. Wang, D.F. Ding and C. Tian 1142

Flashover Pattern Recognition by HMM Based on Fractal Characteristics of Leakage Current on HV Insulators
A. Hui 1148

Thermal Conductivity of Silicon Thin Films Predicted by Molecular Dynamics Simulations and Theoretical Calculation
X.L. Zhang and Z.W. Sun 1152

Chaos Control of Vehicle Nonlinear Suspension System with Multi-Frequency Excitations by Nonlinear Feedback
J.Y. Wang, H.T. Wang and L.M. Zheng 1156

Effect of La_2O_3 and CeO_2 on Morphology of Graphite in Cast Iron
S.M. Zhang and Z.D. Wang 1162

Model Optimization and Stability of Hemoglobin Analysis in Human Soluble Blood Samples by FTIR/ATR Spectroscopy
T. Pan, A.H. Peng and W.J. Huang 1168

Study of the Bit Key Technology in the Airborne Measurement and Control System
L.M. Fan, P. Wu and X.L. Zhang 1172

Research on the Multi-Disciplinary Optimization Design Technology for the ETO Product
M.F. Zhu, S.H. Su, Y.P. Gong and G.J. Chen 1177

Research on the Cooperative CAPP Modularity Technique Supporting the ETO Product
M.F. Zhu, S.H. Su, Y.P. Gong and G.J. Chen 1183

The Auto-Adaptive Digital Watermark Algorithm Based on Wavelet Transformation and FCM Algorithm
J.M. Zhou, Z. Zhang and H.T. Wang 1189

Adaptive Tracking Control of Wheeled Mobile Robots
M. Zuo, G.P. Zeng and X.Y. Tu 1195

Application of Fiber Point Diffraction in Measurement of Optical Surface
L. Nie, J. Han and X. Jiang 1200

Nondestructive Testing of Blockboard Using Combination of Wavelet Transform and Gray-Scale Mathematical Morphology
N.X. Yang and D.W. Qi 1206

Edge Detection of Color Image Using Unit-Linking PCNN
X.C. Wang, M. Cheng, Y.M. Liu and Y.H. Peng 1211

Elevator Group Control System Based on Fuzzy Single-Chip Computer
D.Y. Gu and D.M. Yan 1218

FEM Simulation Analysis of a New-Style Slick Pole Self-Lock Up-Down Setting
Z.H. Yan and D.Y. Yang 1223

Matching of Bag's Images Based on Straight Line Feature Control
G.P. Li, H.G. Liu and C.C. Li 1227

Effect of Fly Ash on Mechanical Properties and Structure of CaO-Al_2O_3-P_2O_5-SiO_2 System
X.S. Tian, S.G. Mei and S.X. Ren 1233

Network Community Detection Based on Co-Neighbor Modularity Matrix with Spectral Clustering
J. Liu and L. Li 1237

Improving Anti-Distortion Performance of Joint Transform Correlator
L. Nie, C.L. Duan and X. Jiang 1242

Comparative Study on Bearing Performance between Y-Section Pile and Conventional Pile
X.Q. Wang, J.S. Wei and Y.H. Chen 1247

Charging-Discharging Control with MPPT for Photovoltaic System
X. Gao 1253

Supply Chain of Concrete Producing Enterprise Based on Soft-Man Technology
X.W. Wu 1258

Feature Model Design Using Dynamic Feature Semantic Network
Y.T. Hao and S.Z. Peng 1263

ANN-Based Feature Recognition to Integrate CAD and CAM
Y.T. Hao and Y.M. Chi 1269

Fundamental Experimental Study on Numerical-Control Electrochemical Finish Machining for Integral Impeller Blade
J.M. Wu and J.W. Xu 1275

Compression Behavior of a Self-Healing Fibre Reinforced Epoxy Composite
J. Lee, D. Bhattacharyya, M.Q. Zhang, Y.W. Mai and Y.C. Yuan 1281

The Research of Engine Modeling Based on the Petri Model of Behavior Flow
Y.T. Hao and T. Tang 1287

A Study of Real Time Security Monitoring of Commercial Vehicles Using a Microscopic Traffic Simulation Model
H. Wang, R. Cheu and D.H. Lee 1293

Experimental Investigation into the Static Cushioning Properties of Rhombic Honeycomb Paperboard
Y. Xie and L.R. Yan 1299

Study of Complex Network Optimization in Wireless Sensor Networks
Z. Yao and Z.H. Wang 1305

Research on Rotating Machinery Fault Diagnosis System
Z. Yao and Z.H. Wang 1310

Accident Reconstruction of Lifting Crane Based on FEA
M.L. Yang, G.N. Xu and Z.Y. Chang 1315

Research on Optimization Algorithm for MFJSSP
L. Li, K.Q. Wang and Q. Yue 1318

The Application of the Improved Verhulst Model in Mid-Long Term Load Forecasting
W.Q. Zhao, F. Wang and D.X. Niu 1322

Chaotic Dynamics of Fractional-Order Liu System
X. Gao 1327

Polypyrrole Nanofilm with Improved Conductivity
B. Paosawatyanyong, K. Tapaneeyakorn, D. Lapsongphol and W. Bhanthumnavin 1332

Etching Effect of SF_6 Plasma on Cotton Fiber
K. Kamlangkla, S.K. Hodak and B. Paosawatyanyong 1336

The Existence of Fixed Point for a Generalized 3x+1 Function
S. Liu, X.J. Che and Z.X. Wang 1341

Research on Improving LFMCW Radar Level Measurement Accuracy
X.M. Yu and X.K. Yu 1346

Research on Design Method of Electromechanical Product Form Based on MA-GA
X.A. Yang, G.L. Sun, H. Chen, X.H. Liu and W.S. Zhang 1350

Application Prospect and Advantages of Power Supply System Based on 20kV Power Distribution Network and Microgrid in China
Z.K. Wang, Y.X. Huang, J. Yi and M.Y. Lai 1357

Multilevel Inverter Based DSTATCOM with Energy Storage Device
J.L. Zhang, X.F. Lv and C. Li 1361

STATCOM Based on Cascade Multilevel Inverter
J.L. Zhang 1365

A Software Evolution Process Model under the Circumstances of Cloud Computing
J. Wang, N. Zhao, J.G. You, L.Y. Li and L. Zhao 1370

The Performance Analysis on a Software Evolution Process Model under the Circumstances of Cloud Computing
J. Wang, N. Zhao, Z.W. Xie, Q. Yu and J.Z. Liu 1376

Monte Carlo Simulation of Flexible Multibody System with Uncertainties
T. Pi and Y.Q. Zhang 1382

Evaluation Method of Manufacturing Resources in Complex Product Development Process
Y.P. Yuan, W.L. Sun and X.J. Li 1386

The Prediction of SO_2 Pollutant Concentration Using a RBF Neural Network
C.Y. Wang, W.Y. Zhang, J.J. Wang and W.F. Zhao 1392

The Effect of the Friction Heat on the Brake Performance of Automobile
F.Z. Li, R.F. Hu and Z.H. Cui 1397

Study on Shock-Absorbing Capacity of Roadside Safety Devices Made by Porous Ultra-High Molecular Weight Polyethylene
J.M. Xiao and X.C. Shang 1403

Determination of Rheological Parameters for Several Lubricants Applied in the High-Speed and High-Pressure Bearings
Y.S. Wang 1407

Development of Heating Device for Diesel Fuel Filter and Analysis of Test
K.X. Wang and Y.L. Pan 1412

Clustering Chinese Web Search Results Based on Association Calculation
Y. Zhao, Y.J. Du and Q.Q. Peng 1418

Research on Knowledge-Based Intelligent Tutoring System
Z.Z. Yi, K. Zhao, Y.T. Li and W. Xu 1424

A Design and Realization on Quantitative Measurement and Evaluation System for Teaching Effectiveness in Middle and Primary School
Z.H. Hu and H.Q. Yang 1430

The Influence of Argon Pressure on the Structural and Physical Properties of LaB_6 Films
X.H. Zhao, G.H. Min, J. Xu and J. Lin 1436

Chapter 3: Automotive Engineering and Industry Application

Free-Form Surface Five-Axis Machining G-Code Automatic Generation System Based on Path Messages for the Different CNC System
S.K. Cao, J. Jia, W.W. Song, K.F. Song and J. Lv 1441

Application of Solar Technology in Design of Public Buildings of Cold Regions
H. Zhao 1447

Adaptive PID Temperature Controller Based on Fuzzy Logic
J. Wang, A.J. Song and Q.X. Zhu 1455

The Application of MATLAB Software on the College Network Teaching Platform of the Mathematics Experiment
Y.F. Li 1459

Preparation and Antibacterial Activity of Al_2O_3-ZrO_2 Carrying Ag^+
X.S. Tian, C.J. Lv and G.L. Zhang 1464

Analysis of Interface Stress of Sn3.5Ag0.75Cu Solder under Temperature Cycle QFP Device
Z. Li, C.P. Zhang, M.R. Zhao and H.J. Jin 1468

Based on Edge Node Network Service Recognition Research
J. Xin and J.P. Xu 1473

Extension Model of Influence Diagrams
Q.S. Peng 1479

Research on the Maintenance Technology of Network Production Equipments and its Application
W. Li 1483

The Fuzzy Comprehensive Assessment of Brand Competitiveness of Property Insurance Companies
S.F. Song, G.J. Li and Y.S. Su 1489

Study on Similar Case Determination of Personalized Recommendation System
J.L. Sun, Z.Q. Zhu and Y. Mei 1494

WSN Location Signal Strength Matches Based on Sugeno Model
W.M. Cao, X.F. Li and R. Wang 1498

Fuzzy-Robust Design Optimization of Dimension Tolerance Using the Improved Genetic Algorithm
B. Zhong 1502

Characterization of Y/TiO_2 Nanoparticles and their Reactivity for CO_2 Photoreduction
J. Wei, X. Tan, T. Yu and L. Zhao 1506

Numerical Simulation Research of Micro-Injection Molding Simulation
X.H. Wei and B.Y. Lou 1511

Hydrogen Storage in A-Type Zeolite by Grand Canonical Monte Carlo Simulation
X.M. Du, Y. Huang and E.D. Wu 1518

Research of Features Extraction for Printed Numerals Based on Geometric Properties
Y.L. Wang 1523

Study on Method to Extract Feature Parameter of Wear Particle Group in Ferrographic Image for the Diesel Engine Lubricants
H.Z. Wang, G.B. Li and D.L. Guan 1530

Qualitative Assessment of the RCS Reduction Benefits on Detection Probability of an Armed Helicopter
Y. Pei, T. Guo, Q. Dong and B.F. Song 1535

Automotive Route Planning Method for Minimizing the Radar Detection of an Armed Helicopter
Y. Pei, Q. Dong, T. Guo and B.F. Song 1541

Study on Burnout and so_2 Emission Characteristics during Co-Combustion of Petroleum Coke and Oil Shale in a Fluidized Bed
W.Q. Lu, D.Y. Fang and Z.Y. Yang 1547

Preparation of Electrospinning Polystyrene Nanofibrous Membrame and Nanofiltration for Simulated Dyeing Wastewater
Z.Y. Yang, X.N. Ning, H. Wang and J.Y. Liu 1554

Research on Control System of Hybrid Regenerative Braking and Low Speed Energy Recovery
P. Sun, X.M. Yu, W.S. Yi, H.J. Ding and J.G. Liang 1560

Study on Tourism Ecological Footprint of Loudi City in Hunan "3+5" Urban Agglomeration
X.T. Liu, Z.F. Sheng and Y.L. Wang 1566

Knowledge Acqusion Model via E-Learning in SNS Oriented Knowledge Community of Enterprise
B. Wu, W.X. Xu and J. Ge 1572

Trust Analysis in Social Network Community Research
B. Wu, W.X. Xu and J. Ge 1578

Preparation and Characterization of Polypropylene/Clay Nanocomposites
L.M. Wang 1584

Preparation and Characterization of Ionic Liquild Modified Clay and its Application in Polypropylene/Clay Nanocomposites
L.M. Wang 1588

Wavelet Packet Analysis Based Feature Extraction of Vehicular Acoustic Signal
X.X. Qi, J.W. Ji, X.W. Han and Z.H. Yuan 1593

Research on the Approach of Reliability Allocation Based on D-S Theory
C.L. Zhou and Z.G. Li 1599

Key Substitution Attack and Malleability of a Short Signature Scheme with Batch Verification
F.Y. Kong and J. Yu 1605

A New Vibration Source Number Estimation Method Based on FFT
H.X. Ye, X.P. Hu and X.F. Zhou 1609

The Behavior and Effect of Nano-Copper on the Interface in the Process of Sintering Fe-Base Powder Metallurgy Parts
X.Y. Zhang 1613

Calculation and Optimization Design of LJ276M Gasoline Engine Intake System
M.Y. Zhu, Z.H. Cui and Q. Liu 1619

Motor Vehicle Longitudinal Performance Roadway Test System Based on CAN Technology
X.L. Zhang, L. Li, D.D. Sheng and J. Song 1625

The Design of STATCOM Control System
J.L. Zhang 1631

A Hybrid Method Based on HITS for Literature Recommendation
P.Y. Zhang, Y.J. Du and C. Wang 1636

Malicious Codes Detection Inspired by MHC
Y. Zhang, L.P. Song and L.H. Yang 1642

Effects of Calcination Temperature on Photoreduction Activity of Cu/TiO_2 Nanoparticles
J. Wei, X. Tan, T. Yu and L. Zhao 1648

Connected Partial Hybrid-Type Target Coverage Model in Wireless Sensor Networks
M.W. Wang and B.P. Guo 1653

Peak Cycle Stress Analysis of the II Type Dent on Pipeline Based on FE Calculation
W. Ying and P. Zhang 1659

Deformation Resistance Analysis and Simulation of Conic-Chamber Gun's Interior Ballistics
P. Wei, J. Hou and T.F. Chen 1665

Periodic Point at Real Axis for a Generalized 3x+1 Function
S. Liu and Z.X. Wang 1670

The Role of Footwear on Plantar Pressure Performance during Badminton Movements
W.J. Fu 1675

A Brief Research of the Internet of Things
P. Liu 1679

Research on Engineering Project Time-Cost Optimization Based on Particle Swarm Optimization
T. Wang and L.F. Li 1683

Research on Variable Time-Domain Discrete Interpolation Control in Flexible Roll Forming
G.Y. Wang, B. Qian, Q. Li and Y. Yan 1687

Design of Simulation System for Batch Process
Z.H. Yuan, X.Y. Qi and X.W. Han 1693

Obstacles Perception for Serpentine Robot Based on Optical Flow Modules and Multi-Sensor Fusion
J. Zhao, Z.F. Han, G.F. Liu and Y.M. Yang 1699

Node Placement Strategies to Prolong Lifetime in One-Dimensional Linear Wireless Sensor Network
G.S. Yang and M.B. Xiao 1705

Dynamical Simulation about Buffer Packaging of Computer
G.Q. Zhang, J. Huang and H.B. Lin 1711

Physicochemical Characterization of *Chuanxiong* Particles by Ultrafine Pulverization
L.W. Yang, R.J. Wang, M. Jia and G.S. Gai 1725

Experimental Research of Ultrasonic Motor Characteristics in Micro EDM
H.B. Lin and G.Z. Yang 1731

Research on High Performance of Pantograph Slider Used by High Speed Train
L.W. Yang, R.J. Wang and M. Jia 1736

The Assessment of Grassland Ecosystem Services Value with GIS Technology in HulunBuir City of China
R.J. Wang, L.W. Yang and M. Jia 1742

Preparation of Zero-Valent Iron Nanoparticles and Study of Dispersion
Q.W. Ding, T.W. Qian, H.F. Liu and X. Wang 1748

Effect of Beating and Fibre Furnish on the Properties of Silk Paper
L.Z. Sha and H.F. Zhao 1753

Design of Weld Seam Tracking Control System Based on DSP
Z.H. Yuan, S.J. Yu and X.W. Han 1759

Synthesis and Characterization of Copper/Paraffin Nanocomposites for Thermal Actuation
B. Xu and B.Y. Lou 1764

Synthesis and Characterization of Thermo-Sensitive Copper/Paraffin Nanocomposites
B. Xu and B.Y. Lou 1769

The Effects of Nano Pt/Carbon Black Compound Coating on the Electro-Catalysis Properties of the Graphite Electrode
B.Y. Lou, H. Zhou and B. Xu 1774

Comparison of KP Pulping Properties between Heartwood and Sapwood of *Cedrus deodara* (Roxb.) G. Don
H. Gao, L.P. Zhang and S.Q. Liu 1778

The Influence of Micro-Arc Oxidation on Corrosive-Wear Behavior of Magnesium Alloy
B.Y. Lou, B. Liang and X. Li 1785

A New Hybrid Optimization Algorithm and its Application in Job Shop Scheduling
X.Z. Cao and Z.H. Yang 1789

Artificial Intelligence Optimization and Experimental Study of Auto Panel Stamping Process
L. Zhou and X.M. Cheng 1794

The Study on Operation Charateristic of Double-in and Double-Out Ball Mill Based on Data Mining
B.L. Liu 1799

Study on the Fault Diagnosis of Turbine Based on Support Vector Machine
B.L. Liu 1803

The Study of Risk Assessment on the Ship Oil Spill Diffuseness
Y.M. Sun 1807

The Research on Maintain Efficiency of Industrial Maintenance System Based on Markov Analysis Model
M. Ge and Y.L. Jiao 1813

Design of a Gas Detection System Based on BP Neural Network
Y.L. Wang, K.C. Lin, X.W. Wang, Z.G. Geng and Q.G. Zhong 1819

Fault Diagnosis System Based on Dynamic Bayesian Network
H.B. Wang, Z.G. Ma and X.Y. Tu 1824

A Relative Colorimetric Rending Mapping Method Based on BP Neural Network
L. Zhao and G.X. Chen 1830

The Portable Intelligent Monitoring System for Patient Based on Bluetooth Sensor
P. Wang and X.Y. Dong 1834

Improving Genetic Algorithm Based Parameter Optimizing LSSVM Model for Tyre Regression
X.L. Zhang, L. Li, J. Song and D.D. Sheng 1839

Study on Field Emission Characteristics of Normal-Gated and Under-Gated Carbon Nanotube Cold Cathode
Q. Wang, W.Q. Dang, X.W. Mu, J.F. Dai and W.X. Li 1845

The Effect of Central China's Logistics Industry to Economic Development Based on Linear Regression Analysis
H.T. Su, L.M. Yang and H. Ding 1851

Research on Approximation Measurement of Enterprise Information System Based on Object-Based Knowledge Mesh
H.W. Cao and C.G. Xue 1857

Study on Dynamic Performance of Step--Down DC-DC Converters
Y.B. Wang 1863

Parameterized Model Design and Extension for Principal-Agent Incentive Mechanism
J. Chen, Y.L. Xu and D. Liu 1869

Research on Compression and Rebounding of the Zoom Air in Sport-Shoes
W.L. Peng, L. Lu and W.N. Zhang 1875

Mechanical Product Concept Extraction Method
L.L. Dong, F.Y. Liao, X. Zhang and F.K. Zhang 1880

Preparation and Characterization of Cationic Emulsion of Styrene and Acrylate
X.M. Zhu, G.H. Cheng and H.Z. Liu 1886

Management Effectiveness Calculation Model and Method of Government Performance Evaluation
W.B. Bu, Y.L. Xu, J. Liu and Y.J. Feng 1892

Game Analysis between Principal and Agent under Principal-Agency Relationship
F.S. Meng, X. Sui and Y.L. Xu 1898

Dynamic Properties of Hydraulic Excavator's Simulation and Analysis Based on ADAMS
C.H. Zhao, S.J. Chen, X.Y. Zhong, M.Y. Zhao and Z.Q. Tan 1905

An Improved AHP Model Applied in Supply Chain Management
S.S. Zhu and Y. Yao 1910

Study on Geological Reserves Calculation Based on 3D Entity Model
H.X. Wu and C.G. Chang 1917

Application of Progressively Statistical Discriminant Models
B.C. Fan 1922

Influence of Composition and Hot Rolling Conditions on Microstructure and Texture of Nb-Ti Stabilized FSS
Y.D. Liu and Y.Q. Yang 1926

Software Module Development for Free-Form Surface Five-Axis Machining Path and Tool Posture Simultaneous Optimization
L. Song, S.K. Cao, K.F. Song, C.Z. Wu and W.W. Song 1932

Study of Surface Roughness and Hardness of Medium Carbon Nickel-Chromium Based Alloy Steels under High Temperature
S.M. Ganechari, V.R. Kabadi and S.A. Kori 1938

Seismic Response Analysis Method of High Core Rockfill Dam
J.K. Zhang, L.J. Zhang and S.J. Di 1943

Back Analysis on Mechanical Deformation Parameters of Columnar Jointed Rock Mass
S.J. Di, W.T. Zheng and J.K. Zhang 1947

Optimal Management of Multi-Campus University: A Case in Jiangxi
Y.X. Guo 1951

Structures and Catalytic Activities of $LaSrCoO_4$ and $LaSrCoO_{3.6}F_{0.4}$ Mixed Oxides
X.M. Yang 1957

Study on Energy Design Factor for the Stage of Product Utilization
P. He, G.F. Liu, D. Zhou and Y. Wang 1962

On the Reasons of Social Security System Right Absence for Migrant Workers in China
L. Sun 1968

Research on Medical and Health Accounting and its Account System in China
C.H. Tao 1974

Functionary Mechanism of Technology Innovation on Industrial Competitiveness
Y.C. Hu 1980

Empirical Study on Performance Evaluation of Regional Tourism in China
T.Q. Li 1986

An Empirical Research on the Relationship between Real Estate Prices and Inflation
T.Q. Li 1992

The Empirical Analysis of Market Performance of Automobile Industry Market in China
