

Table of Contents

Preface

Chapter 1: Reliability Assessment and Restoration of Architectural Structures

Chemical Analysis of the Building Material Coating from Historical Bridge in Prague K. Sladká and R. Pernicová	3
Rehabilitation of Historic Farmstead near Klecany J. Marková, P. Pokorný and P. Marek	9
Investigation of the Effectiveness of the Rehabilitation of Historical Constructions Using Wireless Dehumidification Technologies P. Šťastný	15
Long-Term Monitoring Side Chapel Church from the Point of View of Formation and Course of Condensation on its Inner Surface L. Kudrnáčová, L. Balík and K. Hurtig	23

Chapter 2: Structural Health Monitoring and Reliability Level Assessment

Comparison of Different Sensors Used in the Assessment of Concrete Elements by Impact-Echo Method J. Puchýř, R. Dvořák, A. Hubáček and Z. Chobola	31
Detection of Internal Defects and Failures of Concrete Structures Using Non-Destructive Methods J. Šnědar, V. Bartoň and P. Cikrle	39
Study of Microstructure of Electrically Conductive Silicate Composites with Graphite-Based Fillers Š. Baránek, L. Mészárossová, R. Drochytka and G.I. Yakovlev	45
The Expansion of Defects of Solid Fired Bricks due to their Freezing V. Bartoň, J. Šnědar and P. Cikrle	55
Effect of Target Reliability Level on Partial Factors for Existing Steel Railway Bridges V. Nadolski, M. Holicky and M. Sýkora	63
Introductory Chapter to Microbially Induced Deterioration of Concrete – Focus on Groups of Typical Microorganisms P. Pokorný	73
