

Table of Contents

Preface, Committee

Chapter 1: Biocomposites and Materials for Biomedical Application

Preparation, Characterization and Photostability Study of Biocomposites Comprising Quantum Dots for Bioimaging Application

N. Abu, N. Ismail, Z. Ahmad Zubir and N.M.A. Nik Abdul Aziz 3

Biodegradable Mg Strengthened Poly-Lactic Acid Composite through Interfacial Properties

M.S. Butt, J. Bai and F. Xue 7

Kenaf Silicone Biocomposites: Synthesis and its Hyperelastic Behaviour

N.N. Azmi, A.K. Hussain and J. Mahmud 12

Fabrication and Microstructure Evaluation of Fibrous Composite for Acetabular Labrum Implant

A. Anindyajati, P. Boughton and A.J. Ruys 17

Biocomposites Formulated with Virgin/Recycled Acrylonitrile Butadiene Styrene

S. Nikmatin, A. Syafiuddin, Irmansyah and D.A.Y. Irwanto 23

Synthesis of Multi-Walled Carbon Nanotube-Zirconia Composite and Bovine Serum Albumin Adsorption Characteristics

K. Bozgeyik and T. Kopac 27

Chapter 2: Materials and Technologies of Chemical Production

Preparation of Polymer Nanoparticles and Application on Nitrile-Butadiene Rubber Reinforcement

C.C. Wang, C.L. Chiu and J.S. Shen 35

Synthesis and Pore Structure Characterisation of Novel Mesoporous MgO-CeO₂/SBA-15 as a Potential Catalyst Support

J.K. Efavi, A. Yaya, E. Bowen-Dodoo, L.A. Damptey and R.Y. Abrokwahl 40

Synthesis of Hybrid Carbon Nanoparticles Using Multi-Walled Carbon Nanotubes and Fullerene via Self-Assembly

P.S. Karthik, Z. Lin, V.A. Korada, M. Hada, T. Nishikawa and Y. Hayashi 46

Preliminary Study on the Manufacturing Process of a Membrane Filtration for Protein Concentration from the Recycled Materials

T.W. Chung, S.H. Hsu, C.K. Chen, Y.F. Lin and Y.S. Lin 50

Surface and Interface Engineering of Tungsten Oxide for Highly-Efficient Catalysis

J.J. Song, Z.F. Huang and J.J. Zou 54

Chapter 3: Materials and Technologies for Energy Storage, Opto- and Microelectronics

Engineering the Electronic and Magnetic Properties of Sc₂CF₂ MXene Material through Vacancy Doping and Lattice Straining

L. Ao, A. Pham, X.T. Zu and S. Li 61

Nonlinear Refraction and Absorption Properties of ZnS Semiconductor Quantum Dots

H.Y. Tan, Q. Chang and X.W. Liu 65

Optoelectronic Analysis of CdGa₂X₄ (X= S, Se): A Promising Material for Solar Cells

P. Kumar, J. Sahariya, A. Soni and K.C. Bhamu 69

Synthesis of LiFePO₄/C Composites Cathode via Solid-Phase Method

L.N. Sun, Z.Y. Yuan, Y.F. Xue, W.L. Hong, X.Z. Ren and P.X. Zhang 74

The Study of Ion Beam Assisted Deposition of CuInSe₂ Absorber Films

X.L. Li, Y.D. Feng and H. Wang 78

Effect of Nitrogen Flux on the Properties of N-Doped Zn_{1-x}Mg_xO Thin Films

W. Liu, C.L. Liu, H.X. Chen and R. Wang 83

Gold Nanoparticles Resistance Induced by Femtosecond Pulse Laser	89
C.Y. Zhang, J. Hai, Z.L. Liu and Z.Y. Liu	
Electrochemical Redox Reactions of Lithium Ion on Nickel Electrode in Propylene Carbonate-Based Solutions	93
M.H. Jo, Y.H. Lee and S.K. Jeong	

Chapter 4: Functional Ceramics and Ceramic Matrix Composites

Obtaining of Graphene Structure Containing Ceramic Composites in High Temperature Vacuum Furnace	101
N. Jalagonia, F. Marqui, K. Barbakadze, E. Sanaia, G. Bokuchava and T. Kuchukhidze	
Improvement of Mechanical Properties of CNT/Epoxy Nano Composites Using the B4C by Taguchi Method	105
M. Taşyürek and C. Nazik	
Machinability Analysis in Drilling Glass/Epoxy Composites with Filled MWCNTS	110
I. Ovali and A. Mavi	
Oxidation Kinetics of ZrB₂ Ceramic Matrix Composite Materials	116
H. Yu, Q. Huang, W. Wang, L.T. Liu, C.W. Li, M.H. Xu, X.Q. Wang, J.G. Song, S.B. Li and L. Chen	
Optimization Process during Laser Machining of 2 mm Thick Al/Al₂O₃ MMC	121
A. Ghosal, A. Manna and P. Patil	
Performance of Electrical Discharge Milling and Sinking in Micro Graphite Powder Mixed Dielectric	127
H. Marashi, A.A.D. Sarhan, I. Maher and M. Hamdi	

Chapter 5: Functional Coatings and Films

Investigation on Fracture Toughness of Coating/Substrate Interface - Case Study: Thermally Sprayed Nickel Based Superalloy on Variety of Substrates	133
S. Abualigaledari, M. Salimi Jazi and F. Azarmi	
Formation of Nanosized Coatings in Hybrid Plasma Reactor Combining Magnetron or Arc Deposition with RF Plasma Assistance	137
E.A. Kralkina, P.A. Nekludova, A.M. Nikonorov, A.A. Airapetov, V.A. Sologub and N.A. Dyuzhev	
Aluminide Coating Application for Protection of Anodic Current-Supplying Pins in Soderberg Electrolytic Cell for Aluminium Production	141
V. Kovrov, Y. Zaikov, V. Tsvetov, Y. Shtefanyuk, V. Pingin and M. Golubev	
Photoluminescence Properties of Ru(bpy)₃²⁺ in TEMPO-Oxidized Cellulose Nanofiber Films	146
L.Y. Song, K. Takahashi, T. Higuchi and T. Aita
