

Table of Contents

Preface and Committees

Chapter 1: Material Study, Physical and Chemical Processes in Materials

Corrosion Inhibition Effect of PASP and Sulfuric Acid High Cerium on Copper in Citric Acid R. He, Z.F. Liu and N. Gu	3
Adsorption of Calcium Lignosulphonate Water Reducer on Alkali-Activated Slag Cement Pastes C.H. Yang, Q. Pan and H. Zhou	7
Study of PVA on Polyester Desizing with Atmospheric Pressure Dielectric Barrier Discharge Plasma L.M. Li, Y.Q. Li and J.Q. Liu	11
Study on the Mobilities with Replaceable Linear Polyacrylamide (LPA) Gel Electrophoresis J. Wang, L.N. Guo, L.Q. Wang, Y. Shi, H. Zheng and Z.K. Lu	16
Effect of Doped Iron on Fluoride Sorption by Calcined MgAlFe-CO₃ Layered Double Hydroxides Y.B. Pu, J.R. Wang, H. Zheng, P. Cai and S.Y. Wu	21
Co-Sorption Characteristics of Zn(II) and As(V) on Mixed Fe/Al-PILCs S.Y. Wu, H. Zheng, P.G. Weidler and P. Cai	26
NbF₅ and CrF₃ Catalysts Effects on Synthesis and Hydrogen Storage Performance of Mg-Ni-NiO Composites Q. Wan, P. Li, T. Wang and X.H. Qu	31
Combined Diagnosis Study for Terminal Main Insulation Hole Defect in 10kV Cross-Linked Polyethylene Cable Z.W. Cheng, H. Yu, T. Dong and X.P. Zhao	38
Coal Metamorphism's Influence on Coalbed N₂ Concentration in Mining Area C.Y. Liu	44
Formation Energy Calculations of Impurity Elements at Substitutional or Interstitial Sites in Silicon H. Hatanaka and Y. Hayafuji	48

Chapter 2: Mechanics Engineering, Dynamics and Systems, Manufacturing Design Applications

Controller Gain Design of 2-D Linear Systems Based on the Existing 1-D Analytical Solution W.J. Liu	55
Calculation of VaR with the Bootstrap Method Based on Experts Predict in Mechanical Engineering X. Shi	60
The Research on Embedded Real-Time System Security Issues in Mechanical Control X.H. Wang	65
The Effect of Non-Normality of Navier-Stokes Operator Mechanism on Dynamics of an Axisymmetric Swirling Flow C. Chen and Y.Y. Shi	72
The Application of Web Data Mining System Model in Mechanical Engineering C. Feng	79
Adaptive Selection of Processing Nodes for Spatiotemporal Query Algorithm Based on Agent in Mechanical Engineering W. Jiang	86

Blind Source Separation for Impact Force Induced by Piston Slaps in Diesel Engines Y.X. Zhang, B. Liang, J. Li and W. Ke	93
Dynamic Response Analysis of the Reinforced Concrete Column under the Effect of Explosive Impact Load Y.F. Chen and G.X. Yi	99
Simulation of Laser Shock Wave Propagation and Dispersion in SHPB L.S. Zuo, X.Q. Zhang, L.S. Chen, J.P. She, H. Li and W. Chen	105
Research on the Charged Omni-Directional Spatial Electric Field Tester Y. Liu, X. Chen and K. Tang	110
The Research on Modeling and Dynamic Simulation of Gear Box Virtual Prototype Based on Pro/E and ADAMS L.X. Qiao and J.T. Zhang	115
The Application of Fast and Effective Shot Boundary Detection Algorithm in Mechanical Engineering X.J. Li and P. Chen	121
The Research on Design of Authentication and Charging System in Mechanical Devices L. Yan and C. Yao	126
Optimization Mechanism Control Strategy of Vehicle Routing Problem Based on Improved PSO J.T. Zhang and L.X. Qiao	130
Design and Analysis of in-Wheel Permanent Magnet Synchronous Motor Cooling System of Mining Dump Truck H.L. Sun, C. Jin, W.M. Zhang and H.Y. Tian	137
Heat Dissipation Design and Analysis of Large Power Inverters for Electric Drive Off-Road Mine Truck C. Jin, D. Wu and Y.H. Shen	142
Efficiency Analysis on Three-Dimensional Energy Transmitting System for MEMS inside Body K.F. Xue and X.Q. Liu	147
Theoretical Analysis of Surface Waves on Liquid Jets in Crossflows with Deformation S.L. Wang, Y. Huang, F. Wang and Z.L. Liu	152
Green's Function for Piezoelectric in Multi-Field Circumstance with a Generalized Line Force on an Elliptical Hole Surface L.C. Dai and J.J. Gong	158
Selection and Optimization of Main Process Parameters in High Pressure Waterjet Clearing HTPB Propellant Q.L. Han, Z.M. Zhu and Z.Y. Huang	164
Experimental Analysis on Oil Film Properties of Plane Port Pair in Axial Piston Machine B. Wang, S.L. Chen and Z.F. Ye	169
An Improved Clutter Suppression Method for Non-Sidelooking Uniform Linear Array Antennas Airborne Radar J. Zhao and X. Hang	175
Implementation of a New Digital Grating Angular Acceleration Measurement System Based on FPGA and its Error Analysis H. Zhao	181
Efficient Prediction of Runout Parameters in End Milling Operation J.M. Zuo, L. Wu, M.L. Wang, B.S. Wang, J.M. Hou and Y. Feng	186
Numerical Simulation and Analysis of Ironing Process for Deep Cup Shaped Workpiece L.L. Huang, X.Y. Lu and X.W. Zhang	191
The Choice of Coolants in Accelerate Driven System J.J. Li, T. Zhou, M.Y. Liu, Z.W. Su and W.Z. Zou	195
Lightweight Research of Automobile Dash Panel Based on Sound-Structure Sensitivity L. Zhang and Z.Y. Hao	200
Model Analysis and Optimization Design for Mg-Based Instrument Panel Beam Assembly L. Zhang and Z.Y. Hao	204
Numerical Simulation of Flow Field around DLR_F4 Using Meshless Method X.J. Ma, J.J. Tan, D.F. Ren and F. Wang	209
Electro-Hydraulic Servo Road Simulation System Based on Fuzzy Control D.Z. Huang, Q.G. Zhou, Y.L. Zhang and J.S. Chen	214

Non-Linear Vibration Modeling and Simulation of a Gear Pair Based on ADAMS and Simulink	
C.J. Huo, H. Liu, Z.C. Cai and M.Z. Wang	219
Rigid-Flexibility Modeling and Simulations of Lower-Mobility Parallel Mechanisms	
Y. Qiang, G.H. Wang, B. Ji and L. Hao	224
Research on Velocity Vibration Characteristics of Stator of Radial Piston Pump in Time Domain	
T.Y. Zhou	229
Pushover Analysis of Pile-Supported Bridge Piers	
C.F. Wang and Y.J. Bao	234

Chapter 3: Structure Analysis and Mechanical Properties of Materials

The Effects of Torsional Pre-Strain on 35CrMo Tensile Property and Uncertainty Evaluation	
X.J. Yang, S.Y. Wang and G.S. Liu	243
Crack Growth Life Prediction Based on Monte-Carlo Method for High Cycle Fatigue Dynamic Component	
W.L. Liu and D.Z. Yu	247
Processability and Mechanical Properties of CB/PVC Composite	
X.Q. Liu, H.Q. Xing, L.L. Zhao and D. Wang	252
Studies on the Mechanical Properties of Foam CB-PVC Composite	
X.Q. Liu, H.Q. Xing, L.L. Zhao and D. Wang	256
The Development and Application of Smart Material Pumps	
Y.P. Zhao, D.F. Chen and Q.G. Lu	260
Effects of Laser Shock Peening on TC11 Titanium Alloy with Different Impacts	
X.F. Nie, W.F. He, L.C. Zhou, Y.Q. Li and Y. Chai	266
A Coupled Sensitivity Method for Structural Damage Detection	
J. Li and P.J. Wei	271
Estimation of Strength Parameters and Finite Element Simulation of Lime and Cement Stabilized Granular Soils	
O. Azadegan, J. Li and H. Jafari	276
Numerical Analysis on Steel-Kevlar-Steel Sandwich Structure under Contact Explosion	
J.F. Wei, G.S. Yang, Y. Li and S.S. Wang	281
Analysis of Thermal Stresses in 304 Stainless Steel Plate-Fin Structure	
H.X. Cao, X.Q. Qiu and W.C. Jiang	286

Chapter 4: Material Technology and Design of Materials Applications

Strong and Weak Ion Exchange Resin in Chemical Desalting Process Combined Application	
S.R. Wang	293
Rapid Laminated Manufacturing for Metallic Parts Based on Resistance Welding Double-Station LOM	
R. Cheng, X.Y. Wu and W.H. Luo	298
The Optimization of Carbon Fiber Drawing Process Based on Cooperative Immune Clonal Selection Algorithm	
J.J. Chen, Y.S. Ding and K.R. Hao	304
Preparation and Characterization of BaBi₂Nb₂O₉/PVDF Inorganic-Organic Composite Ultrafiltration Membranes	
D.H. Zhang, L.J. Pan and D.Z. Sun	309
Heat Transfer Modeling for Vaporizing in Vacuum Electron Beam Welding on Magnesium Alloy	
Y. Luo	314
The Construction of Three-Dimensional Finite Element Model of TKA Knee	
B. Jiang, Y.F. Dong, Y. Hu, Q.R. Xu and G.H. Hu	319
Optimized Design for Multi-Layer Absorbing Materials Based on Genetic Algorithm	
X. Chen, X.X. Liu, X.J. Wang and Y. Liu	324

The Levy Solution of Functionally Graded Materials Elastic Thin Plates F. Zheng and M.L. Wang	329
Analysis of Thermal Deformations of FGM Thin Plates M.L. Wang	333
