Preface

Chapter 1: Technique of Magnetism

A New Distribution and Application in Engineering Reliability Z.M. Li, F.H. Jiao, X.J. Kou and Y.M. Zhang	3
A Symbiotic Multi-Species Optimizer for Discrete Optimization Y.H. Huang and J.S. Zhang	8
Analysis on Axial Magnetic Force of Permanent Axial Bearing by Axial Magnetized M. Fan, X.P. Wang, W. Li, L. Guo and Y.M. Yang	12
Calculation of Leakage Coefficient for Hybrid Magnetic Bearing E.Y. Hou and K. Liu	17
Control Parameter Tuning of Magnetic Bearing PID Controller Based on Expansion Coefficient Critical Proportion Y.M. Yang, X.P. Wang, L. Guo and M. Fan	24
Decoupling Control for Bearingless Synchronous Reluctance Motor Based on Neural Networks Inverse Z.B. Yang, H.Q. Zhu, X.D. Sun and T. Zhang	30
Direct Torque Control of Bearingless Synchronous Reluctance Motor W.C. Hu, Y.C. Li, Z.B. Yang and H.Q. Zhu	36
Distance Protection Application Based on Wavelet Transform and Traveling Wave Ranging P.P. Kang and X.F. Zhu	40
Distributed Remote Testing Research Based on Self-Union Technology W. Li and X.P. Wang	45
Effects of Rotational Inertia and Bearing Force on Stability of Permanent Maglev Rotator K.X. Qian, Z.H. Xu and H. Wang	50
Influence of Magnetic Bearing Stiffness on Rotor in Wind Turbine Generator N.X. Wang, J.G. Zhang and G.P. Ding	57
Influence of Suspension Mass Variation on Dynamic Characteristic of Magnetic Suspension System X.G. Wang, B. Mei, F. Sha and X. Zhou	63
Magnetic Force Characteristics and Structure of a Novel Radial Hybrid Magnetic Bearing J.H. Chen, F.Y. Yang, C.R. Nie, J. Yang and P.Y. Wan	69
Method of Variable Parameter PID Control Applied for AMB System H.N. Tan and J.S. Zhang	75
Research on Adaptive Feedforward Control Algorithm of Electromagnetic Active Vibration Isolation System J.G. Zhang, N. Xiang, Z.C. Xiao and G.P. Ding	80
Rotor Eddy Current Losses Analysis on BPMSM Using FEM T. Zhang and H.Q. Zhu	85
Self Adaptive Integral-Type Sliding Mode Control for Supporting Structure of a Magnetic Vertical Axis Wind Turbine X.D. Zhang, G.Q. Wu, J.F. Mao and K. Yang	90
Sensorless Control of IPMSM Using Extended Flux Estimation Method T. Zhang, W. Ni, H.P. Zhang and S.S. Wu	95
Sensorless Control of IPMSM Using Modified Current Slope Estimation Method T. Zhang, W. Ni, H.P. Zhang and S.S. Wu	100
System Identification Based on Recursive Least Square Method for the Magnetic Suspension Active Vibration Isolation System B.B. Yang, Y.F. Hu and G.P. Ding	105
The Impact Analysis of Digital Controller Hardware Parameters of AMB on Control Precision Y.M. Yang, X.P. Wang, L. Guo and M. Fan	111

Chapter 2: Design and Development of Magnetic Suspension System

Analysis of a Comprehensive Example of Numerical Control Machining J.G. Wan, X.P. Wang, Q. Gao and F. Zhang	119
Analysis of Impact of Substation Grounding on Power Network Y.Q. Zou	125
Application of Kalman Filter in DC Motor Speed Control System Z.Q. Zheng, Y.H. Zhang and J.S. Zhang	129
Backstepping-Based Nonlinear Robust Controller for AMB Spindle B. Bian, S.Q. Liu, D.G. Li and Z.K. Wang	133
Comparison and Improvement for PWM Output Circuit L. Guo, X.P. Wang, W. Li, Y.M. Yang and M. Fan	139
Control System Design for AC-DC Three-Degree-of-Freedom Hybrid Magnetic Bearing W.Y. Zhang, Y. Ruan, X.Y. Diao and H.Q. Zhu	144
Design and Optimization of Vertical Axis Wind Turbine Y. Cao, X.N. Li, G.Q. Wu, X.H. Chen and X.Y. Tian	148
Design of High-Speed Magnetic Centrifugal Blower Impeller and Numerical Simulation of Internal Flow Field Z.K. Wang, S.Q. Liu, H.W. Li and B. Bian	154
Design of Main Circuit and Analysis of Active Power Filter Y.C. Jin and L.C. Zhang	160
FEA of Large-Scale Cross-Roller Slewing Bearing Used in Special Propeller G. Zhang, X. Zhang, D.D. Jiang, M.Y. Li and J. Zhang	165
Reactive Power Optimization in Power Supply System for Industrial Enterprise S.C. Geng and J.S. Zhang	170
Research on Single Neuron Adaptive PID Control Y.H. Zhang, D.A. Zhao and J.S. Zhang	174
Small-Sized Wind-Light Complementary Power Generation System with Permanent Magnetic Levitation Technique G. Zhang, D.D. Jiang, J. Zhang, X. Zhang and M.Y. Li	178
Study on Applying Component Methodology in Developing Computerized Adaptive Test System for College English Y. Zheng and S.L. Zheng	183
Study on Support Properties of Axial Maglev Blood Pump H.C. Wu, Z.Y. Wang and Y.F. Hu	187
The Design and Research of Switching Power Amplifier Used on Magnetic Suspension Support Z.Y. Wang and G.Q. Wu	194

Chapter 3: Other

Kinematics Simulation on the Centre of Sliding Universal Joints D.G. Chang, C.C. Wang and B. Zuo	201
Modal Analysis of Maglev Linear Feed Unit L.X. Xiao, G.Q. Wu and X.D. Zhang	205
Research of CNC Fault Diagnosis Based on RBF Neural Network J.S. Zhang and Y.H. Zhang	211
Research on Power Amplifier for AMB Based on DSP J.S. Zhang and D.J. Jiang	217
Study of the LQR Controller for Magnetic Flywheel Rotor System X.L. Wen, C.S. Song, C. Cao and G.P. Ding	221
Study on Evaluation Index System of Product Quality Competence Based on Manufacturing Industry W.H. Li	227
Study on Numerical Control Machining Technology of Toy Car Cover J.G. Wan, X.P. Wang, W. Ding and W. Li	235

The Control Technology of BUCK Converter	
K. Yang, G.Q. Wu and X.D. Zhang	240
A Study on the Relations between Chinese Commercial Chambers and the Government	
F.Q. Peng	245
