

Table of Contents

Preface, Committees and Sponsors

Chapter I. Measurement Methods

I.1. Local Scale Measurements

Strain Measurement with Nanometre Resolution by Transmission Electron Microscopy D. Cooper and J.L. Rouviere	3
Intragranular Residual Stress Evaluation Using the Semi-Destructive FIB-DIC Ring-Core Drilling Method A.J.G. Lunt and A.M. Korsunsky	8
Tailored Mechanical Properties and Residual Stresses of a-C:H:W Coatings C. Schmid, H. Hetzner, S. Tremmel, F. Hilpert and K. Durst	14
Residual Stress State in Oxide Dispersive Steel due to Irradiation by Swift Heavy Ions V.V. Uglov, V.A. Skuratov, T. Ulyanenkova, A. Benediktovitch, A. Ulyanenkov and S. Zlotski	22
Study of Microstrain and Stress in Non-Planar Palladium Membranes for Hydrogen Separation M. Brisotto, M. Gelfi, C. Rinaldi and L.E. Depero	27
Relationship between Dislocation Density and Macro Strain of High-Heat-Load Materials M. Sano, S. Takahashi, A. Watanabe, A. Shiro and T. Shobu	33
X-Ray Line Profile Study on Shot/Laser-Peened Stainless Steel M. Kumagai, K. Akita, M. Imafuku and S. Ohya	39

I.2. Diffraction at Grain Scale and Multiscale Diffraction

Local Stress Analysis in an SMA during Stress-Induced Martensitic Transformation by Kossel Microdiffraction D. Bouscaud, S. Berveiller, R. Pesci, E. Patour and A. Morawiec	45
A Profile-Based Method of Determining Intragranular Strains Using Kossel Diffraction Patterns A. Morawiec	52
Matrix Method for X-Ray Stress Measurement in Single Crystals, and the Rational Planning of the Measurements B. Ortner	58
Measurement of Complementary Strain Fields at the Grain Scale W. Chow, D. Solas, G. Puel, E. Perrin, T. Baudin and V. Aubin	64
Impact of Shot-Peening on a Single Crystal Nickel-Based Superalloy A. Morancais, M. Fevre, M. François, P. Kanoute, S. Kruch and A. Longuet	70
Evaluation of Welding Residual Stresses Using Diffraction Spot Trace Method K. Suzuki, T. Shobu, A. Shiro and S.Y. Zhang	76
Accounting for a Distribution of Morphologies and Orientations on Stresses Analysis by X-Ray and Neutron Diffraction: Normalized Self-Consistent Modeling V. Hounkpati, S. Fréour, D. Gloaguen and V. Legrand	82
Effect of Interlamellar Spacing on the Monotonic Behavior of C70 Pearlitic Steel H. Yahyaoui, H. Sidhom, C. Braham, A. Baczmánski, M. François and W. Seiler	88
Experimental and Numerical Analysis of Mechanical Behaviour of AISI 316L Austenitic Stainless Steel: Two Level Homogenization – Neutron Diffraction J. Fajoui, D. Gloaguen, V. Legrand, G. Oum, J. Kelleher and W. Kockelmann	94
Influence of Morphological Texture on Stresses Analysis by X-Ray and Neutron Diffraction: Accounting for Extreme Morphologies V. Hounkpati, S. Fréour, D. Gloaguen and V. Legrand	100
Modeling Methodology for Stress Determination by XRD in Polycrystalline Materials S. Dufrenoy, T. Chauveau, R. Brenner, C. Fontugne and B. Bacroix	106
New Modelling Approach for Micromechanical Modelling of the Elastoplastic Behaviour J. Fajoui, D. Gloaguen, A. Alimi, M. Kchaou, F. Jacquemin and R. Elleuch	112

Study of Mechanical Behaviour of Polycrystalline Materials at the Mesoscale Using High Energy X-Ray Diffraction

A. Baczmański, E. Gadalińska, S. Wroński, C. Braham, W. Seiler, M. François, L. le Joncour, B. Panicaud, T. Buslaps, H. Yahyaoui, H. Sidhom and Y.C. Zhao

118

Distribution of Residual Deformation Effects in Shell Tubes from Ferritic-Martensitic Steels

Y. Perlovich, M. Isaenkova, E. Zharkov and O. Krymskaya

124

Residual Stress Tensor Distributions in Cracked Austenitic Stainless Steel Measured by Two-Dimensional X-Ray Diffraction Method

Y. Saito and S. Tanaka

128

Microscopic Stress and Strain Evolved in a Twinning-Induced Plasticity Fe-Mn-C Steel

S. Suzuki, S. Sato, K. Hotta, E.P. Kwon, S. Fujieda, K. Shinoda, K. Kajiwara and M. Sato

135

I.3. Diffraction: Gradients and Instrumental Developments

Effects of Misalignment of Parallel Beam Optics on Thin Film Stress Analysis

N. Norberg and A.C. Vermeulen

141

New Developments of Multireflection Grazing Incidence Diffraction

M. Marciszko, A. Baczmański, M. Wróbel, W. Seiler, C. Braham and K. Wierzbanowski

147

Determination of Stress Profiles in Expanded Austenite by Combining Successive Layer Removal and GI-XRD

F.A. Pires Fernandes, T.L. Christiansen and M.A.J. Somers

155

Stress Gradient Analysis by Noncomplanar x-Ray Diffraction and Corresponding Refraction Correction

A. Benediktovitch, T. Ulyanenkova, J. Keckes and A. Ulyanenkov

162

Spatial Convolution of a Stress Field Analyzed by X-Ray Diffraction

C. Kahloun, R. Badji, S. Queyreau, P. Franciosi and B. Bacroix

169

Influence of Layer Removal Methods in Residual Stress Profiling of a Shot Peened Steel Using X-Ray Diffraction

R. Alkaisee and R.L. Peng

175

Material Removal, Correction and Laboratory X-Ray Diffraction

E. Wasniewski, B. Honnart, F. Lefebvre and E. Usmai

181

Looking Towards the Future of Strain Scanning Using Neutron Diffraction

R.C. Wimpory and M. Boin

187

Energy-Dispersive Residual Stress Analysis under Laboratory Conditions: Concept for a New Type of Diffractometer

A. Liehr, M. Klaus, W. Zinn, C. Genzel and B. Scholtes

192

Optimizing Experiment Performance by Realistic Sample Simulations

M. Boin, R.C. Wimpory and R. Woracek

197

MYTHEN Detector – Perspectives in Residual Stress Measurements

D.S. Jung, L. Suominen, J. Parantainen and C. Hoermann

203

Gamma Profile Analysis for Stress, Texture and Grain Size

B.B. He

209

About Error Calculation in X-Ray Stress Measurement

B. Ortner

215

External Reference Samples for Residual Stress Analysis by X-Ray Diffraction

F. Lefebvre, E. Wasniewski, M. François, J. Cacot, P. Le-Bec, E. Baumhauer, D. Bouscaud, T. Bergey, D. Blaize, D. Gloaguen, A. Cosson, S. Jegou, Y. Cheynet, S. Leray, M. Meheux, J.C. Monvoisin, P. Allain, J.C. Vidal, J.M. Sprauel, P. Goudeau, C. Charles, L. Daflon, C. Fischer, L. Desmas, A. Ouakka, M.J. Moya, Y. Bordiec and H. Hamdi

221

X-Ray Optics and Precision Requirements for Residual Stress Analyses with High Spatial Resolution

B. Eigenmann

228

I.4. Mechanical Relaxation Methods

Beyond the Streetlight Effect: A United Future for Relaxation and Diffraction Methods for Residual Stress Measurement

M.B. Prime and M.L. Steinzig

234

Numerical Reconstruction of Residual Stress Fields from Limited Measurements

H.E. Coules, D.J. Smith and K.H.A. Serasli

243

Plasticity and Stress Heterogeneity Influence on Mechanical Stress Relaxation Residual Stress Measurements	249
H.K. Kim, M.J. Pavier and A. Shterenlikht	
Residual Stress Measurement with Laser-Optical and Mechanical Methods	256
V. Martínez-García, M. Wenzelburger, A. Killinger, G. Pedrini, R. Gadow and W. Osten	
Application of the Incremental Hole-Drilling Method for the Determination of Residual Stresses in Glass-Fiber Reinforced Composites	262
F. Schweizer, M. Dickele and M. Luke	
Assessing Shot-Peening Residual Stresses by Using the Incremental Hole-Drilling Technique and Laser Interferometry (DSPI)	269
J.P. Nobre, M. Oliveira, A. Albertazzi, M. Viotti, A.C. Batista, L. Coelho and M.J. Marques	
Combining XRD with Hole-Drilling Method in Residual Stress Gradient Analysis of Laser Hardened C45 Steel	277
K. Kolařík, Z. Pala, N. Ganev and F. Fojtik	
Incremental Hole-Drilling Method Vs. Thin Components: A Simple Correction Approach	283
E. Held, S. Schuster and J. Gibmeier	
Influence of Gradients in the Elastic Anisotropy on the Reliability of Residual Stresses Determined by the Hole Drilling Method	289
J. Niehuesbernd, E. Bruder and C. Müller	
Residual Stress Measurement on Large Shafts	295
J. Václavík and O. Weinberg	
Residual Stress Measurement Using the Hole Drilling Technique on Components outside the ASTM E837 Standard	301
Y. Serra, X. Ficquet and E. Kingston	
Investigation of Influence Factors on Residual Stress Determination within Coated Surfaces in Consideration of the Differential and Integral Method	307
P. Weidmann, U. Weber, S. Schmauder and V. Martínez García	
A Measuring and Evaluation Program for the Application of the Ring-Core or Hole-Drilling Method	313
A. Nau and B. Scholtes	
Four-Point Bending Tests to Study the So-Called Plasticity Effect on the Residual Stress Results Determined by the Hole-Drilling and Ring-Core Methods	319
D. von Mirbach	
Estimation of Residual Stress Field Uniformity when Using the Ring-Core Method	325
F. Menda, P. Šarga and F. Trebuňa	
Integral Method Coefficients and Regularization Procedure for the Ring-Core Residual Stress Measurement Technique	331
M. Barsanti, M. Beghini, C. Santus, A. Benincasa and L. Bertelli	
Plasticity in the Contour Method of Residual Stress Measurement	337
Y. Traoré, F. Hosseinzadeh and P.J. Bouchard	
Residual Stress Measurement Methods Comparison in High-Strength Steel for Naval Application	343
B. Levieil, S. Calloch, C. Doudard, D. Thévenet and B. Leblé	
Residual Stress Measurements on a Metal Matrix Composite Using the Contour Method with Brittle Fracture	349
J. Araujo de Oliveira, M.E. Fitzpatrick and J. Kowal	
Improvement to Stress Calculation Model of LRM in Thick Plate	355
K. Liao, L.J. Li, Y.X. Wu and H. Gong	
Stoney Formula: Investigation of Curvature Measurements by Optical Profilometer	361
M.R. Ardigo, M. Ahmed and A. Besnard	
Characterization of Residual Stresses and Accumulated Plastic Strain Induced by Shot Peening through Simulation of Instrumented Indentation	367
Y.G. Li, P. Kanoute and M. François	

I.5. Acoustics and Electromagnetics Methods

Characterisation of In-Depth Stress State by Magnetic Barkhausen Noise on Machined Steel Acquiring Different Frequency Bands	373
A. Lasaosa, K. Gurruchaga, V. García Navas and A. Martínez-de-Guereñu	

Residual Stress Measurement of Shot-Peened Steel Rings by Barkhausen Noise, ESPI Hole-Drilling and X-Ray Diffraction	380
T.J. Rickert, J.J. Thomas and L. Suominen	
Application of Local Current Pulses for Determination and Control of Residual Stresses	386
L. Lobanov, V. Pivtorak, N. Paschin, V. Savitsky and G. Tkachuk	
Characterization of Micrometric and Localised Residual Stresses on Amorphous Materials Using Dispersion of Surface Acoustic Waves	392
M. Duquennoy, M. Ouaftouh, J. Deboucq, J.E. Lefebvre, F. Jenot and M. Ourak	
Flexible Head, Designed for Measuring Residual Stress along Variable Curves Using Ultra-Sonic Tranducers	398
L. Daniel and F. Belahcene	
Identification of Inhomogeneous Residual Stress State in Elastic Cylinder within the Framework of Plane Strain	404
I.V. Bogachev, V.V. Dudarev, R.D. Nedin and A.O. Vatulyan	
Nondestructive Identification of Inhomogeneous Residual Stress State in Deformable Bodies on the Basis of the Acoustic Sounding Method	409
V.V. Dudarev, R.D. Nedin and A.O. Vatulyan	

Chapter II. Manufacturing and Materials Processing

II.1. Welding

In Situ Observation of Stress Accumulation during Sub-Merged Arc Welding	417
A. Kromm and T. Kannengiesser	
Neutron Diffraction Strain Measurement during TIG Welding	424
U. Reisgen, R. Sharma and J. von der Heydt	
Stress Measurement at Loaded Aluminium Welds Using Diffraction Methods	431
M. Workowski, T. Nitschke-Pagel and K. Dilger	
Neutron and X-Ray Diffraction Residual Stress Measurements in Aluminium Alloys MIG Welded T-Joints after Friction Stir Processing	439
J.P. Nobre, A.C. Batista, J.R. Kornmeier, J.D. Costa, A. Loureiro and J.S. Jesus	
The Effect of Specimen Size on Residual Stresses in Friction Stir Welded Aluminum Components	445
W. Pfeiffer, E. Reisacher, M. Windisch and M. Kahnert	
Welding Induced Residual Stresses in Explosion Cladded AL-6XN Superaustenitic Stainless Steel and ASME SA516-70 Steel Composite Plates	451
R. Varavallo, V. de Melo Moreira, V. Paes, P. Brito, J. Olivas and H.C. Pinto	
Welding Residual Stress Distribution of Quenched and Tempered and Thermomechanically Hot Rolled High Strength Steels	457
T. Schaupp, D. Schröpfer, A. Kromm and T. Kannengiesser	
Influence of Beam Speed on Residual Stresses in the Vicinity of Laser Welds	463
N. Ganev, K. Kolařík, Z. Pala, S. Němeček and J. Čapek	
Evaluation of Weld Filler Alloying Concepts for Residual Stress Engineering by Means of Neutron and X-Ray Diffraction	469
A. Kromm	
Influence of Heat Control on Welding Stresses in Multilayer-Component Welds of High-Strength Steel S960QL	475
D. Schröpfer, T. Kannengiesser and A. Kromm	
Investigating the Effects of Process Variables on the Residual Stresses of Weld and Laser Cladding	481
G. Schnier, J. Wood and A. Galloway	
Residual Stresses in Multi-Pass Butt-Welded Tubular Joints	488
N. Hempel, T. Nitschke-Pagel and K. Dilger	
Microstructure and Residual Stress Analysis of Explosion Cladded Inconel 625 and ASME SA516-70 Carbon Steel Bimetal Plates	494
R. Varavallo, V. de Melo Moreira, V. Paes, P. Brito, J. Olivas and H.C. Pinto	
Residual Stresses of Explosion Cladded Composite Plates of ZERON 100 Superduplex Stainless Steel and ASTM SA516-70 Carbon Steel	500
R. Varavallo, V. de Melo Moreira, V. Paes, P. Brito, J. Olivas and H.C. Pinto	

Influence of Welding Defects on Residual Stresses: Numerical Study	506
I. Frih, P.A. Adragna and G. Montay	
The Influence of Austenite Grain Size during Welding Simulations of Ferritic Steels	512
C.J. Hamelin, O. Muránsky and L. Edwards	
Welding Simulation Used in the Design of Metallic Armor Systems	518
L. Fredette and E. Beach	

II.2. Heat Treatment and Phase Transformation

Investigation of Triaxial Stress State in Retained Austenite during Quenching of a Low Alloy Steel by <i>In Situ</i> X-Ray Diffraction	525
J. Epp	
Analysis of Quenching and Stretching Processes of Aluminum Alloy Thick Plates	532
H. Gong, Y.X. Wu, Z.P. Yang and K. Liao	
Residual Stress Distribution Caused by Laser Hardening and Conventional Quenching in Plain Carbon Steel	538
A. Filep, M. Benke, V. Mertinger and G. Buza	
Evolution of Residual Stresses during Short Time Nitriding of 33CrMoV12-9 Steel Grade	544
G. Fallot, S. Jegou and L. Barrallier	
Investigations of Residual Stress Distributions in Retained Austenite and Martensite after Carbonitriding of a Low Alloy Steel	550
R.J. Katemi, J. Epp, F. Hoffmann and M. Steinbacher	
Estimation of Cross-Sectional Residual Stress Distributionon Hardened Layer of Carburized Chromium-Molybdenum Steel by Electron Backscattering Diffraction Method	556
Y. Sakaida, T. Inayama and S. Yashiro	
Effect of Preloading on Local Residual Stresses Induced by Laser Surface Hardening of Steel	562
V. Kostov, J. Gibmeier, K. Lichtenberg and A. Wanner	
Microstructure and Residual Stresses of Laser Structured Surfaces	568
J. Preußner, S. Oeser, W. Pfeiffer, A. Temmler and E. Willenborg	
Analysis of Thermal Effect on Residual Stresses of Broached Inconel 718	574
Z. Chen, R.L. Peng, P. Avdovic, J. Moverare, F. Karlsson, J.M. Zhou and S. Johansson	
Study of Residual Stresses in Bimetallic Work Rolls	580
I. Neira Torres, G. Gilles, J. Tchoufang Tchuindjang, J. Lecomte-Beckers, M. Sinnaeve and A.M. Habraken	
Analysis of Residual Stress in Stress Harps of Grey Iron by Experiment and Simulation	586
P. Schmidt, L.P. Ru, V. Davydov, M. Lundberg, M. Ahmad, T. Vuoristo, D. Bäckström and S. Johansson	
Residual Stresses of the As-Cast Mg-xCa Alloys with Hot Sprues by Neutron Diffraction	592
J.F. Song, Y.D. Huang, K.U. Kainer, W.M. Gan and N. Hort	

II.3. Machining and Cold Work

Local Global Method for the Prediction of Surface Residual Stresses in 3D Turning	598
F. Valiorgue, M. Girinon, E. Feulvarch, J. Rech and P. Gilles	
Effect of Built-Up Edge Formation on Residual Stresses Induced by Dry Cutting of Normalized Steel	603
J. Kümmel, J. Gibmeier, V. Schulze and A. Wanner	
Influence of Vibration and Heat Treatment on Residual Stress of a Machined 12%Cr-Steel	609
L.P. Ru, J. Moverare, P. Avdovic, A. Billenius and Z. Chen	
Measurement of Pre-Self-Balanced Surface Residual Stresses Induced by Milling in Titanium Alloys and the FEM Validation	615
L.H. Meng, N. He, L. Li, Y.F. Yang and W. Zhao	
Modelling Machining-Induced Residual Stresses after Laser-Assisted Turning of Steels	622
M.N.A. Nasr, M. Balbaa and H. Elgamal	
Numerical Assessment of Residual Stress Induced by Machining of Aluminum Alloy	628
N. Ben Moussa, Z. Al-Adel, H. Sidhom and C. Braham	
Predicting the Effects of Grain Size on Machining-Induced Residual Stresses in Steels	634
M.N.A. Nasr	

Prediction and Measurement of Machining Distortion in Aluminium Alloy 7085	640
Z. Zheng, L. Li, Y.F. Yang, N. He and W. Zhao	
Real Structure of Milled Inconel 738LC Turbine Blades	646
Z. Pala, K. Kolařík, L. Beranek, J. Čapek, J. Kyncl, R. Mušálek and N. Ganev	
Residual Stresses in Different Heat Treated Workpieces after Turning	652
M. Lebsanft, M. Tiffe, A. Zabel, W. Zinn, D. Biermann and B. Scholtes	
Residual Stresses Induced by Dry and Cryogenic Cooling during Machining of AZ31B Magnesium Alloy	658
J.C. Outeiro, A.C. Batista and M.J. Marques	
Residual Stress Evolution during the Manufacturing Process of Bearing Rings	664
D. Cseh, M. Benke, V. Mertinger and Á. Czibik	
Characterisation of Residual Stress due to Fillet Rolling on Bolts Made of a Nickel Base Superalloy	670
W. Li, S.Y. Zhang, S. Kabra, A. Tremsin, B. Abbey, H. Kirkwood, D. Terret, S. Ndoye and E.T. McDevitt	
Effect of Different Manufacturing Process Steps on the Final Residual Stress Depth Profile along the Process Chain of Autofrettaged Thick-Walled-Cylinders	676
H. Brünnet, M. Hofmann, N. Lyubenova and D. Bähre	
Effect of Thermal Residual Stresses on Bonded Structures Containing Cold Expanded and Bolted Holes	682
A.K. Syed, M.E. Fitzpatrick and J.E. Moffatt	
Modification of Stress and Texture Distributions in Asymmetrically Rolled Titanium	688
M. Wronski, K. Wierzbanowski, A. Baczmáński, S. Wroński, B. Bacroix, M. Wróbel and A. Lodini	
High Pressure Interpass Rolling of Wire + Arc Additively Manufactured Titanium Components	694
P.A. Colegrove, F. Martina, M.J. Roy, B.A. Szost, S. Terzi, S.W. Williams, P.J. Withers and D. Jarvis	
The Role of Residual Elastic Stress in Shrinkage of Cold-Pressed and Sintered Fuel Tablets	701
Y. Perlovich, M. Isaenkova, O. Krymskaya, V. Baranov, M. Perlovich and A. Tenishev	
Modeling of Stress and Strain Fields Induced during the Smart-Cut Process on Silicone - Influence of Different Couplings for Diffusion of Hydrogen at a Microscopic Scale	707
Y.C. Zhao, C. Labergère, B. Panicaud, J.L. Grosseau-Poussard and P. Goudeau	

Chapter III. Materials and Structures

III.1. Fatigue and Fracture

Effect of Surface Properties on the Fatigue Life of Manufactured Parts: Experimental Analysis and Multi-Axial Criteria	715
H. Sidhom, N. Ben Moussa, B. Ben Fathallah, N. Sidhom and C. Braham	
The Concept of Local Fatigue Strength Extended by Statistical Approaches to Assess Manufacturing Influences such as Residual Stresses	722
K. Buchhöcker, V. Schulze, J. Hoffmeister, M. Bacher-Höchst and E. Herz	
Stress Relaxation in Shot-Peened Geometric Features Subjected to Fatigue: Experiments and Modelling	729
M. Achinthia, C. You, B.Y. He, K. Soady and P. Reed	
Effect of Ultrasonic Impact Treatment (UIT) on Fatigue Strength of Welded Joints	736
T. Suzuki, T. Okawa, H. Shimanuki, T. Nose, N. Ohta, H. Suzuki and A. Morai	
Prediction of Cyclic Residual Stress Relaxation by Modeling Approach	743
N. Ben Moussa, N. Sidhom and C. Braham	
Residual Stress Gradients in AISI 9254 Steel Springs Submitted to Shot Peening and Heat Treatment for Increased Fatigue Resistance	749
L. Vilela Costa, J.R. Gonçalves Carneiro, R. Pinto Coelho Catalão, O.K. Ribas and P. Brito	
Residual Stresses in Ultrasonically Peened Fillet Welded Joints	755
B. Ahmad and M.E. Fitzpatrick	
Understanding the Mechanisms Responsible for the Beneficial Effect of Hammer Peening in Welded Structure under Fatigue Loading	761
F. Lefebvre, C. Revilla-Gomez, J.Y. Buffière, C. Verdu and C. Peyrac	

Influence of Tempering Conditions on Shot-Peened Tool Steel Components In-Depth Residual Stress Profiles		
D. Cecchin, E. Kobza, M. Cazzolli, C.L. Azanza Ricardo, M. D'Incau, M. Bandini and P. Scardi	769	
Fatigue Crack Growth in Laser Shock Peened Thin Metallic Panels		
E. Troiani, S. Taddia, I. Meneghin and G. Molinari	775	
X-Ray Diffraction Residual Stress Measurements for Assessment of Rolling Contact Fatigue Behaviour of Railway Steels		
A.C. Batista, J.P. Nobre, D.F.C. Peixoto, L.A.A. Ferreira, P.M.S.T. de Castro and L. Coelho	782	
Numerical Investigation of Welding Residual Stress Field and its Behaviour under Multiaxial Loading in Tubular Joints		
K. Hemmesi, M. Farajian and D. Siegele	788	
Effects of Fatigue on the Integrity of a Friction Stir Welded Lap Joint Containing Residual Stresses		
M. Bach, A. Merati and M. Gharghouri	794	
On Welding Residual Stresses Near Fatigue Crack Tips		
J. Hensel, T. Nitschke-Pagel and K. Dilger	801	
Process Induced Residual Stress Effect on Fatigue Lifetime of Automotive Steel Components		
E. Merhy, N.T. Niane, B. Weber and P. Bristiel	808	
Residual Stresses in Large Scale Structures Welded at Low Ambient Temperatures		
J. Klassen, T. Nitschke-Pagel and K. Dilger	814	
The Effect of Specimen Dimension on Residual Stress Relaxation of the Weldments		
Z.Y. Qian, S. Chumbley and E. Johnson	820	
Determination of the Possible Causes of Cracks in Pins of Quick Operating Valves in Hydroelectric Power Plant		
P. Šarga, F. Trebuňa, F. Šimčák and J. Bocko	827	

III.2. Films, Coatings and Oxides

On-Chip MEMS-Based Internal Stress Actuated Structures for the Mechanical Testing of Freestanding Thin Film Materials		
R. Vayrette, M. Coulombier, T. Pardoen and J.P. Raskin	833	
Influence of Xe Ion-Bombardment on the Substrate Microstructure and the Residual Stresses of Tin Coatings Deposited by Plasma Reactive Sputtering onto AISI 4140 Steel		
T.H.C. Miranda, S. Vales, E.O. Becerra, R. Droppa, P. Brito, J.L. Garcia, F. Alvarez and H. Pinto	841	
Investigations on Thermal Stresses of a Graded Ti(C,N) Coating Deposited on WC-Co Hardmetal		
E. Ramos-Moore, C. Espinoza, R.S. Coelho, H. Pinto, P. Brito, F. Soldera, F. Mücklich and J.L. Garcia	848	
Microstructure, Stress and Texture in Sputter Deposited TiN Thin Films: Effect of Substrate Bias		
J. Chakraborty, T. Maity, K. Kumar and S. Mukherjee	855	
Phase Transformation in Ultra-Thin Films		
J. Chakraborty	860	
Relaxation of Residual Stresses in Brush-Plated Gold and Silver Coatings on Copper and on Brass Substrates		
H. Lille, J. Kõo, A. Ryabchikov, R. Reitsnik, F. Sergejev and M.J. Dong	866	
Stress Development and Adhesion in Hydrogenated Nano-Columnar Pd and Pd/Ti Ultra-Thin Films		
N. Verma and A.J. Böttger	872	
Time-Resolved X-Ray Stress Analysis in Multilayered Thin Films during Continuous Loading: Use of 2D Remote Detection		
R. Guillou, P. Renault, E. Le Bourhis, P. Goudeau, P. Godard, G. Geandier, D. Faurie, D. Thiaudière and C. Mocuta	878	
Structure-Mechanical Property Relationship in Hot-Dip Galvanized S355k2+N Steel Plates		
W.T. Ajimi, D. Retraint and G. Montay	884	

Determination of Residual Stress Fields in a Thermally Grown Oxide under Thermal Cycling Loadings, Using XRD and Raman Spectroscopy — Correlations with Microstructural States	
F. Rakotovao, Z.J. Tao, J.L. Grosseau-Poussard, B. Panicaud, G. Bonnet, P. Girault and M. Guerain	890
Determination of Stress Fields and Identification of Thermomechanical Parameters in a Thermally Grown Oxide under Thermal Cycling Loadings, Using Advanced Models	
Z.J. Tao, F. Rakotovao, J.L. Grosseau-Poussard and B. Panicaud	896
Influence of Interlayer Macrostress on Oxidation of Shell Tubes from Zr-Based Alloys	
M. Isaenkova, Y. Perlovich, P. Medvedev, O. Krymskaya and S.S. Thu	902
Influence of Surface Mechanical Attrition Treatment (SMAT) on Oxidation Behavior of 316L Stainless Steel at 650°C	
S. Benafia, D. Retraint, B. Panicaud and J.L. Grosseau-Poussard	906
Influence of the Residual Stresses Induced by Shot-Peening on the Oxidation of Zr Plates	
V. Optasanu, P. Jacquinot and T. Montesin	912
Residual Stress Study in Oxide Scale Obtained on High Temperature Oxidation of AISI 430 Stainless Steel	
N. Li, J. Xiao, N. Prud'homme and V. Ji	918
Microstresses in ZrO₂ Layer and Lateral Cracking	
C. Berdin, Y. Tang and S. Pascal	924
Microstrain and Residual Stress in Thin-Films Made from Silver Nanoparticles Deposited by Inkjet-Printing Technology	
R. Cauchois, A. Borbely, P. Gergaud, M. Saadaoui and K. Inal	930

III.3. Composites and Nano/Micro Structures

Microstructural Evolution and Strain Development in Metal Matrix Composites	
G. Geandier, L. Vautrot, M. Salib, M. Mourot, M. Dehmas, B. Denand, E. Aeby-Gautier and S. Denis	936
Internal Stresses in Metal Matrix Composites in Relation with Matrix Phase Transformations	
L. Vautrot, G. Geandier, M. Mourot, M. Dehmas, E. Aeby-Gautier, B. Denand and S. Denis	944
Residual Stress Evaluation of Short-Fiber Reinforced Plastics by X-Ray Diffraction	
K. Tanaka, Y. Koike and Y. Akiniwa	951
Influence of Hydrothermal Ageing on the Residual Stresses and Mechanical Behavior of Carbon/Epoxy Composite Laminates	
Z.M. Wen and X.L. Gong	958
Comparison between Conventional Shot Peening (SP) and Surface Mechanical Attrition Treatment (SMAT) on a Titanium Alloy	
D. Gallitelli, D. Retraint and E. Rouhaud	964
Non-Destructive Residual Stress Investigations of Natural Polycrystalline Diamonds	
A.M. Venter, V. Luzin, M.A.G. Andreoli, S. Piazolo and T. Moipolai	969
Investigation of TSV Induced Thermo-Mechanical Stress: Implementation of Piezoresistive Sensors and Correlation with Simulation	
K.A. Ewuame, V. Fiori, K. Inal, P. Bouchard, S. Gallois-Garreignot, S. Lioni, C. Tavernier and H. Jaouen	975
