

# Table of Contents

## Preface

## Chapter 1: Restoration of Architectural and Structural Elements from Wood and Timber

<b>Considering the Role of Wood and Timber Roof in Persepolis Architecture</b> A. Davoodi and A. Davoodi	3
<b>Non-Destructive and Minimal-Invasive Status Determination and Heritage Friendly Remediation of the Wooden Structures of Bothmer Castle</b> G. Haroske, U. Diederichs and V. Petranek	11
<b>Failures of the Listed Wooden Buildings in Istanbul</b> A.O. Kuruscu and G. Arun	18
<b>Wooden Boards Arches Roofs in Late Nineteenth-Century Industrial Architecture: Conservation Problems</b> M. Mattone	26
<b>Wooden Buildings by the Fire Damaged of Toxic Gases on Personnel Evacuation Influences</b> C.S. Lin, C.C. Yu, T.C. Chen, S.C. Wang and L.Y. Shen	33
<b>Thermal Degradation of a Wood Painting Support from XIXth Century</b> R.A. Cristache, A.V. Sandu, V. Vasilache and I. Sandu	40
<b>Selected Solutions for Rehabilitation of Wooden Structures: Some Portuguese Case Studies</b> A.O. Feio, D. Félix, V.M. Cunha and J.S. Machado	45
<b>Recommendations for Design in Preserving Historical Buildings with Wooden Structures' Roofs</b> Á. do Valle, N. Biscaglia Pereira and S. Castello Branco Nappi	53
<b>Evaluation of Health Conditions of Wooden Structures of the Former Slave Quarters of Farm Santa Maria do Monjolinho, Located in the State of São Paulo, Brazil</b> A.F. Campos, L.B. de Macedo, M.â.P. de Castroe Silva Bortolucci and F.A. Rocco Lahr	61
<b>The Influence of Biological Factors on the Health of Timber Structures on 11<sup>th</sup> to 14<sup>th</sup> Century AD in Yazd</b> S.R. Moghaddam, S. Poormohamadi, M. Saffar and F. Esfahanipour	67
<b>Review of Timber Structure Reinforcement Research for the Huizhou Ancient Architecture</b> X.Y. Xiong and Z.Y. Su	74
<b>Bending Test on Composite Timber-Steel-Concrete Floor Equipped with Innovative Collar Connectors</b> A. Marzo, M.R. Grippa, B. Faggiano and F.M. Mazzolani	79
<b>Complex Covering Timber Structures in Monumental Buildings: A Study Case</b> M.R. Grippa, A. Marzo, B. Faggiano and F.M. Mazzolani	85
<b>Rehabilitation of Timber Structures and Seismic Vulnerability: A Case Study</b> M.A. Parisi, M. Riggio, C. Tardini and M. Piazza	91
<b>The Royal Palace of Naples: Diagnosis, Assessment and Structural Restoration of Complex Roofing Timber Structures</b> B. Faggiano, M.R. Grippa and F.M. Mazzolani	97
<b>Learning from Case Studies: Timber Tower of Gospić Cathedral and Traditional Timber Church</b> M. Stepinac, V. Rajčić and D. Čizmar	106
<b>The Ancient Reinforced Beams as Model of Consolidation an Example in the Palazzo Pallavicino in Cremona (Italy)</b> A. Grimoldi	114
<b>In Situ Non-Destructive Examination of Timber Elements</b> J. Pošta, J. Dolejs and L. Vitek	119

## Chapter 2: Conventional and Unconventional Materials in the Practice of Restoration

<b>The Utilization of Waste Aluminosilicate to Prepare Cement Composite with Thermal Insulating and Drying Effect</b>	
A. Brenek, V. Vaclavik, J. Valíček, T. Dvorsky, J. Daxner, M. Bendová and V. Šimíček	129
<b>Bacterial Induced Cementation Processes and Mycelium Panel Growth from Agricultural Waste</b>	
E. Mayoral González and I. González Diez	135
<b>Chemical and Physical Processes in the Synthesis of Romancement from Clay and Dolomite</b>	
I. Kirilovica, L. Krage, I. Vitina and S. Igaune-Blumberga	143
<b>Influence of Ox Blood on Water Absorption of and Chloride Penetration into Concrete</b>	
J.G. Xu, T.J. Zhao, P. Zhang and R. Jiang	147
<b>Research on Paste-Like Impregnation Coatings for Protecting Concrete</b>	
W.J. Gu, Z.Y. Cheng, Y. Li and J.K. Liu	152
<b>Restoration of Historic Concrete Structures with Modern Materials - A Case Study</b>	
A. Gypser, A. Flohr and A. Osburg	157
<b>The Use of Composites in Architectural Restoration: Some Critical Considerations on the Theoretical Implications</b>	
E. Coisson and F. Ottoni	165
<b>Structural Performance of Old Composite Floors Made up of Wrought Iron Joists and Masonry Vaults</b>	
N. Gattesco and L. Macorini	173
<b>Analysis of Different Building Materials Used in Heritage Protected Areas in North China</b>	
X.Y. Zhang, Y.Q. Sun, X. Lan and J.M. Bai	185
<b>Development of Thermal Insulation, Capillary Active Plasters Suitable for Historical Buildings</b>	
J. Hroudová, J. Zach and M. Sedlmajer	192
<b>On Thermo-Hydro-Mechanical (THM) Fatigue Damage of Historical Stone Buildings</b>	
D. Hoxha, N. Belayachi and D.P. Do	196
<b>Hydrophobized Lime Plasters as Protective Surface in Wet Rooms in Monument Preservation</b>	
B. Wolff	202
<b>Hygrothermal Behaviour of Newly Developed Thermal Insulation Plasters with Natural Fibres</b>	
J. Hroudová, M. Sedlmajer and J. Zach	212
<b>Analysis of Suitability of Mortar Used for Reconstruction</b>	
R. Pernicová and D. Dobiáš	218
<b>Effect of Freeze/Thaw Cycles on the Physical Properties of Selected Building Stones</b>	
Z. Pavlík, J. Fořt, M. Pavlíková, J. Žumár and R. Černý	222
<b>Brick as a Construction Material in the Modernization Process of the Ottoman Architecture</b>	
A. Çiftçi and U. Yergün	228
<b>Research on the Stability of the Paste-Like Silicone Impregnant</b>	
W.J. Gu, Y. Li and J.K. Liu	234
<b>Phase and Microstructural Characterization of Lime-MK Blended Mixes</b>	
A. Gameiro, A.S. Silva, R. Veiga and A. Velosa	238
<b>Experimental Analysis of Different Kinds of Sandstone for Reconstruction of Historical Masonry</b>	
Z. Pavlík, J. Fořt, M. Pavlíková and R. Černý	244
<b>Innovative Lime-Pozzolana Renders for Reconstruction of Historical Buildings</b>	
E. Vejmelková, P. Máca, P. Konvalinka and R. Černý	248
<b>The Effect of Salt Solutions in the Capillarity Absorption Coefficient of Red Brick Samples</b>	
A.S. Guimarães, J.M.P.Q. Delgado, T. Rego and V.P. de Freitas	252
<b>Increase Water Resistance Decorative Coatings on the Basis of Calcareous Dry Building Mixtures</b>	
V. Loganina, L.V. Makarova, R.V. Tarasov and K.A. Sergeeva	257

<b>Impact Depth on Glass Surface Caused by Sand Particles</b> S. Bouzid and Z. Azari	260
<b>Hardened Properties of Lime Based Mortars Produced from Kaolin Wastes</b> A.F.N. de Azerêdo, A.M.P. Carneiro, G.A. de Azeredo and M. Sardela	276
<b>New Type of Lime Plaster with Pozzolana Admixture for Renewal of Historical Buildings</b> Z. Pavlík, M. Pavlíková, J. Maděra and R. Černý	291
<b>Stone Monuments Consolidation with Nanomaterials</b> R.M. Ion, R.C. Fierăscu, I. Fierăscu, I.R. Bunghez, M.L. Ion, D. Caruțiu-Turcanu, S. Teodorescu and V. Rădițoiu	295
<b>Characterization of Building Stones Involved in Historical Masonry</b> Z. Pavlík, E. Vejmelková, M. Pavlíková, M. Keppert and R. Černý	301
<b>Destruction of Monuments' Materials by Organic Acids – Micromycetes Metabolites</b> D. Shlychkova, S. Starsev and D. Vlasov	305
<b>The Experimental Study on Consolidation of RTV for Wet-Area Earthen Ruins in Southwest China</b> Y. Wu	312
<b>Differences in the Properties of Arenaceous Marlstones from Different Quarries</b> E. Vejmelková, M. Čáchová, D. Koňáková, M. Keppert, P. Reiterman and R. Černý	316
<b>Simulation and Measurement of Hygrothermal Behaviour of Newly Developed Plasters</b> J. Hroudová, M. Sedlmajer, V. Novák and J. Zach	321
<b>Retrofitting Effect of Unreinforced Masonry Walls Using FRPs</b> B.I. Bae, B.K. Park, H.K. Choi and C.S. Choi	329
<b>Bond Behavior of Standard and Reinforced Anchorage between CFRP Sheet and Natural Calcareous Stone</b> L. Anania, A. Badalà and G. D'Agata	333
<b>On Problems of Mechanical Properties of Structural Steel in Load-Carrying Structure of Historical Building Construction</b> M. Karmazínová and J. Melcher	341
<b>Lime-Based Materials and Practices for Surface Refitting of Cultural Heritage</b> S.B. Dai, J.H. Wang, Y. Hu and D.B. Zhang	347
<b>Remediation of Historic Buildings and Patrimony by Bacterially Induced Mineralization</b> P.H. Li and W.J. Qu	353
<b>Air Lime Mortars: The Influence of Calcareous Aggregate and Filler Addition</b> A. Fragata and R. Veiga	359
<b>Application of Chemicals in the Restoration of Monuments</b> W.Z. Huang	365
<b>Recycled-Aggregate Bedding Mortars for Repair of Historical Buildings</b> V. Corinaldesi	369
<b>An Experimental Study of Pig Blood–Lime Mortar Used on Ancient Architecture in China</b> P. Zhao, D.Q. Xie, G.Y. Li and Y.S. Zhang	377
<b>Application of Silicone TQ Resin Reinforced RTV Silicone Rubber in Architecture</b> Y. Li, W.J. Gu and D.Y. Yang	381
<b>Composition Identification of Typical Decorative Textiles in Tibetan Historical Buildings by Burning Test and Projection Microscope Test</b> F. You, F. Yang and M. Ren	386

### **Chapter 3: Problems of Rising Damp, Moisture and Salt Erosion**

<b>The Rising Damp in Cultural Heritage: From Physical and Numerical Analyse to Practical Application</b> J.M.P.Q. Delgado, A.S. Guimarães and V.P. de Freitas	393
<b>Degradation Control of Walls with Rising Damp Problems</b> A.S. Guimarães, J.M.P.Q. Delgado and V.P. de Freitas	442
<b>Characterization of a Hygro-Regulated Wall Base Ventilation System for Treatment of Rising Damp</b> A.S. Guimarães, J.M.P.Q. Delgado and V.P. de Freitas	448
<b>Rising Damp: Optimization of the Wall Base Ventilation System</b> A.S. Guimarães, J.M.P.Q. Delgado and V.P. de Freitas	454

<b>The Effect of Shading Devices in Rising Damp Phenomenon of Historical Buildings</b> J.M.P.Q. Delgado, A.S. Guimarães and V.P. de Freitas	460
<b>Numerical Simulation of Rising Damp Phenomenon</b> A.S. Guimarães, J.M.P.Q. Delgado and V.P. de Freitas	466
<b>The Influence of some Physical Variables in the Capillarity Rise of Different Monolithic Walls</b> J.M.P.Q. Delgado, A.S. Guimarães and V.P. de Freitas	472
<b>Experimental Determination of Innovative Plaster Moisture Expansion</b> J. Lukovičová, G. Pavlendová and S. Unčík	478
<b>Storage Properties of Water-Soluble Salts in Bastion Historical Brick</b> R. Pernicová	482
<b>Determination of Salt Transport Properties of Sandstone: A Combined Experimental/Computational Approach</b> Z. Pavlík, M. Pavlíková and R. Černý	486
<b>A Contribution to the Treatment of Salt Damage in Historical Buildings</b> I. Antepara, I. Medved', J. Žumár and R. Černý	491
<b>Non-Destructive Prospection of Ancient Steam Bathes Covered with Tadelakt — First Preliminary Comparison of Hammam Kasbah des Caids of Tamnougalt and Hammam Kasbah of Taourirt, Morocco</b> B. Wolff, U. Diederichs and H. Ait el Caid	497

## Chapter 4: Seismic Assessment and Technologies of Seismic Protection

<b>The Conservation of Earthen Architectural Heritage in Seismic Areas</b> J. Vargas Neumann	509
<b>Seismic Out-of-Plane Assessment of Podestà Palace in Mantua (Italy)</b> S. Degli Abbatì, S. Cattari, I. Marassi and S. Lagomarsino	522
<b>Distributed Structural Monitoring for a Smart City in a Seismic Area</b> V. Gattulli, F. Potenza, F. Graziosi, F. Federici, A. Colarieti and M. Faccio	531
<b>Finite Element Analyses of Aghjots Monastery Taking into Account Seismic Action</b> L. Karapetyan	544
<b>An Innovative Approach to Assess Seismic Safety of Historical Centres</b> I. Vanzi, S. Biondi, N. Cataldo and C. Sulpizio	549
<b>The Seismic Assessment of the Curia in the Roman Forum through Simplified Models</b> S. Podestà and S. Parodi	558
<b>Behavior of the Leaning Tower of Pisa: Insights on Seismic Input and Soil-Structure Interaction</b> R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta, F. Sabetta and N. Squeglia	564
<b>Dynamic Parameters of Pultruded GFRP Structures for Seismic Protection of Historical Building Heritage</b> G. Boscato and S. Russo	573
<b>Seismic Safety Assessment of the “Tekyeh Amir Chakhmagh” by Simplified Kinematic Limit Analysis</b> S.R. Pashanejati and C. Molins	582
<b>Seismic Assessment of the Superstructure of the Naghareh Khaneh Edifice after Base Isolation by Simplified Kinematic Limit Analysis</b> M. Golabchi, P. Homami and S.R. Pashanejati	588
<b>Seismic Assessment of Monastery of Stoudios (Imrahor Mosque) in Istanbul</b> B. Kucukdogan, J. Kubin and A.I. Unay	594
<b>The Intervention of Earthen Heritage in Seismic Areas and the Conservation Charters</b> J. Vargas Neumann, M. Blondet and C. Iwaki	600
<b>Seismic Analysis for the Structural Retrofit of “Palazzo della Civiltà Italiana” in Rome EUR, Italy</b> T. Trombetti, C. Ceccoli, G. Gasparini and S. Silvestri	608
<b>Seismic Vulnerability of Historical Structures: Damage State of the Abruzzo (Italy) Churches in the Sequence of the April 2009 Earthquake</b> B. Silva, C.Q. Costa, F. Da Porto, M.R. Valluzzi and C. Modena	614

<b>Investigation on Seismic Properties of Load-Bearing Masonry Walls in Chinese Historical Buildings</b>	
B. Peng, W.D. Liu and W.B. Yang	620
<b>Seismic Assessment of a Historical Masonry Building</b>	
C.H. Huang, S.H. Yin and S. Chou	625
<b>Design of the Seismic Upgrading of the Tambour of the S. Nicolò's Church in Catania with the DIS-CAM System</b>	
M. Di Croce, F.C. Ponzio and M. Dolce	629
<b>Performance-Based Seismic Evaluation of Historical Buildings</b>	
W. Cui, W.P. Zhang and X.L. Gu	635
<b>System Based Seismic Strengthening Design Analysis for a Historic Building</b>	
L. Wang, Y.P. Peng, X.L. Gu, W. Cui and W.P. Zhang	641
<b>Temporary Preventive Seismic Reinforcements on Historic Churches: Numerical Modeling of San Frediano in Pisa</b>	
A. de Falco, L. Giresini and M. Sassu	647
<b>Cultural Heritage Buildings and the Abruzzo Earthquake: Performance and Post-Earthquake Actions</b>	
C. Modena, F. Da Porto, C. Filippo, M. Munari and E. Simonato	651
<b>Collapse Mechanisms due to Earthquake in the Structural Typologies of Historic Constructions: The Case of Mirandola</b>	
G. Boscato, A. Dal Cin and S. Russo	666
<b>Mechanical and Mineralogical Characterization of Mortar in Masonry Buildings Damaged by the 20-29<sup>th</sup> May Earthquake in Emilia</b>	
E. Galli, M. Savoia, C. Colla and D. Ferretti	673
<b>Adobe and Effect of Earthquake on Adobe Structure</b>	
M. Najinassajfar and A. Vahidi	681
<b>The S. Marco Church in L'Aquila: Provisional Interventions after the 2009 Abruzzo Earthquake</b>	
M. Carraro, T. Ghedina, A. De Sabbata, C. Modena, F. Casarin and D.M. Benetta	685
<b>Damage Assessment of Historic Buildings Hit by Earthquake</b>	
G. Boscato and A. Dal Cin	691
<b>Anime Sante Church's Dome After 2009 L'Aquila Earthquake, Monitoring and Strengthening Approaches</b>	
G. Boscato, D. Rocchi and S. Russo	698
<b>Numerical Analysis of Rigid Body Behaviour</b>	
A. Gesualdo, A. Iannuzzo, M.T. Guadagnuolo, A. Guerriero, M. Monaco and M.T. Savino	717
<b>A Discrete Element for Modeling Masonry Vaults</b>	
I. Calì, F. Cannizzaro and M. Marletta	725
<b>First Evaluations on Structural Response of FRP Pultruded Applications Subjected to Seismic Actions</b>	
G. Boscato	731

## **Chapter 5: Modeling, Assessment, Structural Analysis and Monitoring of Elements and Objects of Historic Structures**

<b>Preventive Fire Risk Assessment of Italian Architectural Heritage: An Index Based Approach</b>	
A. Arborea, G. Mossa and G. Cucurachi	739
<b>The Crack Pattern in Brunelleschi's Dome in Florence: Damage Evolution from Historical to Modern Monitoring System Analysis</b>	
F. Ottoni, E. Coisson and C. Blasi	746
<b>Strength Performance of Unreinforced Brick Masonry Walls under Flexo-Compression Load. Analytical Methods</b>	
E. Bernat-Maso and L. Gil	758
<b>Effects in Monitoring of the Thermal Moisture Regime of Cultural Objects Located in Different Climate Conditions</b>	
Ľ. Kubičár, J. Hudec, D. Fidiriková, P. Dieška and M. Vitkovič	764

<b>A Self-Heating Approach to Characterize Anisotropy Effects in Fatigue Behaviour: Application to a Nineteenth Century Puddled Iron from a French Railway Bridge</b>	
L. Gallegos Mayorga, S. Sire, S. Calloch, S. Yang, L. Dieleman and J.L. Martin	770
<b>Numerical Modelling of Historical Masonry Structures</b>	
J. Brozovsky, M. Jašek, L. Mynarzova and M. Maluchová	777
<b>Numerical Simulation of Air Channel in Church Gemerský Jablonec</b>	
L. Tažký and A. Sedláková	783
<b>Material Testing of Natural Stones Used in Historical Buildings Based on Scanning Electron Microscopy and Nanoindentation</b>	
P. Koudelka, D. Kytýř, V. Koudelková, J. Lukeš, T. Doktor and J. Valach	787
<b>Building Vulnerability: An Interdisciplinary Concept</b>	
P. Vlamos, V. Chrissikopoulos and M. Psiha	791
<b>A Dynamic Identification of a Historical Building Using Accelerometers with Interface Modules and a Digital Synchronization Method</b>	
L. Spedicato, I. Armeni, N.I. Giannoccaro, M. Avlonitis and S. Papavlasopoulos	796
<b>Repair and Health Monitoring for Historical Structures</b>	
M.H. Maleki Tabrizi	804
<b>A Wireless Sensor Network Innovative Architecture for Ambient Vibrations Structural Monitoring</b>	
K. Oikonomou, G. Koufoudakis, E. Kavvadia and V. Chrissikopoulos	809
<b>Synchronization Issues in an Innovative Wireless Sensor Network Architecture Monitoring Ambient Vibrations in Historical Buildings</b>	
G. Koufoudakis, N. Skiadopoulos, E. Magkos and K. Oikonomou	816
<b>Hearing the Buildings: Smart Monitoring through Advanced Sonification Approaches</b>	
A. Floros, E. Vlamou and V. Chrissikopoulos	822
<b>CFD Model of an Underfloor Air Cavity Created from Special Fittings and its Verification Using a Laboratory Model</b>	
T. Renčko and A. Sedláková	828
<b>The Occurrence of Cyanobacteria and Green Algae on Facades of Historical Sacral Buildings</b>	
R. Wasserbauer, Z. Rácová, I. Loušová and M. Lecák	834
<b>Historical Analysis and Structural Monitoring Cases – Studies for an Integrated Approach</b>	
L. Balboni, P. Corradini, D. Del Curto and L. Valisi	838
<b>Numerical Analysis of Tunnelling Effects on Masonry Buildings: The Influence of Tunnel Location on Damage Assessment</b>	
G. Giardina, M.A.N. Hendriks and J.G. Rots	844
<b>Pathology of the Katholikon of Hosios Loukas Monastery and Preliminary Structural Analysis</b>	
A. Miltiadou-Fezans, E. Vintzileou and N. Delinikolas	850
<b>Measurement and Calculation of Ventilation in the Floor of the Brewery Žirovnice</b>	
J. Jurka and J. Škramlík	856
<b>Long-Term Reliability of Historical Monuments Built with Low Quality Sandstone</b>	
E. Verstrynge, L. Schueremans, D. Van Gemert and E. Bourel	860
<b>Static Monitoring and Non-Destructive Test of a Historic Damaged Palace</b>	
G. Boscato and A. Dal Cin	866
<b>Structural Strengthening of the Portico of the Santa Maria Dei Servi Church in Bologna</b>	
S. Baraccani, M. Palermo, G. Gasparini, S. Silvestri, T. Trombetti and G. Dallavalle	870
<b>Prince of Wales Fort: Structural Wall Analysis</b>	
A. Isfeld and N. Shrive	877
<b>Statistical Time Series Analysis of Crack Movements at Bayon Main Tower, Cambodia</b>	
S. Yamada, M. Araya, M. Fukuda and Y. Iwasaki	883
<b>Stability Analysis of Monument: A Case Study–Safdarjung Tomb</b>	
A. Ahmad and K. Moin	889
<b>Behavior of the Leaning Tower of Pisa: Analysis of Experimental Data from Structural Dynamic Monitoring</b>	
R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta and N. Squeglia	897
<b>Structural Analysis of the Bell Tower of the Basilica De La Merced of Lima</b>	
H.E. Torres Peceros	906

<b>Structural Analysis of the “3Ponti” of Comacchio (Ferrara, Italy)</b> M. Pizzolato, M. Monti, P. Pigozzi and A. Tralli	911
<b>Structural Assessment of the Vaulted Masonry Ice Storage Glacières Royales (1874) in Brussels</b> A. Hellebois, D. De Wolf and M. Provost	917
<b>Investigation and Analysis of the Cultural Buildings of Industry Remains in Yanbian</b> M. Wei and Z. Zheng	923
<b>Assessment Tool for Refurbishments reSBToolCZ Emphasising Cultural-Historical Buildings</b> S. Mancik and J. Růžička	929
<b>Investigating Interior Changes in Historical Building by Computational Modeling and Determination Critical Places for Structural Conservation</b> J. Souček and P. Tichá	933
<b>Introduction to Problems of Candle Combustion in Buildings</b> J. Souček	937
<b>Eye Bars - Pins Connections</b> E. Petzek, A. Butiscă and L. Toma	946
<b>Analysis on the Building Material of the Traditional Copper Hall from the Taishan Mountain, Using XRF and GIS</b> J.W. Zhang	954
<b>Examples of the Use of Non-Invasive Techniques for the Evaluation of Stone Decay in Portugal</b> A. Dionísio, E. Martinho, C. Grangeia and F. Almeida	959
<b>Preliminary Observations on the Structural Condition of a Byzantine Monument in Historic Peninsula of Istanbul: Pantokrator Church</b> U. Almaç	967
<b>Settlement Induced Damage Modelling of Historical Buildings: The Bell Tower of the “Basilica dei Frari” in Venice</b> F. Lorenzoni, M.R. Valluzzi, C. Modena, E. Simonato, F. Casarin and A. Lionello	973
<b>Investigation of the Rail-Induced Vibrations on a Masonry Historical Building</b> A. Erkal, D. Laefer, P. Fanning, E. Durukal, U. Hancilar and Y. Kaya	979
<b>Dynamic Behavior of a Historical Building</b> D. Rinaldis, P. Clemente and G. Buffarini	985
<b>Study on Relationship between Elastic Wave Profile and Stones’ Condition in Angkor Monument</b> S. Tachino, S. Yamada, S. Sakurai, M. Araya and Y. Iwasaki	991
<b>Analysis on the Western-Style Structural System of Zizhulin Church</b> Q. Liu, J. Xie and A.X. Ge	997
<b>Strengthening Proposals for the Trigonio Tower at the City Walls of Thessaloniki</b> V. Delizisi, M. Axiotidou, I.N. Doudoumis and C. Ignatakis	1003
<b>Comparison of Two Different Underfloor Ventilation Systems Using CFD</b> T. Renčko and A. Sedláková	1009
<b>Modeling Interior Environment of Historical Building and Determination of Critical Places for Application of Nanotextiles Protection</b> J. Souček and P. Tichá	1014
<b>Regional Policies for Sustainability in the Mediterranean Countries: The Role of a Proper HVAC System Maintenance in Museums</b> A. Galatioto, S. Pitruzzella, G. Scaccianoce and D. Milone	1018
<b>Preservation, Safeguard and Valorization of Masonry Decorations in the Architectural Historical Heritage of Piedmont (Italy)</b> A. Carpinteri, S. Invernizzi, G. Lacidogna and A. Manuello	1023
<b>Parametric Modeling of Typical Chinese Traditional Buildings on the Basis of 3DSMax Script</b> W. Wang and B.Y. Xie	1029
<b>Progressive Collapse Evaluation for Historic Building Structures</b> F. Lin, Y. Wang, X.L. Gu and X.Y. Zhao	1033
<b>Structural Analysis and Consolidation Strategy of the Historic Mediceo Aqueduct in Pisa (Italy)</b> M. Andreini, A. de Falco, L. Giresini and M. Sassu	1040

<b>Strategy of Research on the Application of Three-Dimensional Information about Historical Building Heritage in Cold Region</b> R. Han, J. Lv and B. Li	1044
<b>Research on the Deconstruction and Application of "Xinya Style Architecture " Based on Building Information Modeling Technology</b> R. Han, J. Lv and B. Li	1048
<b>SHM of Historic Damaged Churches</b> G. Boscato, A. Dal Cin, S. Russo and F. Sciarretta	1052
<b>Durability Research on Masonry Structures of Historical Buildings in Xi'an Beilin Museum</b> Z.P. Dong, C.X. Hou, X.G. Liu and Q.L. Wang	1060
<b>Selected Non-Destructive Methods Suitable for Evaluation of Roofing Slate</b> M. Vavro, K. Souček, T. Daněk and L. Staš	1067
<b>Hagios Gregorios Theologos Church in Cappadocia</b> B. Çelebioğlu and S. Limoncu	1075

## **Chapter 6: Technologies of Restoration and Preservation**

<b>New Resolution for Historic Building Conservation by Building Moving Technology</b> X.L. Lu, W.S. Lu and X. Zhang	1083
<b>The Complexity and the Logic Behind Historical Buildings: The Case-Study of Palazzo del Podestà in Mantova, Italy</b> M. Cofani, V. Frignani and A. Landi	1090
<b>Procedures and Techniques Used to Increase the Durability of Weak Masonries with Clay Mortars</b> D. Covatariu, M. Budescu, N. Țăranu, I. Lungu and I.O. Toma	1096
<b>Analysis of Building Stone of the Medieval Historical Building</b> M. Balintova, A. Eštoková, A. Sicakova, M. Holub and E. Singovszka	1104
<b>Surface Treatments for Historical Constructions Using Nanotechnology</b> M. Colonna, C. Gentilini, F. Praticò and F. Ubertini	1108
<b>Comparison between Methods of Biological Crust Removal on Granite</b> S. Pozo, C. Montojo, T. Rivas, A.J. López-Díaz, M.P. Fiorucci and M.E. López de Silanes	1117
<b>The Application of BIM in the Restoration of Historical Buildings</b> Y. Li, K. Dong and G.F. Li	1126
<b>Value-Based Architectural Conservation Practice as an Alternative Solution to Sustainability Problems</b> P. Praptidita Suratman and Denny	1135
<b>Differences in the Design of Underfloor Air Cavities</b> T. Renčko and A. Sedláková	1139
<b>Repairing of Damaged Stone in Monuments and Stone Buildings</b> A. Teixeira-Pinto	1145
<b>Study on the New Green Technology in Protection and Renovation of Historical Buildings' Structure</b> H.X. Yu and L. Yan	1155
<b>Restoration and Strengthening of a Historical Structure in Antalya - Turkey</b> A. Koçak and Z. Kilit	1160
<b>Historical Architectures Renovation Strategy under the Guidance of the Ecologic Concept</b> J. Zhang and Y.H. Zou	1170
<b>Historical Heritage: A Study to Conservation</b> C. Borges, A.S. Silva, R. Veiga and G. Borsoi	1177
<b>Strengthening Strategies of a Historical Masonry Construction</b> R.S. Olivito, A. Tedesco, R. Codispoti and G. Spadea	1184
<b>Efficiency of CFRP Strengthening of Arches Tested by Failure of Historical Building after the Inappropriate Repair Intervention</b> K. Flaga and A. Kwiecień	1192
<b>The Building Decorative Material Renewal Design Based on the "3R" Principles - Taking Pingjiang Historical Street of Suzhou as an Example</b> X. Cheng, R. Han and Z. Zhu	1198

<b>The Influence of Faulty 19<sup>th</sup> Century Technical Solutions on a Work of 18<sup>th</sup> Century Rafter Framing as Exemplified by Church in Nowy Kościół in Lower-Silesia, Poland - Case Study</b> K. Ałykow and M. Napiórkowska-Ałykow	1202
<b>Retrofitting and Strengthening Design for the Former Yihe Spinner Factory in Shanghai</b> Y. Ouyang and Y. Yi	1210
<b>Restoration of the Chapel of Padre Faria in Ouro Preto, MG - Brazil</b> M.R.O. De Marco and B.T. De Oliveira	1215
<b>Second World War Damages of the Architectural Heritage: St. Maria Del Popolo Agli Incurabili Church in Naples</b> V. Russo, G.P. Lignola, E. Vassallo and A. Zinno	1220
<b>Restoration of the Tsar-Bell Pedestal in the Moscow Kremlin</b> A. Shilin, M. Zaitsev, A. Kirilenko and L. Fabijansky	1226
<b>Protecting the Tangible and Intangible Heritage of Rani ki Vav: A Unique Subterranean Step Well in Gujarat</b> T.L. Priya	1231
<b>The Digital Protection of Minority Architectural Culture Heritage</b> J. Song and H.M. Huang	1239
<b>The Appropriate Fire Prevention Technology for Historic Buildings</b> I.J. Wen and M.J. Lee	1242
<b>Damaged and Healthy Ignimbrites from the Surroundings of Morelia, Mexico; Uses for Restoration of the Colonial Inheritance</b> W. Martínez-Molina, E.M. Alonso Guzmán, H.L. Chávez-García, J.C. Arteaga-Arcos, A.A. Torres-Acosta, C.L. Gómez, J.A. Bedolla-Arroyo and F.A. Velasco-Ávalos	1248
<b>Strengthening of Historical Masonry Buildings with Fiber Reinforced Polymers (FRP)</b> A. Kheyroddin, M.H. Saghaei and S. Safakhah	1255
<b>Stabilization and Strengthening the Foundation of the Two Entrance Gates of the Holy Shrine of Imam Reza (PBUH)</b> P. Homami and M. Golabchi	1263
<b>Role of the Geologists in the Process of Monuments Ashlar Masonry Repair</b> K. Kovářová, J. Schröfel and S. Chamra	1269

## **Chapter 7: Technologies of Reconstruction, Conversion and Retrofitting**

<b>Conversion of Industrial Hall Buildings</b> M. Peřínková, M. Twrdá and L. Kolarčíková	1279
<b>Preservation, Reconstruction or Conversion - Contemporary Challenge for Historic Urban Areas and Historic Buildings</b> T. Bradecki and B. Uherek-Bradecka	1283
<b>Reconstruction of Courtyards in Historical Buildings of Saint-Petersburg – Ways to Improve Quality of Interior Space</b> V. Murgul	1290
